SANTA CRUZ ISLANDS: A group in Melanesia, lying southeast of the Solomon Islands and north of the New Hebrides, between longitude 165° and 170° east, and latitude 8° and 12° south. Santa Cruz is the largest island. The Melanesian Mission has worked on these islands since 1870, and now (1900) has 2 male missionaries, 1 female missionary, 16 native workers, 11 in native churches, 5 day schools. It will be remembered that Bishop Patteson was murdered on one of these islands in 1871. The Melanesian Mission lost 4 of its agents (1 missionary and 3 teachers, murdered by the natives) before it was able to effect a lodgment in this group.

SANTA MARIA: A town in Brazil, in the state of Rio Grande do Sul, about 180 miles W. of Porto Alegre. Station of the American Church Missionary Society (1900), with (1901) 2 missionaries, one of them with his wife; 1 native worker, 1 place of worship, 2 Sunday schools, and 5 professed Christians.

SANTALIA: A name sometimes applied to that portion of Bengal, India, which is inhabited by Santals, who speak a distinct language called Santali. It is in the main coincident with the district known as the Santal Parganas. It is the field of a number of the principal missionary societies, both European and American.

SANTALS: A people of British India, a remnant of the pre-Hindu Kolarian population, and numbering 190,000 in 1871, 232,048 in 1878, and 23,000 in Assam. Santalalia, or the land of the Santals, lies on the extreme eastern edge of the tableland of Eastern India, where it slopes down into the Ganges valley of lower Bengal, extending southward from the Ganges at Bhagalpur. This is the home of two distinctaboriginal tribes. The Paharis, of Dravidian origin, live on the hill tops, and were a terror to the whole country until the closing decades of the 18th century, when they were subdued and tamed by the young civil officer, Augustus Cleveland. As, however, the Hindus were still afraid to occupy the valleys below the Pahar, the government in 1832 encouraged the Santals, who lived further south, to occupy them and the adjoining lowlands, marking off for their use the territory 23° 48' to 25° 19' latitude, and 86° 30' to 87° 25' longitude, calling this the Santal Paha, which became the home of the race. Colonization has taken place to Assam and to the Santal-pur district, at the foot of the Himalayas, 250 miles northward.

The Santals have very dark skins, round faces, flat noses, large mouths, with protruding lips and straight black hair. They wear almost no clothing. They are strongly built, simple, tractable, devoid of caste, and, judged by the standards of India, honest and truthful. They are nomadic farmers and are in demand as laborers on the indigo plantations and railways of Bengal, and the tea plantations of Assam. The women are notable, if not for beauty, for grace of limb, the laden with brass rings. They are on a higher plane socially than most heathen women. It is customary for each family to live by itself within an enclosure of interwined hedge. Santali is a more developed speech than the other Kolarian dialects, but was first reduced to writing by the missionaries. Bengali is taught in the schools. Their religion is ancestor and nature-worship, human sacrifices being offered until the abolition of the brutal custom by the British Government in 1835.

The earliest mission in Santalalia was that begun in 1850 among the Pahari, by the Church Missionary Society, under Rev. E. Droese, who continued at Bhagalpur for 36 years. Attention was especially drawn to the Santals by their terrible insurrection in 1855 against the extortion of the Hindu money-lenders, which proved a turning-point in their history. Commissioner George Yule, who restored order, encouraged Droese to open schools among them, obtaining grants for this purpose, and he and his successors did much for their material and moral improvement. The CMS opened a mission to the Santals in 1859. The following year, E. L. Puxley, a British officer and Oxford graduate, who had volunteered for India, was interested in the Santals by officers whom he had met en route. He opened a station and erected buildings at Taljhar, which he presented to the CMS. In 1868 H. M. Shackell resigned the principalship of St. John's College at Agra to undertake the same work at Godda. This repeated voluntary effort for the Santals is proof of their usefulness. Local missions were opened in 1878 at Baharwa and Baghara. The stations named, all in the N. E. of Santalalia, together with Santalpur, where 880
Christian colonists are settled, constitute the centers of the CMS Mission to the Santals, which in 1901 reported, including Patharis, 4,130 Christians.

"The Home Mission to the Santals," founded in 1867, and led for 35 years by Boerresen, the Danish missionary, at Ebenezer, in eastern Santal, reported in 1902, 11,345 Christians, who are already trained to a considerable degree of independent activity.

The Free Church of Scotland entered the field in 1871, sent missionaries in the S. W. (Pachamba, Tondee, and Chakai), reporting in 1901, more than 1,500 Christians. The Bethel Mission, in the southern section, had enrolled, in 1900, 1,500 Christians. According to Warneck (1902) there are, in connection with these and other small Santal missions, 15,000 Christians.

**Imperial Gazetteer of India, Art. Santal.**

**SANTAL LANGUAGE:** The Santals inhabit a considerable section of Bengal, India, lying northwest of Calcutta. Their language is not of the Aryan family, and is commonly classified with the Kolarian group of Dravidian languages.

**SANTIAGO DE CUBA:** A town and seaport on the E. coast of Cuba, W. I., formerly capital of the Republic (1861-1865). It is head of the Am. Baptist Home Missionary Society (1899), with (1900) 2 missionaries and their wives, 3 women missionaries, and 3 native workers, 4 outstations, 1 place of worship, 5 Sunday schools, 1 industrial school, 1 kindergarten, and 109 professed Christians. Station also of the MES, with (1903) 2 missionaries, 2 women missionaries, 1 native worker, 1 day school.

**SANTO DOMINGO:** Republic of: A country in the island of Haiti, W. I., also called the Dominican Republic. It has an area of about 18,000 square miles, comprising about two-thirds of the whole island, the republic of Haiti occupying one-third in the western part. It was separated from the republic of Haiti in 1844, after a bloody struggle. Spain held it from 1861 to 1865. In 1869 a treaty was signed with the President of the United States for its annexation to the great republic, but the treaty failed of ratification by the United States Senate. It has suffered from wars and revolutions, and is very backward in its civilization. Its government is after the model of that of the United States, with a President chosen by an electoral college, who holds office for four years. Its population is estimated (1888) at 610,000, chiefly of mixed Spanish and Indian blood, with some pure negroes and mulattoes and a certain number of whites. The language is Spanish. French and English are also spoken in towns. The religion is Roman Catholic, but all religions are tolerated. From the time of the revolt of Haiti against French control until 1864, the Roman Catholic clergy withdrew from the island, which was placed under the ban of the Church. The people reverted in many instances to ancient heathenish superstitions which are of considerable sway in the smaller settlements. Protestant missions in the Dominican Republic are represented by the Protestant Episcopal Church of the U. S., who have one station in charge of a colored minister from Haiti, and by the Wesleyan Methodists of the West Indies, who have four stations; these latter stations were passed over to the charge of the WMS in 1903.

**Misionary Review of the World, September, 1903: Haard (S.), Santo Domingo, Fast and Present, London, 1873.**

**SANTURCE:** A town in Porto Rico, W. I., situated about 20 miles W. of San Juan. Station of the American Missionary Association (1898), with 4 women missionaries, 1 Sunday school, 1 day school.

**SÃO JOÃO DEL REI:** A town in Brazil, situated in the state of Minas Geraes, about 130 miles S. W. of Minas, with 2,000 natives. Station of the PS (1895), with (1903) 1 missionary and his wife, 1 native worker, and 40 professed Christians.

**SÃO PAULO:** Capital city of a province of the same name in Brazil. It is an important city, and has developed much within recent years, being the most active and enterprising town in the country. It is the center of the railway system of the province, and is distant only 36 miles from Santos, and 220 miles S. W. from Rio de Janeiro. Tho the streets are narrow, they are well paved, and are lighted with gas. Sewers and watermains have been constructed. It stands on a high, but not quite healthful, plain. Altitude, 2,393 feet. Population (1900), 125,000. Station of the MES (1884), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 2 outstations, 2 places of worship, 6 Sunday schools, and 953 communicant Christians. Station also of the PN (1863), with (1902) 1 missionary, 1 woman missionary, 1 native worker, 2 outstations, 3 Sunday schools, 1 day school, 1 college. Station of the PS (1895), with (1903) 1 missionary and his wife. Also station of the Southern Baptist Convention (1899), with 2 missionaries and their wives, 3 native workers, 2 outstations, 1 Sunday school, 1 philosophical class, and 73 communicant Christians.

**SÃO PEDRO, OR RIO GRANDE DO SUL:** A town in Brazil, situated in the state of Rio Grande do Sul on the sea coast, about 40 miles S. E. of Pelotas. Station of the American Missionary Society (1891), with (1900) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 outstation, 3 places of worship, 1 Sunday school, 1 theological class, and 106 professed Christians. Also station of the Seventh Day Adventists Church, with 1 missionary and his wife. Church statistics included in Rio de Janeiro.

**SAPPORO:** A town in Japan, situated near the W. coast of Hokkaido Island and about 350 miles N. by E. of Tokio, 95 miles N. E. of Hakodate. It is connected with Otaru, its port, by railway. Its streets are wide. Climate cold. Population, 13,500. Station of the CMS (1893), with (1905) 1 missionary and his wife, 1 woman missionary, 22 native workers, 1 outstation, 1 place of worship, 5 day schools, 1 boarding school, and 1,612 professed Christians, of whom 358 are communicants. Also station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 11 native workers, 5 outstations, 7 places of worship, 7 Sunday schools, and 468 professed Christians, of whom 305 are communicants. Station also of the ABCFM (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 10 native workers, 2 places of worship, 5 Sunday schools. Station also of the PN, with (1903) 3 women missionaries, 3 outstations, and 1 boarding school.

**SARAWAK:** A district on the northwestern coast of Borneo, ruled by Rajah Sir Charles Brooke, under protectorate of the British Government. The population is about 600,000, composed of Malays, Dyaks, Kayans, and other
tribes, together with Chinese and other settlers. The SPG has (1902) 5 stations in Sarawak, with about 2,500 baptized Christians.

SARENGA: A village of Bengal, India, situated in the Suri district, N. by E. of Bankura, Station of the WMS (1901), with 1 missionary, 19 native workers, 2 Sunday schools, 4 places of worship, 6 day schools, 6 boarding schools, and 565 professed Christians, of whom 66 are communicants.

SAREPTA: A village in Cape Colony, South Africa, situated about 20 miles N. E. of Cape Town. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 6 native workers, 1 outstation, 1 Sunday school, 2 day schools, and 565 professed Christians, of whom 200 are communicants.

SARGEANT, John: Born at Newark, N. J., 1710; died July, 1749; graduated at Yale College 1729; was tutor 1731-1734. He was contemporary with David Brainerd, and taught him the Algonquin language. In July, 1735, he was settled as a missionary to the Indians on the Housatonic, and the next year made a journey to Deerfield in presence of the governor and council and a large number of English and Indians.

Mr. Sargeant acquired the native language with facility, and so well that the people said he spoke it better than themselves. He translated later into the parts of the Old Testament, and all the New except the Book of Revelation. He introduced many of the arts of civilized life, interested them in singing, taught them Biblical history and doctrine, and brought into the mission school many Mohawk and Oneida children from the province of New York.

Regarding the education of the youth as essential to his success, he had formed the plan of a manual-labor school, in which the pupils should contribute to their own support. Provision had been made for the education of several boys, land procured, a school-house built, and some boys were collected; but the death of Mr. Sargeant prevented the consummation of the plan. Mourned by the Indians, who loved him as a father and friend, he died at the early age of 39. 1749. The mission closed in February of next month, having been 6 months in existence. He found them but 50 in number, living miserably and viciously in wigwams, widely scattered, and roving from place to place. He left them 210 in number, settled in a thriving town, with twenty families in frame houses, and many having farms cultivated, fenced, and well stocked. He had baptized 182, and 42 were communicants.

SARGENT, Edwin: Born at Paris, France, 1815. Died October 10, 1889. Spent the early part of his life at Madras; went in 1835 to Palamotta, Tinnevelly, as a missionary of the Church Missionary Society; in 1839 he went to England, studied three years in the Church Missionary College at Islington; was ordained in 1842, and the same year returned to his work in Tinnevelly. The first eight years he was located at Suviseshapuram, having charge of a missionary district. In 1850 he was transferred to Palamotta, and two years later appointed principal of the Preparandi Institution, which had a high character for proficiency while he was at the head of it. More than 500 young men were instructed by him, many of whom are now pastors of native Christian churches in the towns and villages, and many more are catechists and schoolmasters. In 1854 he was nominated a suffragan or coadjuvant bishop to the Bishop of Madras, and on March 11, 1877, consecrated in Calcutta by Bishop Johnson, assisted by the bishops of Madras, Bombay, and Colombo. He had charge of eight of the ten districts into which the Society's Tinnevelly Mission was divided. In these districts were 61,000 Christians, 66 native pastors, 112 catechists and schoolmasters, and 2,940 professing Christians, of whom 876 are communicants.

SASON: A settlement in Cape Colony, South Africa, about 25 miles S. E. of Piquetburg. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 14 native workers, 1 day school, 1 Sunday school, and 1,579 professed Christians, of whom 876 are communicants.

SARANPRATI, William Thomas: A native of India, of the Vishnupure Sudras. Died at Sinhapunthurai, Tinnevelly, February 24, 1892. Educated at the native English school and Palamotta Preparandi Institution. He was stationed in North Tinnevelly, and afterward had charge of the Southern pastorate at Madras, and was Chairman of the Madras Native Church Council. In 1881 he founded the Chintcadrepetta Christian Association; in 1884 he was elected Fellow of the University of Madras, and in 1885 he received B.D. degree from the Archbishop of Canterbury, on the recommendation of the Bishop of Madras, in recognition of his historical and linguistic labors. He was the author of "A Church History of England and Tamil," and edited a Tamil Commentary on the New Testa-
ment. He also ably conducted two periodicals, and the power of his pen was felt among a large circle of readers. Mrs. Satthianadhan had the superintendence of a large school for high-caste women, and carried on Zenana work for many years in connection with the CEEMS and Female Education Society.

SATUPAITEA: A settlement in the Samoan Islands, situated on the S. side of Savaii. Station of the Australia Wesleyan Missionary Society, with (1901) 1 missionary and his wife, 164 native workers, 7 outstations, 24 places of worship, 25 Sunday Schools, 28 day schools, 1 boarding school, and 1,050 professed Christians.

SAVAGE ISLAND See Nu'iu.

SAVAI: The westernmost of the Samoan Islands. Area, 700 square miles. Population, 13,000. Station of the LMS (1830), with (1903) 1 missionary, 44 native workers, 1 outstation, 63 Sunday schools, 63 day schools, 2 boarding schools, and 5,555 professed Christians, of whom 2,559 are communicants.

SAVAS: An island of the East Indies, southwest of Timor Island, southeast of Java; has estimated population of 15,600, more than half of whom are nominally Christians. They are visited twice a year by the Dutch Government assistant pastor residing at Kupang, Timor.

SAWYERPURAM: A village in Madras, India, situated in Tinneveli district, a short distance S. of Palamcottaa. Founded in 1814 by Mr. Sawyer, an English trader, who bought the land in order to make a refuge for persecuted converts. Station of the SPG (1826), with (1903) 1 missionary, 57 native workers, 21 places of worship, 10 day schools, 1 boarding school, and 2,789 professed Christians, of whom 1,027 are communicants.

SCHAUFLER, William Gottlieb: Born in Stuttgart, Germany, August 22, 1798. Died January 26, 1883. His early life was spent at Odessa, in Russia, where he worked at his father's trade as a turner. At the age of twenty-two he confessed his faith in Christ. He early became interested in foreign missions; and in 1826, meeting the famous missionary, Dr. Joseph Wolff, his enthusiasm was further kindled. Finding, however, the plans of Dr. Wolff impracticable, he went to Constantinople, and thence to Smyrna, where he met Rev. Jonas King, who induced him to go to America for an education. He entered the Andover Theological Seminary, where he remained five years, studying often fourteen and sixteen hours a day. He says: "Aside from the study of Greek and Hebrew, and general classical reading, I studied the Chaldee, Syriac, Arabic, Samaritan, Rabinic, Hebrew-German, Persian, Turkish, and Spanish; and, in order to be somewhat prepared for going to Africa, I extracted and wrote out pretty fully the Ethiopic and Coptic grammars. For some years I read the Syriac New Testament and Psalms for my edification, instead of the German or the English text." He also aided the persuasion in their translations. He was ordained November 14, 1831, a missionary of the ABCFM to the Jews of Turkey. He studied Arabic and Persian with De Sacy, and Turkish with Prof. Kieffer in Paris, and then went to Constantinople. There he preached in German, Saws, Turkish and English. In 1838 he visited Odessa, chiefly on Mrs. Schaufller's account, and was much engaged in evanglistic work, resulting in many conversions. He translated the Bible into Hebrew-Spanish, that is, Spanish with a mixture of Hebrew words and written with Hebrew characters, for the Jews in Constantinople, descendants of those who had been driven from Spain. Dr. Schaufller, besides being a very industrious preacher, was the author of Leviticus and the book of Hebrew convert, a German whom he had known sixteen years before in Russia, not being allowed by the Government to profess Christianity except as a member of the Greek Church, went to Constantinople and was by him baptized. In 1839 he went to Vienna to superintend the printing of the Hebrew-Spanish Old Testament. There he resided three years, and many striking conversions occurred through his labors. He presented to the emperor, in a private interview, his printed Bible, on which he had bestowed great labor. He was, however, having a hard time to come to a decision upon it, a second and larger edition was printed. Journeying from Vienna he spent ten days in Pesth, where many of the better class of Jewish families embraced the Christian faith. The Jewish Mission having been relinquished in 1835, he was requested by the Scotch Church, to which it had been transferred, to take charge of the work, but he declined. He declined also the proposal to enter the Armenian field. About this time he was appointed by the Mission to lay before the Evangelical Alliance, soon to meet at Paris, the great question of religious liberty in Turkey, and to urge the Alliance to memorialize the sovereigns of Europe to use their influence with the Sultan to secure the abolition of the death penalty for Muslim converts to Christianity. The result was seen in the triumph of Sir Stratford Canning. The morning he left Paris the news of Sebastopol's fall was proclaimed on the streets, and in Stuttgart, his native city, he addressed an immense audience on the Crimean War. After this war the way seemed open for missionary work among the Turks, and Dr. Schaufller, with the approval of the mission, decided to enter that field. To fit himself for this new work, he applied himself to the Turkish language anew. In 1857 a paper on the Turkish and Bulgarian work, prepared by Dr. Schaufller and Hamlin, was sent to the Presidential Committee, and Dr. Schaufller was appointed by the mission to present, in America and England, the claims of the new mission to the Turks. After thirty-one years of absence he set sail for home. His appeals met with a generous response from an eminent individual; The Presidential Committee, however, decided, after the Turkish Government refused liberty of conscience to Muslims, not to continue the separate mission to Mohammedan Turks, but to have the Armenian Mission cover the whole of the field. This decision, and the entrance of the SPG into Turkey, led Dr. Schaufller to resign as a missionary of the Board, but he pursued his Bible translation in the employ of the American and British and Foreign Bible Societies. His great work was the translation of the whole Bible into the literary Turkish, the language of religion and instruction of the common people. This occupied him eighteen years. He published an ancient Spanish
version of the Old Testament, revised by himself, with the Hebrew original in parallel columns, a popular translation of the Psalms into Spanish, a grammar of the Hebrew language in Spanish, a Hebrew-Spanish Lexicon of the Bible. He contributed also articles in Spanish to a missionary periodical in Salónica. He was a remarkable linguist, able to speak ten languages and read as many more, and to acquire scholarship, and especially his translation of the Bible into literary Turkish, led the Universities of Halle and Wittenberg to confer upon him the degrees of D.D. and Ph.D., and Princeton College the degree of Doctor of Laws. For his great services to the German colony of Constantinople the King of Prussia conferred upon him a decoration. He left Constantinople in 1874, and went to New York with his wife to live with his two youngest sons. He was in the active missionary work for nearly fifty years.

SCHMACHI: A large and important city of Eastern Transcaucasia, Russia. Population about 25,000, of whom a large number are Armenians. As a result of the work of the Basel Missionary Society, a congregation of evangelical Armenians was organized here, which did not lose its power among the missionaries and obliged by its leader received some education at Basel Seminary, and, by his rare skill and earnest piety, succeeded in keeping his little band together. Notwithstanding the law of Russia, which insists that proselytes shall join the Greek Church, the Protestants grew in numbers and in strength, until they became one of the most influential communities in that section of the Caucasus. From Schemachi the work spread to Shusha, Lenkaran, and Baku, in each of which places congregations were gathered, which now form a recognized body of Christians.

SCHIALI. See SHIYALI.

SCHLESWIG-HOLSTEIN Missionary Society in Breklum. See Germany; Missionary Societies of.

SCHMELSEN, John Henry: Missionary of the LMS in South Africa. Born in Germany, 1777; died at Komaggas, Little Namaqualand, July 26, 1848. Mr. Schmelsen arrived at his field of labor in 1811, in the vicinity of Steinkopf and Pella, south of the Orange River, spending some time in exploring the regions about the mouth of the river, and on its north side, toward Damaraaland. In 1814, on invitation of the Namaqua, he crossed the Orange River and opened a new station at Bethany, 200 miles north of Steinkopf. Here he laboriously carried on his most difficult work of reducing the Namaqua speech to writing, and translating the Gospels into that language. In one of his long tours he encountered Mr. Barnabas Shaw, of the WMS, who was sent out to establish a mission in the Namaqua country. It was characteristic of the man that he at once put himself at the disposal of the new missionary, took him to the Kamiesberg country, introduced him to the tribesmen there, and then, having seen him properly settled, went on to his own field, distant four weeks' journey. In 1824 he visited Cape Town to see his Namaqua Gospel through the press, and, that accomplished, he spent some time exploring the coast regions of Little Namaqualand, finally establishing a new station at Komaggas. There he completed the translation of the Gospels, and took them to Cape Town to be printed. In the meantime he was growing old, and called in vain for an associate to take up his work. His associate came at last in 1840, a missionary of the Rhenish Missionary Society, the LMS having transferred its Namaqua work to that Society. The closing years of his life were thus gladdened by the privilege of helping with his experience and counsel the missionaries of the new group, who were pressing forward the work for his beloved Namaqua people.

SCHNEIDER, Benjamin: Born at New Hanover, Pa., January 18, 1807. Died September 14, 1877. Graduated at Amherst College, 1830; Andover Theological Seminary, 1833; ordained October 2; sailed for Turkey as a missionary of the ABCFM December 12, 1833, the supported by Reformed (German) Churches. He was stationed first at Brousa, where he preached the first evangelical sermon ever preached in the Turkish language. In 1849 he removed to Aintab, where he laid the foundation of two flourishing churches. After the death of his wife in 1853 he visited the United States, and on returning to Turkey in 1858, was again stationed in Brousa. His health failing, he made a second visit home in 1872. A call for help in Turkish and Greek work in the theological seminary at Marsovan induced him, in the following year, to return, reaching Marsovan March, 1874. But from nervous prostration he was compelled to relinquish the work, and in 1875 he left first for Switzerland, thence for his native land.

For more than forty years he was connected with the Turkey missions, laboring in almost every department of missionary service—preaching, translating, preparing young men for the ministry. Few have traveled more extensively as pioneers; few have more cheerfully endured the privations of the service; few are the native churches in Turkey where his name is not known and revered. Even amid the intense sufferings of the last two years of his life his eye would brighten and glow with delight at the bare mention of the missionary life. He acquired languages with great facility. He spoke German, Greek, English, French, Armenian, Turkish, and a vernacular, the latter with an ease and fluency seldom equaled by foreigners. Even natives wondered at his marvelous flow of thought in idiomatic phrases, easily understood by all; for he chose simplicity of style, tho at home in the higher and more complicated forms of expression. He received the degree of D.D. from Franklin and Marshall College, Lancaster, Pa., 1850.

SCHREIBER, August: Born at Bideford, Westphalia, August 11, 1839; died at Barmen, Germany, May 22, 1903. After graduating at Gutersloh, he studied theology at Halle and Erlangen, returning to Gutersloh for two years' further theological studies and examinations. Having decided to become a missionary in the foreign field, he spent a year in London and Edinburgh, studying church organization and missionary methods used by the different societies. He also took a short course in medicine. In 1865 he offered himself to the Rhenish Missionary Society and was appointed missionary to Sumatra by that Society, in 1866. Since he had found means, before going out, to study the Batta language he was able to enter the active work almost as soon as he arrived on the field. He was compelled to return to Sumatra and return to Germany by his wife's illness in 1873. During
the seven years of his missionary career in Sumatra he was occupied with organizing a better system of training native helpers, and also with translating the Scriptures into Batak. He completed the translation of almost the whole New Testament before he returned to Germany. On arriving at Barmen, Dr. Schreiber was usefully occupied in the Rhenish Mission House, and, in 1854, he became second "Inspector" of the Rhenish Mission Society. In 1859 he was made first "Inspector" (Foreign Secretary) of the Society. Dr. Schreiber represented his Society at the London Interdenominational Conferences of 1878 and 1888. He made extended visits to the fields of the Society in South Africa and the Dutch East Indies, and China. In 1900 he represented sixteen German Missionary societies at the Ecumenical Conference on Foreign Missions, held in New York. Many who were present at that Conference long carried in their memory the spare figure of Dr. Schreiber, with his bright, genial manner, and the lucid and effective method of his addresses, as he took part in several of the discussions of the Conference. Dr. Schreiber was a man of learning, of good judgment, and of the broadest sympathies. He believed in missions most heartily as the great preacher of the Gospel and, therefore, of the sincerity of Christendom.

SCHWARTZ, Christian Friedrich: Born in Sonnenburg, Prussia, October 28, 1726. Died February 13, 1798. At the age of twenty he went to the Halle University, where he became established in the faith of Christ, and resolved to devote himself wholly to Him. Dr. Schultz, who had left India from failure of health, was at this time preparing to print the Bible in Tamil, and advised Schwartz to learn that language in order to assist him. Professor Francke, hearing of his great success in acquiring the language, proposed to him to go as a missionary to India. He decided to go, declining an advantageous position in the ministry at home. He was ordained at Copenhagen, with the view of joining the Danish Mission at Tranquebar, where he arrived July 30, 1750. In four months he preached his first sermon in the Church of Ziegenbalg. From the first he devoted much time and attention to the religious instruction of the young. In twelve years Schwartz had baptized 1,238 in the city. He labored also faithfully for the Englisharrison, for which no stipendary instruction was provided. The salary of £100 which he received as chaplain of the garrison, from the Madras Government, he devoted the first year to the building of a mission house and an English Tamil school, and afterward gave a large part of it in charity. In 1776 he went to Tanjore to found a new mission, and here he spent the remaining twenty years of his life. Even in this favorite abode of the Hindūs, where was the most splendid pagoda of India, he had given up, also for churches having been established in 1780. He won the high esteem of the English Government, which employed him in important political transactions with the native princes. When the powerful and haughty Hyder Ali of Mysore refused to receive an embassy from the English, whom he instructed to treat two of them through Schwartz. "Send me the Christian," meaning Schwartz; "he will not deceive me." Urged by the government, he consented to undertake the mission. Through his intercession Cuddalore was saved from destruction by the savage hordes of the bull-thief. On his return he was forced upon him by Hyder, which he gave to the English Government, requesting that it be applied to the building of an English orphan asylum in Tanjore. To a Mohammadan, Hyder's regard for Schwartz was so great that he issued orders to his officers, saying: "Let the missionary, or padre go about everywhere without hindrance, since he is a holy man, and will not injure me." While Hyder was ravaging the Carnatic with an army of a hundred thousand, and multitudes were fleeing in dismay to Tanjore, Schwartz moved about unmolested. In 1780 a famine caused by the war more than 800 starving people came daily to his door. He collected money and distributed provisions to Europeans and Hindūs. He also built there a church for the Tamil congregation. The rajah a few hours before his death requested Schwartz to act as guardian to his adopted son Serfozée. The trust was accepted and faithfully discharged.

After a protracted and severe illness, during which he delighted to testify of Christ and to exhort the people, he expired. His body was two days in the house. At his funeral the effort to sing a hymn was suppressed by the noise of the wailing of the heathen, who thronged the premises. Serfozée lingered, weeping, at the coffin, covered it with a cloth of gold, and accompanied the body to the grave. The small chapel in which he was interred outside of the fort has been demolished, and a large one erected. The grave is behind the pulpit, covered with a marble slab bearing an English inscription—

To the memory of the
REV. CHRISTIAN FRIDRICH SCHWARTZ;
Born Sonnenburg, of Neumark, in the kingdom of Prussia,
The 25th October, 1726,
And died at Tanjore the 15th February, 1798,
In the 72d year of his age.
Devoted from his early manhood to the office of Missionary in the East,
The similarity of his situation to that of
the Prophets and Apostles,
Produced in him a peculiar resemblance to
The simple sanctity of the
Apostolic character.
His natural vivacity won the affection
And unsought probation and purifying trials.
Alike commanded the reverence of the
Christian, Mohammadan, and Hindū:
For sovereign princesses, Hindus, and Mohammedans,
Selected this humble pastor
As the medium of political negotiation with
His English master,
And the very marble that here records his virtues
Was raised by
The liberal affection and esteem of the
Rajah of Tanjore,
Raja Bahadur Rajah Serfozée.

Another beautiful monument was erected to his memory by the East India Company in the Church of St. Mary, Madras, part of the inscription on which is as follows:

On a spot of ground granted to him by the Rajah of Tanjore, two miles east of Tanjore, he built a house for his residence, and marked off an Orphan Asylum. Here the last twenty years of his life were spent in the education and religious instruction of orphans and children; particularly the sons of indigent parents—whom he gratuitously maintained and instructed; and here, on the 15th of February, 1798, surrounded by his infant flock, and in the peace of several of his discoloueer brethren, he closed his truly Christian career in the 72d year of his age.

SCHWIFAT. See SHWIFAT.
most part, only men of the broadest university training. These have gone into regions of the earth where educated Americans or Europeans have not set foot, and where the missionaries were in many countries, and in some sections of all countries, the pioneers. Not a few of these regions were entirely unexplored.

Moreover, the missionaries entered these countries for permanent residence. There they established themselves. They mastered the vernacular of the country and thus put at their disposal, to aid in their investigations, all the wisdom the people themselves possessed. In this way they became identified with the people and the country. The facilities of the missionaries have permitted investigation of the scientific phenomena all about them were unsurpassed. Many missionaries have been in regular correspondence with the leading scientists, who have made suggestions which the missionaries have carried out, and in turn the missionaries have reported the results of their observations and investigations to scholars connected with American and European universities, who have sent back their interpretations.

The missionaries have not given their time and strength to scientific pursuits as an end in themselves. In some cases a particular branch of investigation has been the recreation of a hard-working missionary; in other cases, independent scientific investigation has been a part of the regular work in the training in the missionary colleges abroad. While in a majority of instances perhaps the most valuable scientific results have come from the observations and investigations made in the interests of positive missionary operations, or are the direct results of different phases of missionary work.

The space does not permit of citation to any extent of specific cases. Such exhaustive citations would greatly increase the value of the article, but it would also necessarily add to its length many fold. We can but state the facts, leaving the illustrations to be supplied by the reader.

Geography: Probably no other department of science owes more to the missionaries than does geography. The missionaries have been the pioneers in most countries. The interests of their work, as well as the necessity of making intelligent reports to their committees, boards and constituencies, demanded that accurate information be given regarding the physical condition of the countries occupied. The first communications of the exploring missionaries in all countries have been full of geographical data, which have necessarily been the beginning of all the concrete information we to-day possess about these countries.

Franciscan and Jesuit missionaries, more than six centuries ago, traveled through Central and Eastern Asia, and even into China, and described the topography of the country. They prepared the best maps of those countries then known. Spanish and Portuguese missionaries contributed much of the first knowledge of Africa and America. They wrote the first accounts of the Congo and Abyssinia. The Danish missionaries gave us our first, and best, account of Iceland. It is impossible even to catalog the names of the societies and distinguished missionaries who, previous to the beginning of the 19th century, made large and important contributions to the science of Geography.

During the 19th century the missionaries have been not less active in their explorations. The Sandwich or Hawaiian Islands were opened to the world, and the South Sea Islands were explored for the sake of missionary operations. Africa and Australia were first made known to the scientific world through the report of missionaries, who published their observations in independent books or in the columns of the various geographical societies. The most valuable contributions to the geography of Syria were made by a missionary, and the interiors of Asia Minor, Mesopotamia and Persia were explored for us by resident missionaries. During the first half of the last century the world was introduced to India as a country, apart from its resistance to foreign invasion and its value to commerce, through the extended reports of missionaries regarding the country, its outlines, products and people. China was a missionary country in its first introduction to the world. In 1856, when the British fleet bombarded Canton, its action was directed by a map of the city and suburbs prepared by a missionary. The best work on China, which is still a classic on the Middle Kingdom, was prepared by a missionary. Undoubtedly the files and libraries of the missionary societies which have been in operation for half a century or more contain a more abundant supply of facts regarding the countries of the world, outside of North America and Europe, than can be found in the non-missionary part of the archives of all the geographical societies taken together. The missionary societies in their regular periodicals have published much of this material, so that the foreign missionary magazine usually belongs in the libraries of the geographical societies.

Rev. Dr. William Adams, of New York, has said: "I believe more has been done in philology, geography, and ethnology indirectly by our missionaries than by all the Royal and National societies in the world." The Princeton Review says (Vol. 38, p. 622): "Our missionaries have rendered more real service to geography than all the geographical societies in the world." Carl Ritter, the prince of geographers, confessed that he could not have written his magnum opus, the Erd Kunde, without the aid and material collected and transmitted by missionaries. Mr. L. H. Morgan in his Preface of the Smithsonian Contributions to Knowledge, Vol. XVII, says: "No class of men have earned a higher reputation as scholars or philanthropists than our missionaries. Their contributions to history, ethnology, philology, geography and religious literature form their enduring monument." Mr. G. M. Powell, of the Oriental Topographical Corps, in a paper read before the American Institute, 1874, says: "Probably no source of knowledge in this department has been so vast, varied and prolific as the investigations and contributions of missionaries."

Philology: The study of the languages of the people to be evangelized is the first work of the missionary. The successful missionary is such a man but a slight knowledge of the geography or the history of the country, but he can accomplish little or nothing unless he makes himself master of the spoken vernacular. Language—and that of the people among whom he works—is the
instrument by which the race is to be won. Hence Philology is also distinctly a missionary science.

In order to make missionary effort permanent, it has been necessary to reduce to writing all languages not so reduced, and to prepare grammars and lexicons of the same in order to teach the people themselves the proper and scientific use of the language. "Until the work of literature has been built up. This is the natural and only method of missionary conquest in every uncivilized country of the world.

The cases are few, indeed, where men other than missionaries have ever mastered an unwritten foreign tongue, reducing it to writing and preparing for it a grammar and lexicon. To mention the languages so reduced by missionaries would require more space than is allotted to this part of the subject. In the first six volumes of the Journal of the American Oriental Society out of a total of 2,927 pages, 1,215 are filled by missionaries, and that, too, chiefly as to subjects connected with philology. Prof. Whitney, in his Language and the Study of Language, says: "The extraordinary activity of missions in Africa within a few years has directed study to the study of objects. After a great mass of material has been collected and examined sufficiently to give a general idea of the distribution of races in this continent."

Next to the value of discovering and crystallizing the language of a people in a scientific classification and arrangement, the production of a common literature in the spoken tongue. In this way dialectic differences in the language spoken by the same races in different parts of the same country have been broken down and the spoken tongue of the entire race has been unified. The philologists classification of races and nations by the production of a general Christian literature in a pure form and in the spoken language of the masses of the people, has been one of the greatest scientific triumphs of the last century of modern missions. It has unified the people, made wider and more general literate, and opened the way for the scientific classification of the languages themselves. Comparative philology owes far more to the work of missionaries than to any other class of people. They are the masters of the science.

Ethnology: The missionary has been the discoverer of peoples. For this he was commissioned and sent out into strange lands. The limits of this article would be exceeded if an attempt were made to enumerate and briefly describe the different races that have been introduced to the world, studied, and classified by foreign missionaries. In very few cases the missionary is sent to accomplish has compelled him to do this. No one else has ever had such opportunities for observation and study and no one else has been impelled to this work by such a permanent incentive. Whenever a missionary hears of a strange and unknown race or people, there he is immediately drawn. He cannot cease from his study until he learns all he can of the physical, mental, social, moral and religious characteristics of the people in his new found field of observation and operation. The chances are that he will take up his residence in the midst of that people and give his life to understanding them, in order that he may adapt to their peculiar conditions and needs the Gospel of Jesus Christ.

If we should eliminate from our English liter-
and knowledge of the world are large and valuable.

**Medical Science:** The practise of medicine has constituted an important part of the missionary operations of all the regular Mission Boards. This has been especially true in the pioneer work of those societies. For the Medical Department of mission operations the best trained physicians, both men and women, have been sent out. These have opened dispensaries, built and equipped hospitals, and conducted a general medical practice among the natives of all countries where mission work has been carried on during the last century. The initial development of the modern science of medicine in China, Japan, India, Turkey, Africa, and the Pacific Islands has been accomplished almost entirely by the missionaries.

Medical schools have been opened and conducted according to modern principles of medical and surgical practice, and the youth of these countries have been taught the science and are to-day, by the thousands, practising the same among their own people. To accomplish this, text-books have been prepared in the vernacular of the people for the use of students not familiar with the English language. In connection with the mission hospitals, training classes for training native nurses have been opened and they constitute one of the popular departments of medical work.

Medical missionaries, owing to their location among hitherto unknown people and in climatic conditions unknown to the medical fraternity of England, Germany, France, and the United States, have made extended and continuous observations upon diseases that are entirely unknown in the countries mentioned. The reports of these observations have been widely published in the medical journals, and have added materially to the sum total of medical knowledge. While studying unknown diseases the missionary physicians have also sought for proper remedies in the countries where; in cases not a few they have been eminently successful. It is well known that not a few of the common remedies now in constant use in our most civilized countries were discovered by medical missionaries and given to the world. Medical work has now been so established by the efforts of the foreign medical missionary is now supplemental, and in some countries is taken up and carried on in a large measure by thoroughly trained native physicians.

**Social Science:** The social-settlement method of reaching certain classes of people in our larger cities is the application to English and American life of foreign missionary methods of operation that have been in vogue ever since that work began. The foreign missionary enters upon the work for life, and is usually located in a section of country where he is expected to devote his life to the civilization, education, and Christianization of the native peoples all about him. The missionary establishes his home among these people to whose elevation he has given his life. His home becomes a well-recognized place of refuge for those who want sympathy, comfort and instruction. The natives come and go freely. The missionary identifies himself with the life of the people, with their politics, and their ambitions and trials. They learn to recognize him as one who is interested in whatever interests them and as suffering under conditions that bring afflictions upon them. In famine and plague, in war, pestilence, and massacre, the missionary remains at his post, and often goes down his life in his endeavor to shield and help the people whom he serves. Civilized countries seldom witness such examples of self-sacrifice carried to such conclusions as we witness to-day in actual operation in every country of the world with the mission work that are marvelously developed during the past century. In the face of what missionaries have done and are accomplishing by this means, our American and English operations seem but child's play, and the results obtained almost too meager for record. Missionaries are the masters of this science, and are in a position to demonstrate its value to the world. Because of the circumstances here outlined, questions of class, caste, poverty and wealth, employer and employed and, in fact, all questions that arise in the social life of various peoples, come before the missionaries and compel to some practical solution. They constantly aim to change for the better all social conditions and to set in operation forces that will eventually make the country better socially.

Dr. James S. Dennis embodies extended observations and research in this line in his masterly work, Christian Missions and Social Progress. He says: "It may not be in harmony with the current naturalistic theories of social evolution, yet it is the open secret of missionary experience that the humble work of missions is a factor in the social progress of the world which it would be intellectual dishonesty to ignore and philosophic treason to deny. The entrance of missions into the moral life of ancient peoples is a fact of the highest historic, as well as ethical and religious, significance. They are the heralds of a new era of beneficent progress to the less favored nations of the earth. The social scientist who discounts Christian missions as of no special import is strangely oblivious to a fact, which has wrought with benign energy and unexampled precision in the production of the best civilization we have yet seen in the history of mankind."

**Diplomacy:** The missionaries' part in shaping the diplomatic relations now existing between the civilized and the non-civilized parts of the world has been large and important. In most cases missionaries have preceded the consul, minister, and ambassador. When later the official representative of the missionary's government appeared, the missionary of long residence, not infrequently well versed in the language and conditions of the country, has been compelled to advise, in no small measure, the official representative of his country and, in fact, shape the diplomatic relations of the two countries. The Protestant missionary influence in the settlement of diplomatic questions, and in the drafting of treaties for the control of future relationships, has always been conciliatory and liberal. They have been from the beginning, and in all countries not a few are to-day, confidential and trusted advisers of the accredited representatives of the great powers in delicate international questions. As much of the diplomatic influence of the missionary has been in the rôle of confidential adviser, it would be most un diplomatise to make any public record of the same, but it is safe to state that the work of the missionaries in
aid of wise and conservative diplomatic relations among the nations of the world, civilized and uncivilized, has been emphatic and invaluable.

Philanthropy: The missionary's legitimate profession is not one that is primarily philanthropic in any limited use of the term. He does not take up his residence in distant, unknown countries for the purpose of distributing thereby to the people who seem to be in need of it. And yet, during the last century of modern missionary enterprise, probably no one class of philanthropists have been called upon to administer larger relief funds than have the foreign missionaries. Famine and pestilence, plague, war, inundation, and to some extent famine, have, at different times, swept over countries where missionaries have been living, and they were the only trustworthy people upon the ground both able and willing to distribute the funds that were raised abroad for the relief of the suffering people. Consequently, missionaries have so systematized methods of benevolence as to reduce to a minimum the pauperizing effect of the same upon the people who received the aid. They have undoubtedly demonstrated to the world that relief funds can be distributed to a people desirous to be helped while still leaving upon the people the impression that the aid received has been earned by their own labors. The science of philanthropy must be studied largely from the standpoint of the experiences of the foreign missionary, in order to be understood in its widest and most important relations to the moral character of the people and the fullest development of industry and thrift.

Comparative Religion: One of the chief studies of missionaries has been the religions of the people among whom they live. As they have been sent out to change the religion of the people, and to lead them to accept Christianity in place of that which they had, it is clear that, in order to accomplish this, the missionaries must understand, as far as possible, their present beliefs and religious practises. All missionaries have not given the same attention to the investigation of the religious beliefs of the people for whom they are to work. But many of the most intelligent and observing of the missionaries of the leading Boards of the world, by a careful study of whatever religious literature the people may possess, and by continual inquiries of the most intelligent devotees, have gathered together a mass of thoroughly trustworthy material that has become the basis for the general science of religion.

There are many tribes and races whose religion would not be known now were it not for the information given by missionaries living among them. The fundamental beliefs and practises of the great ethnic religions would be little known today were it not for the mass of information furnished by the missionaries who have given a lifetime, even to the second and third generation, to a thorough and exhaustive study of these religions, upon the ground and amid their daily practises. The results of these studies and observations have not always been gathered into books, but they have been more frequently embodied in letters and reports, and in articles published in missionary, scientific, and popular magazines, and other periodicals. It is not exaggeration to say that missionary literature has done more for general education, in the line of the religious practises and beliefs of the people of the world, than all other sources combined. In fact, it is impossible for this subject to be studied now with any degree of thoroughness and accuracy without the free use of the material furnished by the missionaries. One has but to glance through missionary articles in the magazines, as well as books they have published, to be convinced of the priceless value of the contributions of foreign missionaries to the science of Comparative Religion.

But space will not permit a citation of individual cases. In short, educated missionaries in all parts of the world during the last century have been active and valued contributors to nearly every scientific subject that has attracted the attention of the scholars of the last century.

SCOTLAND: Missions in the Presbyterian Churches of: These will be considered under the four heads, viz.:

1. Established Church Committee for the Propagation of the Gospel in Foreign Parts, especially in India. Headquarters, 22 Queen St., Edinburgh, Scotland.

General History: In contrast to Luther, John Knox, in the first confession of the Church of Scotland (1560), recognized the message of missions. In 1647 the General Assembly recorded the desire for "a more firm consecration for propagating it (the Gospel) to those who are without, especially the Jews," and on the occasion of the Scotch expedition to Darien (1699) the assembly counseled the ministers who went with it to labor among the heathen. Ten years later, the Society in Scotland for Propagating Christian Knowledge was founded, having chiefly in mind the needs of the Highlands. Later it enlarged its scope somewhat to include work in America, Africa, and India. In 1724 Robert Millar, a Presbyterian minister in Paisley, published a History of the Propagation of Christianity and the Overthrow of Paganism, in which he urged prayer as the first of nine means for the conversion of the heathen world. Then came the first Secession in 1733, followed by that of the Relief Church in 1761, while, in the meantime (1746), there went from Scotland and England to America the plea for united prayer.

The effect of Carey's sermons and the formation of the BMS and the LMS was manifest at once in Scotland, when two societies were organized in 1796, the Scottish (later called the Edinburgh) Society and the Glasgow Society. In both of them the Established and Secession churches were represented, and to the Scottish Society belongs the honor of sending out the first martyr missionary of modern times, Peter Greig, a gardener, and a member of the Secession Church of Donibristle, Inver-Keithing, who was murdered in the service of Africa. The same society undertook a mission to the Tatars at Karass, in the Caucasus. This was stopped by the Russian Government, and the Society turned its attention to India and the West Indies, afterward, in 1835 and 1847, transferring them to the Established and the United
churches, and passing out of separate existence. The Glasgow Society joined the Scottish Society in Sierra Leone, but not successfully, and in 1821 it started a work in Kafiria, which developed well. At the time of the Voluntary Controversy (1837) two presbyteries were formed, of which one, in 1844, joined the Free Church, and the other the United Church: the latter's mission work and debt, was organized. This afterward became "The Scottish Ladies' Association for the Advancement of Female Education in India;" then, in 1874, "The Church of Scotland Ladies' Association for Foreign Missions." More recently the above title has been adopted. The Association works in connection with the Church Foreign Mission Society, its members laying 49 missionaries, 17 assistants, 134 native teachers, 28 Bible workers, 9 nurses, and 50 other agents. It has 3,316 pupils on the rolls of 51 schools, and carries on medical work in all the fields occupied by the Church Missions.

2. Missions of the United Free Church of Scotland. A. The Free Church: Immediately upon the organization of the new body the missionaries set about reestablishing their work. A merchant in America sent Duff £500, a physician in Calcutta gave him £500, and other large gifts followed. In 1843 came the Disruption, and the entire body of missionaries, led by Duff and Wilson, gave in their allegiance to the Free Church. Thus the Established Church found itself with a large amount of property and one missionary—a lady. As soon as possible others were sent out, and before long the institutions in the three presbyteries were running on the same basis as before. In 1874 the Church commenced work in East Africa, and in 1878 in China.

3. Africa: In response to the earnest appeal from Livingstone the Established Church started a mission at Blantyre, south of Lake Nyasa, in 1874. Other stations near by were also occupied, and in 1884 Domasi and Zoms, while in 1901 work was commenced in the Kikuyu country, British East Africa. In the African missions special emphasis is laid upon medical and industrial work. The report shows 25 missionaries (of both boards), 137 native workers, 623 communicants, 35 schools with 10,446 scholars. In 1847, the United Church at 1-chang in 1878 has (1903) in 4 stations, 8 missionaries, 15 native workers, 857 communicants, 6 schools with 218 scholars.

The Church also has a Colonial Committee, which provides chaplains for a number of commercial enterprises in Europe, as well as in the colonies; and a Jewish Mission Committee, which conducts schools in Alexandria, Beirut, Constantinople, Smyrna, and Salonica; 10 in all, with 2,328 scholars.

Church of Scotland Women's Association for Foreign Missions: In 1837 a Ladies' Association for Foreign Missions, including Zenana work, was organized. This afterward became "The Scottish Ladies' Association for the Advancement of Female Education in India;" then, in 1874, "The Church of Scotland Ladies' Association for Foreign Missions." More recently the above title has been adopted. The Association works in connection with the Church Foreign Mission Society, its members laying 49 missionaries, 17 assistants, 134 native teachers, 28 Bible workers, 9 nurses, and 50 other agents. It has 3,316 pupils on the rolls of 51 schools, and carries on medical work in all the fields occupied by the Church Missions.

B. United Presbyterian Church of Scotland: In 1847 the Secession and Relief Churches united in the United Presbyterian Church of Scotland, with the exception of a few churches which retained their organization as the United Original Secession Church.

The first mission undertaken was that started by the Scottish Society in Jamaica in 1835, which had already developed so that the colored people inaugurated a work for their fellows in Africa, and helped to found the Calabar Mission on the
West Coast; and in Trinidad, where two stations were occupied. The division in the Presbyterian Church of South Africa, started by the Glasgow Society, had resulted in one section joining the Free Church in 1844, and the other, on the organization of the Church in 1847, identified itself with that movement. The division of the Rev. John Ross and Rev. John MacIntyre in 1873. The first stations, Newchwang, Hai-chung, and Liao-yang, were followed by Mukden and several others. The work in China was proper, given up that this might be strengthened. Japan also was organized in 1859, but on the organization of the United Church of Christ in Japan, and in view of the presence of so many other societies, the Church withdrew its force and focused efforts on other fields.

C. The United Free Church. 1. India: The five missions, Bengal (with its Santal branch), Western India, Nagpur, Madras, and Rajputana. Kafirs, the Nanoone, and the Madras College. There are 21 medical missionaries, with 66 assistants, 232 hospital beds, and 24 dispensaries. Over 160,000 individual cases were treated, while the number reached by preaching was over 420,000. The mission has, therefore, to a branch of the work founded by Carey in the old Dutch town of Chinsurah, and finds much encouragement in its work among the Santals and in the village districts of the other branches. Special regard is had to the excellent results of the addresses by Drs. Barrows, Fairbairn, and Cuthbert Hall, especially among the students. A feature of the Scotch Missions in India has always been the attention paid to the preparation and dissemination of Christian literature. Dr. Murdock, as Secretary of the Madras Branch of the Christian Literature Society and the Madras Religious Tract Society, reports the issues of both societies for the year as nearly 2,500,000, while £5,608 ($28,000) was realized from the sale of books.

2. Arabia: The Mission in South Arabia, founded by the Hon. Ion Keith Falconer at Sheikth Othman, Aden, in 1885, works especially among the Mohammedans and Somalis in the vicinity, but has done good work for Galla captives reduced from the desert. There are reported 3 missionaries and 5 native workers. The work is still, to a considerable degree, pioneer in its character, and the small number of conversions (7 communicants) has not warranted the organization of a church. The school, with its 16 pupils, is a nucleus for good; but the great number of nomads, who, excepting the habitations of which 4,600 patients were treated by the 2 medical missionaries and 2 assistants, while the audiences at the medical services numbered nearly 20,000.

3. China: The Manchuria Mission suffered heavily during the Boxer outbreak, but chiefly in the general disturbance of work. The missionaries, in Hail-cheng, Liao-yang, Mukden, Kat-yuen, Ta-ping, and Liao-yang, gathered round New-chwang in safety, while those in Asihio escaped to Vladivostock. The two native pastors' escape, the several evangelists and alarge number of the native Christians lost their lives. Churches, hospitals, mission houses, schools, and a great many private homes were destroyed, and there was much suffering, as well as complete disorganization of work. With the return of peace the missionaries were able to go back to their stations, and, after two years, the work has assumed its normal character. In the fall of 1902 the transference of the Church was followed by a special spiritual revival, with a new spirit of consecration.

The report (1903) shows 37 missionaries, 97 native workers, 12 organized churches, 75 outstations, 5,994 communicants. The college at Mukden had a student body of 16 in the theological department, and in 30 other schools there are 349 pupils. In the medical department the 10 missionaries and 8 assistants treated over 4,000 cases, reaching nearly twice that number by their services.

The future of this mission will be watched with much interest as Russian power in Manchuria grows stronger.

4. Africa: (1) South Africa, including 3 missions: Kafiria, Transkei, and Natal.

The first mission to South Africa accompanied a Glasgow colony in 1821, and started work on the Chumie River. In less than two years five Kafirs were baptized, and the work progressed, new stations being occupied, the most important being Lovedale (1830). In 1844 the mission of the Church was followed by the work of the Free Church, and every department received a new impulse. The Kafir war (1846) broke up the mission temporarily, but a new start was made and after some years two missions were formed: Kafiria, south of the Kei River, while that on the North was called the Transkei Mission. In 1847, in response to a special appeal from Dr. Duff, who visited the field, another mission was established in Natal. Among the important stations are Kafiria, Lovevade, Burnhill, Prie, Macfarlean, etc.; Transkei, Cunningham, Paterson, Buchanen, etc.; Natal, Pietermaritzburg, Impolomeni, Gordon Memorial, etc.

The best known work of these missions is that of the Lovedale institution, which has furnished the model or the inspiration for a great many efforts in South Africa besides industrial training in the Christian communities. It is principal, Rev. Robert Stewart, D.D., has been a leader in this department of mission activity. Lovedale, however, is far more than a mere industrial school. It is a college and a theological seminary as well, and being distinctive and non-sectarian, it is a great power in all the mission fields of South Africa. The kindred institution at Blythswood, in the Transkei Mission, was established at the earnest request of the natives, who themselves contributed £4,500 for it.

The three missionaries reported (1903) 96 missionaries and 81 native assistants, 28 organized churches, 32 outstations, 14,995 communicants.
262 schools, with 13,062 pupils. The Lovelade Institute has 830 pupils, and the Blythwood 219. Medical work is carried on to some extent, but not to the degree as in India and China.

(2) West Africa. Old Calabar Mission: In 1846 the Rev. Hope M. Waddell, with three associates, opened a mission on the Calabar River in the auspices of the United Presbyterian Church, but specially representing the negroes of Jamaica. To some extent the hope that the West Indies would conduct this work has been realized, but the control of it came into the hands of the Scotch Church and in 1847 under the auspices of the Free Church it became a part of the united work. The first missionaries were made welcome by the native chiefs, reduced the language (Ejik) to writing, established schools, and despite the fact that the section is one of the hardest for evangelistic work in Africa, there has been good success. There are (1903) 41 missionaries, 36 native workers, 8 organized churches, 13 outstations, 750 communicants, 32 schools, with 611 scholars. There is a training institution, with 114 pupils, and medical work is represented by 2 mission hospitals, 11 native dispensary, and 23 native dispensaries.

(3) Central Africa. Livingstonia Mission: In 1875 the Free Church responded to the appeal of Dr. Livingstone by sending a band of missionaries to occupy the lands around Lake Nyasa and half way north to Lake Tanganyika. The first settlement was made at Cape Maclear. The Livingstonia Institution was later removed to Kondowi, a more eligible site. The mission extended to Bandawe, Karonga, and particularly into Ngoniland, among a tribe of Bantu. Notwithstanding the wild character of the people there has been considerable success in the work. There were (1903) 32 missionaries, 4 native workers, 7 organized churches, 2,027 communicants, 207 schools, with 15,765 scholars. The medical work is more fully developed than in the other Africa missions, and with excellent results.

5. New Hebrides Mission: Here the United Free Church reports as its share of the work of the Synod 4 missionaries, 2 native pastors, 3 churches, 7 outstations, 165 communicants, 30 schools, 348 scholars.

6. East Indies. (1) Jamaica: The first work of the United Presbyterian Church in 1847 was to take over from the Scottish Missionary Society the work commenced in Jamaica in 1835, and which had already developed until four stations were occupied. The work suffered from pestilence, hurricanes, etc., and for some little time was not pressed, owing to the demands in other fields. With the impulse to work in West Africa, there came new life into the mission, and the report (1903) shows 37 missionaries, 20 native workers, 64 organized churches, 64 outstations, 12,066 communicants, 64 schools, 7,130 scholars. There is a complete church organization, including 6 presbyteries, and the work is scarcely foreign mission work, except in its history.

(2) Trinidad: This island was first occupied in 1835 at Port-Of-Spain. Later stations were opened at Arouca and San Fernando. There were (1903) 4 missionaries, 1 native pastor, 4 churches, 668 communicants. In 1839 the Free Church sent some missionaries to Syria, who located at Shweir in the Lebanon, and developed a considerable educational work in connection with the Lebanon Schools Society. In 1901 this work was transferred to

THE ENCYCLOPEDIA OF MISSIONS

658

the Presbyterian Church (North) in the U. S. A., the Dr. Carlaw remains on the roll of missionaries of the United Free Church.

Women's Foreign Mission of the United Free Church of Scotland: Headquarter, 15 North Bank St., Edinburgh. The Woman's Foreign Mission was founded in 1871, and organized in 1843 to carry on the work begun by the Ladies' Society for Female Education in India and Africa in 1837; the United Presbyterian Church of Scotland Zenaia Mission (1880), and the Ladies' Kaffrarian Society, which had been founded in 1830 in Cape Colony with the United Free Church, have all been merged in the United Free Church in the one society, with title as above.

III. The United Original Secession Church: Headquarter, Shawsland, Glasgow, Scotland. The few churches that declined to join the United Presbyterian Church in 1847 established in 1872 a station at Seoni, in the Central Provinces of India. They report (1901) 3 missionaries, 20 native workers, 3 outstations, 20 communicants, 2 schools, 325 scholars.

IV. Reformed Presbyterian Church of Scotland: Headquarter, Paisley, Scotland. A few churches preserving the principles of the Covenanter Church have joined with the Reformed Presbyterian Synod of Ireland in the conduct of mission work in Syria.

SCOTLAND. NATIONAL BIBLE SOCIETY OF: Headquarter, 5 St. Andrew Square, Edinburgh, Scotland. The National Bible Society of Scotland was formed by the union, in 1861, of the Edinburgh and the Glasgow Bible societies, founded respectively in 1809 and 1812, together with other leading Bible societies of Scotland. The Society carries on a large work both at home and in foreign countries. The Home Mission supplies large numbers of the Scriptures annually at reduced rates to the poor and to various missionary and benevolent associations; it circulates the Gaelic Bible throughout the Highlands and islands of Scotland and in the regions of North America where Gaelic is spoken, and aids the distribution of the Scriptures in Ireland. As a Colonial Mission it distributes the Scriptures throughout all the British colonies and dependencies. As a Continental Mission it works in nearly all European countries.

As a more distinctively Foreign Mission the National Bible Society of Scotland publishes in the vernacular and distributes by means of colporteurs the Scriptures in Africa, China, India, Japan, South America, and Turkey. It has distributed thousands of Scriptures among the Tatar tribes of Mongolia, and it was the first to establish regular colportage in Korea.

The Society has recently published the Bible in the Eiik for Old Calabar, Africa; the New Testament in one of the Malay dialects and in Chinyan, the language spoken by 500,000 in Central Africa; translations in the Tannese (New Hebrides), Motuan (New Guinea), and Mandarin (China) are also in preparation, and the Society has had its share in the Japanese version of the Scriptures, and in the West-Vlayan dialects. This Society has not carried on its work chiefly through specially appointed agents, but has worked in connection with the various missionary societies, finding this method productive of good results, especially in view of the principle and practice of allowing its colporteurs to engage in secular work together with the Scriptures in
Roman Catholic and heathen countries. It was, however, the first Society to appoint a special agent for Japan, Mr. Robert Lilley, who served there for ten years, and it has taken a prominent share in the arrangements by which the three Bible Societies of England, Scotland, and America carry on the work there conjointly.

The circulation for 1902 was:

More than half the entire distribution was in China, 562,869, the great majority being portions. Next to China came India, 112,059; Japan, 48,844, while in Germany, 56,213 were distributed, and in Spain, 33,281.

**SCOTTISH EPISCOPAL CHURCH, Foreign Mission Agency:** Formerly the Episcopal Church of Scotland collected funds for the Church of England Missionary Societies, but under the consecration of Bishop Cotterill as Bishop of Edinburgh the contributions of the churches in the seven Scottish dioceses were devoted to missions in India and South Africa through their own Society, the Foreign Missions of the Scottish Episcopal Church, the forerunner of their “Association for Foreign Missions.” The SPG even went so far as to hand over to the Scottish Society contributions from Scotland over and above a fixed amount each year. This latter arrangement, however, was annulled in 1900. Bishop Cotterill, having labored as a missionary of the CMS in India for twelve years, and for another twelve in South Africa—Kaffriaria—which he had been consecrated bishop, felt a peculiar interest in those two fields of his former efforts, and organized a permanent union with them. This board sends out contributions every year to Kaffriaria for the general purposes of the diocese of Independent Kaffriaria, now called St. John’s, and also many sums to be devoted to special objects in connection with the various churches and schools in India. The Society also provides the necessary funds for the maintenance of the missionary schools at Chanda, in Central India, which are under the direction of the Bishop of Calcutta, and forwards sums entrusted to it for any mission work being carried on by the Church of England, or any Church in communion with her.

**SCOTTISH MISSION INDUSTRIES COMPANY (1903):** This is not a missionary society nor a benevolent society in any sense. It is a joint stock company organized by friends of the UFS, with a capital of $50,000 ($30,000 paid in), established in order to foster industries in mission fields, by which famine orphans and persecuted converts may find a livelihood. It is not in any sense a training school, employing those whom the missions have already trained. The stockholders will receive 5 per cent. interest on their stock, and they are pledged, after a reserve has been established equaling one-half of the paid-up capital, to have all surplus profits paid over to the UFS.

Of course only such business as promises return will be taken up. The Company has commenced operations by undertaking the working of the UFS mills and factories in India, which will be conducted on a business basis.

**SCUDDER, Henry Martyn:** Dr. Scudder was the son of the famous pioneer missionary, Rev. John Scudder, M.D., and was born on the Island of Ceylon, February 5, 1822. After graduating at New York University in 1840 and Union Seminary in 1843, he was appointed missionary of the ABCFM, and embarked, with his wife, for Madras, May 6, 1844. The "Missionary Herald" stated at the time that "this is the first instance in which the son of a missionary has been sent forth as a preacher to the heathen." He was connected with the Madras Mission till 1851, when, after his exploration of the Arcot district, he was asked to go to Burma, where, as resident giving him facility of access to the people. The Arcot Mission was detached from the Madras Mission in 1853, and was carried on wholly by the Scudder family, consisting of five brothers and their wives and one sister. In 1857 this mission was transferred to the Board of the Reformed Dutch Church. In 1864 Dr. Scudder returned to America, and was pastor of prominent churches in San Francisco, Brooklyn, and Chicago. In 1857 he joined his son and daughter in Japan and there he rendered excellent service for three years. He died in Manchester, Mass., June 4, 1865. He was a man of great abilities, of fine address, and of commanding power in the pulpit.

**SCUDDER, John, Jr., M.D.:** Born October 29, 1835. Died May 23, 1900. Dr. Scudder came to America from Ceylon, where his parents resided, to obtain his education, studying first at Hudson, Ohio, where he united with the church, and at once determined to give his life to the missionary work. He graduated from Rutgers College in 1857, and from the Theological Seminary at New Brunswick in 1860. He was licensed to preach and ordained the same year. He received his medical degree from the Long Island Medical College, and the degree of Doctor of Divinity from Rutgers College in 1897. Having early in life decided upon his course, he had Christian service in foreign lands in view during his college life, and when he left this country as a missionary of the RCA he was well equipped for his work. In 1861 Dr. Scudder sailed for India, arriving on the field in July. He labored successively as follows: Chittur, 1861-1863; Arni, 1863-1865;
Acret, 1865-1876; Vellore, 1876-1877. In 1878, with Mrs. Scudder, he returned to America, after seventeen years of continuous service on the field, and took up his residence for four years in Nebraska. In 1882, returning to India, Mrs. Scudder following a year later. Dr. Scudder was stationed as follows: Arni, 1882-1885; Tindivanam, 1885-1892, building there the commodious mission house and church; Vellore, 1892-1894. In this latter year he and Mrs Scudder made their second journey to America, taking up their residence for three years in New Brunswick. In 1897 Dr. and Mrs. Scudder returned to India and were again stationed at Vellore. It was in connection with this portion of the field that Dr. Scudder’s last work was done. Dr. Scudder’s children have, with a single exception, followed his footsteps into the ministry, and three of them to missionary service.

SCUDDER, William W.: Born in 1823. Died March 4, 1895. Son of Dr. John Scudder, who gave eight daughters to the missionary work in India. Coming to this country in his boyhood, he was converted during a revival in Springfield, Mass., in the winter of 1835-36. In 1839 he united with the Presbyterians church at Elizabeth, N. J. Entering the College of New Jersey, graduated in 1841, and entering the Theological Seminary at that place, he pursued the regular course of study for two years. By special permission, he devoted the third year to studies most adapted to fit him for the missionary work. In 1846 he returned to Ceylon, under appointment by the American Board, where he continued until 1851, meantime being stationed at three different places. After a brief visit to America, he sailed for India in 1852, and with two of his brothers, Henry Martyn and Joseph, established the Arcot Mission of the RCA and organized the Classis of Acret. He remained in India for twenty-two years, diligently doing his work and occupying in turn several stations of the mission. In 1873 family circumstances seemed to make a return to this country necessary, and the next year he was appointed to the Congregational church at Glastonbury, Conn., which he served for eleven years. In 1885, the over sixty years of age, the way being opened for a return to India, he sailed thither, laboring there for nine years, first at Madanapalle, afterwards to the mission at Palmaner, as General Synod’s professor of theology in the seminary in the Arcot Mission.

SEAMEN; Missions to: As early as the latter part of the 17th century some sermons were preached in England on behalf of work for seamen, but it was not until 1780 that a society was organized, at first called “The Bible Society,” whose special field was the army, but which soon was made to include the navy, and became “The Naval and Military Bible Society.” In 1814, prayer meetings for sailors were started in London, and in March, 1817, the first Bethel flag (a white dove on blue ground) was unfurled on the "Zephyr" of South Shields. The next year saw the first London Society formed, and 1819 the Bethel Union Society. The Sailors’ Magazine was started in 1820, yet still so strong was the prejudice against the work that even in 1828 the King was petitioned to abrogate an order by the Lord High Admiral prohibiting the distribution of the magazine. Existing seamen’s missionary societies in the empire of Great Britain, distinct from local organizations, which limit the prosecution of work to their own ports, are: (1) The British and Foreign Sailors’ Society (at Sailors’ Institute, Shadwell, London, England), (2) The London Missions to Seamen (Established Church of England), whose operations are, for the most part, carried on at sea. Its chaplains are at fifty-two English and eight foreign seaports. Local English societies for seamen are at Liverpool (formed in 1821), Glasgow, and at other ports.

Evangelical Lutheran missions to seamen are prosecuted by societies with headquarters in Scandinavian countries, whose homes in our day the larger number of sailors for the world’s mercantile marine.

The Norwegian Society—Foreningen til Evangebets Forkyndelse for Skandinaviske Sømmands friommed Havne (or, in English, the Society for the Propagation of the Gospel to Scandinavian Seamen in Foreign Harbors)—was organized at Bergen, Norway, 1864, and does an extended work.

The Danish Seamen’s Mission Society also has stations in different countries, employing ordained preachers, where there are seamen connected with several of the Swedish and Norwegian societies; and there is a specific Sea-man’s Society in Finland.

American Missions: The first Society for Seamen in the U. S. was formed in Boston in 1812, but did not continue long. A movement was started in New York City in 1816 which resulted in 1817 in The Marine Bible Society. The Society for Promoting the Gospel among Seamen in the Port of New York, commonly known as the New York Port Society, a local organization, was formed in 1818, and laid the foundations of the first mariners’ church erected in the United States, in 1820. These movements led to similar organizations at Charleston, S. C. (1819); Philadelphia, Pa. (1819); Portland, Me., and New Orleans, La. (1823); at New Bedford, Mass. (1825). In the latter year there were in the United States seventy Bethel Unions, thirty-three Marine Bible Societies, and fifteen churches and floating chapels for seamen. In 1828 there was organized, in New York City, the American Seamen’s Friend Society, which has broadened the scope of such work to include, not merely the spiritual, but moral and physical, well-being of the sailors. Its object, as stated, is to secure this “by promoting in every port boarding-houses of good character, savings-banks, register-offices, libraries, museums, reading-rooms and schools, and also the ministration of the Gospel and other religious blessings.” It commenced foreign work very early, sending Rev. David Abel to Canton, China, in 1830. Since then it has extended its work all over the world, having chaplains and Bethels in various ports of Europe and South America, India and Japan, as well as in the U. S.

There is also a Seamen’s Friend Society in Boston, Mass., for a time auxiliary to the New York Society, but since 1888 independent. The Church Missionary Society for Seamen in the city of New York represents the work of the Protestant Episcopal Church. The other societies are undenominational. Mention should be made also of the extended work of the WCTU, and of a large number of Seamen’s Rests and Bethels under private management. The various tract societies also number the seamen among their book-stands. Especially since the war with Spain
the International Committee of the YMCA has had a most successful work of this kind. The YMCA and YWCA organizations also have had a share in the work.

SEBAPALA: A settlement in Basutoland, South Africa, situated to the S. of the Orange River, about 53 miles S. E. of Morija. Station of the Paris Evangelical Missionary Society (1885), with (1903) 1 missionary and his wife, 14 native workers, 18 outstations, 1 place of worship, 1 Sunday school, 22 day schools, and 755 professed Christians.

SECHUANA LANGUAGE: Belongs to the Bantu family of African languages. It is used by the Bechuana tribes forming a large portion of the native population of South Central Africa, from the Orange River to the Zambezi. It is written in Roman letters.

SECUnderabad: A military cantonment in the native state of Haidarabad, India; situated 6 miles N. N. E. of the city of Haidarabad, and covering 19 square miles of territory. The largest military station in India. Climate during rainy season very unhealthy; at other times hot, but agreeable. Altitude, 2,787 feet. Population (1901), including troops, 74,000. Station of the SPG (1842), with (1903) 14 native workers, 1 place of worship, 2 day schools, 2 boarding schools, and 785 professed Christians, of whom 297 are communicants. Station also of the AREH (1875), with (1903) 2 missionaries and their wives, 3 women missionaries, 18 native workers, 1 outstation, 1 place of worship, 6 Sunday schools, 1 boarding school, 4 day schools, and 210 professed Christians, of whom 195 are communicants. Station also of the ME, with 1 missionary and his wife. Station also of the WMS, with (1903) 3 missionaries, 1 woman missionary, 36 native workers, 3 outstations, 3 places of worship, 1 Sunday school, 8 day schools, 1 boarding school, and 368 professed Christians, of whom 218 are communicants.

SEnS: A town in the United Provinces, India, situated 5 miles N. of Agra; contains many historical remains, among which is the tomb of the Emperor Akbar (1566), a grandson of Baber, Turkish conqueror of India. Station of the CMS, with (1903) 1 missionary and his wife, 25 native workers, 1 place of worship, 9 day schools, 1 boarding school, 1 orphanage, and 484 professed Christians, of whom 76 are communicants.

SEFULE: A village in British Central Africa, situated in the Barotsi region, about 15 miles N. E. of Nalolo, on the chain of hills bordering the Barotsi plain. Station of the Paris Evangelical Missionary Society (1886), with (1903) 3 missionaries and 1 dispenser. Some write the name Sefula.

SELANGOR: A state in the Malay Peninsula belonging to the group of Federal States under British protectorate. It lies south of Perak, and has an area of about 3,500 square miles of territory. The capital is Kuala Lumpur. Station of the PB, with (1903) 3 missionaries and their wives and 2 women missionaries. Station of the SPG, with (1903) 2 missionaries.

SELEPENG: A settlement in the Bechuana-land Protectorate, South Africa, situated on Fati River, about 23 miles N. W. of Francistown station on the Bulawayo Railroad. The people belong to the Babarotse tribe, who are somewhat inclined to move the sites of their villages, to the discomfort of missionaries, whose houses are less portable. Station of the Mission Board (1890), with (1903) 1 missionary and his wife, 4 day schools, 1 Sunday school, 11 native workers, and 487 professed Christians, of whom 115 are communicants.

SELWYN, George Augustus: Born at Hampstead, England, in 1809; died, April 11, 1878. Studied at Eaton; graduated at Cambridge University in 1831. It was the fine vigor of his life that made him one of the captains in the first University boat race in 1829. He was ordained deacon in 1833, and took the curacy of Boveney; ordained priest in 1834; became curate of Wind- sor in 1839; was consecrated Bishop of New Zeal and in 1841; received the degree of D.D. the same year, from both Cambridge and Oxford; and was received in the church. He early saw a great truth, too often neglected by missionaries, which he later expressed in this form: "The surest way to spread the Gospel to the uttermost parts of the earth is by building up the Colonial churches as missions of the Home churches. It will not work in the Home to train work to which he was called, and he became at once a tower of strength for the evangelization of New Zealand and all the surrounding regions. When he preached his farewell sermon before leaving England, his words deeply impressed a boy of fifteen, who was later to be Bishop J. C. Patteson. In 1855, when Bishop Selwyn returned to Auckland, after a visit to England, he had with him, as a missionary, the fruit of that early sermon in the person of Mr. Patteson, afterward the missionary Bishop of Melanesia.

Bishop Selwyn arrived at Auckland in 1842, and in 1843 he established there St. John's College for the education of a native ministry. On the voyage out he had spent much of his time in compiling from the Rarotonga, Tahiti, and Maori New Testament, a comparative grammar for these three dialects. He was, therefore, somewhat prepared to supervise the work of educating a native ministry. Here, again, he was far in advance of many missionaries of that time, in realizing the vital necessity of using native laborers for pioneer work, who had been trained by foreigners. It was a maxim of his that in missions one must "use black nets, with white cords." From the very outset, too, St. John's College gave instruction in medicine and surgery. On the voyage to New Zealand, Bishop Selwyn's active, inquiring mind led him to study navigation, with the captain of the ship as his teacher. This stood him in good stead when, besides attending to the spiritual wants of his colonial diocese, he extended his field into Mela-nesia, navigating his own ship, "The Southern Cross," in his visitation voyages. When after twelve years of absence he visited England in 1854, he had made seven such voyages through the Melanesian Islands, had visited fifty islands, and from ten of these he had induced fifty youths to go to the college to prepare for work among the cannibals. He was deeply impressed on finding at some of the southern Melanesian islands mission-aries from Nova Scotia. The discovery filled him with zeal for carrying out his doctrine about making the colonies centers of missionary effort. He took a prominent part in organizing the Australian Board of Missions with the advice of the Church in Australia of the Melanesian Mission as its peculiar field.

Bishop Selwyn's talents, character, and services placed him at the head of the colonial
bishops at the Lambeth Conference, in 1867, which he attended. While from his social position, talents, and acquirements he might have commanded the highest ecclesiastical appointments, he chose the obscurity, privation, and drudgery of a missionary life among degraded savages for the sake of his Master. He thus spent 27 years among the heathen, content if by any means he might save some. At last, on the earnest request of the American Board, he accepted the pastorate of the church in 1868. He twice visited the United States, and exercised a powerful influence by his impressive addresses.

In 1875 he was taken ill, was soon partially paralysed, and continued to fail until the 11th of April, when the end came. He died saying, "It is all light."

SENGELPA. See CHENGELPA.

SEONI: A town in Central Provinces, India, situated in the Hoshangabad district, 24 miles W. of the city, the town is an assembly of public gardens, a fine market-place, and a handsome tank. Climate healthy; temperature moderate. Population, 10,000. Station of the United Original Secession Church (1872), with (1900) 1 missionary and his wife, 5 native workers. Church opened, 1880; 112 members; 2 schools, 1 school; 1 orphanage.

SEORAN: See SEONI.

SEOU: Capital of Korea, situated about 30 miles E. by N. from its port, Chemulpo, on the right bank of the Han River, in a hollow surrounded by rocky hills. It was founded in 1392 by the first king and founder of the present ruling dynasty of Korea, who chose the site for the residence and for the safety and strength of his fortress. The city is long and narrow, and its shape is an irregular oblong, and lies lengthwise in a valley whose trend is from northeast to southwest. The dimensions of the city are, roughly stated, 3 by 25 miles. On the north is a succession of magnificent granite hills culminating in granite peaks 3,500 feet high. On the south side is a chain of hills reaching the height of 1,500 feet. The most striking work of art in the landscape is the city wall, which crosses river, plain, and hills, and climbs the mountains encircling the whole city proper. At intervals are massive and imposing gates, all appropriately named, and through the largest of which the great highroads, starting from the royal palace, run to all parts of the kingdom. In the military system of the country this walled city is the center of a group of fortresses which, before the days of rifled cannon, were strong and trustworthy. The scenery from the walls of the city, and indeed from many points within the city, is magnificent, and the natural situation is one of the best for health and safety. An affluent of the Han River, with branches that flow into nearly every part of the city, traverses Seoul from east to west, and is utilized as a drain and for washing clothes.

To most travelers the aspect of Seoul is uninteresting, shabby, and squalid. Nevertheless, the gay costumes, full of varied color, clean and brilliant with starch, and the peculiar gloss which the Korean women contrive to confer upon the male garments, make the streets in fair weather wear a very bright and animated appearance. The houses are about 8 or 9 feet high, built of stone and mortar, and mostly roofed with tiles. The windows are under the eaves. A long street, about 200 feet wide, divides the city into nearly two equal portions. In the northern half are the walled enclosure containing the king's palace, and more important public buildings. The main entrance to the palace is the south, and the palace in number. From the central and principal gate runs a street 60 feet wide into the main street, intersecting it at right angles and dividing the northern section of the city into eastern and
western quarters. This point of meeting of these two streets is regarded as the center of the city. Here stands an imposing pavilion, the Chong-kah, or belfry, in which is hung a large bell over seven feet in height, which is rung every morning and evening. The street leading from the bell to the Great South Gate is as wide as the main street. It is said that the site of this pavilion of the regent, in 1866, erected an inscribed stone denouncing as traitors to their country all Koreans who were friendly to European intercourse. Another feature in this center of the city is the rows of large warehouses, two stories in height, the roofs of which are adorned with lofty cupolas and shops opening into a central court, instead of into the streets. These large storehouses are not private property, but are owned by the great trading guilds, which enjoy a notable monopoly. Along most of the main streets there are thousands of peddlers' booths erected, at which most of the retail trade of the city is done. These shabby-looking, temporary structures greatly mar the effect and narrow the space of the great thoroughfares. Outside of the buildings in the royal enclosure there are three palaces—two belonging to the government, and the third to the king. The height of the several mansions is shown in the relative amount of land occupied. The offices of the six ministries, or government departments, are small houses, differing but slightly from the better sort of dwellings. Since the residence of foreigners in Seoul a number of the native dwellings have been altered into good-looking houses, the Korean house lending itself more easily to the convenience of Western people than the Japanese. Many Japanese, apart from thelegation people, and probably a larger number of Chinese, live in Seoul, engaged in commercial pursuits. No other city in Korea has so large a number of natives of the official class, including retainers of the nobles and office-holders. Nevertheless, the main part of the city is celebrated for the narrowness and filthiness of the streets. The population within the walls is estimated at 200,000, with about 50,000 living outside the walls. It was here, in the capital, that the Chinese costume and coiffure of the Ming period (1368-1628) was introduced, and became the still fashionable and national Korean dress. In June, 1592, Seoul was captured by the Tatars, and the city occupied during parts of several years by the Japanese during the war from 1592-97. In 1637 the Manchu Tartars captured Seoul, compelled the king and his ministers to perform kow-tow, or the nine prostrations, and to set up a great memorial stone commemorating the clemency of the Manchu general. In 1653 Hawel and his fellow-Dutchmen visited Seoul as shipwrecked prisoners, finding other Hollanders there. In 1777 Christianity entered Seoul through some members of the embassy to and from Peking; in 1794 the first Chinese Jesuit priest, who was beheaded in 1801; in 1836 the first French priest, Maubant, followed by Bishop Imbert, who, in 1839, shepherded 9,000-believers, and was decapitated September 21 in that year. In March, 1866, nine French priests were executed on river flats in front of the city, and on March 25 from the French war-vessels, "Démolîde" and "Tardif," piloted by an escaped French bishop and native Christians, the flag of France floated, causing a cessation of all business for several days. The French invasion took place in October, when two native Christians were beheaded and their blood poured into the river over the place of the anchorage of the French ships. The riot and attack on the Japanese Legation July 23, 1882, the coup d'état and battle of the Chinese and Japanese troops December 4 to 7, 1884, and the funeral of the ex-queen, a spectacle of unprecedented magnificence, have created in Seoul an impression that in autumn day of 1890, are among the notable historic events in Seoul. The following missionary societies have establishments in Seoul: PN (1884), with (1903) 10 missionaries and their wives and 4 women missionaries, 20 native workers, 19 Christian families, 12 shops and 11 school in the district, 10 day schools, 1 boarding school, 1 dispensary, 1 hospital, 1 printing house, and 1,430 professed Christians; ME (1885), with (1903) 2 missionaries and their wives, 6 women missionaries, 8 native workers, 3 places of worship, 7 outstations, 1 printing house, and 624 professed Christians, of whom 433 are communicants; SPG (1890), with (1903) 3 missionaries, 2 places of worship, and 37 professed Christians, of whom 13 are communicants; MES (1896), with (1901) 2 missionaries and their wives, 2 women missionaries, 2 schools, 7 Sunday schools, and 262 professed Christians. The BFBS has an agency here employing 20 native workers. The YMCA has established an agent here (1901).

SERAMPUR: A city in Bengal, India, on the banks of the Hugli, some 13 miles above Calcutta, and on the opposite (east) bank of the river. Serampur was long a Danish station, but in 1815 all the possessions held by the Danes in India were ceded to the East India Company. It was to Serampur that Carey, Marshman, and Ward, the great Baptist missionaries of the early part of the 19th century, retreated; and there, under the Danish flag, they found an asylum from the opposition of the English authorities at Calcutta, who, until the intervention of Parliament in 1814, were unwilling that missionaries should find a foothold in their possessions. The new charter contained a clause legalizing the residence in India of missionaries and philanthropists. The Baptist missionaries not only worked diligently in preaching the Gospel in Serampur and surrounding towns, but established a press, printed books and tracts, assembled their translators from all parts of the empire, prepared and published translations of the Bible in the principal languages of Hindustan, and even in Chinese. These versions were afterward found to be of comparatively small value, owing to the haste with which they were prepared; and the inadequate facts enjoyed for correct translation into the idiom of the various Indian tongues; but nothing can better illustrate the diligence, zeal, and energy which have made the Baptist Mission at Serampur famous in the annals of modern missions than the fact that they were made at all. A church, college, schools of lower grade, and a good library were established at Serampur, and the mission is still in active and successful operation. The wide influence of this mission has been well summarized as covering the following parts of India:

India owes to the Serampur mission, besides the first translation of the Bible into many of its northern dialects, the first newspaper in Bengali; the first steam-engine, paper-mill, and large printing press; the first efforts at education of native girls and women, the first savings bank, and many other benefits directly or indirectly the
result of the labors of Carey, Marshman, Ward, and their associates.

Station of the BMS (1799), with (1903) 3 missionaries, two of them with their wives; 17 native workers, 3 Sunday schools, 1 day school, 1 theological class, 1 boarding school, and 222 professed Christians. Also station of the BZM (1873), with (1903) 1 woman missionary, 7 native workers, 3 Sunday schools, 3 day schools. Some write the name Sarampore.

**SEROWE:** A town in Bechuanaaland, South Africa, the principal center of the Bambangwato tribe, which formerly had its chief town at Sho-shong, and later at Palapye. In 1902 the tribe suddenly decided to move to Serowe and did so, abandoning Palapye. The new town is on a high upland, about 50 miles N. W. of Palapye, and 52 miles W. by N. of the Palapye railway station. Population, 25,000. Station of the LMS (1862), with (1903) 1 missionary and his wife, 1 woman missionary, 9 native workers, 33 day schools, 26 Sunday schools, and 5,569 professed Christians, of whom 697 are communicants.

**SERVIA:** A kingdom in Europe, bounded by Austria on the north, Rumania and Bulgaria on the east, Turkey on the south, and Bosnia on the west. In general, the surface is mountainous and covered with dense forests. The Danube and several other large rivers drain the country. Its total area is 19,426 square miles, of which over half is under cultivation. Cereals and grapes are the principal products.

The independence of Servia was secured by the Treaty of Berlin (1878), and since January, 1889, it has been a kingdom. The legislative authority is exercised by the king, together with the national assembly, which is composed of deputies elected by the people, indirectly and by ballot. Personal liberty, liberty of the press and conscience are guaranteed. Population in 1902, 2,600,000.

The Servians, or Serbs, belong to the most spirited of the Slavonic races, and are noted for the love of freedom and bravery. Poverty is rarely seen, for even the poorest have some sort of freehold property. Thus 97 per cent. of the country population are engaged in agriculture. The Greek Church is the state religion of Servia, but in 1902 there were 9,000 Catholics and 1,200 Protestants.

Education is conducted in elementary schools, maintained by the municipalities, and various technical schools and schools for higher education, which are supported entirely by the state. Attendance is compulsory, and no fees are required from the pupils. The main mission work in Servia is that which is carried on by the colporteurs of the BFBS.

The Servians form an important branch of the Eastern Slavs, or, as they are sometimes called, the South Slavs. They inhabit the kingdom of Servia, Bosnia, and Herzegovina, and part of Hungary. They number about 4,000,000, and belong to the Eastern or Orthodox Church, with the exception of about half a million Mohammedan Servians in Bosnia.

The Servians settled in the first half of the 7th century in the Balkan Peninsula, and their settlements spread over an extensive tract of land, comprising the present Servia, Montenegro, Herzegovina, Bosnia, and the Dalmatian coast. These various communities were ruled over by separate independent rulers called "Cana" or "Zhoopans," who were under the nominal authority of the "Great Zhoopan" residing at Rasse (Novi-Bazar), and all of whom originally were vassals to the Byzantine Emperor. Christianity was first introduced among the Servians by the Roman Church in the middle of the 7th century, but this introduction was not successful, and it was only in about 868-870 that the Orthodox Church was established by Greek ecclesiastics sent by the Emperor Basil.

In the beginning of the 19th century the Servians revolted against the Sultan to regain their political independence. They met with many vicissitudes and struggles they succeeded in establishing a semi-independent principality, under the suzerainty of the Sultan.

The Servian Church is ruled over by a Metropolitan residing at Belgrade, and bearing the title of "Metropolitan of all Servia." He is also the president of the Synod, who act as his counsellors and advisers; but the power of the Metropolitan and the Synod does not extend beyond the limits of the Servian kingdom. Bosnia and Herzegovina are under the jurisdiction of bishops nominated by the Greek Patriarchate and accepted to the approval of the Austrian Government. The Servians living in Austria-Hungary, and who also belong to the Orthodox Church, have a Patriarch residing at Carlowitz, who is chosen by a council and approved by the Austrian Government. He bears the title of Patriarch as an homage still in continuation of the Patriarchs of Ipek, who ruled over the Servians in former days. All the Servians belonging to the Orthodox Church use the Church-Slavonic language in their churches and the alphabet invented by Cyril in their literature. Their language belongs to the Eastern branch of Slavic languages, and is akin to the Bulgarian, from which it differs, however, considerably in its vocal sounds. Many Turkish, Greek, and Albanian words have entered into the formation of the modern Servian language under the influence of their ecclesiastical and their ecclesiastical literature, the Servians in the beginning of the 19th century used in their literature a language called Slavonic-Servian, a mixture of Church-Slavonic and Servian, with the elements of the former predominating. But, thanks to the genius and efforts of Verk Karadjitch, a self-made man, the Servian alphabet was modified to a certain extent to suit the pronunciation of the spoken language of the people, which was raised to the dignity of a literary language. In this way the Servian orthography became the most philological of all Slavic orthographies, and, in spite of the opposition the reforms of Karadjitch met with, they were officially sanctioned by the government in 1868, and accepted by all the Servians with the Cyrillician alphabet. Karadjitch translated almost the entire New Testament into the common language of the people, while some years later Danitchitch, a well-known Servian philologist and a follower of Karadjitch, did the same thing for the Old Testament; and both these versions have been accepted and are used by the British and Foreign Bible Society.

**SERVIAN LANGUAGE:** The Servian, which belongs to the Slavonic branch of the Aryan family, is spoken in Servia, Bosnia, Herzegovina, Montenegro, Croatia, Slavonia, Dalmatia, etc., and is more akin to the Russian and Wend than to the Bohemian and Polish languages. It is rich in vowels, and free from the accumulation
of consonants which render the other Slavonic tongues so harsh to the ear of a foreigner. Its sound is very soft, and one of the most Slavonic scholars of our age, Prof. Schafarik, in comparing the different dialects of the Slavonic family, makes the following remark: "Servian song resembles the tone of the violin; Old Slavonic that of the organ; Polish that of the guitar. The Old Slavonic in its psalms sounds like the loud rush of the mountain stream; the Polish like the bubbling and sparkling of a fountain; and the Servian like the quiet murmuring of a streamlet in the valley." The Servian is written with the Slav (Cyrillian) alphabet, and is beginning to possess a modern literature of its own.

**SESEKE**: A settlement in British Central Africa, situated in the S. W. part of that region, on the Zambesi River, about 400 miles W. of Salisbury in Rhodesia. The climate is very trying to Europeans because of malaria. Station of the Paris Evangelical Missionary Society (1890), with 1 native male teacher and 136 Christians in native churches. At Mâhî the CMS has a mission station, and works, mainly by its schools, among the creole negroes.

**SEYCHELLES**: A group of islands in the Indian Ocean; a dependency of the British colony of Mauritius. Missions are carried on by the SPG (1843), with 1 native male teacher and 136 Christians in native churches. At Mahé the CMS has a mission station, and works, mainly by its schools, among the creole negroes.

**SHAFTESBURY**: A settlement in the N. W. of Canada, situated on Peace River, in the S. W. part of Athabaska. Station of the CMS (1888), with (1903) 1 missionary, 1 native worker, 1 day school, and 26 professed Christians, of whom 10 are communicants.

**SHAHJAHANPUR**: A town in the United Provinces, India, situated in the Rohilkhand division, about 55 miles N. W. of Sitapur. Manufactures much sugar. Population (1901), 76,458, of whom 37,000 are Mohammedans and 36,000 Hindus. Station circuit of the ME, with (1903) 2 missionaries and 2 monitors. 1 woman missionary, 42 native workers, 5 places of worship, 1 boarding school, 1 orphanage, 15 day schools, 29 Sunday schools, and 385 professed Christians.

**SHANGHAI**: The most important emporium in China, and the city which shows more of Western civilization than any other settlement of Europeans, excepting Hongkong. It stands at the mouth of the Wu-sung River in the Province of Kiang-su, about 14 miles from the sea. There are two entirely distinct parts to the city: (1) The Native City; (2) The Foreign Settlement.

1. The Native City is very old. The first mention of it is found to be in 1015. In 1360 it became a district city. The British captured it in June, 1843, and it was the fifth of the treaty ports thrown open to foreign commerce. During the Taiping rebellion it was captured by the insurgents and occupied by them for 17 months, and when they were driven out in 1860 the eastern and southern suburbs were almost entirely destroyed. By virtue of its position it is the outlet for a vast territory. The Wu-sung and Hwang-pu rivers, the latter emptying into the Wu-sung at Shanghai, give it communication with the sea. (2) The Foreign City. Situated on all the region of the Grand Canal, while the Yangtse, only a few miles distant, makes it the outlet for the great Yangtse valley. The city, walled, three miles in circuit, stands in a large and fertile plain.

Along the water front are vessels which carry goods to and from the interior. The streets are broad, and on one of them live 100,000 of the most Slavonic scholars of our age, Prof. Schafarik, in comparing the different dialects of the Slavonic family, makes the following remark: "Servian song resembles the tone of the violin; Old Slavonic that of the organ; Polish that of the guitar. The Old Slavonic in its psalms sounds like the loud rush of the mountain stream; the Polish like the bubbling and sparkling of a fountain; and the Servian like the quiet murmuring of a streamlet in the valley." The Servian is written with the Slav (Cyrillian) alphabet, and is beginning to possess a modern literature of its own.

(2) The Foreign Settlement is a municipality, and is divided into the English (and American) and French concessions, is governed by municipal officers, and there is a mixed court where cases involving natives and foreigners are tried by both Chinese and English officials. Spacious docks line the river front for three miles. The streets are broad, overhung with trees, lighted with electric light, and nearly all the comforts of modern civilization are to be found. Jinnikishas, together with the native sedan chairs and wheelbarrows, provide abundant means of transportation, and horses and equipages of the latest European style are to be seen on the streets, especially along the Bubbling Wire Road, the fashionable drive. Hundreds of native boats ply for hire on the river, and with the shipping, the steam-tugs, and small boats, the water presents a most animated appearance. The land of the concessions belongs really to the Emperor of China, to whom a mere nominal rental is paid. The domestic and foreign mails are handled at seven post offices—at the consulates—in connection with the Chinese customs. Clubs, libraries, museums, in addition to the various mission establishments, present attractions to the visitor. Telephone service is provided. The great northern line of telegraph was connected with the settlement in 1871, and the city is now in cable communication with the rest of the world. The first railroad in China was opened in 1876 between this city and Wu-sung, at the mouth of the river; the Chinese Government bought it the ensuing year, tore it up, and sent the material to Formosa; it has been rebuilt, nevertheless, and has been in use since 1898.

From this port is carried on the most important trade in China, the value of it having risen from 65,000,000 taels in 1868 to 240,000,000 taels in 1901. It is the center for the export of tea and silk. According to the census of 1890, the population of the municipality, exclusive of the French concession, was 165,129; of the French concession, 34,722; the foreigners numbered only 4,285, of whom 444 were in the French quarter. Such a wide range of nationality is seldom found in any Oriental settlement; while the bulk of the foreign population is British, American, French, and German, yet twenty-one other nationalities are represented in varying numbers. Together with the estimated population of the native city, the total population of Shanghai is 1,500,000; it is the literary center of the foreigners in China. Here is published the best English daily paper, together with a considerable number of the missionary publications in China. At the Presbyterian Mission Press books are printed in
Chinese—not only religious, but scientific; and the Chinese Religious Tract Society issue from here their periodicals in Chinese, and the Chinese Recorder and the Messenger are published in English. On account of its central location, the beauty of its situation, the hospitality of the foreign community, it has been the place of meeting for the great Missionary Conferences.

Its importance as a center for religious work was early appreciated, and a larger force of missionaries, or representatives of more denominations, are probably not met with elsewhere in China. Mission societies now represented at Shanghai, with the last available statistics, are: LMS (1845), CMS (1845), PE (1848), Seventieth-Day Baptists (1847), MES (1848), PN (1850), CIM (1854), WU (1881), FCMS (1891), and German General Protestant Missionary Society (1886); altogether these societies now have 100 missionaries, men and women; 180 native workers, men and women; 46 places of worship, 6 hospitals, with dispensaries; 3 printing houses, and 1,921 professed Christians. The BFBS and the ABFS have each a center for their Bible work. The YMCA (1898) also has an agency here, with (1901) 2 men and their wives and a Young Men’s Christian Association.

SHANGPOONG: A village and district in Assam, situated in the Jaintia Hills. Station of the Welsh Calvinistic Missionary Society, with (1903) 1 missionary and his wife, 31 native workers, 57 outstations, 57 places of worship, 52 Sunday schools, 57 day schools, and 2,635 professed Christians, of whom 672 are communicants.

SHANG-TSING: A town in Kiang-si, China, situated 68 miles S. E. of Nan-chang-fu. The Taotist pope resides here. Station of the CIM (1893), with (1903) 1 woman missionary, 5 native workers, 2 places of worship, 1 day school, and 36 professed Christians.

SHAN STATES: A name given to some of the hill provinces which lie on either side of the boundary between Burma and Siam, and are tributary to the one or to the other. They are inhabited by the Shan, Laos and other tribes.

SHANS: The Shan are now principally found on the mountain plateaux between the Salwen River and the great Burman plain. They are one of the strongest of the Tai family, and first came from Tonquin on the east to the confines of Assam on the west, and from Southwest China on the north to the Gulf of Siam on the south. The kingdom of Siam is the only independent representative of this family. The differences of language are more of a broad dialectic character than of distinct cognate languages.

The original home of the Tai people was undoubtedly Southwestern China in Sze-chwan, and the country south of the Yangtse-kiang. Until c. 250 the Chinese Kingdom did not have its subsequent compact character, and its rule did not have any permanent hold south of that river. Doubtless at that date the Chinese began to press southward and slowly pushed the Tai people into Yunnan, where they resisted the advance of the Chinese for a long time. As early as the first half of the 7th century a strong Tai state, Nan Chao, had arisen, which maintained itself as the kingdom of Tai until it was overthrown by Kublai Khan in the 13th century.

The migration of the Tai into Burma was by the branch which we know under the name of Shan, and probably began about 2,000 years ago, at which time the Chinese commenced to push their conquests south of the Yangtse-kiang. Shan and Burman tradition places the beginning of the migration still earlier, and this tradition may be correct, tho of no political importance, as the restlessness of the nature of the Shans has always led them to frequent changes of residence. But the wars of Chinese aggression must be responsible for the great migration which found itself at home in the valley of the Shweli River, and thence spread over plateaux southwest of China, and across the northern part of the plains of Burma to Assam, and to the headwaters of the Irrawadi. As the oldest branch of the Tai family, the Shans have always been called the Long, or Great Shans, by the other branches of the family.

In the 7th century, out of this migration grew a large Shan kingdom, with a capital at Mong Maw Long in the Shweli valley. This kingdom maintained itself for several centuries with varying degrees of prosperity, until Anawratta, the Burman King of Pagan, by a victorious military career, established Burman supremacy for a time over much of the territory of the Shan princes. After the death of Anawratta, the Shan kingdom regained power, and later, during the times of Shan Kham Hpa and Sam Long Hpa, extensive military campaigns increased the territory of the kingdom to a size that it had never attained before. The prosperity of the Shan kingdom soon began to wane. From the 14th to the 16th century there was a gradual decadence of power. Distant dependencies shook off its suzerainty. Wars with Burma and China were frequent and weakened the central authority, and in the confusion many of the stronger principalities became semi-independent. In 1594 the Shan royal line ended. From that time Shan principalities became tributary to Burma, and Shan history merges into Burman history.

It was an evil day for the Shans when Burman suzerainty was established. In the Shan principalities west of the Irrawadi, and the mountains bordering on the eastern side of the Burman plain, successful efforts to Burmanize the people by the destruction of Shan books and the enforcement of study of the Burmese language in the monasteries were put forth by the Burman government. But, in the rest of the Shan states, the Shan language, as a patois in many country places in these regions, but the Burmese language has become so thoroughly the language of the people that mission work must be carried on in the Burmese language. The Shan language, however, maintains itself in the interior mountain regions.

Another cause of decadence was the frequent desolation of both border and interior principalities by war. The Shans, always restive under Burman rule, engaged in frequent rebellions put down by the Burmese with merciless cruelty, and also by civil wars fostered by the Burman policy. These wrought such a great loss of life that the interior principalities became sparsely populated, except in a few important centers. With the decline in population, for a century the wave of Kachin migration has moved from the Himalaya region southeastward as far as Hsenui and Mong-Mit, and has driven the Shans from much mountain country between Burma proper and China.

The Shans show their Chinese affinities in their physical characteristics and language. They have the Chinese type of face. Their complexion
is light, and the eyes are almost almond-shaped. There are a good number of common roots in the two languages. The greatest number of common roots are foreign words of Chinese origin, and this results in a large number of words of restricted meaning or limited use. There is a great difference from that of the Tibet-Burman family. There is an elaborated tonal system like that of the Chinese.

The Shan are a thrifty people. They are good agriculturists, but they excel in trading, for which purpose they visit Burma, Siam, and Western China. In this way they supply themselves with food and merchandise not obtainable in their mountainous country. In time of peace they are cheerful and hospitable, but in time of war they are cruel and vindictive, not only seeking to put to the sword all men of a hostile region, but slaughtering male children who fall into their hands.

The Shan are a zealous Buddhists. Current legends about the introduction of Buddhism are manifestly untrustworthy. The looser Buddhism of the Northern Vehicle was doubtless the first form of that religion to be introduced into Upper Burma from Northern India. At the time of Anawratta's succession to the throne of Pagan, if Buddhism was so exceedingly corrupt in doctrine, it has not been a bad, if not worse, in the more northern Shan kingdom. Anawratta became a zealous religious reformer and introduced the stricter doctrine and practice of the Southern Vehicle. Wherever Burman influence has predominated in the Shan principalities, the people have become strong Buddhists, proud of their religion and tenacious in adherence to it.

This strong adherence to their ancestral religion makes mission work among them slow and difficult. Buddhism, as held and practised by them, does not have much unpleasing restraint power over their lives. Every male child must, by religious law and by inflexible custom, be placed for a time in a monastery, where the tenets of Buddhism are diligently instilled into his mind. His mind thus becomes strongly possessed with Buddhist ideas and feelings, and when adult age is reached, there is at first little readiness to listen to a missionary, as they consider that it is one of the five great sins to do anything to bring about a schism in the body of Buddha. But when Shan becomes Christian, the people generally decided in their attachment to their new faith.

The first missionary work for the Shan was confined to immigrants into Lower Burma, who had fled from the oppression of the native princes. It was impossible at that time for a missionary to live in the Shan country. Since the annexation of the whole of Burma to the British Empire, mission stations have been opened successfully at Hsipaw, Mongnai, Nam Kham, and Kengtung in the Shan principalities, and a goodly number of converts have been made. The Bible has been translated into the Shan language, and some Christian literature prepared. The prospect is one of quiet, steady growth, rather than one of rapid development.

Elías (N.), History of the Shan, Calcutta, 1876; Colquhon (J. A.), and Hallett (H. S.), Amongst the Shan, London, 1885.

SHAN-TAU. See Swatow.

SHAO-HSING-FU: A city in Che-kiang, China, on the south side of the Bay of Hang-chau, about 60 miles W. by N. of Nanking. Its climate is warm and somewhat malarious. Surrounded by

a fertile and prosperous country, with a population of 150,000, it is one of the important cities of Che-kiang. At the last census (1903) 2 missionaries and their wives, 2 women missionaries, 12 native workers, 7 outstations, 8 Sunday schools, 2 day schools, 1 boarding school, and 326 professed Christians. Also station of the ABP (1869), with (1903) 2 missionaries and their wives, 11 native workers, 7 outstations, 3 places of worship, 3 Sunday schools, 1 day school, 1 theological class, and 48 communicant Christians. Station also of the CMS (1870), with (1903) 2 missionaries and their wives, 3 women missionaries, 6 native workers, 1 outstation, 1 place of worship, 3 day schools, 1 dispensary, and 53 professed Christians. Some write the name Shaow-hing.

SHAO-WU-FU: A town in Po-kien, China, situated 240 miles N. W. by W. of Fu-chau. Station of the ABCFM (1877), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 25 native workers, 22 outstations, 17 places of worship, 2 Sunday schools, 1 theological class, 1 dispensary, and 513 professed Christians.

SHAO-SHI-ISISIEN: A town in Hu-pei, China, situated on the right bank of the Yangtze at the nearest point of that river to the Han-ho, with which it is connected by canal. It is an important trade center. Population 100,000. Station of the PE (1889), with (1903) 10 native workers, 3 outstations, 3 places of worship, 3 Sunday schools, 3 day schools, and 276 professed Christians, of whom 103 are communicants. Station also of the Swedish Mission Society (1896), with (1901) 2 missionaries and their wives, 2 native workers, 1 outstation, 1 place of worship, 1 day school, and 250 professed Christians. Some write the name Shashi.

SHEBIN EL KOM: A village in lower Egypt, situated about 40 miles N. W. of Cairo. Station of the North Africa Mission (1890), with (1903) 2 missionaries and their wives, 1 day school, and 1 Sunday school.

SHEDD, John H.: Missionary of the American Presbyterian Board (N.). Died, Urmia, Persia, April 12, 1895. The first years of Dr. Shedd's missionary life were spent in pioneer work. His youthful energies seemed to know no limit in the missions. He was a natural leader. Given some special work to be done requiring vigorous action, self-denial, large resourcefulness, and he was pretty sure to be in it. His tours in the wild, rugged mountains of Kurdistan year after year marked well his character as a missionary, resolute, devoted, wise. Restricted as to times and seasons between the pathless winters and the fever-breeding summers, he would push in at the earliest possible moment of spring, abandoning his mule when he found the roads still closed, and with a Kurd as a porter to carry his quilt and a small change of clothing, he marched upon the snow crust, over the perilous passes and down through the valleys, visiting the little congregations, counseling and strengthening them in the name of the Lord Jesus. And scarcely had he returned home when he was ready to go again, with his family back again to the outer bounds of the mountains for the summer, drawing the native workers around him for additional instruction and training.

After his first ten years of service in Persia, Dr. Shedd returned to the United States on
The care of this field passed to the local church in 1860. The UB also has a work here, of which statistics are given under Bonteh. The Sierra Leone CMS also maintains a mission here, with 8 native workers, 8 day schools, and 220 professed Christians. Also station of the WMS, with 26 native workers, 2 outstations, 6 places of worship, 3 Sunday schools, 3 day schools, and 346 professed Christians, of whom 281 are communicants.

SHERRING, Matthew Atmore: Born at Halstead, Essex, England, September 26, 1826; studied at University College, London, and Coward College; ordained December 7, 1852; sailed as a missionary of the LMS the same year for Benares. He took the superintendence of the Central School, with which he was identified during much of his life; also engaging in bazar preaching and itinerating, and the pastorate of the native church. On Sunday, August 8, 1880, he went through his usual services in Hindustani and English in apparently good health. At 2 o'clock Monday morning he was attacked with cholera, and on the 10th passed gently away. The same evening native Christians carried his body to the grave, among them his first convert, baptized twenty-four years before, a Brahman, and now vernacular headmaster in the institution at Benares. Combining high culture and strong common sense with a gentleness of disposition almost womanly, Mr. Sherring endeared himself to all with whom he came in contact. "I make it my rule," he would say, "to try to please every one if possible." In the twofold work of high-class education and of preaching in the vernacular he found ample scope for his superior talents.

SHERSMON: A town in Algeria, situated 60 miles W. S. W. of Algiers. Station of the North Africa Mission (1890), with 2 women missionaries, 1 Sunday school, 1 dispensary. The French spelling of the name is Cherchel.

SHIGAR: A town in Kashmir, India, situated about 110 miles N. E. of Srinagar. Station of the Scandinavian Alliance of N. A. (1895), with (1900) 1 missionary and his wife, 2 women missionaries, 1 day school, and 1 industrial institute.

SHIGATINI: A settlement in German East Africa, situated on the S. side of Mt. Kilima Marie. Station of the Leipzig Missionary Society (1900), with (1903) 2 missionaries, 1 place of worship, 1 day school.

Shih-Ts' Uen. See Shi-Tsuen-Hsiien.

Shi'te MOHAMMEDANISM: The there are many different Mohammedan sects, yet these may all, or nearly all, be summed up under two heads—those which are generally known as Sunni and Shi'ah, respectively. Shi'te doctrine and schools almost exclusively in Persia, where it is rare to find anyone who will venture to confess himself as a Sunni. On the other hand, in Arabia a Shi'te is not allowed to live unless he conceals his faith. Most Mohammedans in Oude are Shi'ites, but in the rest of India the latter are nearly so numerous their rivals. In the Caucasus the Shi'tes are estimated to number about 800,000. The whole population of Persia is variously estimated at 8,000,000 or 10,000,000. Including the Babs, claimed to number 1,000,000, the total number of Shi'tes in the world probably falls below 20,000,000.
History and Origin: In earlier times Shi'ite doctrines were by no means confined to Persia. Under the Caliphs we find them again and again asserting themselves in Arabia, Egypt, and Mesopotamia. But whenever this occurred it was due to Persian influence. It is not too much to say that the truth of the founder of Shi'ite belief, and that the enmity subsisting between Sunnites and Shi'ites is the continuation of the ancient hostility between Arab and Persian (Arab and Ajem—which may be compared with Greek and Barbarian) on the one side, and on the other Persians and Arabs (from and to each other), who, in the Persian traditions, have always been mortal enemies. These feelings were still more excised on both sides, and especially on that of the Persians, when the Arabian conquest of their country (642-643) compelled them to save their lives by outwardly professing Islam. Furthermore, skepticism and mysticism are natural to the Persian character, but alien to Arabian conservatism and devotion to the literal interpretation of the Koran and Tradition. It is no wonder, therefore, that the two races have developed different creeds.

Another historical cause of the schism between Sunnites and Shi'ites may be found in the rivalry between the Hashimite and the Ommayyate houses. Both Hashim and Ommayyah were descended from a common ancestor, Abd-ul-Mannaf, father of the former and grandfather of the latter. Even before Mohammed's time the descendants of these two men had been rivals in Mecca; and when Mohammed arose as a prophet, none of the Koreish opposed him so bitterly as Ommayyah's family. When the caliphate fell to the lot of the latter, under Othman, the rivalry which had apparently been laid aside during the conquest under Abu Bekr and Omar, burst out with renewed energy, owing to the disappointment of Ali, who stood at the head of the Hashimites, at failing to be made Caliph on Ommar's death (644). Othman's unfairness in conferring all important posts on the Ommayyate faction, coupled with his evident weakness of character, still further aroused the enmity of the Hashimite party. Ali, on his part, tacitly encouraged the rebels who murdered Othman, and then he succeeded him as Caliph. But Mu'awiyyah, a member of the Ommayyate party, was ultimately successful in securing Ali's deposition and obtaining the coveted dignity for himself. Ali refused to acknowledge Mu'awiyyah's claim, but was murdered by a Kharjī assassin. His prosaig son Hassan, succeeded to the Caliphate, but, after a reign of five or six months was forced to resign his pretensions in favor of his powerful rival, and some eight years later was poisoned by one of his many wives. When Mu'awiyyah died, Husein, the younger brother of Hassan, and, like him, son of Fatimah, Mohammed's daughter, laid claim to the caliphate, the he had previously sworn allegiance to Yeizid, Mu'awiyyah's son and heir. But Husein, with two of his sons, six of his brothers, two of Hasan's sons, and six other descendants of Abu Talib, Ali's father, was slain, fighting bravely at Kerbelah (680) under circumstances of especial atrocity. This event forever put an end to all hope of harmony between the house of Ommaymah and that of Husein. Husein's tragic death evoked sympathy for his surviving descendants, and there gradually grew up the belief that Ali should have succeeded Moham-
volve any real difference of doctrine. But if we wish to understand the importance of the schism from the Muslim point of view, let us imagine the way in which the two sections of the Roman Church would regard each other had the medi-

The Shi'ite movement may, from an intellec-
tual point of view, be regarded as an Aryan revolt against a Semitic past, rooted upon the

tes is green, or at least their turbans are of that color, whereas in Persia the Seyyids may be dis-

Morality in all Mohammatan lands is low, and
it would be hard to prove that the Shi'ites are in this respect worse than the Sunnites. But the following statement of the dogmatics, that the people's confidence, the Prophet's doctrines and the doctrine of temporary (mul'dah) marriages were the reason which the Prophet disadvantaged to the Jews and the Christians, is merely a hypothesis. These are the dogmas known as Kutiman and the doctrine of the legality of temporary (mul'dah) marriages.

The doctrine of Kutiman i din (concealment of faith) is that a man is justified in concealing and even denying his belief, whenever his confession would endanger life or property. When a Shi'ite makes the pilgrimage to Mecca he professes himself a Sunnite, and to prove it shows the greatest reverence for the first three Caliphs, whom he really believes it a meritorious act to curse every day.

The result of such a doctrine has been to change the ancient Persian reverence for truth into utter disregard for it, and to raise lying almost to the dignity of a fine art. No Shi'ite will, for a moment, dream of trusting another's most solemn assertions or oaths.

Mul'dah, or temporary marriage, for a month, a week, or even a shorter period, is sanctioned by Shi'ite religious law. Consequently, very large numbers of women make their living by contracting such unions, especially with the pilgrims who visit Mecca. It is very difficult to form an estimate of such unions, but it is commonly termed to denote such a marriage is Siqheh. A great part of the wealth of the highest of the Mohammedan clergy in the places of pilgrimage is obtained by officiating at these marriages. To realize in any degree the moral degradation of Islam in this respect, we must try to form ourselves to imagine the higher clergy of the Church drawing their income in considerable measure from sanctioning such connexions, and the nation at large as being so degraded in moral sense as to have no revulsion of feeling. While the Sunnite law regards such unions as unlawful, the Sunnites of Central Asia, and of some other regions, permit them. Shi'ites and Sunnites both appeal to authoritative traditions in support of their respective views of Mut'ah marriages.

Sects: Even in Ali's lifetime a Jewish convert to Islam, named Ablabius Ibn Sauda or Ibn Saba, coming from Southern Arabia, proclaimed Ali to be an incarnation of the Deity. In 653 this man's followers, in spite of Ali's denunciation of their doctrines, were numerous enough to cause sedition in Basra, Kufa, and Syria, whence the sect spread to Egypt, as well as to Persia. Ibn Sauda taught that Mohammed, like Christ, would come again, and that, meanwhile, Ali was his representative. An allegorical interpretation began to be given to the Koran, and this is still a common feature with the Shi'ite party. Even in very early times the Shi'ites divided into a number of sects, each holding one or other of Ali's descendants in peculiar reverence, but all agreed in looking forward, with large numbers of Sunnite also, to the coming of a Mahdi or guide to lead men back to the truth before the last day. One of the most important sects of the Shi'ites of the early times was that of the Ismailites. Its founder was a Persian called Abdullah Ibn Maimun, who appeared about the year 850. The sect took its name from Ismail, eldest son of Jafar, the sixth Imam, and Ismail's son Mohammed, the third in the line, was the founder of the new religion. Abdullah taught that there had been six preceding dispensations, those of Adam, Noah, Abraham, Moses, Jesus, and Mohammed, each of these Prophets having been an incarnate of the Divine Reason. The last and most perfect dispensation was that of Mohammed Ibn Ismail, who was also an incarnation. All these prophetic dispensations, according to the sect of "Divine Reason" or "Universal Reason," conceived of as being produced by the will of God. This doctrine is almost identical with that held by the Elkeheesite in the second half of the 2d century, except that in the Book of Elkehees no mention of the doctrine has yet been made of Mohammed. Maimun, the father of the Ismailite sect, was the founder of the Isma'ilites, Christ being called the one true prophet, who previously appeared as Adam, Enoch, Noah, Abraham, Isaac, Jacob, and Moses. The Isma'ilites added Mohammed and their own founder to the list, but still held to the doctrine of the divine incarnation. A sect, so marked by the adherent of Ismail, was divided, so many times from age to age in the special Prophet of each time. One division of the Isma'ilis was the Karmatit sect, called after their leader Karmat, who committed fearful excesses in the reign of the Caliph Mutasid. The Druses are also of Isma'il origin, their leading tenet being that Hakim, the notorious Fatimite Caliph of Egypt, was a divine incarnation. The sect of the Assassins (Hashishin) was the Isma'ilite body best known in Europe. It was founded by a Persian named Haron Sabbah, who was held to have adopted Isma'ilite doctrines at the court of the Egyptian Caliph Mustansir (1261-1262). This sect was almost exterminated by the Mongols in the 13th century, but small numbers of Isma'ilites, who are generally inoffensive, still exist in India, Persia, and other countries.

Sufism can hardly be said to be connected with Islam at all, since the views of those who hold to this mystic and pantheistic system of thought—so far as it can be called a system—are utterly opposed to Mohammedanism. It has had very extensive influence in Persia, so much so that nearly every thoughtful and educated Persian is a more or less Sufi. Such men outwardly profess to be Shi'ites, but, in confidence, acknowledge that they absolutely disbelieve every tenet of Islam.

The least important Shi'ite sects are (1) the Akbaris, who treat the doctrine of the resurrection and many others as merely allegorical; (2) the Ali-ileahis, who deny Ali and worship him as God; (3) the Sheikhhis, who hold what is known as the Rukn-i-Rabi (fourth column) doctrine, to the effect that there must ever exist an immediate line between the twelfth Imam (the Mahdi) and his votaries. This Imam is said to have vanished most mysteriously in 874 and the popular belief is that he disappeared under a new form, where he still lives. A message sent by him out of the well in 1892 was so universally believed, that, in accordance therewith, the Shah of Persia was obliged to abolish the Tobacco Regie monopoly, which he had granted to foreign companies. But it is believed that after his disappearance in 874 the Imam Mahdi once appeared for a time in 940, only to vanish again for an indefinite period. During his "lesser disappearance" (874-940) he communicated with the faithful by means of four persons in succession, each of whom bore the title of Bab (Gate). Mirza Ali Mohammed of Shiraz, founder of the modern Babi sect (1844), claimed to be the Bab, and the sect of this Bab, as of the Babis, has grown in importance. Therefore, an offshoot of the Sheikhhi sect from the then leader of whom (Sayyid Kasim of Resht) Mirza Ali Mohammed at first received instruction. But persecution has rendered the Babis so hostile to the Shi'ites that it is hardly
correct to regard them as any longer Shiites themselves.

Sunnite and Shi'ite: It remains for us to inquire what is the attitude of the Shi'ite sect toward Christianity, and what way the Gospel may be most effectively brought to bear upon them.

Like all Mohammedans, a Shi'ite holds that the Gospel was at one time intended to be, as the Koran states both in the Old and New Testament, "a light and a guidance to mankind." But he believes that it has been abrogated by the descent of the Koran upon Mohammed, and he also holds that the Bible has been willfully corrupted by the Jews and Christians. Neither the Koran nor the Holy Book, nor any other book, nor the very slightest support to such ideas, and this fact must be insisted on in urging Muslims to accept the Bible. It may be shown from the Koran itself that the Bible could not have been corrupted before or during Mohammed's time, while the existence of the Shi'ite faith absolves it from that time, proves that the Bible we now have is identical with that which the Koran mentions. Strangely enough, the Mohammedans endeavor to adduce from the present text of the Bible prophecies in support of Mohammedan claims. It is necessary for the missionary to prove that such passages do not bear the meaning thus attributed to them.

In all controversy, however, it is important to remember Bengel's rule: "Never enter upon controversy without knowledge, without love, without necessity. The truths that are contained in the Mohammedan faith should be frankly and thankfully acknowledged and taken for a basis of agreement, and, in some sort, a foundation for what has to be proved; but it should be pointed out that these truths are taught in the Bible and by the Shi'ites themselves, and that Christianity very alone can reveal how much deeper such truths are than the Muslims conceive.

Besides the great truths of the Unity of God, the After-life, Future rewards and punishments, the fact of Revelation and others held by all true Muslims, the Shi'ite faith ascribes to (1) the need of an Atonement, and (2) the possibility of an Incarnation in some sense. In preaching the Gospel to Shi'ites, therefore, the Christian doctrine should be shown to inculcate both these truths, but in a manner more logical and more abstract, and also as indispensable as their own mystical speculations. The Sufi longing after union with God can be shown to be provided for in the Gospel, which teaches how man may become, not identical with God, but a child of God, through spiritual union with Jesus Christ. Above all is it necessary to endeavor by prayer and teaching, under the guidance of God's Holy Spirit, to convince the inquirer of sin, the heinousness of which no Muslim realizes from the teachings of his own faith. The missionary should endeavor to remove misconceptions as to the nature of the Christian doctrine of the Trinity, to show that its foundation is belief in the Unity of God. Other misconceptions also must be met by careful reference to Holy Scripture. It must be clearly shown that we abhor idolatry and prierecraft, at least as much as Muslims do, and that we have no sympathy whatever with corruptions of Christianity.

In brief outline this is the method which experience in the Persian field has shown to be the best for the missionary to follow in preaching the Gospel to the Shi'ites. In life and word Christ must be exalted that He may draw men into Himself.

In studying the Shi'ite doctrines all so situated as to be able to do so should consult the original sources, e.g., The Koran in the original; the five collections of Traditions named above; the History of Ibn ul 'Abbas and Ibn ul Wakiid, and Shi'ite commentaries and controversial works in general. For the Babi sect, one should consult the Hakim, and the Khatib 'Abbas.

General readers will find the following useful: Muir (Sir W.), The Caliphate, Oxford (Muir or Duigg). Islam and the Khatibs of Baghdad, Sell (E.), The Faith of Islam, Hughes (Rev.), Dictionary of Islam; Brownes (Dr. J. P.), History of the Koran; the Bible (Dr. W. St. Clair), The Religion of the Crescent (S. P. C. K).

For dealing with Shi'ite inquirers, Tisdall (Dr. W. St. Clair), Missionary Objections, London (S. P. C. K.). Articles of value on Babism will be found in the Missionary Review of the World, Vol. XV pp. 771 and 775, and on Persians, Mohammedan Women, the same, Vol. XVII, p. 388.

SHILLONG: A town in Assam, India, situated in the Khasia Hills, 42 miles E. by S. of Guwahati. It is an administrative center and a charming spot, commanding extensive views of the Brahmaputra valley. Station of the British and Foreign Unitarian Association, with (1900) 1 native, 1 place of worship, 1 day school, and 1 Sunday school. Station also of the Welsh Calvinistic Missionary Society, with (1903) 1 missionary and his wife, 2 women missionaries, 441 native workers, 80 outstations, 36 places of worship, 59 Sunday schools, 70 day schools, and 4,139 communicants.

SHILOH: A village in the southern portion of Basutoland, South Africa, about 62 miles N. E. of Aliwal North. Station of the Paris Evangelical Missionary Society, with 13 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 4 day schools, and 978 professed Christians, of whom 562 are communicants. Some write the name Silo.

SHILOM: A town in Mysore, India, situated on the Tunga River, 87 miles N. E. by N. of Mangalore. Population, 12,000. Station of the WMS, with (1903) 1 missionary, 1 woman missionary, 37 native workers, 6 outstations, 7 Sunday schools, 10 day schools, 1 boarding school, and 90 professed Christians, of whom 81 are communicants.

SHINTO: The origin of Shintoism is involved in more or less obscurity, but the translation of the Kojiki, which may be looked upon as the sacred record and exposition of the system, has been of immense help to the understanding of the doctrines. It is an embodiment of the crude superstitions of the early Japanese, their nature-worship, spirit-worship, ancestor-worship, and hero-worship, in fantastic combination. It is dimly monotheistic in its very earliest references. It presents the idea of one supreme being, from whom all things spring, but of whom nothing beyond this can be known. He was not a real Creator. This mysterious and unrevealed being is known in Shintoism as the ‘Central and Supreme God of Heaven.’ Tradition relates that when the heavens and the earth were separated from that confused relation in which they had been intermingled in the original chaos, this supreme god came forth and appeared uplifted between them, but he had existed, tho unrevealed, from all eternity. This system also presents the idea of a concourse of a third deity, subordinate to the first, but self-existent. From these deities two emanations proceeded, namely, Isaname (female), and Isanagi (male); from the fecundity of these sprang all things. They were the Adam and Eve of Shintoism. Several other subordinate gods were produced.
The process of creation ascribed to the divine pair was very unique: standing on a bridge of heaven and looking earthward, they stirred the ocean with a long spear. From the end of the spear sprang two lines of islands, which comprised the island of Japan, and in the islands thus composed was the potency of all things; vegetable and animal life sprang up spontaneously. Shintoism does not recognize a real creation out of nothing. It claims only a development. The universe is regarded as eternal. God and man and all things are of one essence. The system, therefore, is in a sense Pantheistic.

The development of the sun myth appears in Japan as in so many other countries. The male and female deities above named produced a daughter of most resplendent beauty, represented by the sun. While this fair maiden was embroidering beautiful textures—thus, perhaps, symbolizing the beautiful work of nature in verdure and in flowers—her churlish brother spoiled her work by pulling it with defiance; the brother representing the principle of evil, and thus establishing a dualism which has been found in so many nations. The maiden, thus insulted, is represented as having withdrawn herself in sulkiness to a dark cave, leaving the world in gloom; and the legends represent the forlorn inhabitants of the world as having resorted to various expedients to bring her forth from the cave. Three of these appear to have been successful. One was to gather as many cocks together as possible, from all quarters, and place them near the cave's entrance, that at the proper hour of cock-crowing their clamar might excite her womanly curiosity, and bring her out. A second expedient was to institute a dance of beautiful goddesses before the cave. Becoming jealous of the praises which she heard lavished on them, she would certainly come out and reveal her charms.

Another plan, quite as successful, was that of constructing a mirror, which was so placed before the mouth of the cave as to reflect to the goddess her own beautiful form. This threefold appeal to her curiosity, her vanity, and her vanity, was successful. She came forth, whereupon means were immediately taken to prevent her return. The sunlight of her presence again bathed the world, and filled all nature with delight. This sun-goddess married at length, and became the mother of the whole line of mikados, and from her to the present incumbent of the throne there has never been a break; the succession for thousands of years is claimed to be complete.

There are imposing ceremonies connected with the worship of this goddess, almost wholly of a cheerful tone; and it may be said in general that of all races, perhaps the Japanese, before the advent of Buddhism, had the most light-hearted type of faith. In the springtime there are still festivals designed to hail the springing of the fruits and flowers, and ceremonies in imitation of planting and sowing are performed. Here is a vocation for the Shinto priests, and one far more grateful than offering bloody sacrifices or in any way striving to appease gloomy deities. This sun-goddess, the ancestor of the mikados, is a genial being, and she is symbolized, not by cruelty and horror, but in the case of Moloch, the fiery sun-god of the Phoenicians, but by all benign influences, and her only sacrifices are offerings of rice and fish and flowers. It is scarcely necessary to say that the original supreme deity, who never revealed himself, and of whom nothing is known, is removed very remotely from the practical interferences of the natural man. The Mikados, sons of the miko or the mikado, is the really supreme object of worship.

Shintoism in its essence is ancestor-worship combined with worship of nature as having proceeded from the earliest ancestors of the Japanese. The Emperor is the head of the religious system and a direct descendant from the sun-goddess. The system is a vast Pantheon of demi-gods. The names of the heroes of Japanese history, fierce warriors and successful generals, and rulers are on the list, which is ever increasing. Dead statesmen and heroes, even in modern times, are deified by decree. A great general who won renown in the Chinese war of 1895 was given such an apotheosis by decree when he died. Every Shinto temple may thus be regarded as a sort of Westminster Abbey for perpetuating the fame of the great dead.

The literature of Shintoism is not extensive. Such as it is, it found its source in the fables and folk-lore of the earliest and rudest times. These were preserved by minstrels. In the 3d century Chinese legends were introduced, and some of these myths were committed to writing. It was in 712 that the basic historical record, the Kojiki, was compiled. This is the sacred Bible of Shinto priests. It is also the earliest Japanese history. It is most unique in its style, resembling nothing else that has ever been published in any land. It is remarkable for the agglutination of long compound names and expressions. But the Shintoism cannot compare with Buddhism in its literature, or in its intellectual influence, yet it does not wholly neglect the instruction of the people. There is more or less preaching on ethical subjects, and the ethics thus presented are pure and salutary. Even this custom may have been borrowed from Buddhism. During the long centuries in which Shintoism and Buddhism have coexisted side by side, or rather have been more or less intermingled, the Buddhist influence has done most to promote the intellectual growth of the people, any little effort having been made by the Shinto priests to emulate the Buddhist culture. Buddhism has not only proved educational in its influence: it has inculcated a higher moral feeling, and especially in the direction of benevolence and humanity.

It is difficult to decide whether or not Shintoism is to be regarded as idolatrous: no idols appear in the temples, even of the sun-goddess. Statues of heroes are not invoked in prayer, and yet, undoubtedly, they receive something akin to worship; and the Japanese temples are never closed against any object which seems even to approach the supernatural. In every Shinto temple a mirror is seen. This may be a mere reflection of the idea which leads Chinese Taoists to make use of mirrors—that evil spirits dare not approach one, since good mother of the sun has never been the Mikados. Shintoists explain that the mirror symbolizes the divine man that is in us, at the same time that it is a vivid representative of one's conscience and judge. The thought is that a man within the sacred temple precincts is brought face to face with himself, and that what he is in one sense what he is himself as he really is. It cannot be denied that this is a forcible conception. Next to the prayer of the Psalmist, that the Spirit of God may search the
petitioner and try his heart, is that means, whether it be, which brings a man face to face with himself in the solemn presence of real or supposed deity.

It is declared by some Japanese that Shintoism is not a religion, but simply a means of cultivating a patriotic, nationalistic spirit. The enduring tenet of the system is, nevertheless, admitted to be devotion to the Emperor. The will of the sun-goddess and of the Emperor are necessarily the same. The essential requirement of the system is perfect obedience as the essence of moral conduct. But Shintoism is a religion in so far as it recognizes the relations of man to a higher power, as is shown in the fact that prayer is a resource constantly resorted to. It is offered to a supreme something, which is supposed to cherish an interest in all creatures. At funerals and elsewhere prayers are offered for the dead as well as for the living. There is in Shintoism a resemblance to the ancient cult of the Aryans, both in its dread of death and of all that belongs to death. A corpse is looked upon as polluting, and one should have as little as possible to do with it; no people except the Zoroastrians carried this matter so far. It is closely connected with sun-worship in both cases.

Relations of Shinto to Buddhism: Buddhism entered Japan in the year 552. The Shinto deity and thoughtlessness opened the way for a system which was of a more melancholy tone and spirit, and which took a more earnest hold upon the future life. For a thousand years, according to Kodera, there existed a strange partnership between the two religions. By common consent the Shinto priests officiated at all marriages (with which Buddhist monks were supposed to be little in sympathy), while Buddhist priests took charge of the funerals, from which Shinto priests were only glad to be exempt. At the present time marriage is a civil rite only. So intimately interwoven did these two systems become, that the Government now began to dread the influence of Buddhism, which had proved the stronger element. And in order that Shintoism, with its traditions of imperial descent and the prestige which it thus afforded, might not lose its supreme place, a decree was passed declaring it to be the religion of the State; and this is still the theory of the Government. Yet it is evident that the two systems long been blended, that it is said that nine-tenths of the people consider themselves as belonging to both. Like other Oriental systems, Shintoism is easy-going, and in a negative sense charitable toward Buddhism; both have long been accustomed to represent their position by the maxim: "Men may ascend Fujiama on any one of many sides, but when once on the summit the same glorious moon is visible to all. So with the religions."

There can be little doubt that the early mythology of Shintoism exerted a disastrous influence upon the morality of the people. The legend which represents the goddesses as dancing in an almost nude condition before the cave in which the sun-goddess was hidden has presented a poor explanation to theHyperborean Japanese peasantry, and one cannot greatly wonder that indelicacy and indecency have known less restraint than in almost any other land. Under the influence of Shintoism immorality has scarcely been considered a vice. The late Dr. S. R. Brown, after years of observation, could scarcely find any element of moral restraint in the system, and was slow to accord to it the name of religion.

There is no doubt that in comparison with this childlike system of nature-worship and mere natural impulse Buddhism has been a blessing to Japan. Rev. K. C. Kurahara has summed up the beneficial influences of Buddhism in Japan as follows:

1. It has taught the people a vivid realization of future rewards and punishments—thus ministering both inspiration and restraint, and giving to life a higher dignity and solemnity.

2. It has presented a high conception of our common humanity, without caste or slavery.

3. It has enjoined a higher grade of ethics, and much more of self-restraint.

4. It taught the people temperance, even prohibition.

5. It has emphatically enjoined benevolence and pity to all beings.

6. It has stimulated an intellectual activity not known before. It has introduced philosophy and poetry, and all literature.

7. From the 12th century until the year 1868 Buddhist priests were the only educators. All schools were due to their influence.

8. The Buddhist doctrines have greatly enkindled the powers of imagination, pathos, and lofty aspiration.

9. The introduction of Buddhism has led to increased foreign intercourse, and has brought in its train the literatures not only of China, but of India.

10. Buddhism has given great impulse to architecture, landscaping, gardening, and all ornamental arts. Of this the peerless bronzes, lacquers, and the sweet-toned temple-bells are proofs.

11. By its support of a priestly and yet a thoughtful class, Buddhism furnished many men of leisure, who gave themselves to literature, and were promoters of a higher national culture. Were the Buddhist element eliminated from Japanese literature, there would be but little left.

12. Altogether Buddhism weakened the divine autocracy of the Mikado, and thus perhaps facilitated the introduction of the rival power of the Shoguns, yet nevertheless it exerted a powerful restraint upon cruelty and oppression.

13. It taught rulers the duty of respecting the claims of the people, and of promoting their good.

Confucianism has been credited with imparting to the Japanese nation a higher degree of moral earnestness than either Shintoism or Buddhism. To the ethics of Confucius, it is claimed, is due whatever of loyalty to government and to country has been found in public officials and the higher classes.

As to the special obstacles which Shintoism offers to Christianity, we see at once that a system which openly deifies men, blunts the sensibilities as to the sinfulness of wrong-doing. The Christian preacher who calls upon men everywhere to repent speaks a language unintelligible to the Shintoist. Belief that they are descended from the gods satisfies the Japanese that they can do no wrong. They require no moral code because they have it in their nature. The barrier which self-righteousness to Christianity is especially repellent in Japan.

At the same time, the weakness is clear of a religious system that becomes indistinguishable from political loyalty to a human leader. Shintoism in its modern and secularized form cannot...
long satisfy its adherents. The fruits already seen to result from conversion to faith in Jesus Christ must increase such dissatisfaction. For the Gospel of Jesus Christ has imparted more of noble impulse, secured a greater degree of moral and philosophical advancement, in twenty-five years than all the other religions have realized in Japan in the centuries of their dominion.

SHIRA: A settlement in German East Africa, situated on the W. slope of Mt. Kilima Njaro, about 190 miles N. W. of Tanga. Station of the Leipzig Missionary Society (1889), with (1903) 2 missionaries, 1 place of worship, and 1 day school.

SHIRAZ: A town in Persia, situated 100 miles N. E. of Bushire on the Persian Gulf. It is a place famous as the birthplace of many great Persians, and has considerable commercial importance. Population about 50,000. Station of the CMS (1900), with 1 missionary and his wife and 1 day school.

SHIRIYALI: A village in Madras, India, situated about 16 miles N. N. W. of Tranquebar. Station of the Leipzig Missionary Society, with 2 missionaries, 1 native worker, 1 Dispensary.

SHIWAN: A town in China, situated near the Mien-chau station, about 50 miles W. of Mien-chau. Station of the CMS (1895), with (1903) 1 missionary and his wife, 1 native worker, 1 Dispensary.

SHI-TUEN: A town in Kwang-tung, China, situated about 1,800 miles S. W. of Canton. Station of the CMS, with 1 missionary and his wife and 5 women missionaries. Church statistics are included in Canton. Station also of the SBC, with 1 woman missionary.

SHISHUOKA: A town in Japan, situated on the S. coast of the main island, about 90 miles S. W. of Tokyo. Population (1898), 42,172. Station of the MCC (1874), with (1900) 4 native workers, 1 place of worship, 1 Sunday school, and 1,201 professed Christians, of whom 1,027 are communicants. Some write the name Schiati.

SHIYALI: A village in Madras, India, situated about 16 miles N. N. W. of Tranquebar. Station of the Leipzig Missionary Society, with 2 missionaries, 4 native workers, 4 places of worship, 9 day schools, 4 boarding schools, and 1,201 professed Christians, of whom 1,027 are communicants. Some write the name Shiah.

SHIZUOKA: The capital of Japan, situated about 150 miles N. W. of Tokyo. Station of the Leipzig Missionary Society, with 2 missionaries, 4 native workers, 4 places of worship, 9 day schools, 4 boarding schools, and 1,201 professed Christians, of whom 1,027 are communicants. Some write the name Schiati.

SHOLAPUR: A town in Bombay, India, 280 miles E. S. E. of Bombay, on the Bombay and Madras Railroad. Temperature 50° to 110° F. It stands at an altitude of 1,800 feet, in the center of a wide plain. It is an important trade center and manufactures silk and cotton. Population (1901), 75,285. Languages, Marathi, Hindustani, Kannara. Station of the ABCFM (1864), with (1903) 3 missionaries, one of them with his wife; 2 women missionaries, 48 native workers, 15 outstations, 9 places of worship, 28 Sunday schools, 18 day schools, 1 dispensary, 1 kindergarten, 1 orphanage, 2 boarding schools, and 174 professed Christians. Also station of the Mission of Leper's Asylum, which supports the leper asylum of the ABCFM.

SHOHONG: The former capital of the Baman-gwato tribe of Bechuana, situated in Bechuana-land, South Africa, about 30 miles N. W. of the Shoshong Road station on the railroad. Station of the LMS, with (1903) 1 missionary and his wife.

SHUN-KING-FU: A town in Sze-chuan, China, situated about 90 miles N. W. of Chung-king-fu. Station of the CIM (1896), with (1903) 2 missionaries, 1 of them with his wife; 2 native workers, 2 outstations, 2 places of worship, and 25 professed Christians. Some write the name Shun-king.

SHURMAN, John Adam: Born in Westphalia, Germany, 1810. Died October, 1852. Studied at Berlin; sailed for India, July 9, 1833, as a missionary of the LMS; stationed at Benares, February 17, 1834. He devoted himself to the educational department and to Bible translation. With others he labored in preparing the Urdu and Hindustani versions of the Scriptures. In April, 1842, he went to Calcutta to superintend the printing of the Urdu version of the Old Testament. Returned to Benares in June, 1843, and left in October for England. He arrived at Benares February 20, 1846, on his return to his work, remaining there until his death, six years later.

SHWE-GYIN: The capital of Burma, on the branch of the Si-taung River, 100 miles N. E. of Rangoon. Climate, tropical. Population, 7,519. Race and language, Burmese. Religion, Buddhism. The Karens, however, predominate in the surrounding regions. Station of the ABMU (1853), with (1903) 1 missionary and his wife, 2 women missionaries, 36 native workers, 50 outstations, 50 places of worship, 10 Sunday schools, 28 day schools, 4 boarding schools, and 5,200 professed Christians, of whom 2,165 are communicants.

SHWIFAT: A village in the Lebanon district, in Syria, Turkey in Asia, situated about 3 miles S. E. of Beirut. Station of the Miss Proctor's Schools (1885), with (1900) 3 women missionaries, 11 native workers, 2 outstations, 1 Sunday school, 4 day schools, 2 boarding schools, 1 dispensary, and 22 professed Christians.

SIALKOT: A town in Punjab, India, situated in the Amritsar district, about 70 miles N. W. of Amritsar. It has some commercial importance, and is handsome and well built. Population (1901), 57,956. Station of the Church of Scotland Foreign Mission Com. and Woman's Board (1857), with (1901) 2 missionaries with their wives, 5 women missionaries, 46 native workers, 22 outstations, 2 places of worship, 29 day schools, 1 boarding school, 1 college, 1 dispensary, 1 hospital, and 257 professed Christians. Also station of the UP (1855), with 4 missionaries, 2 with their wives; 5 women missionaries, 58 outstations, 36 Sunday schools, 24 day schools, 2 dispensaries, 1 hospital; the number of Christians is not named by the Society.

SIAM: The kingdom of Siam lies at the southeast corner of Asia, occupying the central and
principal portion of the peninsula of Indo-China. It has Burma on the west and northwest, and the French possessions of Cambodia, Annam, and Tonkin on the east and northeast. It stretches along the Malay Peninsula to within four degrees of the equator. The area is uncertain, but is estimated at about 236,000 square miles, of which 60,000 square miles lie in the Malay Peninsula.

**Physical Features:** The physical contour of the country may be best understood by remembering that both its mountain chains and its rivers have a general north and south direction. Of river systems there are two—that of the Me-nam in the west, and that of the Me-kong on the eastern frontier. In their lower courses the rivers traverse immense alluvial plains, which are, to a large extent, overflowed during a portion of the year. In the upper country the mountain walls on either side approach each other in some places so closely as to leave only a narrow gorge, while in others they recede, enclosing fertile plains varying in width from 10 to 50 miles. Nearly all the navigable streams are broken by rapids, which render water communication between the lower and upper courses difficult.

**Climate:** Altho Siam lies wholly within the tropics, the climate is not so hot as that of Southern India. The temperature at Bangkok ranges between 57° and 99° F., with a mean annual temperature of 80°. The periodical monsoons of the Indian Ocean divide the year into two seasons of about equal length—the rainy season, extending from May until October, and the dry season, covering the rest of the year. Owing to the tropical heat, the abundant rainfall, and the annual overflow of the rivers, Siam is a very fertile country.

**Population:** The population of Siam is uncertain, the latest (1899) foreign estimate placing it at 5,000,000. The Siamese and their near kinsmen, the Laot, make up three-fourths of the whole; the other fourth is composed of Chinese, Malays, Peguans, and Burmeze, the first-named being the most numerous and important. The Siamese and Laot are alike members of the Shan race, which at one time (14th century) dominated the greater part of Indo-China.

**Physical Characteristics:** The Siamese are a people of medium stature, well formed, with brown skins, straight, black hair, which is worn short, except by the Laot women; and slightly flattened noses. Their eyes are not set obliquely, as in the Chinese and Japanese. In disposition they are gentle, lively, hospitable, kind to children and to the aged, fond of amusements, but lacking in energy; deceitful, unstable, and conceited. The Laot and Independent Shans are superior to the Siamese proper in strength of body and stability of character. The civilization of the Siamese closely resembles that of China, but is of a lower grade, as they have not the patient industry, the inventive skill, nor the literary taste of the Chinese. Much of the trade of the country falls into the hands of the Chinese and Burmezee. The Chinese in many cases marry Siam women, and the children of such unions make one of the most promising elements in the population, combining the superior energy of the Chinese with the vivacity and quickness of the Siamese.

**Language:** The language is broken into several local dialects, e. g., the Siamese, the Laot, and the Siamb proper. This tongue is properly a monosyllabic language, and, like the Chinese, has an elaborate system of tones, by which words otherwise identical are given different meanings. There are six tones in common use. The chief difficulties of the language for the foreigner lie in the recognition and accurate reproduction of the tones. The main obstacles to be overcome in translation are the lack of connective particles, the native love for multiplying synonyms, and the observance of a proper mean between the simplicity of the vernacular and the stilted style adopted in the sacred books of Buddhism. It should be added that besides this and other differences in the intercourse between Siamese and Laot dialects, there are also slight but important differences of vocabulary, of tone, and of idiom—e. g., so common a word as "not" is in Siamese mē, in Laot baw.

**Social Customs:** In their social customs the Siamese present several points of interest to the student of missions. The position of woman is high for an Oriental people. No attempt is made to seclude her, but she moves freely among men, engages in business, holds property in her own name, and is in general the equal of man. Monogamy is the rule, and, excepting in cases of necessity and even among them the principle of monogamy is recognized in the preeminence given to one, generally the first, wife. Child marriage is not practised; widows may remarry; divorce is easy. The position of woman is due, in part, doubtless, to the humane teachings of Buddhism, and in part to the social custom which ordains that a man on marriage shall become a member of his wife's family. Children are kindly treated, and the adoption of children by childless couples is common. Great respect is paid to distinctions of age and rank. There are separate sets of pronouns which must be used with regard to superiors, inferiors, and equals.

**Religions:** Two religions obtain among the Siamese peoples—Buddhism and the worship of evil spirits. The one is a historic religion, with ancient, sacred books, costly temples, a numerous priesthood, and the support of the states; the other is an unorganized worship, without literature, priesthood, or temples, but in many portions of the country, particularly among the Laot tribes, it rivals, if it does not exceed, Buddhism in its hold upon the popular mind and influence over the affairs of life. Buddhism, as held and practised in Siam, constitutes a formidable barrier to the progress of Christianity. Simply as the ancient religion of the country, it is strongly entrenched in the popular regard. "It is not the custom of our ancestors" is often considered a sufficient reply to the best-constructed argument for Christianity. Buddhism, too, is interwoven with the whole social life of the people—scarcely a family but has or has had a member in its priesthood. Its fétes furnish the principal opportunity for social pleasures. Vast sums of money have been invested in its temples, pagodas, and monasteries, and in support of its priests. It makes strong appeal to the self-righteous tendencies of the human heart. It operates powerfully to deaden the conscience, and to discredit the possibility of a vicarious atonement for wrong-doing.

Side by side with Buddhism, and to a large degree intermingled with it, is the religion of demon-worship. This is but one form of that Shamanism which prevails so largely in Asia and Africa. What gives it interest is the extent to
which it affects the lives of the people. The spirits or demons, some of which may be said to correspond to the elves and fairies of Western superstitions, but the majority of which are believed to be greater or less evil beings, are of several different kinds. Some are local genii—spirits of the forests, the mountains, the streams, the caves. Others preside over certain natural phenomena—as thunder, rain, wind; or over particular operations—as plowing, sowing, reaping, harrowing, or certain diseases or unfortunate events in human experience—notably birth, marriage, sickness, death. A vast multitude also are spirits of deceased persons. This burden-some superstition finds its natural climax in the belief which refers misfortune or sickness to witchcraft. Persons adjudged to be witches are driven from their homes, their houses burnt, and their gardens uprooted. There are in the Laos provinces cities where the whole population consists of such persons and their families.

Potent as this demon-worship is in its influence upon the people of Siam, and especially of the Laotians, it is less serious than Buddhism as a hindrance to the progress of the Gospel. Since disease in its various forms is largely attributed to the influence of demons, medical missionary practice does much to weaken this superstition. So does the mission school, with its rational explanations of natural phenomena. And so heavy is the incubus of fear which this belief lays upon its adherents, that they are prepared to hail as good tidings a religion that promises relief.

**Early Missionary History: It was as a possible door of entrance to China that Siam first attracted the attention of Protestant Christians. In the year 1828, Dr. Karl Gutzlaff, who had gone to Singapore under the Netherlands Missionary Society, accompanied by Rev. Mr. Tomlin of the London Missionary Society, visited Bangkok. Convinced that here was an open door for missionary effort, these brethren sent an appeal to the American churches for men to occupy the field. This appeal was brought to America by the same trading vessel which brought the news of the Twentysixth American Board instructed the Rev. David Abeel, then stationed in Canton, to visit Siam, with a view to the establishment of a mission there. Meanwhile Gutzlaff and Tomlin had been earnestly at work. While their attention was principally given to the Chinese, whom they found numerous in Bangkok, Dr. Gutzlaff prepared a tract in Siamese, and made a translation of one of the Gospels. But the death of his wife compelled him to leave, and Mr. Tomlin shortly went away also.**

Besides the appeal to the American churches, Gutzlaff and Tomlin had sent one also to the American Baptist Mission in Burma. It is interesting to note in this connection that the very earliest effort on the part of a Protestant for the evangelization of the Siamese was made by Mrs. Ann North, who, while in a French vessel, had, by the help of a Siamese resident in Rangoon, learned something of the Siamese tongue, and had translated into it the catechism just prepared by Dr. Judson for the Burmans, also a tract and the Gospel of Matthew. The catechism was printed (1819) on the mission press at Rangoon, and believed to be the first Christian book ever printed in Siamese. The Baptist missionaries in Burma sent Rev. J. T. Jones to Siam in answer to Gutzlaff's appeal. He labored there from 1833 until his death in 1851.

The attempt of the ABCFM to establish a mission in Siam began with the dispatch of Rev. David Abeel, in 1830, and ended with his breaking down under the effect of its failure, and his departure in 1832. It was renewed by the sending out of Messrs. Johnson and Robinson, who reached Bangkok in 1834. They were joined a year later by Daniel B. Bradley, M.D., who arrived in the same vessel with Mr. Dean of the Baptist Mission. These two missionaries were engaged for two periods of missionary service. Dr. Dean continued his labors for the Chinese, with sundry interruptions, until 1855. Dr. Bradley was ordained to the ministry in 1838. He was a man of versatile powers, and left an abiding mark on the Siamese nation. Like the missionaries of the American Board at first carried on missions both to the Chinese and the Siamese, but with the opening of China proper the laborers engaged among the Chinese were withdrawn. The mission to the Siamese was maintained until 1849, when it was brought to a close by the death of the Rev. Mr. Caswell, one of the missionaries, and the withdrawal of the missionaries. The Siamese, indeed, had already received the Gospel one and a half centuries ago, but the Siamese, not understanding it, continued unconverted.

As yet but slight results had been obtained, either by the missionaries of the American Board or by their Baptist brethren, in the conversion of the Siamese. The native conversions which had been accomplished in other directions. The missionaries, by their blameless and self-denying lives, and especially by their success in healing the sick, had won the esteem of the native community. By preaching and teaching, and by translating, printing, and distributing portions of the Scriptures and Christian tracts, they had brought the truth into contact with a multitude of minds; and especially, they have won, in estimating their labors, to be mindful of the influence which one of their number, the Rev. James Caswell, has been the means of creating. He died in 1855, and was buried in the warren of Bangkok, in the house of Dr. Abeel, and near the seat of his labors for the conversion of the Siamese.

One other of the American churches was to have a share in the work of missions in Siam. This was the Presbyterian Church (North). In 1848 the Presbyterian Board of Foreign Missions sent to Bangkok the Rev. William Buell and his wife. After three years of service they were compelled by the ill-health of Mrs. Buell to leave the field. The work was then suspended until 1847, when it was renewed by Rev. Stephen Mattoon and Samuel R. House, M.D. This mission continues until the present, and is now the only Protestant agency for the evangelization of the Siamese. The first convert, Nai Chune, was baptized in 1856—twelve years after the permanent establishment of the mission. In 1902 the number of church members among Siamese and Laotian together was over 4,000.

In 1861 the Mission opened a new station in Petchaburee, which has now become a center of Christian influence, not only for the province in which it is located, but also for the provinces lying to the south, along the Gulf of Siam.

Another important step was taken in 1887 in the establishment of a mission to the Laotian tribes. Interest in the evangelization of these tribes was first awakened through the presence in the neighborhood of numerous tribes whose ancestors in a time of political disturbance had put themselves under the protection of the King of Siam, who had assigned them a
residence in the province of Petchaburee. In 1863 Messrs. McGilvary and Wilson of the Petchaburee Mission made a tour of exploration to Chiang Mai, the capital of the most powerful Laos province. This important city is situated on the river Me Ping, about 500 miles north of Bangkok. The news of Mr. McGilvary's return was received with joy by the verification of the prediction made by the missionaries of the eclipse of August 18, 1868. His conversion was followed within a few months by that of six others.

The Laos converts at first suffered persecution, but the issue, in 1878, of a proclamation of religious liberty for the Laos, the persecuting spirit has been held in check. The edict of toleration was issued in response to an appeal from the missionaries in Chiang Mai on behalf of two native Christians who wished to be married in Christian fashion, without making the offerings to spirits customary on such occasions. Their heathen relatives attempted to prevent the marriage, and were supported in their attempt by the authorities; so there was nothing left for the missionaries but to appeal to Bangkok.

Medical missionary work was begun in Chiang Mai in 1875, with the opening of a dispensary, since developed into a hospital. A boarding school for girls was opened in 1878, and one for boys in 1885.

In the Laos states the people have shown great readiness to accept the Gospel, and here we find seven times as many Christians as in Siam, the field has been occupied only a little more than half as long. The PN has sole care of the work among the Laos. The press and medical missions are agencies of great usefulness in this field, and the training of the native Christians and the encouragement of the churches toward self-support are among the leading features of the Laos Mission.

SIANG-CH'ENG. See HSiang-ch'eng-hsien.

SI ANTAR: A village in Sumatra, Dutch East Indies, situated near the S. E. extremity of Toba Lake. The Rhenish Mission Society, with (1902) 2 missionaries, one of them with his wife; 25 native workers, 4 outstations, 1 Sunday school, 6 day schools, and 705 professed Christians, of whom 217 are communicants.

SIAO-MEI. See HSiao-mei.

SIAR: A village in German New Guinea, situated on the coast near Prinz Heinrich Hafen. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife and 1 day school.

SIBOGA: A town of Sumatra, Dutch East Indies, situated on the W. coast, about 210 miles N. W. of Padang. Station of the Rhenish Mission Society, with (1903) 2 missionaries and their wives, 37 native workers, 14 outstations, 4 Sunday schools, 15 day schools, and 1,804 professed Christians, of whom 647 are communicants.

SIBSAGAR: A town in Assam, India, situated about 40 miles S. S. W. of Dibrugarh, at an altitude of 1,336 feet on the Brahmaputra; the seat of the river trade; once a very important place, as proved by the ruins of a magnificent tank, with temples and palaces along its border, and still interesting on account of its tea-gardens. Population, 5,200, of whom 3,000 are Hindus and 1,500 Musulmans. Station of the ABMU (1841), with (1903) 2 missionaries and their wives, 11 native workers, 11 outstations and places of residence, 5 Sundays, 4 day schools, 1 boarding school, and 1,200 professed Christians, of whom 639 are communicants.

SIDAMBARAM. See Chilambaram.

SIDON: A town and seaport mentioned in the Bible as a port of Phoenicia, and now called Saida in the local languages. It is situated on the coast of Syria, Asiatic Turkey, about 30 miles S. of Beirut, standing in a plain encircled by mountains. The population is about 11,000. Station of the PN (1851), with (1903) 4 missionaries, one of them with his wife; 2 women missionaries, 32 native workers, 27 outstations, 16 places of worship, 20 Sunday schools, 26 day schools, 2 boarding schools, 1 industrial school, 1 orphanage, and 805 professed Christians.

SIENG-1U, or SIENG IU. See HSien-yu-hsien.

SIERRA LEONE: A colony and protectorate of Great Britain, on the west coast of Africa, lying between French Guinea on the north and Liberia on the south and east. The area of the colony proper extends from the coast towards from 7 to 20 miles, is about 4,000 square miles, with a population of 76,665, of whom 40,790 were reported as Protestants (1901). The protectorate has an area of about 30,000 square miles, and a population estimated at 1,000,000.

The peninsula of Sierra Leone, which is completely surrounded by water in the rainy season by the junction of Waterloo and Calmont creeks, covers an area of about 290 square miles. It is mostly occupied by a range of gently rounded hills rising in places to a height of 3,000 feet. The rainfall in the whole territory is heavy; copious streams, rising in the Niger watershed, flow south and west. The climate is equable, ranging from 78° to 86°. The rainy season commences in April or May and declines in October, November, and December. January, February, and March are almost rainless. The mean annual rainfall is 134 inches. The marshy exhalations during the rainy season render the climate insalubrious. The death rate is high. Vegetation is luxuriant.

Freetown, on Cape Sierra Leone, is the capital. The dominant race is the Timne (about 200,000), on the plains between the Rokelle and Little Sarcie rivers. Their language is wide-spread. Several books, religious and educational, have been translated. The people are very superstitious and suspicious. The Los Islands and adjacent coasts north of the Mallecory River are occupied by the Bagas and the courteous Su-Sus, whose speech, a Mandingan dialect, is the dominant one in the whole region, and possesses the Bible and several other translations.

The Church Missionary Society undertook its mission in Sierra Leone in 1804, and has enjoyed encouraging success. The Wesleyan Methodist Missionary Society comes next, with nearly equal statistics; the United Methodist Free Churches, the United Brethren of Ohio (American), the German Lutherans, the Episcopal Church, and the Roman Catholics also pursue missionary work there. The Christian schools are
denominational, conducted by the missionary societies. The also Mohammedan schools subsidized by the Government.

SI-GAN. See Hsi-Ngan-Yu.

SI-GUMPAR. See Nahurupor.

SI-GUMBAP: A village in Sumatra, Dutch East Indies, situated on the W. coast of Toba Lake. Station of the Rhenish Missionary Society, with 2 missionaries and their wives, 82 native workers, 13 baptisms, 14 day schools, and 1,997 professed Christians, of whom 955 are communicants.

SIH-CHAU. See Hsi-chau.

SI-HSIANG. See Hsi-hsiang-hsiien.

SIKHS: A sect of British India, numbering (in 1901) 2,105,268, of whom 2,102,306 were resident in the Punjab, where they form about 8 per cent. of the population, and where six tributary states are under Sikh rulers. Their four gurus (1469-1539) born near Lahore, was a contemporary of Luther, and, like him, a religious reformer. As a youth he was of a pious, contemplative disposition, and devoted his early manhood to a study of the rival creeds prevailing in India: the Hindu and Mohammedan. Not finding satisfaction, he became a pilgrim in search of truth, but returned to his own country in the conviction that he had failed to find God in any of the creeds. Laying aside the character of an ascetic, he led an ordinary life, reared a family, and preached the one invisible God, the Creator, calling upon people of all religions to seek knowledge of God, to worship Him, to find salvation in living righteously, and in doing good works, as God desires, and to be tolerant of the failings of others. By what he deemed important concessions, he endeavored to reconcile the essentially diverse Monotheistic and Pantheistic creeds of Muslim and Hindu, thus showing that he had never really mastered either. He left behind him an unsullied reputation, and a company of zealous followers, whom he called Sikhs, i.e., Disciples, mostly of Jat origin, like himself, but with an admixture of Hindus and Mohammedans. He was succeeded by nine other Gurus, or teachers, the first of whom, Angad, was of Nanak's own choosing, and was the author of the first of the sacred books of the Sikhs, the Adi Granth, made up of the life and sayings of Nanak, with additions by Angad. The fourth Guru, Ram Das, gave permanent expression to Sikhism by establishing Amritsar as its central seat, and building there its Golden Temple in the midst of the Tank or Pool of Immortality. So far the counsel of Nanak, to avoid political complications, had been followed, but Arjun, the fifth Guru, systematized the theocracy, collected taxes, and assumed something of the state of a secular ruler. The unity of the Sikhs was further cemented and strengthened by the growing enmity with the Muslim power, which persecuted them bitterly. Finally, their tenth and last Guru, Govind, at the close of the 17th century, organized the Sikhs into a military brotherhood, the Khalsa, and said his followers should no longer be called Sikhs, but Singh's, i.e., lions, or fighters. He relaxed the restrictions regarding food, permitting them to eat meat, instituted an initiatory rite of baptism, forbade the cutting of hair or beard, gave up smoking, and adopted the right of entry of Hindu and Mohammedan Scriptures, prayers, and ceremonies, and instilled into the people a spirit of hostility which made the Punjab, during the next hundred years, an arena of bloodshed. The fortunes of the Sikhs were various until the decline of the Mogul dynasty, and the rise, at the beginning of the 18th century, of their great leader, Ranjeet Singh, who brought all the region from the Sutlej to the Himalayas under his sway. He abandoned fierce intolerance for indifference to religion, except in so far as religious zeal was useful to his political ends. Every man who was enrolled as a the Khalsa was ever true to his alliance with the English, and the Sikh regiments were an invaluable aid in putting down the Sepoy rebellion. After Ranjeet Singh's death, the Sikhs entered upon war with the English, and, being defeated, Sikh dominion disappeared in English history over the Punjab. The Sikh regiments, true to their history, now constitute the best and bravest soldiers in the Anglo-Indian army, but the majority of the Sikhs have returned to agriculture and other peaceful pursuits, and are the most industrious race in the Punjab sphere, despite the relatively small numbers and their lagging behind other races in taking advantage of educational opportunities, they exercise a leading influence. They are a people marked by their symmetry, comeliness, and warm-hearted; lovable, receptive to kindness, and they render loyal service to those whom they trust. They are on a par with the rest of the population in morality, and are free from caste prejudice. Drunkenness is a prevalent vice, especially among the urban classes. The polarization and pacification of the Punjab, which ended the Sikh dominion, was accomplished by that company of great Christian soldiers and civilians, Hardinge, Edwardes, Cust, William Martin, and the brothers John and Henry Lawrence. It presents the unique and conspicuous instance in Indian history of a body of Christian rulers going to work as firmly as Christian men, confessing Christ before the world, and not shrinking from energetic action for the evangelization of the people, who never false to those great principles of religious tolerance which the government professed. It was they who first established the Church Missionary Society in the Punjab, the officers raising a subscription as a thank-offering for victory, and supporting, with large contributions, their appeal to the CMS to the enter the field. Amritsar was occupied as a station in 1852, and other points soon after, the officers building church, school, and mission house, and two converted Sikhs being employed as evangelists. At the time of the mutiny, Lawrence sent to the siege of Delhi a regiment made up of Sikhs of the sweeter caste, much despised by their coreligionists, and usually of a turbulent, degraded character. When the city was taken, some of them found Christian books among the spoils, and on reading them, asked the English officers for Christian instruction. They were taken to the CMS missionaries at Amritsar, and as a result several received baptism. It looked at one time as tho a whole regiment, and perhaps two, would become Christians, but the opportunity was lost through the interference of the Calcutta authorities, who forbade the officers to further the conversion of
natives. After the first Sikh war the mission of the Presbyterian Church (North) in the U. S. advanced from its Cis-Sutlej station at Ludhiana to Jullundur and Lahore in the Punjab, and other societies followed. There are, however, no missions specifically to the Sikhs, and cannot be, since they are thinly scattered among the other inhabitants, especially in the country districts, and are indefinitely divided among themselves into various kinds of Sikhs. They are often, however, not separated by a very sharp line from other Hindus. The breaking of their national unity and their wide dispersion, the diminishing grants by the government for the support of their temples, their reverence for the Brahman priests, who are employed to officiate at birth, marriage, and death, coupled with the fact that Sikhism is not a hereditary but an elective religion, being entered by a rite of baptism, seldom taken till adult years, are influences tending steadily to lessen the number of Sikhs, and bring about a general revival to dominant Hinduism. In districts remote from Amritsar there is now little to distinguish Sikh from Hindu. This transition period is an opportunity that should not be missed to meet the moment for the evangelization. Baptisms among them have not been frequent, tho probably as large in proportion to their numbers as among other classes. They average well as Christians in comparison with other converts, and have produced some fine specimens of Christian manhood.

**Cunningham, History of Sikhs, 1849; Hughes (T. F.), Dictionary of Islam (article on Sikhs), London, 1885.**

**SIKKIM:** One of the Indian feudatory states, lying in the Himalayas, on the north of the British district of Darjiling. It is bounded on the E. by Bhutan, on the W. by Nepal, and on the N. by the Chumbi district of Tibet. The estimated area is 2,918 square miles, and the population (1901) is 59,401. The Bhutias are the masters of the land. They are of Mongol race, and have come into the country from Tibet. The Lepchas are of quite another type, and have a language of their own. They seem to be the aborigines of the country, and call themselves "Rong," the name Lepcha being given to them by their neighbors. They are treated almost as serfs by the Bhutias. The Church of Scotland Foreign Missions Committee established a mission in Sikkim in 1852, on which the working force consisted in 1901 of 2 missionaries, with 22 native workers, 14 day schools, and 94 professed Christians.

**SIXONGE:** A settlement in German East Africa, situated in the district of Ngulu, about 100 miles S. E. of Urambo. Station of the Moravian Missions (1902), with 1 missionary and his wife and 12 members of worship.

**SI LAILTAI:** A village in Sumatra, Dutch East Indies, situated a little S. of Toba Lake. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 52 native workers, 10 outstations, 1 Sunday school, 11 day schools, and 1,980 professed Christians, of whom 639 are communicants. The station headquarters have been transferred to Butar.

**SILCHAR:** A town in Assam, India, situated on the plains, about 60 miles E. of Sylhet. Connected by railroad with Chittagong. Station of the Welsh Calvinistic Methodist Missionary Society, with 2 missionaries and their wives, 2 women missionaries, 7 native workers, 1 place of worship, 4 Sunday schools, 5 day schools, 1 dispensary, and 108 professed Christians, of whom 58 are communicants.

**SILOAM. See Trekkovilur.**

**SILOE. See Siloh (Basutoland).**

**SI MANOSOR:** A village in Sumatra, Dutch East Indies, situated near the W. coast 23 miles S. E. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 11 native workers, 8 outstations, 3 day schools, and 155 professed Christians, of whom 40 are communicants.

**SI MATORKIS:** A village in Sumatra, Dutch East Indies, situated near Padang Sidempuan, about 23 miles S. E. of Siboga. Station of the Java Committee (Netherlands), with 1 missionary and his wife and 1 day school.

**SIMBANG:** A village in Kaiser Wilhelmsland, New Guinea, situated on the sea coast, on the easternmost point of the German colony. Station of the Neundettelsau Mission Institute (1886), with (1901) 3 missionaries, two of them with their wives, and 1 day school.

**SIMLA:** A town in the Punjab, India, 170 miles north of Delhi, situated in the Ambala division, among the foot-hills of the Himalayas. Chief sanitarium and summer capital of India. Formerly the capital of the British province, except for its insufficient water supply. Climate cool, exhilarating, healthful, tho for several reasons the difficulties of drainage are considerable. Population averages 12,000, changing with the season. Station of the CMS (1899), with (1903) 1 missionary and his wife, 3 native workers, and 87 professed Christians, of whom 29 are communicants. Station also of the Moravian Missions (1900), with (1903) 1 missionary and his wife and 1 day school. Also station of the SPG, with (1903) 3 women missionaries, 3 native workers, 2 day schools. Station also of the YWCA, with 2 women agents of the society.

**SIMONTON, Ashbel Green:** Born at West Hanover, Pa., January 20, 1833. Died December 9, 1867. Graduated at Princeton College, 1852; taught two years, and graduated at Princeton Theological Seminary 1858; ordained by the Presbytery of Carlisle; appointed the first missionary of the PN to Brazil, and reached Rio de Janeiro August 12, 1859. While acquiring the language he preached in English to Americans and other foreigners. He soon became an effective preacher in Portuguese, and his ministry was remarkably blessed. At almost every communion additions were made to the church, mostly from the Church of Rome. He knew how to use the press as an important auxiliary. He translated the Shorter Catechism and other works into Portuguese. He edited also the "Imprensa Evangelica," a religious monthly, in which he wrote articles, which were often of rare value, attracted the attention of readers among the educated classes. As he had been pioneer in this mission, so to the end he was one of its leading members. Master of the language, and possessing unusual prudence in planning and tact in executing, he was relied upon by his associates. Necessity alone could lead them to take any important step without first hearing his counsel.

**SIMORANGKIR:** A village in Sumatra, Dutch East Indies, situated in the Siilindung Valley district, about 5 miles E. of Pea Radja. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 woman missionary, 44 native workers, 6 outstations, 5 Sunday schools,
8 day schools, and 3,191 professed Christians, of whom 1,559 are communicants.

**SIN-AN.** See Hsin-an-hsiien.

**SINCHANG.** See Hsin-chang-hsiien.

**SIND.** A part of the Northwest Frontier Province of India. It occupies the southern part of the Indus valley, including the delta of that river. West of it lies Baluchistan, east Rajputana, and south the Arabian Sea and the Rann of Kachchh. It has an average density of population of only about 50 to the square mile. The country is largely desolate, a treeless, flat and uninteresting in appearance. Its soil is, in many places, strongly impregnated with salt. Mohammedans preponderate, over three-quarters of the population being of that faith. Hindus constitute only an eighth, Sikhs about 5 per cent., aboriginal tribes about 3 per cent., Christians over 7,000, Jews and Parsees a thousand or more each. The Sindis represent the original Hindu population, but are now Mohammedans, having been converted under the reign of early Mohammedan rulers. The history of the province is complicated and not of special interest. For many centuries it was ruled alternately by Hindu and by Mohammedan dynasties. As English power on the coast became stronger, entanglements with outlying native rulers were inevitable. At times the use of armed force against them was necessary for self-defense or for retaliation; and at other times treaties for trade and commerce would be made, and very likely broken, which again was supposed to render necessary military measures. As a result of such relationships, Sind was conquered in 1843 by an army under Sir Charles Napier, and formally annexed to British dominions. Karachi is the chief town; it lies at the northern end of the Indus delta, and by the erection of elaborate harbor works it has been made one of the most important seaports in Western India.

The Church Missionary Society occupied Karachi in 1850 and Haidarabad in 1857. The success has been small. The American Methodists began work in Karachi, largely among unevangelized Europeans, in 1872 or 1873. Education has made rapid progress since the advent of British power. In 1880 there were only 20 government schools; in 1883-84 there were 340, with 23,273 pupils. There are also private schools, not included in the government figures. The last census shows a gratifying number of men and women who can read and write. The language in the principal use is Sindhi, one of the Sanskrit family.

**SINDHIA'S DOMINIONS:** A name sometimes applied to the state of Gwallor, India; ruled under British protection by one of the old Mahatta families known as that of the Maharaja of Sindhia.

**SIN-FENG.** See Hsin-feng-hsiien.

**SINGAN, or SI-NGAN-FU.** See Hsi-nang-fu.

**SINGAPORE:** An island about 27 miles long by 14 wide, containing an area of 206 square miles; situated at the southern extremity of the Malay peninsula, from which it is separated by a strait, and not of special importance mile wide. It is a part of the crown colony of Great Britain named the Straits Settlements. A number of small islands adjacent to it are also included in its territory. The population is composed of Europeans, Malays, Chinese, and natives of India. Singapore town, at the southeastern part of the island, is the seat of government for the Settlements, has a well-defended harbor, and has 121 miles of tramway. The climate is warm, but not unhealthy.

**SINGAPORE:** A town in the Straits Settlements, Malaysia, situated on the S. side of Singapore Island. It is a depot for commerce E. and W., and is the most southern point of Asia. The streets are wide, except in the Chinese and Malay quarters. Population, 186,600, of whom 1,200 are Europeans. Station of the SPG (1861), with (1903) 1 missionary, 15 native workers, 2 places of worship, 1 day school, and 350 professed Christians. Also station of the PCE, with (1900) 2 missionaries, one of them with his wife; 10 native workers, 10 outstations, 10 places of worship, and 419 professed Christians, of whom 240 are communicants. Station of the PB, with 2 missionaries and their wives, 2 women missionaries. Also station of the ME, with (1905) 8 missionaries, five of them with their wives; 4 women missionaries, 49 native workers, 2 places of worship, 4 day schools, 2 boarding schools, 1 college, and 283 professed Christians. Station also of the CEZ (1900), with (1903) 2 women missionaries, 1 native worker, and 1 boarding school. Station of the BFBS, with 2 men and 4 women engaged in Bible work.

**SING-JU.** See Hai-ning-fu.

**SIN-TIEN-TSI.** See Hsin-tien-tsi.

**SIN TU.** See Hsin-tu.

**SINYONG.** See Hsin-yang-chau.

**SIOKE: A town in Fo-kien, China, situated about 40 miles W. of Amoy. Station of the RCA (1887), with 2 missionaries and their wives, 15 native workers, 7 outstations, 11 places of worship, 3 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 367 professed Christians. Some write the name Siok-hai.

**SIONI MALWA.** See Shoni.

**SIPAHUTAR:** A village in Sumatra, Dutch East Indies, situated in the Teba Lake region. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 31 native workers, 8 outstations, 9 day schools, 1 Sunday school, and 995 professed Christians, of whom 446 are communicants.

**SIPIOGOT:** A village in Sumatra, Dutch East Indies, situated in the Batang Toru district, about 62 miles E. by N. of Medan. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 14 native workers, 11 outstations, 9 day schools, and 551 professed Christians, of whom 138 are communicants.

**SIPOK:** A village of Sumatra, situated in the valley of the Batang Toru, about 40 miles S. E. of Siboga. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 26 native workers, 6 outstations, 10 day schools, 2 Sunday schools, and 1,102 professed Christians, of whom 442 are communicants.

**SIPOHOLON:** A village in Sumatra, Dutch
West Indies, situated in the island region of the Caribbean, and about 500 miles N. W. of Puerto Rico. Station of the Missionary Society, with (1903) 3 missionaries and their wives, 2 women missionaries, 56 native workers, 9 outstations, 10 day schools, and 4,269 professed Christians, of whom 1,723 are communicants.

SIROMBU: A village on Nias Island, Dutch East Indies, situated on the W. coast, about 25 miles E. by W. of Gunong Sitolli. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 7 native workers, 1 outstation, 1 day school, Sunday school, and 636 professed Christians, of whom 350 are communicants.

SITAPUR: A town in the United Provinces, India, situated on the N. coast, of Baranoff Island. Capital of the North Territory. Population, 1,200. Station of the Presbyterian Home Missionary Society (1877), with (1900) 6 missionaries and their wives, 6 native workers, 1 place of worship, 1 day school, 6 boarding schools, 349 professed Christians. Station also of the EF, with (1903) 2 missionaries, 1 place of worship, 1 Sunday school, and 60 professed Christians.

SIUK: A town and seat of a town in Alaska, situated on the W. coast of Baranoff Island. Capital of the North Territory. Population, 1,200. Station of the Presbyterian Home Missionary Society (1877), with (1900) 6 missionaries and their wives, 6 native workers, 1 place of worship, 1 day school, 6 boarding schools, 349 professed Christians. Station also of the EF, with (1903) 2 missionaries, 1 place of worship, 1 Sunday school, and 60 professed Christians.

SIUT: See ASVUT.

SIVAS: A town in Asiatic Turkey, capital of the province of Sivas; situated on the Kiril Irmak (anc. Haly) River, at an altitude of about 4,000 feet, and 180 miles E. by S. of Constantinople. Population about 43,000, of whom 30,000 are Muslims. Station of the ABCFM (1851), with (1903) 3 missionaries and their wives, 2 women missionaries, 39 native workers, 11 outstations, 5 places of worship, 10 Sunday schools, 26 day schools, 3 boarding schools, 2 orphanages, 1 dispensary, 1 industrial school, and 320 communicant Christians.

SKAGUAY: A town in Alaska, situated at the head of the Lynn channel. Terminus of a railroad over the mountains to Whitehorse. Station of the Pacific Missionary Society, with (1900) 3 missionaries and their wives, 2 women missionaries, 1 place of worship, 1 hospital, and 41 professed Christians.

SKIDEGATE: A settlement on Graham Island, British Columbia, N. W. America, situated on the southern coast of the island, on the inlet separating it from Queen Charlotte's Island. Station of the MCC (1883), with (1900) 1 missionary and his wife, 1 place of worship, 1 Sunday school, and 141 professed Christians.

SLAVE TRADE AND MISSIONS: One would faint at the thought of slavery. Of the Middle Passage, where, in the stifling hold of a small vessel, human beings were packed like dead freight, that neither eats, nor drinks, nor breathes. Yet it is worth while to recall that missionaries have exerted no small influence in bringing to an end the traffic in human flesh in its last stronghold of Africa. The system is not dead, but great examples of freedom have been forever closed to the Muslim slave-raider. The voice of the missionary has ever been powerful to arouse the public to the duty of holding the slave in check, and of protecting the native people. He has used his influence, he notes and reports the horrors practised with the permission of the slave owners. Livingstone, in his Last Journals, gives some account of the atrocities which he saw on the road. June 19, 1866, he passed a woman tied by the neck to a tree, and harried with a sword; she begged for mercy, but the rest, and in order that she should not become the property of another she was thus dispatched. Dr. Livingstone saw others tied up in the same way, and one lying in the path in a pool of blood. June 26 he passed another woman lying dead in the road: a man was standing over her, and when Livingstone killed her early that morning, in anger that he must lose the money paid for her, because she was too exhausted to walk any further. His Last Journals gives an account of a merciless and unprovoked massacre of hundreds of native women and children. We learn something from the pages of other modern travelers of the slave trade as carried on by Muslim Arabs. November 24, 1883, H. M. Stanley was steaming up the Congo on his way to Stanley Falls, not far from the mouth of the Werre, when he found in front of them, a town, situated for the town of Mwene, which he had passed in his first voyage down the river. The site was there, the clearing in the forest, and the white paths up the banks, but not a house or living thing was to be seen. The palace had disappeared. The leaves of the trees were scorched and their stems blackened, showing the effects of the fire that had wiped out the town a few days before. Three days later he sent a boat to ascertain what slate-colored object was floating down stream, which was tied to the body of a woman. The woman had been found together with cords. This tragedy had taken place only twelve hours before. Soon after he came in sight of the hordes of banditti, 300 strong, with a like number of domestic slaves and women. Sixteen months had they been engaged in their work of slaughter. They had desolated a region of 34,570 square miles, 2,000 square miles larger than Ireland; 118 villages in 43 districts had been destroyed, containing at least 118,000 people, and all they had to show as the result of these six months of slaughter was so extensive a region as it was wretched, ragged, and starving. The crowd of 2,300 women and children, with not one grown-up man among them. Five expeditions in all had already carried as many captives away as these possessed. To obtain these 2,300 they must have shot 2,500 men, while 1,300 more had perished by the way from hunger and despair. On an average, six persons had been killed to obtain each puny child in the encampment. The slaves were fetered in groups of twenty chained together; such fruits as could be found were thrown down before each gang, to fight for as they might, and the odors and Domingo of the crowded camp were simply horrible. The bones of many stared through the skin, that hung in flabby wrinkles. He adds, "How small a number of them will see the end of their journey, God only knows. The process of their capture was as horrid as their condition, when Mr. Stanley saw them, was full of misery. The Arab stole up stealthily at midnight through the darkness to the doomed town: no sound save the chirping of insects disturbs the sleepers, till suddenly the torch was applied on all sides, and in the light of the flames of the grass roofs of the
houses the deadly musket, shot down the men as fast as they appeared. Many might succeed in reaching the shelter of the woods, but the women and children were seized and carried off. Mr. Stanley estimated that the gain of the Arabs from the slaughter was only 2 per cent. of the proceeds with the slave dealing. That Rev. J. A. Dunn, at Maindu, 35 miles northwest of Lake Nyassa, on the Kiwira River, wrote as follows in 1889: "At daybreak, March 15, we were awaked by a number of shots fired in rapid succession; we were told it was Mereri with two bands of Arabs. The surprise was complete. More than thirty women with babes and several girls were captured. The men, only half awake, tried to defend their wives and children, but were driven back by the murderous firing. The Arabs entrenched themselves in a bamboo stockade, then slaughtered their last on their captives. Two children, whose weeping over the dead bodies of their mothers disturbed the orgies, were flung into the flames of a burning house. The two following days were spent in plundering and destroying the villages. The cattle are Mereri's. The women are claimed by the Arabs who will sell them when they tire of them. They left, after burning everything that could be burned."

Another English missionary at Kibanga, on Lake Tanganyika, wrote in 1888: "At night we could see the villages everywhere in flames, the people fleeing for refuge to the lake, and the brigands leading away the women and children in long files. A poor old woman as she was led away caught hold of the clothing of the missionary and begged him to save her, but she was hauled away by the rope that was round her neck; another received a wound from the butt end of a pistol. Where yesterday we sought to impart instruction and comfort, now reigns the silence of a desert."

The Rev. (afterward Bishop) Chauncey Maples, of the Universities Mission, during a residence of six or seven years never went 70 miles from Masi, the capital city. A large number of them numbered 2,000, and, according to Mr. Stanley, that number must represent an amount of butchery and an extent of territory turned from populous villages into a desert that is appalling to think of.

Dr. Kerr Cross wrote from Karonga in April, 1889: "For five weeks the Arabs have harassed us constantly. They hide in the woods and murder men as they pass to and from their gardens. A few days since a party of Wankonde were thus attacked; one was killed and another wounded. The Arabs cut off the head of their victim and fed home, and it is now stuck on a pole in their stockade. Another was in the woods cutting trees for a house, when Arabs fired on him, piercing his shoulder. Again a band of our men were fired on by Arabs hidden in the long grass; only one was shot, and he was brought in and soon died. A week ago we were awaked at midnight by a volley fired quite near our home. In a few minutes every man was at his post on the stockade, but only one old woman was killed; three bullets had gone through her body. What would be the fate of these poor villagers should the missionaries be driven off?"

The turmoil in Uganda before British control was established, and the insurrection of the Sudanese troops in which Pilkington lost his life, may be traced directly to the Arab slave-raiders, whose business was hampered by the presence of Christians and missionaries. The same is in part true of the slave trade of Mahdian in the Sudan. Each was a clash of the system that now stands alone in fostering slavery with the system which proclaims the brotherhood of man as taught in the Gospel. Because Christianity spoiled their trade, the Arabs attempted to crush out the rising Christian power in the upper Nile region.

As to the guilt of Mohammedans in connection with the slave trade, Cardinal Lavigerie was very outspoken, and for years he was in constant intercourse with them. He once remarked: 1. "I do not know in Africa a Muslim state whose ruler does not permit, and often himself practises on his own subjects, and in ways barbarously atrocious, the hunting and sale of slaves."

2. "It is only Muslims who ravage Africa by slave raids and slave-trading."

3. "Where the slave trade is prohibited by Christian powers, I do not know a Mohammedan who does not advocate slavery and declare himself ready to buy or sell negro slaves."

4. "I know personally in Asiatic Turkey and in that part of Africa under the Ottoman Sultan, many public slaves in the slave market, and the passage of the sad caravans take place with the complicity of Turkish authorities."

5. "Never to my knowledge has any mufti or teacher of the Koran protested against this infamous traffic. On the contrary, in their conversations, they recognize it as authorized by the Koran for true believers as regards infidels."

6. "Never to my knowledge has any cadi or Muslim judge pronounced a judgment which implied the condemnation of slavery, but all have sided with the teachers and expounders of the Koran."

In conclusion, we cannot more than barely allude to the unutterable beastliness, as well as cruelty, of these Muslim slave-traders, in connection with the mutilation of boys, for the vast market which after the operation, yet, as the market value of the survivors is greater on account of it than would have been the price of the whole, the horrid work goes on wherever the Muslim power is still unchecked.

The great center of the slave-trade is now in the regions of the Niger, in the Fula or Wolof territories, and the Sokoto Empire. British power is slowly advancing and enforcing its prohibition of slave-raiding in those regions, and this infamous commerce must soon come to an end, never to be revived while Christianity lives.

SLAVS: The Slavs belong to the Aryan or Indo-European family, and the group in which they are classed is commonly called the Slavo-Germano-Lithuanian group.

The primitive history of the Slavs and date of their immigrations into Europe are covered with the veil of darkness, like those of many other nations. It is generally supposed that they appeared in Europe after the Germans, and that their original settlements extended between the sources of the rivers Don and Dnieper, and beyond the Dnieper toward the eastern shores of the Baltic Sea and the river Vistula, and toward the south, not farther than the River Priu. But in the 3d and 4th centuries they are found.
occupying a district the approximate boundaries of which were: from the river Niemen, as far as the mouth of the river Duna; from the Gulf of Riga over the Valdai Heights as far as the mouth of the Oka; on the east, a line stretching from the Oka to the Keivar, and from the Keivar to the River Berezina while on the west the line extended to the Carpathian Mountains and the upper Vistula. Toward the end of the 5th or beginning of the 6th century the Slavs occupied the northern banks of the Danube; they soon crossed over and took possession of its southern banks. Hence to spread themselves as far down as Albania, Thrasybulus, Epiphanes, and even the Peloponnesus.

The introduction of Christianity among the Slavs is the epoch from which their history takes a more definite form. This momentous event was brought about by the combined efforts of two brothers, Cyril and Methodius, natives of Salonica, whom all the Slavs venerate as their apostles and "illuminators," and whom they worship as saints. Cyril, the younger brother, was a man well versed in all the learning that Byzantium at that time, could impart, and in account of his erudition he was honored with the title of "philosopher." Giving up all the honors and emoluments to which they might have easily attained, the two brothers went to Pannonia at the request of Prince Rotislav, to preach Christianity among the Slavs of Pannonia.

Here they devoted themselves to the spreading of the Gospel and the translation of the Scriptures, and the most essential liturgical books. Cyril devised a Slavic alphabet, constructed on the basis and model of the Greek, which is still known by the name of "Kyrillitsa," (Cyril's alphabet). It consisted of 38 letters, 24 of which were the 24 letters of the Greek alphabet, while 14 others were devised by Cyril to express sounds peculiar to the Slavic speech, and for which there were no corresponding Greek letters. In spite of the opposition of the German clergy, Cyril and Methodius succeeded in obtaining the approbation of the Pope, and he allowed them to use the Slavonic language in the church services. During a visit to Rome, in 869, Cyril died, aged 43 years; while his brother, Methodius, having been appointed his bishop by the Pope. But he soon found his position shaken by the virulent opposition of the German clergy, was dispossessed of his bishopric, and died, as it is said, in prison, in 885.

The total number of the Slavs is estimated at about 90,000,000, distributed in round numbers as follows; Russians, over 60,000,000; Bulgarians, 4,000,000; Serbo-Croats and Slovenes, about 7,000,000; Czecho-Moravians and Slovaks, 7,000,000; Poles, about 10,000,000; and Serbo-Lansatians, about 150,000. According to their religious denominations, about 68,000,000 Slavs belong to the Eastern Church, 20,000,000 to the Roman Catholic, 1,500,000 to the Protestant, and about 800,000 are Mohammedans. To the Eastern Church belong the Russians, the Bulgarians, and the Servians; to the Catholic Church belong the Poles, the Czecho-Moravians and Slovaks, the Croats, and the Slovenes. The Protestant Slavs are distributed as follows: Slovaks, 640,000; Poles, 500,000; Czecho-Moravians, 150,000; Serbo-Lansatians, 100,000; Slovenes, 120,000; Bulgarians, 5,000. The Mohammedan Slavs are found chiefly in Bosnia and Herzegovina (500,000), and Bulgaria (about 250,000), who, however, have retained and speak their respective Slavic dialects. The Slavic languages are divided into two branches: (1) Southeastern, including the Russian, the Bulgarian, the Servian, the Croat, and the Slovene, and (2) Western, including the Bohemian, the Polish, and the Serbo-Lansatian, with all their local dialects. The Roman Catholic Slavs use the Latin language in their church services and the Latin alphabet in their literature, while the Slavs of the Eastern Church use the Kyrillitsa, with some partial modifications, in their writing, and the "Church-Slavonic" in their churches. This "Church-Slavonic" language is the paleo-Slavonic of Cyril's translation of the Scriptures, modified according to Russian orthography and grammatical construction. The most ancient manuscript of the Kyrillitsa which bears a certain date is the "Ostromirov Gospel," written in 1053 for a Russian prince named Ostromir. Other manuscripts, written in another alphabet, known as the "Siagolitsa," however, probably date as far back as this, or perhaps are even older.

There can be no doubt that even in the 9th and the 10th centuries various Slavic dialects existed, just as we find them now; but these dialects were nearer to each other than at present. This is the Slavonic epoch of their works, when the Kyrillitsa was accessible to all the Slavs in the 9th century, and how the literary productions of one Slavic tribe could be very easily transcribed and appropriated by another. But in the course of time these various Slavic dialects have tended to diverge more and more from each other, until at the present time they form quite distinct languages. The common Bulgarian or Servian of to-day can hardly understand the spoken or literary language of the Pole or the Bohemian, nor can the Slovak or the Slovene comprehend the Russian. In grammatical form and construction all the modern Slavic dialects, with the exception of the Bulgarian, have retained a close resemblance to the paleo-Slavonic language, and one well acquainted with the latter will not find much difficulty in mastering and understanding the various Slavic dialects.

In conclusion, we may say that many fanciful derivations and examples of the word "Slav" have been given. The most probable one is that the word is derived from *slav*, which means "word" or "speech," and the name of the ancient orthography is *slavonic*. *Slavonic* means "man of speech," while the Germans, the nearest neighbors of the Slavs in olden time, were and are still called by the Slavs, Nyemtzi, from "nyem," meaning "dumb."

**SLOVAKS:** The Slovaks are, strictly speaking, only a branch of the Bohemian race, and their language may be considered as a dialect of the Bohemian language. But of late years a separatist movement has arisen among them, and they are trying to form a literature of their own and to be treated as a nation apart from the Bohemians. The Slovaks inhabit all the west of Hungary, and number over two millions. The greater mass of them (1,553,000) belong to the Roman Catholic, and 640,000 to the Protestant Church. They settled in the territory they now occupy toward the end of the 5th century, and shared the fate of the Bohemians and Moravians in many historical catastrophes. Christianity was introduced among them before the first half
of the 9th century by German preachers; and later on in the same century Methodius, the Slavic apostle, introduced among them the doc-
trines of the Eastern Church, together with the Slavic liturgy. But this form of Christianity could not be maintained for long, and after the death of Methodus (885) it was replaced by Latin Christianity and the Latin liturgy. In 907 the Hungarians put an end to the existence of the great Moravian kingdom, which had united under one scepter the Slavs of Bohemia and Moravia and the Slovaks. In 999 the country of the Slovaks was colonized by the Franks after they fell again under the Hungarians, who practically put an end to their political inde-
pendence. They preserved, however, their local liberties and national immunities for a long time, and in the 15th century the doctrines of Huss found warm adherents and followers among them.

The dispersion of the Hussites and the emigration of the Bohemian and Moravian brethren strengthen-
ed still more the Slovak reformed party; and the Bohemian language, along with Bohemian books, was established among them. Luther's reformation likewise found an entrance among the Slovaks—not only among the common peo-
ple, but also among the nobility. But a Roman Catholic reaction, which manifested itself as far back as the 16th century, gradually put down Protestantism among the larger part of the Slovak population. A part of the followers of the reformed party who refused to return to the Roman Church, confiscating their property, and burning the books and publica-
tions of Truber and his followers with such zeal that few are now to be found. This perse-
cution put a stop to religious and literary progress among the Slovaks, so that literary activity remained at a standstill till the end of the 18th century. But in the general revival of the Slavic dialects and nationalities that began early in the 19th century the Slovanes also have cultivated a national literature in their national tongue, and this movement has gone on increasing, especially since 1860.

SLOVENES: The Slovenes inhabit the districts of Carinthia, Krania, Styria, and Istria in Austria, and number about one and one-third millions. They are classed among the Southeastern Slavs, and their language is one of the South Slavic dialects. It bears a strong relationship to the Serbo-Croatian language, and in its lexiconology it has a great resemblance to the Bulgarian. The Slovenes belong to the Roman Catholic Church, with the exception of about 15,000 Protestants, and they all use the Latin alphabet, with some slight modifications, in their literature. The Slovene language was used in Europe in the 6th century, and about the end of the 5th they fell under the dominion of the Franks in the reign of Charlemagne. Their petty princes were allowed to rule over them as vassals of the Franks until, in the course of time, the country was entirely subjugated to German rulers, and ever since has formed a part of Austria. Chris-
tianity was introduced among the Slovenes in the 7th century by preachers who came to them from Aquilea (in Italy) and from Salzburg; but in the second half of the 5th century, and especially after the Tractarian controversies that took place in Austria, the Archbishop of Salzburg, Virgilus (known as the apostle of the Slovenes), succeeded in establishing Christianity among the Slovenes through his German preachers. That the Slavic apostles, Cyril and Methodius, introduced in the 8th, but when Slovenes is doubtful; still there are some very high authorities on the Slavic languages who claim that the language in which the original transla-
tion of the Scriptures was made by SS. Cyril and Methodius was the language of the Slovenes, and not that of the Hungarians. Hence they call it paleo-Slovenic in distinction from the neo-

Slovenic. The most ancient linguistic remains of this old Slovenic language are the so-called "Freisinger Extracts," found in an old Latin manuscript, and referred to the 9th century. Up to the 16th century the Slovene language seems to have been almost lost, and to have been replaced by Latin due to the fact that literature was exclusively in the hands of the clergy. But when the Reformation found its way among the people a movement was made to bring the vernacular of the people to the front as a means of their enlightenment and instruction. Riman Truber (1508-1586) was the most active laborer for the spread of the new ideas among his people, and for the elevation of the national idiom. He found many followers and adherents, and, thanks to his labors and theirs, a translation of the whole Bible, the first one in Slovene, was published in 1584, the New Testament having been translated by Truber himself. Unfortunately this reformatory move-
ment did not last long, and in the first half of the 17th century it was suppressed by a Roman Catholic reaction, which violently raged against the reformed party, banishing those who refused to return to the Roman Church, confiscating their property, and burning the books and publica-
tions of Truber and his followers with such zeal that few are now to be found. This perse-
cution put a stop to religious and literary progress among the Slovenes, so that literary activity remained at a standstill till the end of the 18th century. But in the general revival of the Slavic dialects and nationalities that began early in the 19th century the Slovenes also have cultivated a national literature in their national tongue, and this movement has gone on increasing, especially since 1860.

SMITH, Azariah: Born at Manlius, N. Y., February 17, 1817; died June 3, 1851, at Aintab, Turkey. Graduated from Yale College in the class of 1838. After studying medicine and theology, he was sent to Turkey, November, 1842, as missionary of the ABCFM. After learn-
ing the Turkish language he spent five years in visiting the various stations of the Board in Turkey, giving to each the advantage of a "medical department" for a time. Wherever cholera appeared, there Dr. Smith also appeared; and in many a city in Asia Minor, Armenia, and Mesop-
tamia, in Cappadocia and Christiania. To bless the missionary who seemed miraculously to heal. The preparation widely used in the United States in 1849 as "Dwight's Cholera Mixture," and more lately famous as "Hamilin's Cholera Mixture," was a prescription devised by Dr. Azariah Smith. In 1848 Dr. Smith was definitely sta-
tioned at Aintab, and to the people there he became deeply attached. He published valuable papers on the archeology, meteorology, and natural history of Turkey at a time when such papers were rare.

SMITH, Eli: Born at Northford, Conn., September 13, 1801; graduated at Yale College, 1821; taught in Putnam, Georgia, for two years; gradu-
ated at Andover Theological Seminary, 1826; ordained May 10, same year; left for Malta under appointment of the ABCFM, May 23, 1826, as superintendent of a missionary printing establish-
ment. In 1827 he went to Beirut to study Arabic. The missionaries being obliged to leave Syria on the general outbreak of war, he became involved in the battle of Navarino. Mr. Smith, in 1828, returned
to Malta. He traveled through Greece in 1829, with Rev. Dr. Anderson. In 1830, with Rev. H. G. O. Dwight, he set out from Constantinople for an extended and adventurous exploring tour of Asiatic Turkey, Western Persia, and the Caucasus. The tour occupied a whole year, and secured the basis of his Geographie of the establishment of the Board’s missions to the Armenians and the Nestorians. Returning to the U. S. in 1832 he published the report of these explorations under the title Researches in Armenia, Persia, and British India. His personal “Missionary Sermons and Addresses.” In 1833 he embarked for Syria, accompanied by Mrs. Smith, formerly Sarah Lannan Huntington, whose brief but bright missionary career of only three years was terminated by her death at Smyrna, September 30, 1836. In 1837-38 and 1852 he was the companion and coadjutor of Prof. E. Robinson in his extensive explorations of Palestine. By his experience as an Oriental traveler, his tact in eliciting information, and his intimate knowledge of Arabic he contributed largely to the accuracy, variety, and value of the discoveries of Biblical geography recorded in Dr. Robinson’s celebrated Researches. At the same time these travels, in close relations with the people of the country, added to his own information, and prepared him for the literary work in Arabic which was the greatest and at the end of each journey carried. He visited the United States again in 1838 and 1845, for reasons of health. During these visits he traveled extensively in the United States, speaking on “missions” and preaching with great acceptance. He also took the opportunity while passing through the state of New York to study the methods of Arabic typography there in use, and gathered information which enabled him to make his printing house as complete as possible. For he was all this time pressing on the work of publication of books and tracts. Among his qualifications as translator as well as editor was his ripe scholarship. His learning was extensive and accurate. To the ancient classics he added an acquaintance with French, Italian, German, and Turkish. With the Hebrew he was very familiar, and the Arabic, the most difficult of all, was to him as a second mother tongue. His learning fit him for the difficult office of editor, but by long practice and close attention to the business of printing in all its branches, he acquired an unusual skill in managing the minutest details. He not only wrote himself in Arabic, but devoted much time and labor to correcting and editing works written or translated by others. For many years he carefully read the proof-sheets of nearly everything that went through the mission press. He spent also much time and intense labor in superintending the cutting, casting, and perfecting of various fonts of new type made from models which he had himself drawn with the utmost accuracy. This work was done at Leipzig in the celebrated establishment of Tauchnitz. It was in 1847 that Mr. Smith devoted himself to the translation of the Bible into Arabic. To this task all his studies and all his previous work had been made to serve as preparation. After eight years of incessant toil he completed the translation of the New Testament, the Pentateuch, the minor Prophets from Hosea to Nahum, and the greater part of it.

In 1856 failure of health compelled Dr. Smith (he had received the degree of Doctor of Divinity from Williams College) to suspend his labors for a time. He prayed often and earnestly that he might recover and be permitted to complete his work of translating the Scriptures. But it was not to be. He died at Beirut January 11, 1857. During all his labors in the literary branch of the mission, Dr. Smith never forgot that he was a messenger of Jesus Christ, and he entered with all his heart into every plan for the spread of divine truth. Being a fluent speaker of colloquial Arabic, it was ever his delight to preach the Gospel in the family, by the wayside, and in public assemblies.

His work of Bible translation was taken up by his associate, Rev. C. V. A. Van Dyck, D.D., and carried to a full and admirable completion.

**SMYRNA**: A city in Asiatic Turkey, at the head of the Gulf of Smyrna, about 200 miles southwest of Constantinople. Population about 150,000, of whom a little more than half are Mohammedans and Greeks (40,000), Armenians (10,000), Jews (15,000), and Europeans. The climate is hot and trying, the summer being very oppressive. The general appearance of the city from the sea and also from the Acropolis is very attractive, many of the houses, especially in the Christian quarters and foreign embassies of stone and well built. As a business center Smyrna has grown rapidly in importance, especially since the establishment of two lines of railway connecting it with the interior of Asia Minor.

European customs and influence have also been largely predominant, and the intimate connection of the large Greek population with Greece and the islands of the Egean has helped to make it a center of far greater commercial activity even than Constantinople. It has also derived considerable importance from the fact that it is the only Turkish city which the fleets of Europe and America can visit, and during the cooler months there is seldom a time when one or more warships are not anchored in the roadstead. The colloquial Turkish name of the city is *Giaour Imeri*. (In A.D. Smyrna)

As a center for missionary work Smyrna has been prominent from the earliest times. The interest of its name as the home of Polycarp, and as one of the Seven Churches addressed by the Apostle John, naturally drew attention to it; but even before the Protestant missionaries reached it, at the commencement of the 19th century it was the only city of Turkey that was regularly open to missionaries, and with which there was direct communication from European and American seaports. The British and Foreign Bible Society early established an agent here, and the first missionaries of the ABCFM to the Levant were located here.

At present the missionary societies working in Smyrna are as follows: ABCFM (1829), with (1903) 3 missionaries, two with their wives; 6 women missionaries, 46 native workers, men and women; 5 outstations, 7 day schools, 1 kindergarten, 2 boarding schools, 1 college, and 203 professed Christians; London Jews Society (1829), with (1903) 1 missionary and his wife and 4 native workers; Church of Scotland Jewish Mission, with (1900) 6 missionaries, men and women; 2 schools, a dispensary, and a hospital; Kaiserswerth Deaconesses’ Institute (1833), with (1903) 14 deaconesses and assistants, 1 boarding school, 1 orphanage, and 1 sanitarium for deaconesses; FCMS (1891), with (1901) 1 missionary and his wife, 1 woman missionary, 1 place of worship, 1 day school, and 14 professed Christians. There...
is also a Sailors' Rest, which serves as a center for work among foreign sailors, and also for native inquirers. One of the most interesting developments of missionary work has been the formation and the growth of the Greek Evangelical Alliance. It originated in the effort of Rev. Geo. Constantine, D.D., a native Greek educated in America, to place the work among the Greeks on a firm basis of self-support. Dr. Constantine commenced a series of sermons in the hall connected with The Rest, and the following year for his work in Africa, arriving in Zanzibar on February 25, 1884. In 1885 he paid his first visit to Lake Nyasa, and during this visit he secured a site on the island of Likoma, a convenient and comparatively healthful center for the Universities Mission work on the lake. This mission settlement on the lake showed a steady increase; in four years the staff had more than doubled; and the little steel vessel, built in England and sent out in four hundred packages, enabled the missionaries to found station after station on the lake shore. Under the supervision of the bishop, the work at Zanzibar steadily grew in power. At Kigangani, where Bishop Smythies resided, a theological college was formed, which was the heart of the mission. In 1889, and again in 1891, the bishop visited every station under his jurisdiction; and in 1890, on his trip home, he conferred with the German Chancellor, in order, if possible, to remove the possibility of friction with the German agents on the East Coast of Africa, since by a recent treaty the Magila stations remained within the sphere of German influence. The interview was entirely successful, and the effect of this visit was most beneficial to the cause of missions in and around Zanzibar. In the completion, equipment, and opening of the hospital at Zanzibar, Bishop Smythies saw the fruit of years of earnest labor, and it has proven to be an institution of increasing usefulness. Bishop Smythies was buried at sea, May 7, 1894.

SOCIETY FOR PROMOTING CHRISTIAN KNOWLEDGE: This Society is the oldest organization for Christian work in the Church of England. It was founded in 1698, and has since carried on its work in ever-widening spheres of activity, and with ever-increasing expenditure of funds. Its history has not been fully utilized, and the meager outline which can be gained from its report must suffice instead of the lengthy notice which is its due, both on account of its age and its wide-spread usefulness.

The Society is composed of persons who must, of necessity, be members of the Church of England or some church in full communion with it. Its work is of a more mendicant kind, self-perpetuating organization of the existing members, after which they are elected, and on payment of a certain annual sum are entitled to full privileges. Persons who make subscriptions are entitled to some privileges in the form of receiving books and tracts; thus the Society is charged with the ever-growing expense of the Church of England, the apparently responsible to no one except its own elected authorities.

His Majesty the King of England is the patron of the Society. The Archbishop of Canterbury is the president, and there are numerous vice-presidents, comprising mainly the other archbishops and bishops of the Church of England, together with like dignitaries of any church in full communion with the Church of England, who may be members of the Society. There are four treasurers, two general secretaries, and two who are designated for the work in the United States. A general committee of administration called the Standing Committee is assisted by special committees, such as the Committee of Finance, of Foreign Translation, of General Literature, the Tract Committee, etc.

Under one broad comprehensive title, the Society combines the work of many departments, each of which might well be the work of a single society. In its endeavor to aid Christian work of any kind throughout the world it is:

1. The Bible and Prayerbook Society of the Church of England: In this branch of the work is included the producing and circulating of these books or portions of them not only in England but throughout the world. The publication is in seventy-five or more different languages. By means of grants of books or by paying the expenses of these publications at cost or less, by assisting translation and publication committees in various foreign lands, the work is carried on, and during the year 1900 about 60,000 books and tracts were circulated in non-Christian lands.

2. A Tract and Pure Literature Society: It produces and circulates distinctively religious works, together with works by able writers, on science, history, and topics of general interest and utility, including fiction of an elevating character. In connection with this branch of the work, grants of books are made to churches, reading-rooms, missions of every kind, seamen, soldiers, etc.

3. A Home Church Mission and Education Society: In addition to the general Home Missionary work carried on along the lines already mentioned, there are the following distinctive objects of its care.

(a) A college (St. Katherine's) at Tottenham, England, where school-mistresses are trained.
(b) A training college for lay-workers maintained in the east of London.
(c) Money is given toward the maintenance of the archbishopric, bishops, and deans in the Church of England, to counties, and also in other parts of the world.

4. A Foreign and Colonial Missionary Society:
This work is accomplished in various particular ways:

(a) Churches, chapels, and mission-rooms are built or aided in dioceses of the Church the world over. (b) Native clergy and lay mission agents are trained for the work. (c) Medical missions are undertaken. (d) The training of theological missionaries, both men and women, is trained. (d) Funds are provided for the support of clergymen called to work in destitute regions. (e) As mentioned above, Bible translation and other work of similar character has been aided, and grants made for the publication of religious literature, or the work of publication assisted. In connection with this work, the Translation Committee is assisted by vernacular sub-committees in Madras (Tamil and Telugu), Punjab, Sind, Bombay, and Calcutta. Deposits for the Society’s publications have been established at many places on the Continent of Europe.

5. Emigrants’ Spiritual Aid Society: An important and, in some respects, unique feature of the work of the Society is the care which it exercises over the many emigrants who annually leave the shores of Great Britain for other lands. These emigrants are watched over both spiritually and temporally; chaplains attend them on their departure, and letters are given to the Society’s representatives in foreign lands, who meet the emigrants on their arrival, assist them in locating in their new homes, besides protecting them from the wiles of those who are ready to take advantage of their ignorance and strangeness. In many cases chaplains are deputed to accompany a shipload of emigrants, and a matron is sent to lend a helping hand during the voyage—a long one when Australia, New Zealand, or South America is the objective point—the Gospel is preached, church ordinances are administered, and the weary days whiled away by lectures which deal with the country of their destination, the rotes to which many of the emigrants are sadly ignorant. At the principal ports of the United States, Canada, Tasmania, Australia, South Africa, South America, and New Zealand representatives of the Society meet emigrants on arrival to render any needed services.

These, briefly stated, are the various branches of the important work of the Society. Two facts of this work should be borne in mind by all interested in Foreign Missions: 1st. This Society aided, and at last entirely supported, during nearly a hundred years, the Mission (Danish-Halle) in South India, founded by the King of Denmark at the beginning of the 18th century. 2d. The Society has furnished translations of Holy Scripture and other religious literature—particularly the Prayer Book—in many insignificant and transitory dialects of obscure tribes. The number of volumes or copies of tracts issued at home and abroad by the Society, each year, is about 14,000,000.

SOCIETY FOR THE PROPAGATION OF THE GOSPEL IN FOREIGN PARTS: From the time of Cranmer (1534) the different movements for English colonization recognized, more or less clearly in principle, the necessity of Christian work, but the performance fell so far short that, in 1675, an inquiry was instituted by the authorities of the Church of England into the situation. One result was the organization, in 1698, of the Society for Promoting Christian Knowledge. The limited scope of this Society did not meet all the need, and in 1701 a special committee was appointed in the Lower House of the Convocation of the Province of Canterbury to inquire “into ways and means for Promoting Christian Religion in our Foreign Plantations.” The result was a petition to the King, granted by William III., on which a charter was drawn up, and, in its turn, granted by the King, dated at Lambeth Palace, June 27, 1701, the “letters patent” presented, officers elected, and steps taken for full organization of the Society for the Propagation of the Gospel in Foreign Parts.

The organization of the Society, as completed by supplemental charter in 1865, widened 1. Incorporated members (1900), about 6,000 in number, elected by the corporation, in virtue of donations to the Society’s funds, or special service rendered.

2. A Standing Committee, including certain members ex officio (the President, Vice-President, Treasurer, and Secretary), 24 members elected by the Society out of the incorporated members (six retiring annually), and Diocesan Representatives (two for each diocese in England and Wales, and four each for Armagh and Dublin, in Ireland) also elected from resident incorporated members.

3. The President is the Archbishop of Canterbury, and the Archbishop of York and the Bishops of the Church of England holding seats in England and Wales are Vice-Presidents. The Lord Almoner and Dean of Westminster, the Dean of St. Paul’s and Archdeacon of London, and the two Regius and two Margaret Professors of Divinity of Oxford and Cambridge are members ex officio.

Aside from certain special duties reserved for the Society, the entire management rests with the Standing Committee, ten members forming a quorum. The Society meets once a month, but, aside from some routine business, these meetings are distinctly missionary in their character. At the annual meeting of the Society for the election of members, officers, etc., all incorporated members are entitled to vote, absentees being allowed the use of voting papers. Only once has a poll of the entire Society been taken in this manner (1894).

The Society depends for most of its support upon the regular diocesan and parish organizations of the Church of England, but it has kept pace with modern development by the formation of children’s associations, and has also junior clergy missionary associations. The most efficient agency, however, is the Women’s Mission Association. This was first suggested in 1866, approved by the Society, and the complete organization effected on May 11 of that year.

The original title was “Ladies’ Association for Promoting the Education of Females in India and other Heathen Countries in Connection with the Missions of the Society for the Propagation of the Gospel.” This was altered in 1895 to “Women’s Mission Association for the Promotion of Female Education in the Missions of the SPG,” and its objects defined: “(1) To provide missionary teachers for the Christian instruction of native women and girls in such countries by supporting abroad and selecting and preparing in this country, Church women well qualified for the work; (2) to assist female schools; (3) to employ other methods for promoting Christian education; (4) to assist generally in keeping up an interest in the work of the Society; and independent of the Society as regards its funds, its methods of work.
were in entire harmony with the plans of the Society, and it entered no fields without its approval. The development, however, was slow, rapid, and its system of diocesan and parochial associations so parallel with that of the Society that it was deemed best, in 1903, to secure a still closer arrangement. This went into effect January 1, 1904. (1) The WMA Committee became the Committee of Women's Work (SPG); (2) WMA branches became local associations of SPG; (3) WMA workers became SPG workers; (4) the WMA general fund was amalgamated with the SPG general fund; (5) where a special interest is preferred contributions may be so designated. Provision was also made for increased representation of subscribers, and each diocese has the right to send a representative to the committee, also every woman subscriber to SPG may vote at the election of new members to succeed those retiring, under the by-laws, at the annual meeting of the Society.

By the terms of the charter the object of the Society was (1) to provide maintenance for an orthodox clergy in the plantations, colonies, and factories of Great Britain beyond the seas, for the instruction of the King's loving subjects in the Christian religion; (2) to make such other provisions as may be necessary for the propagation of the Gospel in those parts; (3) to receive, manage, and dispose of the charity of His Majesty's subjects for those purposes. The first action was an inquiry as to the religious state of the colonies; the second the raising of a fund. As to the scope of the Society's work, it was interpreted at first as being primarily the interests of "our own people," then the "conversion of the natives;" but in 1710 it was laid down by the Society that that branch of its design which related to the "conversion of heathens and infidels" ought to be prosecuted preferably to all others. While this exclusive policy was not pursued, the Society has never, even from the beginning, lost sight of this part of its missionary character and duty.

North America: For the greater part of the 18th century the colonies of Great Britain in America, together with those provinces in Canada, constituted the principal field of the Society. Its first missionary, Rev. Geo. Keith, originally a Presbyterian, afterward a Friend, and then a member of the Church of England, landed in Boston June 11, 1702. The next move was to South Carolina, where Dr. Thomas landed at Charleston, December 25, 1702. Other sections were occupied, and considerable work was done among the Indians, as well as for the colonists. In the political disturbances, in 1776, the Society's missionaries, numbering 77 in all, were loyal to the Crown, and were nearly all forced to retire from their missions, altho a few eventually took the oath of allegiance to the Republic. The result of the war, "while it almost destroyed the Church in the 'United States,' set her free to obtain that gift of the Episcopate so long denied." In 1785 the Society formally withdrew from the mission field in the United States, in which it had employed 309 missionaries among 6 European-Colonial races, negroes, and 14 Indian tribes, conducting its work in 8 languages.

Other fields were taken up in North America as follows: Newfound land, 1709; Nova Scotia, 1725; Quebec, 1759-64; New Brunswick, 1783; Ontario, 1784; Cape Breton, 1785; Printe Edward Island, 1819; Manitoba and Northwest Territories, 1850; British Columbia, 1859.

In all of these, 921 central stations have been occupied, and 1,597 ordained missionaries (European and Indian) labored among European-Colonial races, 31 Indian tribes, as well as negroes, Chinese, Japanese, and mixed races, using 12 languages. At the time of the organization of the Society there were 500 (estimated) church members and 2 clergy. In 1900 there were 66,757 members of the Church of England, and 1,310 clergy, including 100 in the employ of the SPG.

In 1902 the General Synod of a Missionary Society, consisting of members of the Church of England in Canada, was formed for the special prosecution of missionary work among the Indians, Eskimos, etc.

West Indies: The SPG made grants of books and passage money to clergymen going to the West Indies as early as 1703, but did not undertake special work in that field until 1712, when it came into possession of the Codrington estates in Barbados. To aid the Society for the special purpose of maintaining "Monks and Missionaries to be employed in the Conversion of Negroes and Indians." Plans were immediately made for a college, but the building was not completed until 1745. On the abolition of slavery the compensation money was invested by the Society for the benefit of the college. The income of late years has considerably fallen off, but there are still several scholarships, and there is also connected with it a Mission House for training workers for Africa. It has been affiliated with the University of Durham. The hurricanes that have devastated the islands, and more recently the terrible eruption at St. Vincent, have heavily taxed the Society's ability to help the weak churches.

The Bahamas were occupied by a representative of the Society in 1733, but the work was chiefly among the settlers, and it was not until the abolition of slavery in 1835 that any special forward movement was made. In that year work was commenced, with special reference to the negroes. To aid the Society for the benefit of the college. The income of late years has considerably fallen off, but there are still several scholarships, and there is also connected with it a Mission House for training workers for Africa. It has been affiliated with the University of Durham. The hurricanes that have devastated the islands, and more recently the terrible eruption at St. Vincent, have heavily taxed the Society's ability to help the weak churches.

South America: The Society's labors in South America have been chiefly in British Guiana, tho a missionary was maintained for a few years (1860-7) in the Falkland Islands. In Guiana the work has been chiefly among the aboriginal Indian tribes, Arawaks, Waranos, etc., and among the Chinese and East Indian coolies. Especially successful has been the work in the Pomeroon River, where there are good schools, churches, and parsonages. In the Church of England chapels and parishes in South America are under the general supervision of the South American Missionary Society.
Africa: The Society entered the African field on the West Coast in 1752; South Africa, 1820; the Seychelles, 1832; Mauritius, 1836; St. Helena, 1847; Madagascar, 1864. In all these sections the work has been consecutive as well as European races. In North Africa it has established chaplaincies among the English communities.

West Africa: The Royal African Company, in 1720, made application to the Society to recommend chaplains for their factories, but it was not till 30 years later that an accredited representative was engaged. The first was the Rev. W. Thompson, a graduate of Cambridge, who had served in New Jersey, resolved to devote himself to work in Guinea, and, receiving appointment, arrived at the river Gambia in January, 1752. He went to Sierra Leone, passed into the interior and met with not a little success, sending three boys to London for training, one of whom, Philip Quaque, returned to work among his people, being the first of a non-European race to receive Anglican ordination (1765). There were no great results of the work, and he remained the station, and for a considerable part of the time, serving as chaplain. After his death (1816) for eight years two chaplains were commissioned to superintend the free schools, but from 1821 to 1851 the Society had no permanent connection with West Africa, although it gave some assistance to Barth and Fearnley.

In 1851 the churches in Barbados turned their attention to Africa, and organized a society in connection with the S.P.G., which the Society assisted with funds. Care was taken to avoid collision with other societies, and, finally, a location was decided upon at Rio Pongas, 130 miles north of Sierra Leone, among the Susus and Mohammedans. Since 1864 the entire work has been in the hands of native missionaries, and has not developed largely.

South Africa: The first work of the Society in South Africa was specially directed to the needs of the English colonists, by the appointment of three chaplains in 1820, supported chiefly by the Government, but directed by the Society. Schools were established, some with special reference to the children of emancipated slaves. The first Bishop of Cape Town was consecrated in 1847, and then commenced a more aggressive work for the different classes, especially the Kaffirs. Then two more dioceses, Grahamstown and Natal, were created, the scattered, individual efforts became united, and work among the natives was extended, until it assumed the first place in the Eastern section, the colonists being able to provide for themselves. Thus, while in Cape Town the S.P.G. clergy are all working among colonists, in the dioceses of St. John's and Zululand (all 47) are missionaries, working among the natives; in Grahamstown, 14 out of 21; in Natal, 11 out of 21; in Mashonaland, 7 out of 9; in Bloemfontein, 9 out of 16 are missionaries to the heathen. This work has been very successful. Special attention has been paid to education, the institutions of the Society including a college at Zonnebloem, an institution at Grahamstown, a normal college, at Keiskama Hock, a training college at Maritzburg, a college for boys at Balgowan, Natal; St. John's College, Umtata; McKenzie Memorial College at Isandhlwana, St. Mary's Training College in Basutoland, and others at Pretoria and Bloemfontein.

The policy of the Society in educating and ordaining natives and placing them on a par with the white clergy has given it a certain advantage, and has drawn to the Church of England a considerable number who have felt that the other denominations, particularly the Dutch Church, did not recognize them to the full. A survey of the field in the Western Cape Colony (1821-1900) the Society employed 112 ordained European missionaries in 57 stations among the colonists; in the Eastern Division (1830-1900), 95 European and 10 native missionaries in 56 stations among the colonists, Kaffirs, and Basutos, in Kaffraria (1855-1900), 52 European and 19 native missionaries in 30 stations among the colonists, half-castes, Kaffirs, Basutos, Fingoos, Hottentots, Griquas, etc.; in Griqualand West (1870-1900), 21 European missionaries in 6 stations among colonists, Kaffirs, Zulus, Matabelese, etc.; in Natal (1849-1900), 85 European and 9 native missionaries in 38 stations among colonists, Kaffirs, East Indians, etc.; in Zululand (1859-1900), 13 European and 1 native missionaries, in 9 stations, among colonists and Zulus; in Swaziland (1879-1900), 4 European missionaries, 4 Swazi colonists and Swazis; in Tongaland (1895-1900), 2 European missionaries, itinerants, among the Zulu-Kaffirs; Portuguese E. Africa (1894-1900), 6 European missionaries in 6 stations, among colonists and natives; in the Transvaal (1864-1900), 49 European missionaries, 32 stations, among colonists, Africans, and East Indians; in Orange River Colony (1850-1900), 23 European and 1 native missionaries, in 6 stations, among colonists and natives; at Basutoland (1875-1900), 16 European missionaries in 5 stations, among colonists and natives; in Bechuanaland (1873-1900), 5 European missionaries in 5 stations among colonists and natives; in Matabele and Mashonaland (1893-1900), 24 European and 1 native missionaries, in 6 stations among colonists and natives; in Central Africa (1879-1884), 1 European and 1 native missionary at 1 station among natives.

The Society has carried on work also in Mauritius and the Seychelles (1832-1900), in St. Helena (1847-1900), in Tristan d'Acvilha (1859-1881), and in the Falkland Islands (1864-1900). With the exception of Madagascar the work has been chiefly for colonists and for coolies—East Indians, Chinese, etc.

In Madagascar the entire force of 12 European and 22 native missionaries are primarily engaged in work for the Malagasy and creoles, tho they do not neglect the foreign population. St. Paul's College at Ambatonaravana is a flourishing institution.

Australasia: The work of the S.P.G. in this section of the world commenced in 1793 with the appointment of four schoolmasters to New South Wales, two for Sydney, and two for Norfolk Island, where a penal colony had been established. Application was made for a clergyman, especially for work among the convicts, but for one reason and another none was sent until 1841. References were made at different times to the needs of the natives, but practically the entire effort of the Society has been directed to the convicts. The same is true in regard to Victoria (occupied 1838), tho something there was done for the Chinese coolies. In Queensland, on the contrary (1840), considerable attention was paid to the South Sea Islanders, who came there as laborers, as well as to the aborigines and Chinese coolies. The same is true of the work in South
and West Australia (1836). In Tasmania (1835) the Society's work has been entirely colonial. Moore College, Sydney; Christ's College, Tasmania, and St. John's Theological College, N. S. W., have been assisted by the Society.

The "Danish Mission" in 1840 to take up work among the colonists, some of which was the direct result of the labors of the Rev. Samuel Marsden and of the CMS. As the Maori Christian community developed, the Society gave assistance in the local and missionary work. In 1847 it established its first mission in New Zealand, and later its own bishopric. In the Punjab, commenced at Delhi in 1842, was in response to the urgent request of the resident supported by the influence of the lieut.-governor.

The general work of the Society in India, as in Africa, combines the interest of the foreign residents, the conversion of natives, the establishment of the ecclesiastical organization of the Church of England, and of education for all classes in various directions. The diversity of these enterprises makes it practically impossible to do more than give summaries. These, again, in the absence of certain statistics, lose much of their value.

In Bengal (1820-1900) the Society was represented by 75 European and 44 native ordained missionaries in 32 stations; in Madras (1825-1900), by 112 European and 127 native missionaries, in 78 stations; in Bombay (1830-1900), by 42 European and 7 native missionaries in 1 stations; in Ceylon (1814-1893), by 28 European and 6 native missionaries, in 5 stations; in the Central Provinces (1846-1892) by 2 European missionaries in 2 stations; in Assam (1851-1900), by 9 European and 2 native missionaries in 4 stations; in Burma (1859-1900) by 35 European and 21 native missionaries in 17 stations; in Ceylon (1840-1900) by 31 European and 31 native missionaries in 31 stations.

Among the more important educational institutions are: Bishop's College, Calcutta; St. Stephen's College, Delhi; St. John's College, Rangoon; Trichinopoly College; St. Peter's College, Tanjore; Christ Church College, Cawnpore; St. Thomas' College, Colombo, besides a number of training institutions, seminaries, etc.

The statistics from the different dioceses not being prepared with reference to any comparison of the tables, it is difficult to summarize them. There appear to be not far from 50,000 communicants and about 100,000 baptized persons connected with the missions of the SPG in British India.

Borneo: Mr. James Brooke, a naval cadet, who, while traveling for health became interested in the suppression of piracy in the Malay Archipelago, fitted out a ship, and in 1838 landed at Kuching in Sarawak, in Borneo, and made himself master (or Rajah) of the province. As soon as he had established his rule, he invited the Church of England to establish a mission. The SPG felt unable to assume the work, but contributed to a committee which was organized for the purpose in 1846. The first missionaries went out in 1851, and two years later the SPG took charge of the mission. The mission suffered severely at different times, from rebellions and wars, but on the whole its work among the Dyaks prospered, and subsequently (1861) it extended its efforts to the Straits Settlements. In all 41 European and 7 native missionaries have worked in 28 stations. Among the stations occupied in the Straits Settlements are Singspur, Penang, and Perak; in Sarawak, Kuching, Qu nip, Sibujong, and Undut. In Borneo, Labuan, Kudat, and Sandakan. In 1902, 15 clergymen
conducted work in 78 villages; there were 12 churches and 32 chapels; 1,781 communicants and 4,850 baptized persons, 21 schools, with 35 teachers and 913 scholars.

China: In 1843 the Society appealed for funds for a chaplain for the English residents in Hong-kong, but it was not until 1863 that its first missionary, specially commissioned for work among the Chinese, reached Peking. Other stations have been occupiced as follows: Chefu, 1874; Tai-yuen-fu and Ping-tse, 1873; Yung-ching (originally founded by CMS, 1869), and Lung-huai-lien, 1889; Tien-tsin, 1899; Pei-tai-ho and Weh-ho, 1884. In all, 21 European and 1 native missionaries have been employed in 9 stations, their work being distinctively for the Chinese.

Japan: As early as 1859, when Japan was first opened to missions, the Society reserved a sum of money for work there, but placed its first missionaries in Tokio in 1873. Other stations occupied were Kobe (1874), Awaji (1875), and Yokohama (1889). There is also some work on the Bonin Islands. There have been in all 21 European and 10 native missionaries in 14 stations. In 1902 there were 12 clergy, 11 churches, 606 communicants, and 470 baptized persons.

Korea: One of the founders of the SPG Mission in Japan urged, in 1880, that work be taken up in Korea. At that time it was deemed premature, but some years later Bishop Scott of North China and Bishop Bickersteth of Japan pressed the matter, and in 1889, Rev. C. J. Corfe was consecrated the first missionary bishop of Korea. He reached Seoul in 1890 with several associates. The plan of work contemplated several years of preparation before direct evangelistic work should be undertaken; but in 1896 aggressive work was indicated by the enrollment of a class of catechumens. Other places occupied are: Chemulpo (1891), Mapo and Kanghoe (1893). In 1902 the reports showed 5 clergy, 4 churches, 117 communicants, and 294 baptized persons.

Western Asia: The Society's work has been chiefly confined to occasional assistance to the Anglican Bishop of Jerusalem, the English communities in Smyrna and Cyprus, and to work among the Assyrian Christians (see Archbishop's Mission).

Europe: In its early history the Society assisted in the building of churches in various places, and in the founding of English schools. Kiefer was under no great extent until 1841, when the see of Gibraltar, including the English congregations of Southern Europe, was founded, a grant in aid being made from the Society's fund. After the Crimean War (1854-56) it assisted in erecting the Crimean Memorial Church in Constantinople, and maintained a chaplain in charge of it. Since then it has added a number of chaplaincies in different parts of Europe.

The Society has always paid special attention to the preparation and dissemination of literature, including not only Bibles and tracts-books, but general religious literature. It has assisted to establish libraries in the different colleges in which it has been interested, and among its gifts is noted one to Harvard College, Boston, Mass., in 1794, on the occasion of a disastrous fire. Its list of publications includes the entire number of languages which its missionaries have used in their labors.

Organ: The Mission Field, monthly; The East and the West, quarterly.

SOCIETY, or TAHITI: A group in the South Pacific, between latitude 10° and 18° south and longitude 148° to 155° west. There are 13 islands and several small islets, divided by a channel 60 miles wide into two groups, originally called the Georgian Islands and the Society Islands. The principal islands of Tahiti, the Marquesas or Eimeo, Tiiteroa, Maitea, Raiatea, Tubuai, Moru, Huahine, Tahaa, and Bora-Bora. Tahiti, by far the largest of these islands, has an area of 600 square miles. Moorea has 30 square miles. The general physical characteristics are the same for nearly all of them; the flat, mountainous interior, with low, rich plains sloping down to the coast. Coral reefs surround them. The water supply is abundant, tropical fruits and vegetables grow in great abundance, and a salubrious, temperate climate is universal. The natives belong to the Malay race, and resemble the Marquesans and Rarotongans in appearance, but differ greatly from them in their customs. The dialect is one of the softest languages in Oceania. Agriculture is in a rather backward state, except in Tahiti and Moorea, where 7,000 acres are under cultivation, producing cotton, sugar, and coffee. The population is about 15,000.

The Society Islands, together with the Marquesas, Tuamotu, Gambier, Tubuai, the island of Kapa the Wallis or Uea, and Hove Islands, form what is called the French Establishment in Oceania, under the control of a commandant-general, who resides in Tahiti. Tahiti was taken possession of in 1814, and the various other islands were gradually encroached upon by the French until, in 1880, they became French possessions. Missions on the Society Islands. The LMS sent its missionary ship "Duff," and the missionaries arrived at Tahiti in March of that year. From that time until the French occupation in 1844 great success attended the labors of the missionaries, whose influence over the converted islanders was exerted for their best temporal and spiritual good. In 1818, the anniversary of the LMS, the Christian king Pomare originated and formed a Tahitian Missionary Society. In 1839, just previous to the introduction of the French protectorate, the following testimoniums, and 1,700buffets of missionary work were given by the captain of a whaling vessel: "This is the most civilized place that I have been at in the South Seas. It is governed by a dignified young lady, about 25 years of age. They have a good code of laws, and no liquors are allowed to be landed on the island. It is one of the most gratifying sights the eye can witness on a Sunday to see in their church, which holds about 5,000, the queen, near the pulpit, with all her subjects around her, decently appared, and in seemingly pure devotion." With the institution of the French protectorate the people were corrupted by the combined influence of rumsmellers and other foreigners. The LMS Mission was embarrassed and broken up, and withdrew from Tahiti and Moorea in 1852. At that time there were 1,870 church members in those two islands. Huahine was first reached by the Missionaries in 1808, and the history of the mission there is similar to that of Tahiti and Moorea. The islands were practically Christianized, missionary societies were organized, and in 1852 there were 962 church members in Huahine, Raiatea, Bora-Bora, and Maupiti. Since the French occupation of the islands the work in Tahiti and Moorea...
has been under the care of the Paris Evangelical Society, which has continued the good work done by the LMS in the face of the opposition of two great influences: the traffic in liquors and the Roman propaganda. Tahiti is divided into two sections, north and south, and in the former, which includes the town of Papeete, there are several missionary stations which are under the care of native pastors, and in the latter there is a bright spot in the work, a native pastor, all under the supervision of European missionaries. Bora-Bora and Maupiti have each one native ordained pastor under the LMS.

SOEMBER PAKEM: A village in Java, Dutch East Indies, situated 105 miles S. E. of Surabaya. Station of the Java Committee’s Mission, with 1 missionary and his wife and 1 day school.

SOGAE ADU: A village on the Island of Nias, Sumatra, Dutch East Indies, situated on the N. E. coast, about 20 miles S. E. of Gunong Sitoli. Station of the Rhenish Missionary Society, with 2 missionaries and their wives, 8 native workers, 1 outstation, 2 day schools, and 401 professed Christians, of whom 231 are communicants.

SOH-PING. See So-ping-fu.

SOLOMON ISLANDS: A group in the South Pacific, consisting of a double chain extending from northwest to southeast, between 5° and 10° south latitude, and 154° and 160° east longitude. They were first discovered in 1567, but as yet have not been explored to any great extent. Since 1886 the northerly part of the group, including the islands of Bougainville, Choiseul, Isabel or Mahage, together with various smaller islands, with a total area of 57,000 square miles, has been seized by Germany. The population of this part is estimated at 80,000. The principal other islands are San Cristoval, Guadalcanal, Malanta, and Bouro. The climate is damp and unhealthy on the coast, tho the high lands are probably more salubrious. The natives belong to the Melanesian race, and the language is of Melanesian type, but with dialects differing in different islands. Of their religion, habits, and customs little is known, tho they resemble the other Melanesians in most things, and are known to the Christians to some extent. Mission work is carried on in these islands by the Melanesian Mission.

SOMAIIAND (French): An African possession of France, including the colony of Obock, lying between Abyssinia and the Strait of Bab-el Mandeb, bounded north by Eritrea and south by Italian Somaliland, touching also British Somaliland on the east. It has 46,000 square miles of area and 200,000 inhabitants (estimated). The natives are Gallas or Danakil. The capital and chief port is Jibutil, where two French mission schools, one for boys and one for girls, were opened in 1902, under government grants.

SOMALILAND (Italian): A protectorate of Italy in Africa, lying on the Indian Ocean and bounded landward by Abyssinia, French Somaliland and British Somaliland on the north, by British East Africa on the southwest, and by the Egyptian Sudan on the west. The area is about 100,000 square miles, the population about 400,000, chiefly Somalis. The country away from the coast is mountainous, and largely unexplored by Europeans. As a mission field it is thus far unoccupied. The Mohammedan faith and the pagan religions still wholly prevail.

SOMALILAND Protectorate: A British protectorate in Africa. It adjoins Abyssinia on the southwest of that state, having Italian Somaliland on the south; and is bounded by the coast on the southeast, with a population of about 500,000, all Mohammedans, and largely nomadic. This territory has been the scene of operations of “The Mad Mullah,” as he is called. Military operations by Great Britain for the pacification of the interior of the country have been going on for miles, with a population of about 500,000, all Mohammedans, and largely nomadic. This territory has been the scene of operations of “The Mad Mullah,” as he is called. Military operations by Great Britain for the pacification of the interior of the country have been going on for

SOMERSET EAST: A town in Cape Colony, Africa, 80 miles northwest of Grahamstown. Population, 2,231. Station of the UFS (1869), with (1903) 2 missionaries and his wife, 5 native workers, 2 outstations, 14 Sunday schools, 3 day schools, and 149 professed Christians. Station also of the South African Wesleyan Methodist Church, with (1901) 25 native workers, 15 outstations, 4 places of worship, 4 Sunday schools, 7 day schools and 333 professed Christians.

SOMERVILLE: A town in Cape Colony, S. Africa, situated about the Tropic of Capricorn, 18 miles by S. of the nuclear Climate-sub-tropical. Station of the UFS, with (1903) 1 missionary and his wife, 28 native workers, 17 outstations, 1 place of worship, 14 day schools, and 696 communicant Christians.
SONG-CHIN: A town in Korea, in the district of Phyeng-yang, about 50 miles W. of Wen-san. Station of the CMS (1865), with 2 missionaries and their wives, 3 native workers, 1 dispensary, 1 hospital and 60 professed Christians, of whom 14 are communicants.

SONGDO: A town in Korea, also called Kaesong, situated 40 miles N.W. of Seoul. Population, 60,000. Station of the MES (1897), with (1905) 1 missionary and his wife, 2 women missionaries, 3 native workers, 9 outstations, 2 Sunday schools, and 270 professed Christians, of whom 79 are communicants.

SOONG-YANG. See SUNG-YANG-HSIEN.

SOOCHOW. See SU-CHAU-FU.

SO-PING-FU: A town in Shan-si, China, situated about 220 miles W. of Peking. Station of the CIM (1865), but the work has not been reorganized since the Boxer rising, when all the missionaries were killed. Some write the name Soh-p'ing.

SOPO: A mission station of the German Baptists of Berlin, situated in Kamerun, Africa, about 10 miles S. E. of Buea, with (1900) 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 place of worship, 1 day school, 1 boarding school, and 67 professed Christians.

SORABJI KHAIRSEDDIJI: Died August 14, 1894. A Parsee of Bombay. Amid the bitterest persecution he confessed his faith boldly and clearly at the police-office, where he was under police protection; before the magistrates and a great company of Hindus, Parsees, and Mohammedans. To escape from the abuse to which he was exposed in Bombay, he accepted service under the SPG at Ahmedabad in the summer of 1842. Later he entered the CMS divinity class at Nasik, and was engaged in conducting the orphanage and building the Christian settlement of Sharanpur. In 1875 he was admitted to deacon's orders at Agra; and from 1882 he resided at Poona, serving as an honorary missionary. He was familiar with the two great Zoroastrian languages, the Zend and Pehlevi, to the mysteries of which only Parsee high priests are admitted. And this has made his book on The Comparison of Zoroastrian and Christian Religion a valuable addition to Parsee literature. His works, Entitled Zoroaster and Zoroastranism, and Life of Christ, were left by him unfinished. He was a member of the Gujarati Bible Revision Committee; and the New Testament portion of his work, and all of his work on the Old Testament, except one book, were finished just before his labors ceased. His heroic death, as well as his consecrated life, was the means of the spiritual awakening of many Parsees and Hindus of Poona. The booklet (CMS), How a Native Clergyman Died, written by his daughter, is an impressive work.

SOUTH AFRICA DUTCH REFORMED CHURCH MISSION TO BRITISH CENTRAL AFRICA: Headquarters: Sea Point, Cape Town, Cape Colony.

In 1884 the ministers of the Dutch Reformed Church of the Cape Colony decided to form a Ministers' Mission Union, with a view to supporting foreign missionaries, a policy already in force in the foreign mission field. They undertook to contribute each from $25 to $50 per annum, out of their private salary, for this purpose. While looking out for a field in which to work, they were generously invited by the Livingston Mission of the Free Church of Scotland to come to the region west of Lake Nyasa, and share their extensive field of work with the Rev. W. Murray, an ordained minister of their church, after an eighteen months' course of medical training in Scotland, left South Africa as their first representative in that field. The following year he was joined by another missionary from South Africa, and they selected the district to the S. W. of Lake Nyasa as their sphere of labor.

The first station was Mvura, in what is now the British Central Africa Protectorate. Gradually the work extended, until in 1899 the staff consisted of sixteen workers (including three missionaries), and six stations at three main stations—Mvura, Kongwe, and Mkomia.

In 1897 the Synod of the Dutch Reformed Church of the Orange Free State decided to start their own mission work in Central Africa, and sent out two men, who proceeded from Mvura further to the west, and planted their first station at Magweru, in the district of N. E. Rhodesia, near Fort Jameson. This work, altho carried on uninterrupted all the time, could not be extended owing to the South African war, but within a year after peace was made the Orange River Colony Synod decided to send out three missionaries (one being an agriculturist), and a new station was started at Madzimoyo. In 1899 the chairman of the Cape Colony Mission, Dr. Andrew Murray, urged upon the committee definitely to pray for a doubling of the stations and workers in Nyasaland. In many cases the Mission seemed too much to ask for, the more as within six months the devastating war broke out. But within four years there were thirty-four workers instead of sixteen, and six stations instead of three. The first two converts were baptized in 1894, but no others were admitted into the Church till 1897, when thirty adults were baptized. Since then the number has steadily increased, till in 1901 there were in all close upon three hundred church members, and at the end of 1905 over seven hundred. The district occupied by the above Mission in Nyasaland (not counting N. E. Rhodesia) contains about 300,000 natives. With two more stations it will be sufficiently occupied and can then be worked by means of native evangelists and catechists. There are over one hundred outstations under native teachers, with an attendance of 7,000 children, while about 10,000 natives are continually under religious influence and instruction. The conditions of baptism are rather strict, as the candidate must have been at least one year in the catechism class, and have manifested a thorough breaking with all heathen customs during that time. Consequently cases of discipline are rare.

There are seven unmarried women workers in this field, who are supported by the Women's Mission Union (The Women's Bond) of the same church. This union also supports women workers in other mission stations in the Cape Colony, Transvaal, Bechuanaland, and Mashonaland. Headquarters: Huguenot College, Wellington, Cape Colony.

SOUTH AMERICAN MISSIONARY SOCIETY: Captain John G. Duff, a founder of the South American Missionary Society, first visited South America with a view of establishing a mission in 1838. For years the great aim of his life had been to become the pioneer of a Christian mission to
the most abandoned heathen.” With this object steadily in view, he went through a series of travels and adventures for some years, taking his wife and children with him on long, perilous journeys. After repeated disappointments in other countries, he was led to direct all his efforts toward the mission work of South America. His attempts to reach the mountain tribes were defeated by the jealousy of the Roman Catholic priests. At last he thought that not even the Spanish priesthood would consider it worth while to interfere with anything he might attempt among the natives at the distant southern corner of the great continent, and by beginning with them he hoped to reach in time the nobler tribes.

In 1830 Captain (afterward Admiral) Fitzroy had been sent by the British Government to survey the coasts of Tierra del Fuego. On his return to England he took with him to visit his native lads and a girl of nine years. They were kindly treated, and found capable of learning a good deal. When, a year later, Captain Fitzroy took them back to their own land, he was accompanied by Mr. D. Williams, who hoped to remain in Tierra del Fuego as a missionary. A very few days sufficed to show the danger of this attempt; he returned to the vessel, and all thought of missionary work in this region was abandoned until Captain Gardner took it up. His hope was that the natives who had visited England might be still alive, and that one of them—called “Jemmy Button” —if he had not forgotten all his English, might act as interpreter and friend. But he found great difficulties in the way. England, while warmly supporting missions to other parts of the world, seemed utterly indifferent to the fate of South America. After much effort he succeeded, in 1844, in forming a society called the Patagonian Missionary Society; soon after, he, with a few companions, attempted to establish a mission in Tierra del Fuego. Owing to the hostility of the natives it was a most painful failure. The Society in England was much discouraged; “not so the brave captain.” The funds necessary were secured and on September 7, 1850, he again sailed from England. With him were Mr. Richard Williams, a surgeon in good practice; Mr. W. Williams, of the Church of England YMCA; very few a ship carpenter who had gone on the previous expedition, and who volunteered his services for this second attempt, saying that to be with Captain Gardner was “like a heaven upon earth,” and three Cornish fishermen, Christian men, who readily offered themselves for the “forlorn hope,” tho plainly warned of its dangers. They took with them provisions for six months, and arranged that more should be sent by the first opportunity.

On the 5th of December the “Ocean Queen” anchored in Banner Cove, Tierra del Fuego, and on the 18th she sailed away, with many cheerful messages to friends at home from the brave men left behind. The journals of Gardner and Williams, preserved almost by miracle, tell the painful story of the next nine months. Misfortunes and disasters rapidly succeeded one another. In a heavy storm an anchor and both small boats for landing were lost; by an oversight almost the whole supply of powder and shot had been left on board the “Ocean Queen,” leaving them without the means of obtaining game, and also without power to defend themselves from the attacks of the natives. Later, a terrible gale made a complete wreck of the “Pioneer.” At Garden Island they buried several bottles, placing above them boards of wood on which were written, “Look underneath.” Each bottle contained a written paper: “We are gone to Spaniard Harbor; we have sickness on board. . . . Our supplies are nearly out, and if not soon relieved we shall be starved. You will find us in Spaniard Harbor.” Then, with the last remaining boat they succeeded in reaching Spaniard Harbor. The frightful Fuegian winter began in April, and from the terrific storms of wind and snow the deep cavities in the rocks formed their best refuge. Their efforts to catch game and fish met with little success; they grew weaker and weaker; the sailor, John Badoock, was the first to die. Mr. Williams seems to have realized that the still expected “ship” would arrive too late for his relief, and his most deplorable appeal to his country and to his beloved friends at home. One by one the little band passed away; it is probable that the brave Gardner himself was the last survivor. The last entry in his diary is September 5; a little note was also found, dated September 6. The long-looked-for vessel, owing to strange mistakes and delays, did not reach the coast until the end of October. Following the directions written on the rocks, the boat was found, with one dead body on board, and another on the shore, while books, papers, etc., lay scattered around. “The captain and sailors of the ‘Ocean Queen’ are all dead,” the letter stated. “At a violent gale arising, they dared not remain longer, but put out to sea at once, carrying the sad news to Montevideo. By this time friends in England, greatly alarmed, had applied to the government for aid, and the frigate ‘Dido’ was sent to search for the lost missionaries, reaching the coast in January. Guided by the writings on the rocks, the officers soon completed the sorrowful discoveries. In Spaniard Harbor they saw on a rock the verses from Psalm lxxxii: 5-8, “My soul, hope thou in God.” . . .” etc., with the drawing of a hand pointing to the spot where the wreck of the “Pioneer” and the bodies of Maidment and Gardner were found. All the remains of the martyrs were reverently collected, and, after the reading of the burial service, the body of Captain Gardner was buried in one grave beside the “Pioneer.” The colors of the “Dido” were lowered, and three volleys fired, as in honor of an officer’s funeral. The heroic death of Gardner and his companions accomplished what in life they had failed to do. The Christian public of England soon resolved that the dying wishes and prayers of the martyrs should not have ascended to heaven in vain. The last directions of Captain Gardner, so wonderfully preserved, were acted upon; the Society was re-formed according to his plan, and a Christian missionary received at the South American Fuegian station. The South American Missionary Society is rapidly extending its agencies over many regions of the great continent.

According to the plan of Captain Gardner, the South American Missionary Society should have the threefold object of supplying the spiritual wants of “his own fellow-countrymen,” the Roman Catholics, and the heathen in South America. On this general basis, the work of the Society has now four departments: 1. Missions to the heathen. 2. Evangelistic (including educational, work. 3. Chaplaincies. 4. Work among seamen.
I. Missions to the Heathen. (1) Southern Mission: This is the direct successor of Capt. Gardiner's work, and is especially for the Yahgans of Tierra del Fuego. It was commenced in 1854, when the missionary schooner "Allen Gardiner" sailed for the Falkland Islands. The place distinctly chosen for a base of operations was Keppel Island, the station was commenced with 2 Missionaries and 15 men at the island lying north of the west island of the Falklands. From there, in 1856, a cautious intercommunication was commenced with the Fuegians, and they were encouraged to visit the mission station at Keppel in small parties. After much toil of preparation a handful of the Yahgans made the journey to Keppel Island; they seemed occupied with the wonders they had selected, and by the confidence of the natives, and to impart to them some religious knowledge. So friendly did they seem that in 1859 the missionaries thought they might venture to take the first step toward the establishment of a missionary station at this island alone. During their judgment partly from their visitors at Keppel Island, and partly from others on the Fuegian coast, they believed that the ferocity of the natives had been overstated. Accordingly, they sailed for Woolly, in Navarin Island. Mr. Phillips was the leader of the little band of missionaries, and he was fearlessly supported by Captain Fell of the "Allen Gardiner." Their first reception was friendly, and on Sunday, the 6th of November, they went ashore to conduct divine service, thus entrusting their lives to the savage who had attacked and massacred. One Yahgan was taken back by the ship which went in search of the missionaries, and through him the language was learned, so that when another attempt was made in 1863, by Bishop Wirding, it proved more successful. Much progress was made in numbers, until there is now (1903) but a handful left. The "Allen Gardiner" was sold (1900) and lost (1902). There remained three stations, Tekenika, on Hoste Island, Ushuia, on the mainland, and Keppel Island, each under care of a missionary.

(2) The Paraguay Chaco: The mission to this, in the western part of Paraguay, was commenced in 1888. There are (1902) 2 central and 4 outstations, 19 missionaries (including wives). The work is carried on by itinerating and by schools for the Indians. The report of Bishop Every (1902) speaks of the spiritual results among the Indians as most encouraging, as also the progress in the schools. A significant event was the assembling of the first native church council in August, 1902. The prayer services conducted by the missionaries were impressive.

(3) The Araucanian Mission: This was begun in 1894 as a Jubilee Memorial. The first station occupied was Cholchoh, and the second, Quepe. The staff (1902) consisted of one clergyman, 7 laymen, 8 women and 1 Mapuche chief. The work is chiefly among the Mapuche tribe of Indians, who have not as yet, except some of the younger men, come under the influence of the Roman Catholic Church. They seem anxious to learn, and the schools, particularly the industrial school at Quepe, are crowded. Medical work, as elsewhere, is an invaluable adjunct in winning the sympathy of the people.

II. Evangelistic Work: This is carried on at Palermo, Buenos Aires (1898), and Alberdi, Rosario (1896). At Palermo there are a boys' school, with 6 teachers, a girls' school, with 7 teachers, an infant school, with 4 teachers, an older girls' school, with 3 teachers, and an industrial and trade's institute, with 3 teachers. Conferences and home visits are made to the two schools, one for boys and one for girls, and at General Urquiza, a mission hall and schools, the latter not directly under the supervision of the missionary. At Alberdi there is a home and school. The whole number of employed workers is 54, besides 9 honorary helpers and several physicians, who render gratuitous service.

III. Chaplaincies: These are located at São Paulo and Santos, Brazil; Fray Bentos, Uruguay; Welsh Colony, Chubut, Patagonia; Sandy Point (Punta Arenas), Straits of Magellan; Villa Rica, Paraguay; Quino and Coquimbo, Chile. In connection with several of these there are schools, and not a little general evangelistic work is done.

IV. Work for Seamen: This includes a Sailors' Home, Rio de Janeiro; a Seamen's Mission, Santos, and sailors' homes at Buenos Aires and Rosario. In all, the Society occupies 19 stations and 32 outstations, with 12 clergy, 61 laymen, and 58 female workers.

SOUTHERN BAPTIST CONVENTION: The Southern Baptist Convention was organized in the city of Augusta, Georgia, in May, 1845. It originated with the withdrawal of the Southern churches from union and cooperation with "the General Convention of the Baptist Denomination in the United States," popularly known as the Triennial Convention. (See article on American Baptist Missionary Union.) The constitution of this convention, as well as the history of its proceedings from the beginning, conferred on all the members in good standing of the Baptist denomination, whether at the North or the South, eligibility to all appointments emanating from the convention of the Board. Unmistakable indications, however, led the Alabama Baptist State Convention in 1844 to adopt a preamble and resolutions which were submitted to the Board of Foreign Missions of the Triennial Convention, to which a frank and explicit answer was returned that "if any one having slaves should offer himself as a missionary, and insist on retaining them as his property, we could not appoint him. One thing is certain, we can never be a party to any arrangement that would imply approbation of slavery."

When this reply was made known, the Board of the Virginia Foreign Missionary Society addressed a circular to the Baptist churches of Virginia, suggesting that a convention be held at Augusta, Georgia, for conference as to the best means of promoting the Foreign Mission cause, and other important interests of the Baptist denomination in the South. Both at the North and the South a separation seemed inevitable. At the North it was desired by many, regretted by a few, and expected by all.

Before the proposed convention in Augusta could meet, the Home Mission Society at its meeting in Providence, in June, 1846, formally declared for a separation, and recommended that as the existing Society was planted in the North, and had there its Executive Board and charter, which it seemed desirable to preserve, it be retained by the Northern churches, and those
sympathizing with them as to the appointment of slave-holders.

At the call of the Board of Managers of the Virginia Foreign Mission Society, there assembled in Augusta, May 8, 1845, 310 delegates from the States of Maryland, Virginia, North and South Carolina, Georgia, Alabama, Louisiana, Kentucky, and the District of Columbia. Owing to the short notice of the meeting, other States were represented only by lotter. The committee appointed for the purpose presented a resolution, "That for peace and harmony, and in order to accomplish the greatest amount of good, and for the maintenance of those Scriptural principles on which the General Missionary Convention of the Baptist Denomination of the United States was formed, it is proper that this convention at once proceed to organize a society for the propagation of the Gospel." Then followed the adoption of a constitution which was "precisely that of the original union; that in connection with which, throughout its missionary labors, Adoniram Judson was the person under whose head Ann Judson and Boardman died. We recede from it no single step. We use the very terms, and we uphold the true spirit and great object of the late General Convention."

Thus the Southern Baptist Convention claims to be the real and proper successor and continuator of that body which "at a special meeting, held in New York, November 19, 1845, was dissolved," and the American Baptist Missionary Union, with an entirely new constitution and a different basis of membership, was organized in its stead.

A Board of Foreign Missions was appointed, to be located in Richmond, Virginia, and one for Domestic Missions, to be located in Marion, Alabama. In 1882 the location of this Board was changed to Atlanta, Georgia, and its name was changed to the Home Mission Board. It has had a career of great usefulness.

A Sunday-school Board was organized in 1891, with the Rev. J. M. Frost, D.D., as corresponding secretary. The work of this Board, or publishing house, located at Nashville, Tenn., has steadily grown.

The Southern Baptist Convention has gathered around itself the enthusiastic support of the Baptist churches of the South; and the wisdom of its formation is evidenced by the fact that while Southern Baptists contributed to the Triennial Convention in 31 years, from 1814-1845, $212,000, during the 34 years, from 1845-1879 (covering the period of the war), their contributions for Foreign Missions alone were $939,377. From 1880 to 1890 the contributions were $812,662, and from 1890 to and including a part of 1903, contributions to the Foreign Mission Board were $1,778,883; for the single year 1902-3, $218,752.62, or more than the contributions of the entire Southern States to the "Triennial Convention" prior to its dissolution.

Development of Work: Immediately after the organization of the Board they were instructed to correspond with the Boston Board with regard to mutual claims; and were authorized to make any equitable and prudent arrangement with that Board, to take a portion of its missions under the patronage of the Convention. At the suggestion of the Boston Board, through Dr. Francis Wayland, it was agreed that "the property and liabilities of the General Convention should remain with that body," and that "the mission-

aries should have the choice of the associations with which they would be connected."

Under this arrangement Rev. J. L. Shuck, the first American Baptist missionary to China, and Rev. I. J. Roberts, who had followed Mr. Shuck in 1836, gave in their adherence to the Southern Convention. Rev. S. C. Clifton and Rev. George Pearcey were commissioned to join them, and the missions of the new Board were fairly inaugurated.

Coincident with the establishment of the China mission, it was determined to commence work on the coast of Africa, where missions of the Northern Board were already in operation, and in 1847 stations were formed in Liberia and in Sierra Leone, and in 1850 in Central Africa.

As early as 1850 the attention of the Board was directed to South America as an important field, but it was not until 1860 that the opportunity was afforded for carrying out the plans of the Board. The Rev. T. J. Bowen, who had been obliged to leave Africa on account of ill-health, was appointed for the South American field; he was gladly sent, and a station was founded at Rio de Janeiro, from which point the work has rapidly spread.

In 1859 the needs of Japan attracted the attention of the Board, and in 1860 four missionaries, two ministers and their wives, were sent. All were lost at sea before reaching their field of labor. The enterprise, tho deferred, was never abandoned. In 1889 four missionaries were sent out, who founded the present mission.

The duty of Baptists to send the pure Gospel into the Catholic countries of Europe was felt by the Board from the very beginning, and France was chosen as a field for missionary labor; but the occupation of Rome by Victor Emmanuel in 1870 opened Italy to missionary work, and drew attention thither, and in 1871 Rome became a center of operations, which have spread throughout the peninsula, Sicily, Sardinia, and a portion of Austria.

In 1903 the Board began a new mission in Buenos Aires, Argentine Republic, sending thither several missionaries.

Statement of Missionary Work in China: The work of the Southern Convention in China is carried on under three missions, South China, with Canton as a center, but extending to the interior; Central China, with Shanghai as a center, and the Shan-tung province. In 1846 the work was begun in Canton by the Rev. George Pearcey and Rev. Samuel Clifton. The work has progressed since that time with little or no interruption, and Canton has been the largest center of the work in China. The Mission now includes 13 churches and 46 stations, in which labor 20 foreign missionaries and 50 native helpers; the church membership is 2,464.

Shanghai was chosen as a station at the same time as Canton, being situated in a central position on the coast. It is a city of great importance for missionary operations, being the Chinese commerce here from all parts of the empire, the number of transient inhabitants being estimated at above 100,000. During the Tai-ping rebellion in 1854 the mission property was destroyed, but on the seizure of the city by the Imperialists, full restitution was made, and the work was resumed.

The Taipings, a movement strictly religious and iconoclastic in its origin, and proved in the end a benefit to the mission, for it roused the moral sense of the people and offered a blow at
the great curse, idolatry, and the preaching of the missionaries was decidedly more effective after than before the insurrection. The Shanghai, or Central China, mission has now 6 churches, 6 out-
stations, 21 missionaries, 8 native helpers, and 204 members.

In 1858, in Shantung, a northern province of China, was begun in 1860, immediately on the conclusion of the treaty of Tien-tsin, the stations chosen being Tung-cho and Chi-fu. Some oppo-
sition was experienced at first from the gentry of Tung-cho, but the common people showed great delight at the coming missionaries. Mission reports and statistics were included in those of the Shanghai mission, altho the fields were 500 miles apart; but in 1866 Tung-cho was set off as an independent mission, and has continued to be so regarded. There are now in the North China Mission 21 stations, 22 foreign mis-
sionaries, 10 churches, and 733 church members.

Africa: One of the first fields chosen by the Southern Convention was Africa. In 1846 work was begun by Rev. John Day in Liberia, where the Northern Board had already established a mission, but in 1856 they withdrew, and the Southern Board alone carried on the work of Baptists in the Dark Continent. The field was found to be one of great promise, and in 1850 the work was extended by the formation of a mission in the Yoruba country, and in 1855 a station was opened at Sierra Leone in connection with the Liberian mission. For four years, from 1850 to 1864, war raged among the native tribes of Central Africa, and the missionaries of the Yoruba country were driven to the coast, and the mission had to be suspended. Soon after this, the money pressures and panics attendant upon the Civil War at home rendered it necessary to withdraw support from the African mission for a time, and from 1866 to 1874 the work was carried on by the missionaries without aid from the Board. As a result the mission was terminated and the Yoruba country again opened to missionary operations, and the finances of the Board by this time permitting, laborers were sent to occupy that field. The Liberian mission was closed and Lagos chosen as a center from which work could be extended to Central Africa, and a report of the Board for 1902 gives the following statistics: 6 stations, Lagos, Abeokuta, Ob-
bomosho, Shaki, Oyo, and Salate, with a number of outstations, 10 foreign missionaries, 21 native assistants, 389 pupils in schools, and 544 church members.

South America: The mission in South America was begun in 1860 at Rio de Janeiro by the Rev.
T. J. Bowen and his wife. The health of the former, which had caused his transfer from Central Africa, compelled him to again give up his work, and with his return the mission in South America was suspended. For twelve years nothing was done, at the end of which time, at the urgent request of a church of settlers in Brazil from the Southern United States, the Board again renewed its operations. The Board has many stations in Brazil, including Rio de Janeiro, on the coast, in the southeast; Pernambuco, on the coast, in the northeast; Bahia, mid-
way between Rio de Janeiro and Pernambuco; Maceio, south of Pernambuco; the city of Juiz de Fora in the mining district of Minas Geraes, in the midst of the gold fields; of Para, near the mouth of the Amazon, and Manaos, more than a thousand miles interior. There are 21 foreign missionaries at work, 18 native preachers, 16 native assistants, 48 churches, and 75 stations; church membership over 3,000.

As previously stated, the Board has begun very recently operations in the Argentine Republic. At the time of this writing (January, 1904) four missionaries have been sent, but only one has reached his field of labor. Indications point to a prosperous mission.

Italy: In 1850 the Board began deliberations with regard to work in the Catholic countries of Europe, but no mission was begun until 1870, when Rev. Wm. M. Cote, M.D., who was secre-
tary of the YMCA of France, was appointed mis-
sionary of the Southern Convention. On the opening of Italy for evangelistic work, by the victory of Victor Emmanuel, operations were immediately begun in that city, and from there have spread throughout Italy. There are now 25 churches and 37 stations of the Southern Convention on the peninsula, including Rome, Milan, Venice, Modena, Carpi, Bari, Naples, and, besides others, as Cagliari and Iglesias—on the island of Sardinia; and a station in Trieste, Austria; and a station at Venice, in connection with the Italian Mission. There are 4 foreign missionaries, 27 native workers, and a total membership of 661.

Mexico: The missions of the Southern Baptist Convention in Mexico are divided into two groups, North Mexico and South Mexico. North Mexico takes in the cities of Saltillo, Torreon, Durango, and Chihuahua, besides outstations, and the South Mexican Mission includes the cities of Guadalajara, Morelia, Toluca, and Leon, besides outstations. There are in all Mexico 17 missionaries, 12 ordained and 7, ordained native helpers, 43 churches, with 1,251 members, 32 stations, 13 houses of worship, 18 schools, including both Sunday schools and day schools, with 628 pupils. A number of the Mexican churches are self-supporting in whole or in part.

Japan: In 1850 the Board appointed three missionaries to Japan; two of them were pre-
vented by the outbreak of the war from going out. The third, J. Q. Rohrer, with his wife, set sail from New York on August 3, 1860, in a vessel which was never heard of afterward, and he missionary mission was not returned until November, 1889, when two missionaries and their wives were sent out. There are now 12 mis-
sionaries doing successful work. Their fields of labor are confined for the most part to the island of Kiuishi, but include such cities as Pukuoka, Nagasaki, Yokohama, Kumamoto, and Kagoshima.

The work of the Foreign Mission Board has steadily advanced, through all the years since its birth in 1845, and that, too, in spite of the desolations of the Civil War in this country and the disheartening years that followed. During more than fifty years, J. B. Taylor, D.D., and H. A. Tupper, D.D., were the able secretaries. In all the great countries where its missionaries are laboring the work is going forward with quickening pace, and in the homeland the spirit and liberality of Southern Baptists give evidence of a day of even greater things.

SOUTH SYLHET. See SYLHET.

SOUTH VILLAGES: Name applied by the BZM to a group of a score or more villages in Bengal, India, lying south of Calcutta, in the district near the mouth of the BMS between Fort Canning (Mutlalab) and Diamond Harbor, and
including the 24 Pargannas. Lakikanatopur is the village where the 2 women missionaries of the BZM reside (1903), giving regular religious instruction in 11 other villages. They have 31 native workers and 9 days schools under their care.

SPALDING, Henry H.: Born at Bath, N. Y., 1804; graduated at Western Reserve College, 1833, and Lane Theological Seminary, 1835; ordained a missionary two years later. He was appointed by the ABCFM in 1836 missionary to the Nez Perces Indians, with his wife, Dr. and Mrs. Whitman, and William B. Gray. In a company of furs-traders they traveled on horseback nearly 2,200 miles beyond the Missouri River, to Fort Walla-Walla, a trading post of the Hudson Bay Company, which they reached September 3, 1836, being four months and six days on the journey from Liberty, Mo., to that place. The mission was broken up by the massacre of Dr. Whitman and others in 1847. Mr. Spalding, who was in the vicinity, providentially escaped the murderers when his track was found by day, he made his way night after night, bare-footed, over sharp rocks and thorns, until, almost dead, he reached a place of safety. Then, with his family, he left the mission field for a time. In 1862 he resumed his work, but remained only a few years. In 1871 he renewed his labors under the Presbyterian Board of Foreign Missions, in which he remained till his death, which occurred at Lapnor, Idaho, August 3, 1874. His labors were interrupted, he accomplished a great work among the Indians. Over 900 of the Nez Perces and Spokane were added to the church through his instrumentality. He prepared a translation of the Gospel of Matthew and a collection of Nez Perce hymns. At the time of his death he had a translation of the Acts well advanced.

SPALDING, Levi: Born at Jaffrey, N. H., August 22, 1791. Died June 18, 1874. Graduated at Dartmouth College, 1815, and Andover Theological Seminary, 1818; sailed for Ceylon, June 8, 1819, under the ABCFM. He labored at Maney for several years. In 1833 he removed to Oodooville, and with Mrs. Spaulding took charge of the girls' boarding school, which was under their care for nearly forty years. He was one of the original Tamil scholars in Southern India, having so mastered the language as to use it with great facility and power. More than twenty Tamil tracts were prepared by him, and many of the best lyrics in the vernacular hymn-book were from his pen. He prepared two dictionaries, one Tamil, the other English and Tamil, and took a prominent part in the revision of the Scriptures. He furnished an excellent translation of Pilgrim's Progress, and compiled a Scripture History, which is used in the schools. School-books, hymn-books, tracts, and Gospels passed through his hands for revision and proofreading. But he was far from being chiefly occupied with these tasks. In season and out of season, to merchants on their verandas, or seated with way-farers under the hedge, to the poor and the_maimed, in lanes and highways, and to the children in the school who were not met at any time to preach and to teach Jesus Christ. His fluency in the colloquial language, his apt quotations from Hindu books, his original illustrations, and ready and racy sallies, combined with his genial humor, gave him great influence with the natives.

Mrs. Mary Christy Spaulding, his wife, rendered equally conspicuous services to the mission in another line. The care of the girls' boarding school was her special duty for almost forty years. Her sympathetic services to natives and to missionaries alike, when there was suffering to be alleviated or sorrow to be borne, gave her the distinction of "Mother Spaulding." She died at Batticotta one year after her husband finished his labors.

SPRINGFONTEIN: A village about 40 miles N. W. of Bethulie, in Orange River Colony, S. Africa. Station of the Berlin Missionary Society (1894), with (1903) 1 missionary, 13 native workers, and 639 professed Christians.

SRINAGAR: Capital of Kashmir, India, situated in the beautiful valley of the Jhelum River, about 175 miles due N. of Amristar in the Punjab. It lies on both sides of the river, boats on which are a principal means of conveyance between different parts of the town. Canals extend this use of boats. The place is picturesque in general, but industrially filthy and in detail. Population (1901), 122,618. Station of the CMS (1863), with (1903) 5 missionaries, three of them with their wives; 2 women missionaries, 3 native workers, 1 day school, 1 boarding school, 1 industrial school, 1 dispensary, 1 hospital, 1 lepers' asylum, and 22 teachers for the girls. Of the population of 10 are communicants. Station also of the CEZ (1888), with (1903) 3 women missionaries, 6 native workers, 2 day schools, 1 boarding school, and 1 dispensary.

Mrs. Bishop (better known as a traveler and writer by her maiden name of Isabella Bird) has given money to build a woman's hospital here, as a memorial to her late husband, Dr. John Bishop. The Maharajah gave an excellent site.

SRIPERUMBUDUR: A village in Madras, India, situated in the N. Arcot region, about 22 miles S. E. of Chittur. Station of the Leipzig Missionary Society (1898), with (1903) 2 native workers, 8 outstations, 8 places of worship, and 10 day schools. Station also of the UFS, with (1903) 1 missionary, 20 native workers, 9 outstations, 1 place of worship, 11 day schools, and 105 proselytes of Christians.

STACK, Matthew: Born at Maukendover, Moravia, March 4, 1711. Died, December 21, 1787. In his early youth he had deep religious impressions, and, leaving Moravia, he went to Herrnhut, in Saxony. Soon after his conversion he received from Count Zinzendorf an impression of the condition of the Greenlanders which led him to devote himself to work among the heathen. He set out with his cousin, Christian Stack, and Christian David for Copenhagen, January 19, 1733. On their arrival they found that the mission under Egede was about to be abandoned, communication with Greenland closed, and their project was regarded as romantic and ill-timed. They applied to Count Von Pless, the king's chamberlain, who fully stated the difficulties. "How will you live?" he asked. "We will cultivate the soil, and look for the Lord's blessing." "There is no soil to cultivate—nothing but ice and snow wherever we go." "Then we must try to live as the natives do." "But in what will you live?" "We will build ourselves a house." "But there is no wood in that country." "Then we will dig holes in the ground and live there." "No," said the Count, seeing their faith, "you shall not do that. Here are $50 to help you: take wood with you."
Other persons aided them. The king decided to reopen communication with Greenland, and got them leave to Egede, commending them to his kind attention.

Matthew Stack embarked with his two friends April, 1733, and after a six weeks' voyage reached Bull's River, where he selected a place for a mission and called it New Herrnhut. In commencing his labours, Mr. Stack encountered many obstacles. The language was difficult of acquisition; the natives not only refused to listen to him but were positively hostile, in various ways annoying and persecuting him. They mimicked his reading, praying, and singing; interrupted him by throwing any article or object before him; beat him, singing and beating of drums. They stoned him, destroyed his goods, attempted to send his boat out to sea, and even sought to take his life. He was often in straits for provisions, and obliged to buy seals from the Greenlanders, who sometimes refused to sell them at a proper price. Often he had to live on shell-fish and sea-weed, a little oatmeal mixed with train oil, and even old tallow-candles. But, nothing daunted, he toiled on, when, after five years of privation and suffering, he had the reward of conducting, as one of his associates was copying a translation of the Gospel of Matthew some natives from South Greenland passing by, stopped, and asked what was in that book. On the missionary's reading the story of God's love and the sufferings of Christ, to save us, Kajarnak, one of the savages, said with much earnestness: "How was that? Tell me that once more, for, I too, would fain be saved." He became a Christian, was baptized, laboring faithfully for Christ, and died in the faith the following year. His companions through his efforts were converted, and the large families pitched their tents near the missionary, that they might hear more of the Gospel. After forty years spent in the Greenland Mission, he went, in 1771, to Wachovia, in North Carolina, and for years devoted himself to teaching the children and Bethabara, N. C. In 1783 he united with the Salem Congregation in celebrating the semi-annual centennial jubilee of the Greenland Mission. In 1785 he was rendered helpless by a fall. When told that the Master would soon come and call for him, he raised his clasped hands and exclaimed, "Let my Redeemer live, let the Lord, my Savior, come soon, come soon." He died December 21, 1787, in the 77th year of his age.

STALLYBRASS, Edward: A missionary of the LMS to Siberia from 1817 to 1839. His first station was Irkutsk. In 1819 he commenced a station at Selenginsk. The early time of his residence here was spent in exploring the southeast of Lake Baikal and the Tchelatham, and later with Mr. Swan among the Chorinsky Buriats. On his return from a visit to England he made his home at St. Petersburg, and for some time was engaged in the revision of the Siberian Mission was suppressed by the Russian Government, and he returned to England. He died at Shooter's Hill, Kent, July 25, 1884, aged 91.

STANLEY: A settlement in the N. W. of Canada, situated in the S. E. part of Athabasca. Station of the CMS (1850), with (1903) 1 missionary, 1 native worker, 2 outstations, 1 day school, and 210 professing Christians, of whom 190 are communicants.

STANLEY POOL: A settlement in the Congo Free State, Africa, situated at the expansion of the Congo just above the rapids. Altitude, 920 feet. Station of the BMS (1882), with 1 missionary and his wife, 1 native worker, 1 Sunday school, 1 day school, and 5 professing Christians. Some use the name Arthington for this station.

STANN CREEK: A town in British Honduras, situated on the coast, 40 miles S. of Belize. Station of the SPG (1894), with 2 missionaries and 450 professing Christians, of whom 2 are communicants. Also station of the WMS, with 13 native workers, 2 outstations, 4 places of worship, 4 Sunday schools, 4 day schools, and 277 professing Christians, of whom 200 are communicants.

STEINKOPF: A town in Cape Colony, Africa, a little south of the Orange River, 56 miles E. of Port Nolloth. Station of the Rhinens Missionary Society, with (1903) 1 missionary and his wife, 14 native workers, 2 outstations, 2 day schools, 1 Sunday school, and 1,171 professing Christians, of whom 575 are communicants.

STELLENBOSCH: A town in Cape Colony, South Africa, 30 miles by rail east of Cape Town. Population, 3,173. Station of the Rhenes Missionary Society, with (1903) 2 missionaries and their wives, 1 woman missionary, 18 native workers, 1 Sunday school, 1 day school, and 2,915 professing Christians, of whom 1,260 are communicants.

STERN, Rev. Henry Aaron, D.D.: Born in 1820 at Unterreichenbach. Died in 1885. His parents were zealous and orthodox in the Jewish creed. It was their hope that he might become a doctor, and to that end they sent him to a school at Frankfort. While there he developed a taste for commerce. When seventeen years old he got a situation in Hamburg. While there he used to pass the house of Mr. Moritz, one of the missionaries of the London Society for the Jews, who had a glass case by his door in which were open Hebrew and German books. Through reading these from time to time he became convinced that Christianity was more rational than Judaism. In 1839 he went to London, and one Sunday a young friend suggested they should go to Palestine Place Chapel to see the apostates. Dr. Mcaul was preaching, and his words impressed him so much that he began to read the New Testament, which led him to exclaim, "If there be a Savior, it must be Jesus." Now came the struggle, as he gradually came out of death into life. He had to suffer for Christ's sake and the Gospel. At last he was baptized, March 15, 1840. For two years he remained in the Operative Jewish Converts' Institution, when he entered the training college of the London Society for the Promotion of Christianity among the Jews. In 1844 he began missionary work at Baghdad, previously being ordained in Jerusalem by Bishop Alexander. His great work in Persia was done by means of long missionary journeys, distributing the Scriptures, reaching Jews who had rarely or ever been visited by Christians. Later on his dauntless nature and Christian zeal led him to undertake, dressed as a native, a most perilous journey throughout Arabia Felix, where his terrible experiences were similar to those of St. Paul as told in II. Cor. xi. 23-27. But his greatest work was that among the Falasha Jews of Abyssinia in 1859, and again in 1862. Owing to political difficulties between England and the King of Abyssinia, the latter
determined to vent his rage on Mr. Stern, and for four years and a half kept him and his fellow-workers in prison and in chains. Nothing but the power and faithfulness of God could have sustained them during those years of agony and suspense. When Lord Napier of Magdala relieved them, some of his officers brought the captives into a tent, and all knelt down and thanked God for their wonderful deliverance. He then became head of the London Mission. In 1818 the Lambeth degree of Doctor of Divinity was conferred upon him. His deeply lamented death, in 1885, closed a life of faithful service.

STEWARD, Robert Warren: Born March 18, 1850. Died August 1, 1895. He was accepted by the CMS Committee for service abroad in 1875, and in 1876, at St. Paul's Cathedral, he was ordained. In the September following his ordination he sailed for China. For several years he was principal of the divinity school at Fuchau, where Chinese evangelists and pastors are trained. Mr. and Mrs. Stewart called forth, almost entirely by their personal influence, a noble band of women from England and Ireland, who were soon providing connection with the Church of England Zenana Society. Some years before his death Mr. Stewart left the college and took charge of the interior district of Kucheng; but severe illness drove him home. While at home he supervised the printing of the Romanized edition of the Pu-chau Colloquial New Testament; and in 1891 he was appointed by the CMS to accompany Mr. Eugene Stock to the colonies. On his return to China, in 1893, he was appointed to Ku-cheng city; and he threw himself energetically into the opening of day schools—a form of mission work that was very dear to his heart. His ideal of a native church was one entirely supported by the natives; and to this end he exerted his potent influence. This devoted missionary of the Cross was murdered at Hwa-sang.

STODDARD, David Tappan: Born at Northampton, Mass., December 2, 1818. His early education was at Round Hill Academy. He studied at Williams College; graduated at Yale College, 1838, taking high rank as a scholar, especially in physics. In 1843 he sailed for Turkey as a missionary of the ABCFM, assigned to the Nestorian mission in Persia. Before reaching his destination he visited several mission stations in Turkey. After learning Turkish he, on reaching his station, commenced Syriac, that he might preach and also might assist Dr. Perkins in his translation of the Scriptures into modern Syriac. In five months he was able to instruct a class of Nestorian youths, and the male seminary was reorganized and committed to his care. Into this work he threw himself with intense delight. In 1847, Mr. Stoddard's health being impaired, he went, by medical advice, to Erzerum and Trebizond, where his wife died of cholera in 1848. With consent of the Board he took his orphan children home, returning to his field in 1851. Soon he began to instruct his older pupils in theology, to prepare them for preaching to their countrymen. Besides his other work, he prepared a grammar of Modern Syriac, published in the Journal of the Oriental Missionary Society in 1855. His theological lectures, embracing a full course of doctrinal theology, were delivered in Syriac. His labors were arduous, and for recreation he turned to astronomy and meteorology, making observations which brought him into relations with Sir John Herschel and other eminent scientists of that period. This carried him into various researches and activity, his devoted piety, his winning, genial manner, made Mr. Stoddard a man of mark, respected by all and loved by those who knew him. In 1856 the Persian authorities undertook to hamper the liberties of the mission, and Mr. Stoddard was the only man who achieved any redress. On his return from this successful errand he was attacked by typhus fever and died January 22, 1857.

STONE, Seth Bradley: Born at Madison, Conn., April 30, 1817. Died June 27, 1877. Graduated at Yale College, 1842, Union Theological Seminary, 1850; embarked as a missionary of the ABCFM for Africa, October 14, 1850; was stationed among the Zulus. His health having failed, he returned to the United States in 1875. He was a faithful, hard-working missionary for twenty-four years among the Zulus. A close student of the Zulu language, he translated portions of New Testament and Native hymns, and published an edition of church history in Zulu; also a summary of general history. Thirty-nine of the hymns in the Zulu hymn-book were translated or composed by him.

STRAITS SETTLEMENTS: A crown colony of Great Britain, comprising Singapore, Penang, and Malacca, all of which are treated of in separate articles. In 1886 the Keeling or Cocos Islands, a small group 1,200 miles southwest of Singapore, owned by an English family, were placed under the government of the Straits Settlements, and in 1888 an uninhabited island, 200 miles southwest of Java, named Christmas Island, was also added to the Straits Settlements.

STRONACH, John: Born at Edinburgh, Scotland, March 7, 1810; studied at Edinburgh University and Theological Academy, Glasgow; was ordained August 10, 1837, with his elder brother Alexander, and sailed as a missionary of the LMS for China, reaching Malacca March 2, 1838. In May, 1847, Mr. Stronach removed to Shanghai, having been appointed one of the delegates for the revision of the Chinese version of the New Testament. On the completion of that work he returned to Amoy in 1853. On March 17, 1876, he left Amoy, and, after visiting Japan, proceeded via America to England, arriving January 6, 1877. In 1878 he retired from foreign missionary service. He died in Philadelphia, U. S. A., October 30, 1888, after forty years' uninterrupted labor in China. His powers were of no common order. He had a very comfortable home in his university, and made a great mark in the translation of the Bible into Chinese, known as the Delegates' Version. He was a most idiomatic master of Chinese, and it was a charm to hear him speak. His literary ability did not cease with Bible translation. One of his tracts called the "Falk-bun" (Inquirer) was a masterly setting forth of the difficulties felt by a literary Chinaman, and the answers of the missionary. He assisted in revising Dr. Douglas' dictionary of the Amoy dialect. He was greatly blessed as an evangelist in Amoy, and labored indefatigably in starting stations, appointing native superintendents and working with them. With all this he was overflowing with high spirits and had an unfailing fund of humor, which served him well when opposers became annoying during his street preaching.
STUDENT VOLUNTEER MOVEMENT for Foreign Missions: I. Origin: The Student Volunteer Movement originated in the first international student conference of Christian college students, which was held at Mount Hermon, Mass., in 1886. Of the 250 delegates who attended, twenty-one had definitely decided to become foreign missionaries when the conference opened. Of this number, Wilder of Princeton, Tewksbury of Harvard, and Miss Herbert had each with the deep conviction that God would call from that large gathering of college men a number who would consecrate themselves to foreign missions. Before the conference closed one hundred of the delegates put themselves on record as being "willing and desirous, God permitting, to become foreign missionaries." At the conference it was decided that a deputation should be sent among the colleges, and four students were selected for this purpose. Of the four selected, Robert P. Wilder of Princeton was alone able to go, and John X. Forman, also of Princeton, was induced to join him. Messrs. Wilder and Forman visited 176 institutions, including a majority of the leading colleges and divinity schools of Canada and the United States. During the second year, 1887-88, the movement was left to itself, it was understood there would be no leadership in the general organization. This committee met in December, 1888, and an organization was effected, taking the name of the Student Volunteer Movement for Foreign Missions. An Executive Committee of three, consisting of John P. Mott, Robert D. Wilder, and Miss Nettie Dunn, was appointed, each member representing one of the three then existing Christian organizations among students. In January, 1889, the new Committee began its work. In 1889, the work having assumed so much importance, a board of trustees was formed to enable the membership of the committee to six members, so that it now consists of John R. Mott, J. Ross Stevenson, W. Harley Smith, H. P. Andersen, Miss Susie Little, and Miss Bertha Condé. John R. Mott is the chairman, J. Ross Stevenson the vice-chairman, and Pincott and Miss Dunn the general secretary and treasurer. In order to transact the ordinary business of such an organization, it is incorporated under the laws of the State of New York. There is a Board of Trustees and an Advisory Committee.

II. Organization: About fifty volunteers attended the student conference at Northfield in the summer of 1888. It was then decided that some organization was necessary in order to conserve the results, and a committee was appointed by the volunteers present to effect such an organization. This committee met in December, 1888, and an organization was effected, taking the name of the Student Volunteer Movement for Foreign Missions. An Executive Committee of three, consisting of John P. Mott, Robert D. Wilder, and Miss Nettie Dunn, was appointed, each member representing one of the three then existing Christian organizations among students. In January, 1889, the new Committee began its work. In 1889, the work having assumed so much importance, a board of trustees was formed to enable the membership of the committee to six members, so that it now consists of John R. Mott, J. Ross Stevenson, W. Harley Smith, H. P. Andersen, Miss Susie Little, and Miss Bertha Condé. John R. Mott is the chairman, J. Ross Stevenson the vice-chairman, and Pincott and Miss Dunn the general secretary and treasurer. In order to transact the ordinary business of such an organization, it is incorporated under the laws of the State of New York. There is a Board of Trustees and an Advisory Committee.

By the Purpose: The Student Volunteer Movement is in no sense a missionary board. It never has sent out a missionary, and never will. Those who become student volunteers are expected to go out as missionaries of the regular missionary organizations of the Church. The Student Volunteer Movement is a recruiting agency. It does not usurp or encroach upon the functions of any other missionary organization. It is unswervingly loyal to the Church, and has received the endorsement of every leading missionary board on the continent. Its purpose, as set forth in its statement, is as follows: "(1) To awaken and maintain among all Christian students of the United States and Canada intelligent and active interest in foreign missions; (2) to enroll a sufficient number of properly qualified student volunteers to meet the successive demands of the various missionary boards of North America; (3) to help all such interested students to secure a footing in the missionary network and to enlist their cooperation in developing the missionary life of the home churches; (4) to lay an equal burden of responsibility on all students who are to remain as ministers and lay workers at home, that they may actively promote the missionary enterprise by their intelligent advocacy, by their gifts and by their prayers."

IV. Membership: The membership is drawn from those who are or have been students in institutions of higher learning in the United States and Canada. Only those are entitled to become student volunteers who sign the "declaration" of the Movement, which is as follows: "It is my purpose, if God permit, to become a foreign missionary." The meaning of this declaration, as interpreted by the Executive Committee, is as follows: "This declaration is not to be interpreted as a 'pledge,' for in no sense withdraws one from the subsequent guidance of the Holy Spirit. It is, however, more than an expression of mere willingness or desire to become a foreign missionary. It is the statement of a definite life purpose, formed under the direction of God. The person who signs this declaration fully purposes to spend his life as a foreign missionary. Toward this end he will shape his plans; he will devote his energies to prepare himself for this great work; he will do all in his power to remove the obstacles, which may stand in the way of his going; and in due time he will apply to the Boards to be sent out. Only the clear leading of God shall prevent his going to the foreign field. While it is the duty of every Christian to face this question, no one should decide it without careful thought and earnest prayer. Having confronted the question, no one should leave it until a decision pleasing to God has been reached. 'Understand what the will of the Lord is.'"

V. Watchword: The watchword of the Volunteer Movement is "The Evangelization of the World in this Generation."

VI. Field: The field for the cultivation of which the Movement considers itself responsible embraces all colleges, universities, and other institutions of higher learning in the United States and Canada. There are fully 1,000 such institutions, in which are matriculated over 200,000 students. From these institutions come the leaders in all the influential walks of life. No work, therefore, can be more important than that of making the student centers strongholds and propagating centers of missionary intelligence, enthusiasm and activity.

VII. Methods of Cultivation: The secretaries of the Movement are a General Secretary, an Assistant Secretary, an Educational Secretary, and the Traveling Secretaries. The position of traveling secretary is usually held for one year by a student volunteer ready to go to the mission field. Returned missionaries also have been employed. In a few cases the secretaries have held the position two years. The size of the staff of traveling secretaries is determined by the needs of the work, and by the number of available candidates. The traveling secretaries visit the colleges and deliver addresses on missions, meet with missionary committees and volunteer bands, organize mission study classes, and in every way possible promote
the missionary activities of the colleges—but the chief object of their work is by public address and personal interview to lead students to give their lives to missionary service. The student volunteer band, an innovation in the college mission work, is also a volunteer band. The objects of the volunteer band are to deepen the missionary purpose and spiritual lives of the members, to secure other volunteers, and to promote missions in the college and in the college community. Connected with each Young Men’s or Young Women’s Christian Association in the colleges is a missionary committee whose duty is to cultivate the missionary life of the institution. The educational department of the Movement, under the direction of the Educational Secretary, has to do with the conduct of the mission study classes in the colleges. The Movement in conjunction with the Student Young Men’s Christian Association publishes during the academic year a magazine called *The Intercollegian*, which circulates among the students and is a valuable agency in keeping the volunteers in touch with the aims, methods and results of the Movement, and in keeping the Movement before the Church. The Movement publishes pamphlets, mission study text-books, and such other literature as may serve its purpose. The sales of these publications amount to more than 25,000 copies per year.

The volunteers in cities which are large student centers, and in some States, are organized into unions. The purpose of these Unions is to promote the missionary interest in the different colleges represented in them. In the United States and Canada there are held each year seven student conferences for men and five for women. At each one of these conferences special attention is given to developing the missionary life and activity among students. At these conferences, missionary institutes are held to train the leaders of volunteer bands, of mission study classes, and other missionary activities of the institutions represented. Once in four years an international convention is held. Four such conventions have been held, the attendance being as follows:

VIII. Results: 1. The work of the Movement, through visitation, summer conferences, conventions and correspondence, has reached more than 800 institutions. In more than half of these institutions nothing was being done in the interests of missions prior to the effort put forth by this Movement, or, as its inception, by the Student Young Men’s or Young Women’s Christian Associations. In many colleges where there has been for years more or less missionary interest, it has been the testimony of professors and of others who are in a position to know that the Movement has greatly increased that interest. Each year the traveling secretaries bring to the attention of thousands of students the needs of the non-Christian world and the claims of missionary service.

2. The Movement has been a principal factor in the recent remarkable development in the scientific study of missions; not only in the colleges and theological seminaries, but also in churches and young people’s societies. In its early years the Movement simply recommended subjects and books for study; later it outlined courses of study. In 1894 the Educational Department of the Department of Education of the Movement, under the direction of the Educational Secretary, was appointed Educational Secretary. He was succeeded by Harlan P. Beach in 1895. When the department was organized, there were about a score of mission study classes in all the colleges, universities, and theological seminaries in North America. Since then the textbook literature of the Movement has been created, and the reports for the year 1902-1903 show that there were 6,700 students enrolled in 544 classes in 319 institutions.

3. Since its inception the Movement has never ceased to press upon students the claims of foreign missionary service as a life work. Up to the beginning of 1904 the names of over 2,400 student volunteers have been reported as having reached the mission field, going out in connection with more than fifty different missionary agencies, and scattered throughout all parts of the non-Christian world. Many who have been hindered from going to the foreign mission field have taken up mission work in the home field.

4. As a result of the work of the Movement, the gifts of students for missions have steadily increased. In the academic year 1903-1904 over $68,000 was contributed for missions by institutions reporting. The Movement has exerted a mighty reflex influence on the religious life of the colleges and theological seminaries. If the volunteers and all that pertains to the work of the Movement were taken from the institutions of higher learning they would suffer great loss. The traveling secretaries, through their addresses and conversations, exert a great spiritual influence. The missionary idea has been emphasized in meetings and in mission study classes, thus widening the horizon, enlarging the sympathies, and stimulating the zeal of students. Missionary intelligence, missionary activity, and the missionary spirit have done far more than is generally realized to counteract the evil and subtle influences of pride, selfishness and rationalism, as manifest in the student convention.

5. The Movement has been an increasing factor in promoting the missionary life of the churches, confining its activities chiefly to work among the young people. The volunteers in all parts of the continent have taken a leading part in the work of local societies of young people in their vicinity. The principal result in this direction has been in the organization of the student campaign in connection with different denominations. The first and most successful effort of this kind was made by the Methodist Church of Canada. Within the past few years the students of twelve other denominations have inaugurated similar movements, with varying degrees of success. The leaders of the Volunteer Movement have helped by counsel at each stage of this development. In most cases the leaders of these movements have been volunteers. In the pathway of the work of student campaigners thousands of young people have been stirred, missionary committees have been organized, missionary libraries have been established, mission study classes have been formed and reorganized; and when they have been instituted, and the young people have been influenced to form the habit of systematic giving.
Many churches have been led to support their own missionaries. Intercession on behalf of missions has been greatly promoted, and the spiritual life of young people's societies has been quickened and sharpened. The inauguration of the Young People's Forward Movement, the purpose of which is to promote missionary activities among the young people of all denominations, is a direct outgrowth of the work of the Student Volunteer Movement among young people.

X. The Volunteer Movement in Other Countries: The Volunteer Movement has, under different names, become world-wide, largely as a result of its direct influence on the students of other lands. In Great Britain the Student Volunteer Missionary Union was organized in 1898, when the existence of the British missionary societies. They have held three missionary conferences, which have been the largest and most notable student conventions ever held in Europe. The Volunteer Movement in Germany and the one in Scandinavia have made most encouraging progress. They have materially increased the number of missionary candidates, and have done much to promote the scientific study of missions.

In the spring of 1895, Mr. D. Willard Lyon prepared the first text-book written specially for this course, a sketch of the History of Protestant Missions in India. In 1896, Mr. Harlan P. Beach, now Educational Secretary of the Movement, published the first of the introductory text-books to which the student world owes so much, The Cross in the Land of the Tridents, a study of India. Since that time the Movement has prepared or provided text-books and frequently issuing courses on three different subjects. The reason for this has been the demand that as many phases of the subject as possible should be presented within the short college generation.

The Ecumenical Conference of 1900, representatives of the Women's Boards of North America planned a course for their constituencies to be known as the United Study of Missions Series. In the fall of 1901, the first text-book was published, written by Miss Louise M. Hodgkins—Lux Christi, an introduction sketching missions from apostolic times down to Carey. The sale of 35,000 copies during the first year showed that the time was ripe for such a plan. The second volume, Lux Christi, published a year later, treats India; the third takes up China. Among the young people's societies a desire was expressed for something more elementary in character than the text-books of the Student Volunteer Movement, which were written with the college sophomore in view. This has led to the Forward Mission Study Series, the first of which, The Price of Africa, by Mr. S. Earl Taylor, was out in July, 1902. This tendency to adapt to specific needs is a very hopeful sign, but there is still much to be done. We need as many grades in text-books for the study of Foreign Missions as for that of geography or history.

In addition to these courses several of the denominations have prepared or recommended text-books, or have furnished outline studies in magazines.

The methods of the mission study class have varied. The college classes have, for the most part, methods of the transmission type. Among the classes outside the colleges have followed the same plan.
and poetry. Its silk manufactures are of especial note, but all Chinese manufactures are produced in great abundance and of superior quality. Several channels connect it with the Yangtsze-kiang, and small steamers at high tide reach the many important vil- lages in the surrounding districts. The population is estimated at 500,000, and from the top of one of the high pagodas can be seen an area containing a population of 5,000,000. Station of the Methodist Episcopal Church (South), (1853), with (1900) 7 missionaries, mix of them with thirty-three women missionaries, 24 native workers, 4 places of worship, 3 Sunday schools, 2 boarding schools, 1 theological class, 1 college, 1 dispensary, 1 hospital, 1 medical class, and 101 professed Christians. Station also of the PN (1851), with (1903) 4 missionaries, three of them with their wives; 17 native workers, 2 outstations, 5 places of worship, 3 Sunday schools, 4 day schools, 1 boarding school, 1 hospital, 1 dispensary, and 68 professed Christians. The name is also written Soochow.

**SU-CHIEN.** See **SU-TSIN-HSIEN.**

**SUDAN:** A territory in Africa adjacent to the Sahara. Taken in its broader dimensions, or as spoken of by the Arabs and earlier European geographers, together with the additions claimed by Egyptian rulers in late years, Beled-es-Sudan, or the "Country of the Blacks," extends from west to east along the southern border of the Great Desert from the Atlantic and Senegal to the Red Sea and Abyssinia, and southward from the desert to Upper Guinea on the west, and to the equatorial and lake regions on the east, being some 3,500 miles in length from east to west, and in its broader parts on the east some 1,600 in width, and comprising a population estimated at 50,000,000. It is thus almost a fourth of Africa, both in extent of country and in the number of its inhabitants.

The Western Sudan from Wadai to the Atlantic is now comprised and described as belonging to the more recently created colonies and protectorates and spheres of influence of France, or to Northern Nigeria, which has fallen to Great Britain. The extreme northern part of Kamerun also falls in the general region.

Eastern or Egyptian Sudan, to which the eyes of the world have been chiefly turned during recent years, lies along each side of the Nile, from Assouan or the first cataract to Uganda and the Congo Free State, extending some 1,100 miles or more from north to south, while its width, from the Red Sea to the eastern limits of Wadai, is from twelve to fourteen hundred miles.

The extensive additions to his own territories, which the distinguished viceroy of Egypt, Mehemet Ali, made, more than half a century since, included all the country on the Blue and White Niles, for great distances east and west of them, and for several degrees south of the equator; and in after years his grandson, Ismail, the first Khedive of Egypt, claimed that he had a right to extend his borders as far as the Juba River on the Indian Ocean. The Sudan as now constituted (1903) comprises eight provinces, viz.: Khartum, Gezira, Dongola, Berber, Kassala, Sennar, Kordofan, and Bahr el Ghazal, and three administrative districts, Wadi Halfa, Suakin, and Fashoda.

The present area is about 950,000 square miles, and the population is estimated roughly at 2,500,000. Khartum, the capital of this vast region, is situated at the junction of the two
Niles, Blue and White; and Suakin, on the Red Sea, is its chief seaport. This section of Africa is chiefly inhabited by two distinct races. From the eleventh degree of latitude, and generally from the Nile westward, are Arab in their origin. They are chiefly nomads, and are professedly Mohammedan. Being exceedingly emotional and superstitious, they have the greatest regard for their sheikhs or spiritual guides, ascribe to them a kind of supernatural power, and venerate them more than they do the Prophet himself. The country south of the eleventh degree of latitude is peopled by negroes, chiefly of a sedentary and agricultural mode of life, who, while classed as Mohammedans, are in reality but slightly changed pagans. The mingling of Arab and negro blood has produced a third, hybrid, Arab-speaking class, who are found in the more fertile parts of the Sudan, especially in Darfur. A small yet very distinct race, said to have descended from the ancient Nubians, is found in the northern province of Dongola; and between the Nile and the Red Sea, not far from Suakin, there is still another distinct and ancient tribe, who speak a language of their own. The history of the Sudan, since the expulsion of the French from Egypt by the English in 1801, has been largely determined by the life of Mehemet Ali, a poor fisherman of Greek descent, a shrewd and active leader, who, with a band of followers, had aided the English and Turks in expelling the French, succeeded in securing the appointment from the Porte, in 1806, as viceroy of Egypt. While he was himself more especially a statesman, and man of affairs, and met with great success for many years. Finding the Mameluks, whom he had used as a stepping-stone to power, a hindrance to his rule, and a plague to the country, he massacred a great part of them in 1811; others escaped and fled to New Dongola, but they were followed and finally exterminated in 1820. Mehemet Ali then made himself master of Upper Egypt, and by him the Egypt of to-day was virtually founded. His rule extended from the Mediterranean to the equator, and hereditary succession was established forever, according to Mohammedan law, in the eldest of his blood. Ismail, the fifth viceroy of Egypt, and a grandson of Mehemet Ali, enlarged his army, extended his sway southward over regions which Mehemet Ali had dramatically taken, so as to recover and include the Upper and White Nile, together with the equatorial and lake provinces, and pushed his victories into the Darfur regions. In levying enormous taxes upon the people he laid the train for revolt. The revolt took definite form in the person of a young man. It was led by Ahmed Mohammed, an Arab of African birth. An air of mystery surrounded Mohammed, and he styled himself the Mahdi, claiming to be that prophet or reformer of Islam whose coming had been awaited for many centuries. Eluding execution, he and his motley army took several large towns, and in July, 1882, he overpowered and massacred a force of about 6,000 Egyptian soldiers, together with the commanders of the army. An English officer, General Hicks, was now sent to take command of the Egyptian forces at Khartum. After some successes, the British were runched into a corner by the Mahdi with an Egyptian force of about 10,000 men in the autumn of 1883. Through the treachery of a guide he was led into a defile not far from El Obeid, where the Mahdi fell upon him and left "not a man" of all his army to tell the tale. The fate of General Hicks' expedition aroused in England a deep interest in the Sudan war. The Mahdi's force of 6,000 appeared with strong forces before Suakin on the Red Sea. England's route to India was in danger; a fleet was sent to Suakin, and troops were sent thence to drive off the Sudanese. Defeat of the English enterprise and massacre was the only result. Stung to action by these disasters, the British Government dispatched troops to Suakin, and having now become concerned for the safety of Egypt, proposed to abandon the Sudan. As a first step to carrying out this policy, Gen. Gordon, who had formerly been Governor-General of the Sudan, was sent to Khartum in 1884. He was to tranquillize the hostile tribes and prepare a means by which English and Egyptian officers, civil functionaries, and soldiers might withdraw from that turbulent and unprofitable region. But the Mahdi won over Gordon's trusted Egyptian troops, found entrance to Khartum, and killed Gen. Gordon, so that the English forces, sent tardily in the latter part of 1884 to his relief, found naught, on arriving near the city, but desolation dominated by the green flag of Islam.

For eleven years after the fall of Khartum the Sudan, administered by the Mahdi, awaited his death, in 1885, by his successor (Khalife or Caliph). These new rulers held the country under a desolating and blood-thirsty despotism, for they considered themselves divinely appointed reformers. Prosperous districts were reduced to barren wastes, and the river populations, reduced to small numbers, were little better than slaves. In 1898, however, the increasing power of the Khalife led to a serious interposition on the part of Great Britain, and under Lord Kitchener's direction the combined British and Egyptian forces broke the power of the Khalife, recovered Khartum and finally destroyed the last vestige of Mahdism, by the death in battle of all its most prominent leaders.

The Sudan is now a condominium of Egypt and Great Britain, an arrangement having been made, in January, 1899, between the two governments for the administration of that part of the Sudan held by Egypt, with the assent of Great Britain, who rules under general principles agreed upon by both governments.

The prosperity of the Sudan is slowly reviving. A primary school system is now in operation. Gordon College, an institution proposed by Gen. Kitchener for teaching Western sciences to Mohammedans, by Mohammedans, or, at least, without Christian taint, was opened at Khartum in 1902, with an endowment of about $500,000.

Direct missionary work for Mohammedans is under projection. Missionaries have been authorized, under certain restrictions, and the CMS has a station at Omdurman, and the UP a station at Khartum. The last-named Society has also undertaken missionary work among the pagan population (Shillahs) on the Sobat River, 540 miles south of Khartum. The British Government will probably consent to the opening of schools by missionaries without much more delay.

Alford (H. S.) and Sword (W. D.), The Egyptian Sudan, Its Loss and Retention (1893) in the Sudan, the military authorities fearing its results upon the fanaticism of the people. Medical missions have been authorized, under certain restrictions, and the CMS has a station at Omdurman, and the UP a station at Khartum. The last-named Society has also undertaken missionary work among the pagan population (Shillahs) on the Sobat River, 540 miles south of Khartum. The British Government will probably consent to the opening of schools by missionaries without much more delay.
SUDAN PIONEER MISSION. See GERMAN; MISSIONARY SOCIETIES IN.

SUDHARAM: Town in Bengal, India, situated in Noakhalii district, in the eastern portion of the Ganges Delta, and about 60 miles N. W. of Chittagong. It has some commercial importance, but is unhealthy and disagreeable as a residence. Population about 5,000. Station of the Queensland Baptist Missions (1880), with (1901) 1 woman missionary, 6 native workers, 1 outstation, 1 day school, and 10 native communicants. Also called Noakhalii.

SUFISM: A theosophy or mystical philosophy found among Mohammedans, altho branded as of heretical tendency by the Ulema or regular hierarchy. By the true Logicians it is termed the "secret" or "mystery" of the orders of Dervishes, each order having its own practise and method of applying the philosophy of man's relation with God proposed by Sufism.

The name Sufi is variously derived by Persian and Turkish writers, some holding that it comes from Sofi, wool; woolen garments being worn by ascetics. Others, more correctly, perhaps, connect the word with the Greek sophos, a sage. The body of doctrine and rules as to practise followed by Sufis is called the science of tasawwuf, a word formed by regular Arabic rules from "Soft." It is perhaps worth noting, however, that this word is spelled with the letters which might be used (with different vowel points) to represent the word "Theosophy."

Sufism has been chiefly taught, and most extravagantly also, in Persia, where the stimulus of its aspirations has fostered imagination, clothed its teachings in beautiful literary garb, and changed every philosopher into a poet.

Sufism first attracts attention in the 9th century. Under the Abbaside Caliphs, at Baghdad, it flourished among the men of genius from Greece together to grace the Golden Age of Mohammedan intellectual activity. The time was a critical one both for Islam and for the principle of free thought which theologians sought to suppress. The assimilation of Islam of the mass of men of various religions and philosophies who had been forced into Mohammedanism, was not complete. It had produced in Islam itself various heretical schools of thought. These schools of philosophy were gradually crushed out, and Sufism, with its careful reverence for Mohammedanism in teaching secret and inward explanations of visible and outward things, seems to have become a refuge for all who revolted against chaining the mind to dogmas and formulas. It gave hospitable welcome to everything in the way of doctrine that the world has ever heard, since "all personal.

The "Sincere Brethren," found in Baghdad in the 10th century, seem to have been imbued with the principles of Sufism. Their mysteries made their bond of union, and in the seeriy with which they surrounded their real creed they resembled some orders of the Dervishes of to-day.

So far as can be gathered from their literary remains, the chief subject of their investigation was that knowledge of divine things which is taught imperfectly by all religious systems. They held the central Sufi doctrine, that the essence of every existing thing is derived from one supreme mind. All knowledge, therefore, aids understanding of the One Source of all things. Everything may turn to the benefit of the soul in leading it to the knowledge of God. The highest attainment is such separation from worldly things as will permit life with God and knowledge of His counsels. In this pursuit the poorest may be the richest, and all seekers may recognize a brotherhood bond which makes each ready to aid the other.

Sir William Jones gives the central idea of the Sufis as follows: "Nothing exists absolutely but God. The human soul is an emanation from His essence, and will finally be reunited with it. The highest possible happiness will arise from this reunion, and the chief good in this world consists in as perfect a union with the Eternal Spirit as the encumbrance of a mortal frame will allow."

The great Sufi writers give telling illustrations of their views of the relation of the soul to the spirit of man with God. Says one (translation by Ubicieni): "You say 'the sea and the waves,' but in this utterance you do not signify distinct objects; for the sea when it heaves produces waves, and the waves when they settle down again become sea. In the same way men are the waves of God, and after death return to His bosom. Or, you trace, with ink upon paper, the letters of the alphabet, 'a, b, c,' but these letters are not distinct from the ink with which you write them. In the same manner the creation is the alphabet of God, and is lost in Him."

Sufism has features which recall the doctrines of the Gnostics, who had not yet vanished from Asia when Islam put forth its sword to rid the world of all formulas of belief save the formula of allegiance to the Prophet of Mecca. Like the Gnostics, the Sufis attach an important mystic meaning to light, as symbolizing the Supreme Power. So, too, the Sufis believe in Aeons ruling the world through a whole hierarchy of under dignitaries (the Kuth, the Ghaews, etc.), and showing the power of God in thaumaturgic displays, of the world, and of the essential division of mankind into two classes: on the one hand are spiritual men, understanding all things, initiated into the councils of God—thoroughly ripened souls who are free from all law, and, on the other hand, are fleshly men—inmature creatures still struggling with the desires of the body and burdens of law, and of the endless rites of religious observance.

Neo-Platonism, too, is preserved like a fossil in its matrix by Sufism in the use which it makes of the doctrine of man's unity of essence with the Creator. Sufis hold that man may cease to be himself—that is to say, individual—while in the body; and he may thus identify himself with the Absolute and Infinite Truth. This intuitive grasp or vision of the Infinite is not subject to any effort of will. But by an effort of will man can attain to a consciousness of himself that is nearer to the God to such an extent that God gives, in return, the inspiration or enthusiasm of vision which is infinitely precious, altho transient in consequence of the mortal frame in which the soul of man is chained.

Sir William Jones translates from Perhad and
Shirin a passage illustrating various allegories in nature which invite the soul to desire to approach God: "There is a strong propensity which dances through every atom and attracts the individual particles to some particular object. Search the universe from base to summit, from fire to cold, and you will find all matter acting according to the motions to all above the celestial spheres, and you will not find a corpuscle destitute of natural attractability. The very point of the first thread in this apparently tangled skein is no other than the principle of attraction, and all principles besides are destined to yield. From such a propensity arises every motion perceived in heavenly or in terrestrial bodies; it is the disposition to be attracted which taught hard steel to rush from its place and rivet itself to the magnet; it is this quality which gives every substance in nature a tendency toward some other, and an inclination forcibly directed to a determinate point."

The Sufis speak in very warm terms of their devotion to God. "We are not afraid of Hell," says one, "neither do we desire Heaven." Asked by a scandalized follower what he meant by so blasphemous a speech, he replied, "Our devotion is for love of God only. To God belongs the right to put us either in Heaven or in Hell. And may God's commands be executed agreeably to His blessed will."

The Sufis are the teachers of the mystics. "The spiritualism of the Sufi, ascribed to Mohammed, is nothing but asceticism. As the Mohammedans have established a Pantheistic school appropriate to Islamic ideas—a sort of esoteric doctrine of Islamism, which must be distinguished from Indian Pantheism, and, indeed, it presents only errors of the Vadastra and the Saukhyata. Pantheism as a moral doctrine leads to the same conclusions as materialism—negation of human liberty, indifference to actions, and the legitimating of temporal enjoyments. In this system all is God except God Himself, for He thereby ceases to be God. The spiritualism of the Sufi, the contrary to materialism, is a zeal for it. Ideally, if this doctrine is not more reasonable it is at least more elevated and more poetical."

There is a special Sufi vocabulary of the experiences of the seeker after God. God is the Truth—Hakl. The devotee's attraction to God is called Jeth. The intuitive knowledge of Divine things, which the soul seeks to acquire, is marifeh (knowledge—gnosis). That state of self-effacement, which removes the obstacle of individuality from the path of union with God, is called i'tiqad (annihilation) and the attainment of the sense of union with God is called ma'ad (the term used in speaking of a lover's gaining access to his mistress). The resulting ecstasy of joy is Wajd. A special meaning attaches to many other words in the mouths of Sufis. This must be borne in mind in order to avoid reading Christian or other preconceptions into the writings of these philosophers, as has been done by the one seductive translator of Omar Khayyam. The meaning conveyed to a Sufi by the name of God has already been hinted. He furthermore considers God to be the author of evil as well as of good. Dr. Holme has remarked that quality and quantity distinctions are obscured for them. "Love of God,"

"Desire for God." "Union with God," entrain no moral responsibility in the man who has them for his object in life. "Knowledge of God," too, is merely apprehending His existence by some mechanical or other means which concentrates attention upon the fact. The aim of the seeker after knowledge of God is neither a clearing of the mind nor purification and transformation of his thinking and desires. It is simply personal enjoyment of an ecstasy, artificially produced and transitory, whose highest value, aside from the nervous orgasm, is its power to make the Sufi oblivious of the thought and feelings and relations to other men which characterize life. In this text the Sufi holds an attitude like that of the stylique monks of early Eastern Christianity who could perceive nothing in the world more worthy of effort than personal advancement in what they were pleased to call "sainthood."

Sufism has never been free from the attacks of Mohammedan theologians. The heretical sects of the early centuries of Islam have disappeared. The "Sincere Brethren" have likewise gone. Sometimes one gets a glimpse of the methods of this removal of Sufism, as the dying will of the thing alive of a poet or a teacher for some anathema, utterance; and in modern times the persecution of Babism in Persia (which is but one of the manifestations of Sufism) is familiar to all. Such practical obstacles to free development have led the Sufis to announce loudly, and some of their sincerity, their honesty, their dependence upon the Mohammedan faith. They draw from the Koran proof texts which they use at their full value. One of such texts is, "It is not given to man that God should speak to Him; if He does, it is by inspiration, or through an interpreter, and He speaks to them in their own manner."

Ubieini points out, however, the essential antagonism between Sufism and the Mohammedan religion. It is natural that an indirect, unreasoning morality as that of Sufism, should be repugnant to those who demand that virtue should be considered as the highest value of the universe and the aim of all religious actions. It has "two schools, the one public, which precedes initiation; and the other secret, for adepts only. A strict observance of religion and all the social virtues is required of the candidate for initiation. Later, when, by a long suite of proofs and mordifications (under a teacher to whom absolute obedience has been vowed) and, above all, by the absolute annihilation of his individuality the novice is supposed to have arrived at the desired degree in which he may behold the truth face to face, the veil, until then spread over his vision, suddenly falls, and the teacher makes known to his pupil that the Prophet in his book has only presented under the veil of allegory maxims and political precepts; that the Koran without mystical interpretation is only an assembly of words void of sense; and that once the habit of mental devotion acquired, one can abandon all forms and outward ceremonies of religion, and reduce worship to a purely inward and spiritual exercise." But a Mohammedanism which has abandoned its forms of worship has ceased to be Mohammedanism. The Sufis are the teachers of the West. The Sufis have a volume which represents Sufism as an expansion from Mohammedanism that explains its
essentials. In fact, Sufism is a force opposed to Islam, which will one day destroy it by substituting pantheism for monotheism in the Mohammedan theology. The strength of Islam resides in its truer doctrine, which is explained by the phenomenal falsehood. When that truth of one personal God has been replaced by the pagan conception which Sufism seductively offers, the religion of Mohammed will be found to have vanished from the face of the earth.

On perceiving the pantheistic taint in every utterance of the more advanced Sufis respecting God, one cannot avoid a sense of disappointment, for many of their really beautiful sayings seem to offer a bridge by which the system may be connected with mystical Christianity. The Christian as well as the Sufi may join with the Hindu in saying "There is One only—and there is none else." But the Sufi parts company with the Christian to follow his Hindu teacher. The great poet Jellal-ed-din Rumi said, in a moment of exaltation, "Oh, my master, you have completed my doctrine by showing me that you are God—God is all!" But the Christian finds Scripture teaching that the Spirit of God will lead him who consents to be led, and that he who is led by the Spirit of God is a son of God, he can join with the Sufi in declaring that, "To lose self in God is the one object toward which men should strive." But this the Christian understands as a call to subject self-will to the control of God, with a change of desires that places him in harmony of purpose and action with God, enabling him to make kindly helpfulness to others the God-like characteristic of his life. The Sufi, however, finds in his desire to seek God no stimulus toward moral elevation; and his brother feeling toward others is but the bastard kindliness of the mutual admiration society which rates the masses—those who do not belong to the aristocracy of the instructed ones—as accursed. Even for his own brethren he gains little from his quest after the Divine. Saadi sets forth the barrensness of this quest, so far as benefit to others is concerned, in one of his quaint parables in the Gulistan: "A Dervish being questioned as to what gift he had brought back to his brethren out of the garden of delights to which he had gone, replied, 'I came to a rose-tree and a rose-tree at that rose-tree (the vision of God) to fill the skirt of my robe with roses, so as to offer them to my brethren. But when there, the scent of the roses so intoxicated my senses that the skirt of my robe escaped from my hands.' The tongue of that man is slumbered with the name of God."

Setting on the one hand this conception, that God countenances a man's content to bless himself and his fellows are left without participation; and placing upon the other side John's great elucidation of the metaphysical interpretation of Himself to men—"He that abideth in me and I in him, the same beareth much fruit"—we touch the central point in the contrast between the two systems. Sufism, like all error which has power to enthral men, is based on a great truth, misunderstood and elaborated by darkened minds. The missionary's approach to the Sufi, then, should be cautious until he has mastered this curious eclectic philosophy, and has prepared in some way to show clearly the truth which it has obscured and perverted.

Ubisch (M. A.), Letters on Turkey; Misiiri (Mohammed), Turkish: Hâta Tesâwurul (The Science of Tesawur), Constantinople, 1884; translated also by Brown (J. P.), in The Dervishes, London, 1868; Gobineau (J. A. de), Les Religions et les Philosophies dans l'Afrique Centrale, Paris, 1865; Borchardt, "Études sur l'Édifice d'Art de la Pensée Chinoise," in Journal Asiatique, Vol. 10 and 30, Paris, 1902; Tho- luek (F. A. D.), Saufamius, Berlin, 1821; Wa'fa ibn Moham- med Wa'fa, Refutation of the ignorant followers of Islam (Arabic), Cairo, 1876; Biergare (C. H. A.), Sufi Interpre- tations of the Quatrains of Omar Khayyam, and Fire- Gerald, New York, 1902; Sa'l of Samarend, Rehniyat i A'in i Hayat (Rills from the Fountain of Life), 1904; Turkish translation from the Persian by Arih, 1885; printed Constantinople, 1830.

SUIHIN STATION: A station of the SAMS in the Grand Chaco of Uruguay, South America, situated near the Pilcomayo River, about 150 miles N. W. of Asuncion. Station established (1899), with (1903) 4 missionaries.

SUI-CHAU: A town in Hu-pei province, China, situated about 110 miles N. W. of Wu-chang-fu. Station of the WMS, with (1903) 2 missionaries, 8 native workers, 7 outstations, 8 places of worship, 2 day schools, and 157 professed Christians, of whom 127 are communicants. Some write the name Sui-chou.

SUI-FU. See Ssu-cha'U.

SUI-TING-FU: A town in Sze-chwan, China, situated in the N. E. part of the province. Station of the WMS, with (1903) 2 missionaries, with their wives, 2 women missionaries, 1 place of worship, 1 dispensary.

SUIYANG. See Ssu-cha'U.

SULTANPUR: A town in the United Provinces, India, situated about 30 miles S. W. of Faizabad. Station of the ZBM, with (1903) 5 women missionaries, 5 native workers, 1 day school, and 1 orphanage.

SULU ISLANDS: An archipelago lying between Mindanao, the southern island of the Philippines, and the northeast extremity of British Borneo. By the treaty of peace, December, 1898, these islands were ceded to the United States by Spain, and they are included in statistical reports with the Philippine Islands. There are over fifty islands, the largest of which is thirty-six miles long and twelve broad. The population of the Sulu Islands is entirely Mohammedan in religion, and no missionary work has, as yet (1903), been attempted among them.

SULURPETA: A town in Madras, India, situated near the coast, about 50 miles north of City of Madras. Station of the Hermannsburg Missionary Society (1866), with (1903) 1 missionary and his wife, 8 native workers, 2 outstations, 1 place of worship, 5 day schools, and 206 professed Christians, of whom 197 are communicants.

SUMATRA: One of the largest and richest islands of the Dutch East Indian Archipelago. It extends 700 miles from northwest to southeast, lying between latitude 5° 40' north and latitude 5° 59' south. Its area is estimated at 160,000 square miles, and the population (1900) at about 3,000,000. The island belongs to the Dutch Government, the some of the interior districts have been brought under cultivation. Throughout the whole length of the island extends a range of lofty mountains, which lies nearer the western coast than the eastern; hence on the eastern slope there are several large rivers, but the watercourses on the western slope are completely short. Sugar-cane, coffee, rice, and spices are the principal products, the much fine timber and many tropical fruits are found in abundance. The greater part of the population are Mohammedan in religion and
belong to the Malay race, but it is probable that they have absorbed many aboriginal tribes, a few remnants of which are found in the interior, such as the very small Negritos of the interior, and the Negrito blood, and the Battaks. These latter are pagans and differ in many points from the Malay type. They are somewhat undersized, with broad shoulders and rather muscular limbs. Their eyes are large and black, with heavy brown eyebrows; the women have abundant black hair running northward from Padang on the W. coast of the island to Toba Lake, and beyond, as far as Deli on the E. coast of the island. Their language contains words of Sanskrit origin, and has evidently been affected by Javanese, Malay, Macassar, Sundanese, and Tagal influence. Another peculiar tribe are the Redjangers, who use distinctive characters, which they cut on bamboo with their short kreeses or daggers. The possessions of the Dutch Government in the island of Sumatra are divided into the Residencies of the West Coast, the East Coast, Benkelen (the extreme southwestern coast), Lampangs (southeastern coast), Palembang (southeastern and central), and Atjeh, the northern extremity. The principal towns are: Padang, on the west coast, about latitude 1° south, the residence of the governor, with a population of about 100,000 including a Chinese settlement and a European quarter; Benkelen, the capital of the Residency of that name, with 11,000 inhabitants; Palembang, in the Residency of Palembang, has 32,000 inhabitants, with barracks, hospitals, one of the finest modern buildings in the island, and a public library. On the east are Bengkalis, Rhio-Lingga Archipelago, and Banka. The latter is separated from Palembang by Banka Strait, and has an area of about 5,000 square miles and a population of 106,305.

Vincian operations in the interior of Sumatra have been chiefly among the Battak tribes. The Battak tribes hold to a belief in demons, their religious rites showing traces of ancestor-worship, and being accompanied by cannibalism. The BMS sent Messrs. Burton and Ward to Sumatra about 1820, but the mission was shortly afterward given up. The ABCFM attempted a mission among these people in 1834. The enterprise came to an end, however, with the murder of its two missionaries, Munson and Lyman. A private enterprise in Ermeio, Holland, sent out missionaries in 1850, and the Netherlands Bible Society, in 1859, published a translation of the Gospel of John in one of the Battak dialects. Two years later (1861) the Rhenish Missionary Society took up this enterprise, and has had a marvelous success. It now has 32 stations in the Battak country, with 6,000 missionaries and mission agents; 1,153 native workers, men and women; 207 outstations, 242 schools, and 51,685 professing Christians. The larger part of the converts are from the heathen Battaks, and the Siangdung district is entirely Christianized. But the most pressing need is among the Mohammedan Battaks, and some 6,000 of the number of converts given above have been won from the Mohammedans. Besides the Rhenish Society, the Netherlands Missionary Society, the Java Committee (Holland), and the Mennonites have opened stations on the east coast and in the interior.

**SUNDANESE LANGUAGE**: This is a difficult and even perplexing language of the Malay family, and is spoken by about 4,500,000 of the inhabitants of Java, in the Dutch East Indies. It is less polished than the Javanese, but has long been written, the Javanese alphabet being used for the purpose. Arabic letters are also used for writing Sundanese, and some of the Dutch missionaries have tried to introduce the Roman alphabet for this purpose among the unlettered sections of the people.

**SUNDAY SCHOOL UNIONS**: The different Missionary Societies, with few exceptions, include the organization of Sunday schools as part of their regular work. The M. E. Church Missionary Society particularly emphasizes this feature. Early in the 19th century, about the same time as the Bible societies, societies were organized for the specific purpose of extending the Sunday school work. The first of these was the The Sunday School Union, formed in England in 1803, which, however, devoted itself distinctively to home work. In 1817 a similar society was formed in Philadelphia, Pa., which developed in 1824 into the American Board of Commissioners for Foreign Missions. That, however, like the English Society, gave all its special attention to the home field, and it was left to a layman, Mr. A. Woodruff, to give the impulse for the foreign phase of this branch of Christian effort. As early as 1858 he commenced the efforts which resulted in the organization of the Foreign Sunday School Association, incorporated in 1878. Meanwhile, during a visit to England in 1864, Mr. Woodruff pleaded the cause of the Sunday School as a missionary agency so effectively before the Sunday School Union that a separate department was created, called The Sunday School Union’s Continental Mission. Of these three organizations, the largest, the American Sunday School Union, still does very little for the foreign field except occasionally by way of assistance to Sunday school establish ing societies on the foreign field. The Sunday School Union’s Continental Mission (headquarters, 56 Old Bailey, London, England,) carries on work in Norway, Holland, Belgium, France, Germany, Bohemia, Italy, Spain and Portugal, and in the United States. In Sweden its missionaries have organized 2,000 Sunday schools; in Norway one formed 160 new schools in four years; in Germany the 750,000 Sunday school scholars are very largely the fruit of the Society’s labor.

The Foreign Sunday School Association (headquarters, 67 Schermersbur St., Brooklyn, N. Y., U. S. A.) is more distinctly a foreign mission organization. It emphasizes work among the Spanish-speaking peoples, and in connection with the foreign mission societies, devotes itself to the publication of Sunday school papers. Among them are six illustrated papers for children: Glad Tidings, in Japanese; El Amigo, in Spanish; O Amigo, in Portuguese; La Feuille du Dimanche, in French; Die Sonntag Schule, in German; and Il Amico, in Italian. Last year 13,000 subscriptions were paid for these papers. Several more have been published. One, Christie’s Old Organ, will illustrate the diffusion of this work. First published in 1877, it has been translated into sixteen different languages, and more than 30,000 copies were published. Several more have been published. One, Christie’s Old Organ, will illustrate the diffusion of this work. First published in 1877, it has been translated into sixteen different languages, and more than 30,000 copies were published.
circulated in Germany, Hungary, Bulgaria, Belgium, Portugal, Greece, Syria, Japan, Bombay, Ceylon, Bohemia, France, Italy, Asia Minor, and China.

**Sung-Yang-Hsien:** A town in Che-kiang, China. Situated 25 miles W. of Chang-chou, Station of the CIM (1896), with (1903) 103 missionaries, 4 native workers, 3 outstations, 2 places of worship, and 20 professing Christians. Some write the name Sung-yang.

**Sung:** A town in Bombay, India, situated in the district of Rewa, Kantha, about 75 miles E. by N. of Ahmadabad. Station of the PCI (1899), with (1900) 1 missionary and his wife and 1 orphanage.

**Support of Missions:** Principles and Methods used: It is proposed in the first place to indicate the total and per capita contributions of the churches for foreign missions; second, to partially account for the smallness of the contributions; third, to suggest an effective financial system and describe the working of the same in a local church; fourth, to discuss the policy of the support of specific objects which has been adopted by many churches in a number of leading denominations and which has been endorsed by some of our largest and most representative Missionary Boards.

I. The Contributions of the Churches: The most recent, reliable, and complete exhibit of the contributions of the churches of Christendom for foreign missions is the compilation of the Rev. James Dennis, D.D., in his remarkable encyclopedia work entitled *Christian Missions and Social Progress.* From this exhibit it appears that at the close of the century the annual income from home sources of the 537 denominational and independent societies and their auxiliaries was $17,284,363, a little more than three and one-half million pounds sterling. It is next to impossible to ascertain the per capita gifts represented by this amount, but they are not far from 30c. a year. The per capita gifts of American Christians are more certainly ascertainable because our church census returns are more complete than those of most countries. The annual income from home sources of all American Missionary Societies at the close of the century was $5,199,497. The total membership of the Evangelical Churches of the United States in the year 1900 was 17,537,147, from which it appears that after a century of missionary appeal the average American Christian has become interested in the greatest work in the world only to the extent of an investment of 29c. per year. He is still settling his missionary obligations in small silver and copper coin. This pitiful showing would be rendered even more pitiable were we able to compile the large gifts of a small number of generous wealthy persons with the legacies and the product of endowment funds, and then compare this total with the total gifts of the rank and file of our church membership.

Another illustration of the low scale of missionary giving is furnished by the following table of the contributions of the living members of four of our greatest and wealthiest American denominations during the twenty-five years closing with 1901:

It is worthy of special remark that the extraordinary fluctuations which characterize the above annual incomes cannot be accounted for by the financial conditions prevailing in the different years, because it will be noticed that the per capita contributions in 1893, the first year of the panic, were 43c., and in 1894, the second year of the panic, 34c., whereas in 1899, 1900 and 1901, three of the most prosperous years in the country's history, the per capita contributions were respectively 28c., 27c. and again 28c. It would probably be impossible to account for the decrease of 16c. per capita from 1893 to 1900 by the decreased financial ability of the churches. Reference is made to the annual church collection. It is evident that however efficient this method may have been in other days when there were very few causes appealing for support, it can no longer compete successfully with the definite, persistent, ingenious methods of financial appeal which are now resorted to by the legion of causes whose advocates make their appeal ever more effectively by letter and personal call. The weakness of the annual collection consists in its infrequency, its indefiniteness and its unexpectedness. A man who is appealed to only once a year cannot be made to believe that the cause is as important as one whose claims are repeatedly urged. The very all-embracing indefiniteness which marks the two minutes' appeal from the pulpit on the day of the annual offering has no chance whatever in competition with the earnest, direct, persistent appeal of the financial representative of an educational or philanthropic institution. Moreover, the annual offering is in very many cases entirely unexpected and therefore unprepared for. Even if it was announced the preceding Sabbath the announcement was only one of a half-dozen or more reminders and notices and was probably not carried with the hearer through the church door; so the collection basket found him unprepared the following Sunday and he was obliged to choose between the stray piece of silver or copper on the one hand or the smallest bill in his pocketbook on the other, which happened on that occasion to be $5.00, and his decision had to be made as the collection basket made its way from the front of the church to his pew. A man thus hedged in will settle with the Board upon the silver or copper basis.
ninetynine times out of a hundred, whereas if he had given a fair opportunity, such as is given men every day in business and other philanthropies to make a pledge to be discharged in installments, or even in one payment six months or a year, the pledges would exceed the $5,000, and probably much more. The time fails to fully discuss this method in an encyclopedia article; it is sufficient that it be judged by its fruits, that is, by the depleted treasuries of the churches and the failure of the Church after a hundred years of modern missions to contribute more than one-tenth of the way around the population of the non-Christian world.

III. The Successful System: It is that which is elastic enough to adapt itself to the great variety of people who compose the membership of any single congregation. Such a system must take account of those who meet their benevolent financial obligations upon the same principles which daily characterize their commercial dealings, who do not hesitate to "promise to pay;" who will, in other words, make a pledge. It must also adapt itself to those who wish to meet their pledges in installments semi-annually, quarterly, monthly or even weekly. It must also recognize those who will not at the outset consent to be troubled with installment payments, but who insist upon paying their pledges in one lump sum at some subsequent time. It must also reckon with those who "will not make a pledge from principle" (notwithstanding they do it daily in business), or will not make a pledge because they are ashamed to put down in black and white the small sum they intend to contribute and therefore insist on making a cash contribution. Moreover, the system must have regard for all the various lines of beneficence which run out from the church and it must not push one cause to the detriment of others. Furthermore, it must satisfy those who prefer to apportion their own contributions, and also those who magnify the policy of supporting specific persons or objects on the home and foreign mission fields; also those who know so little or care so little about the missionary enterprise in detail that they prefer for this or another reason to have a committee apportion their gifts. In a word, the system must be as many sided as possible. Such a system as the above is in successful operation in a well-known suburban church, and it is worth remarking in describing the system that it has increased the city, home and foreign mission contributions of the church over tenfold. The method is as follows:

1. The Church Committee decides to raise a definite minimum amount during the year, say $10,000.
2. On the first Sunday in December the pastor announces the budget recommended by the Committee and urges the people to give universally, weekly and proportionately. He urges the necessity of some large gifts like $20, or $10 or $5 a week. This is Scriptural, see I. Cor. xvi., 1-2.
3. Pledges are made in the hands of the people immediately and all are asked to make definite pledges to be paid in weekly installments through the year. Fully three-quarters of the people are now using the pledge card.
4. Envelopes are placed in the people's hands and returned every Sunday with the contributions.
5. The Church Committee recommends a system of apportionment to those who prefer not to make their own apportionment, but concedes to each person this privilege.

(6) Every month a special free-will offering is taken over and above the foregoing contributions. A special envelope handmandesumedly distributed is given out on Sunday with the object printed thereon. These monthly collections are devoted to the various church boards and a few other important causes. In this way the person who will not make a pledge but will make an annual contribution has his opportunity. Moreover, many people who have made pledges, who, because of increased prosperity or other reasons, wish to make a special thank offering have the opportunity to do so.

(7) Once a year a specific foreign missionary appeal is made for the support of the church's missionary in the Philippines. The appeal is made the Sunday before the offering and special envelopes are furnished for use on the following Sunday. This offering constitutes the third opportunity given the church to contribute to foreign missions, inasmuch as one of the monthly offerings is made to that cause; the balance of the Sundays it is added to the fund composed of the weekly installment contributions.

(8) Considerable loose cash is contributed every Sunday. On the annual missionary day this is applied to the church's missionary; on free-will offering day, once a month, it is devoted to that cause; the balance of the Sundays it is added to the fund composed of the weekly installment contributions.

(9) A collection is never taken for a special cause the day the appeal is made, but on the following Sunday. While an immediate collection may enlist more from those who are easily stirred by an appeal, experience has shown that those who give after reflection and prayer more than offset what is lost from the former class.

Would not the universal adoption of this system fill the mission treasuries, fill our fields with missionaries and overfill our church members with the blessing of giving, which is more blessed than that of receiving?

IV. The Support of Specific Objects: More than fifty years ago President Wayland warned the churches against a peril which to-day assails the foreign mission enterprise, when he declared "the tendency will be more and more for churches to turn over their missionary obligations to societies, for societies to turn it over to boards, for boards to turn it over to executive committees, and executive committees to secretaries, so that in the last result the chief responsibility for the great work will rest on the shoulders of a dozen men." The late Rev. Dr. A. J. Gordon, one of the foremost missionary pastors of his generation, corroborated the opinion of President Wayland when he said: "The greatest problem that confronts us for the opening century is that of distributing the missionary responsibility which has become congested in official centers." That this peril and problem are actually upon us no one will deny who is engaged in trying to rally the churches and their individual members for the discharge of their obligation to the missionary cause.

The discovery of a method which will create a spirit of individual obligation for the success of missions will constitute the capital event in the final era of world evangelization. There is ground for this claim, inasmuch as the development of this spirit is the solution of the great problem, and it is

The method is simply this: That every church which is able to do so extend its parish boundary
so as to embrace a definite section of some mission field and support a missionary there who shall sustain to the home pastor the relation of associate or co-pastor; in other words, let the church have its foreign mission and sustain its foreign missionary, just as many churches have their own city mission and sustain their own city missionary. This method has been a distinguishing feature in the splendid work which the women of several leading denominations are doing. Every one of the nearly 200 unmarried women on the field has its own city is supported by funds specifically pledged. The same is true of practically every woman, both single and married, connected with the mission fields of the Presbyterian Church of the United States.

This policy has been adopted by several of the leading missionary societies in Great Britain, the Dominion of Canada, and the United States. This method is one of the most notable features which characterize the marvelous advance movement which the Church Missionary Society made during the last decade of the 19th century. Fully four hundred missionaries were specifically provided for by churches, families, individuals, and societies in response to the appeal of that missionary.

The Board which follows closest upon the record of the Church Missionary Society is that of the Presbyterian Church of the United States, which has approximately 650 of its force of 800 missionaries supported by funds specifically contributed by churches, young people's societies, Sunday schools, women's auxiliaries, and individuals.

The Congregational Churches of the United States and Canada are supporting a larger proportion of ordained missionaries by specific funds than any other denomination. After testing the method for years in several representative churches the American Board unanimously recommended the adoption of the policy as a permanent educational and financial measure at its annual meeting in Grand Rapids, Mich., in 1898, and appointed a committee which it empowered to elect representatives to exploit the movement throughout the denomination. The reports of the committee have led the Board for four successive years to recommend the continuance of the policy. It is an interesting fact that not a single Congregational Church in which the representative has had an opportunity to present the method has failed to subscribe money sufficient for the salary of a missionary.

The third most notable illustration of this policy is furnished by the Missionary Committee of the Southern Presbyterian Church, under whose direction over 75 salaries were provided by specific churches within a year, and over 100 other churches made pledges for the support of specific phases of work in the different foreign missionary fields occupied by the denomination. The Missionary Society of the Canadian Methodist Church has also endorsed the policy and commended its Young People's Movement, whose work has largely consisted in enlisting young people's societies in the support of missionaries.

Among other notable endorsements of the policy may be mentioned that of the American Baptist Missionary Union, as well as the action of certain congregations of the Church of the Disciples, the United Brethren, etc.

Experience has fully shown that the churches which have adopted or are adopting the policy on the foreign fields are better informed than the average church concerning the work of missions, this information being secured from correspondence and also by the home visits of the missionary.

It is perfectly obvious that this policy enables a church in assuming and maintaining a specific obligation. Long experience and extended inquiry have failed to discover a better method of persuading a church which is giving $100 or $200 a year, and is well able to give $800 or $1,000, to give the large sum and renew it annually.

The financial significance of this policy is forcibly set forth in the last report of the Forward Movement Committee of the American Board. In the report a comparison is made between the increased contributions of the 144 churches which the committee had enlisted in assuming the salaries of missionaries or the expenses of other special objects on the one hand, and the increased contributions of all the balance of the contributing churches in the denomination on the other. This comparison shows that the Forward Movement churches contributed in 1902 $32,958 more than in 1898, the year before the appeal of the Board, whereas the balance of the churches, about 3,400 in number, only contributed $24,372 more in 1902 than in 1898. In other words, the Forward Movement churches, which constitute one-twenty-fourth of all the contributing churches, made an increase of over $7,000 above the increase of the remaining twenty-three-twenty-fourths of the churches; the average increase of the 144 Forward Movement churches was $229, whereas the average increase of the balance of the contributing churches was only $8, or one-twenty-seventh of the average increase of the former. This exhibit is considered a final argument in favor of contributions for specific objects. In the light of this report the question may well be raised whether or not every church should not constitute itself a mission station and support its own outstation.

SURAT: A town in Gujarat, Bombay, India, situated on the Tapti River, about 15 miles from its mouth. In the center, facing the river, is an old castle (1540), now serving as a public office building. An ancient moat encloses the city on the land side. Among its interesting features are old Parsi temples and the tombs of the earliest and most celebrated settlers. In 17th and 18th centuries Surat was of more commercial importance than Bombay. Its population in 1797 was 800,000, but it had fallen to 80,000 in 1847. The city has revived again; it received its stimulus to growth from the American Civil War of 1861, and it now (1901) has a population of 119,306, of whom about 80,500 are Hindus, 21,000 Muslims and 5,000 Jains. The climate is hot, malarious, and unhealthful. Station of the PCI (1846), with (1903) 1 missionary and his wife, 3 women missionaries, 29 native workers, 200 members, 21 Sunday schools, 1 printing house, 15 day schools, 3 orphanages, and 56 communicant Christians.

SURINAM: A name sometimes applied to Dutch Guiana, S. America.

SUSA: A town in Tunis, North Africa, situated on the E. coast about 23 miles E. by N. of the sacred city of Kairwan. Station of the North Africa Mission (1896), with (1900) 2 mission-
aries and their wives, 4 women missionaries, 1 native worker, 1 outpost station, 1 place of worship, 1 dispensary.

SUSAKI: A town in Japan, situated on Tosa Bay, on the S. side of Shikoku Island, about 20 miles S. W. of Kochi. Station of the PS (1898), with (1900) 1 missionary and his wife.

SUSU LANGUAGE: The Susu is spoken by some of the negroes living near the coast of French Guinea in West Africa. It belongs to the negro group of African languages and has been reduced to use of Roman letters.

SUTO LANGUAGE: This language, also called Lesuto, belongs to the Bantu family of African languages. It is the language of the Basuto tribes. It is spoken in Basutoland, South Africa, and is also found in adjacent regions in the Transvaal and Orange River Colonies and among some of the tribes northward toward the Zambesi. It has been reduced to writing with use of Roman letters.

SU-TSIE-HSIEH: A town in the province of Kiang-su, situated on the Grand Canal, about 40 miles N. W. of Hswai-ngan-fu. Station of the PS (1894), with (1900) 2 missionaries and their wives and 1 woman missionary. Some write the name Su-chien.

SUTTON, Amos: Born at Sevenoaks, Kent, England, 1798. Died August 17, 1854, at Cuttack, Orissa. Having studied theology with Rev. J. G. Pike, he was ordained at Derby, and sailed in 1824 for Orissa, India, as a missionary of the General Baptist Missionary Society. He was stationed most of the time at Cuttack. He preached in Uriye and in English, taught in the mission academy, and was superintendent of the orphan asylums. He translated the whole Bible into Uriye, and made a second revision of the New Testament. He visited England and America. He returned to his mission from America in 1835, in company with Rev. Dr. Phillips, who was sent to the same field by the American Free Baptist Missionary Society. Dr. Sutton, besides translating the Scriptures, published a Uriye grammar, grammar and lesson book, wrote three volumes of tracts in that language, and translated many English books for his scholars and converts.

SUVA: A town in the Fiji Islands, Polynesia, situated on the S. coast of Viti Levu Island, of which it is the capital. European population, 1,073; native population uncertain. Station of the SPG (1880), with 1 missionary and a chaplain. Also station of the Seventh Day Adventists (1895), with (1900) 2 missionaries and their wives, 1 woman missionary, 2 native workers, 2 outstations, 1 place of worship, 1 printing house, 1 day school, and 23268. Also station of the Australian Wesleyan Missionary Society, with (1900) 1 woman missionary, 1 day school, and 1 Sunday school.

SWAHILI LANGUAGE: Among the people inhabiting the parts of East Africa adjoining Zanzibar, where the Arab influence has been very strong, and extending northward to Somaliland, a mixed language has been developed, called the Swahili or coastal language. It belongs to the Bantu family and has a wide range westward from the coast toward Equatorial Africa. At the same time it has adopted a large number of Arabic words and forms because it has served as a means by which Arabs of the coast and negro tribesmen from the interior could understand each other. It is written with Arabic letters, but missionaries have now succeeded in introducing the Roman letters for the purpose.

QUITE a beginning of Christian literature exists in Swahili.

SWAN, William: Born June 21, 1791, at Baldwin, New Brunswick. Died January 1, 1866. Studied at the Theological Academy of Glasgow; sailed July 1, 1815, for Siberia as a missionary of the LMS. His first work was among the Basut Tatars found on the frontiers of Siberia and Chinese Tartary, east of Lake Baikal. For eight years he itinerated with Mr. Stallybrass in the Selunginsk region, but in 1826 made his permanent home at Onon. During these years he, in conjunction with Mr. Stallybrass, completed the Mongolian version of the Scriptures. For the printing of this version Mr. Swan succeeded, by personal entreaty, in obtaining permission from the Russian Government. After twenty-two years of arduous service in the inhospitable wastes of Transbaikalia Mr. Swan and his companion were summarily informed one day in 1840 that their mission was suppressed by order of the Czar. Mr. Swan therefore returned to Scotland in 1841, and shortly afterward withdrew from the service of the Society.

SWAROK: A town in Java, situated 130 miles S. E. of Surabang. Station of the Netherlands Missionary Society (1869), with 1 missionary and his wife, 4 native workers, 6 outstations, 1 place of worship, 5 day schools, and 2,093 professing Christians, of whom 169 are communicants.

SWATOW (Shan-tau): A seaport town of Kwang-tung province, China, situated on the left bank of the Han River, about 5 miles from the sea. Its houses are mostly built of concrete, which has been rammed between molding boards, the boards being afterward taken away. It is a treaty port and has some foreign trade. The climate is healthful. Population about 30,000. Station of the ABMU (1843), with 13 missionaries, men and women; 62 native workers, men and women; 58 outstations, 32 places of worship, 11 day schools, 2 boarding schools, 1 theological school, and 2,050 professing Christians, of whom 128 are communicants. Station also of the Hanghai mission of the Church of Scotland, with (1903) 17 missionaries, men and women; 73 native workers, men and women (in district); 51 day schools, 2 boarding schools, 1 woman's training class, 1 theological class, 1 medical class, 1 printing house, 2 dispensaries, 2 hospitals, and 3,466 professing Christians, of whom 2,250 are communicants.

SWEDISH MISSIONS: The first missionary work undertaken by Protestant Sweden was among the Lapps, or Finns, who in scattered nomadic tribes occupy the whole northern part of the country. That mission has on its records but missionaries, as for instance that of Peer Forsström (1667-1764), which are still remembered with gratitude; but unorganized and unsystematized as it was, all its exertions and sacrifices were of no avail for a thorough success.

In 1650 a Swedish colony, "Ny Swearkie," afterward called "New Sweden"—now Pennsylvania, was founded on the Delaware in North America, and the Swede Campanius, who in 1642 began to preach to the Delaware Indians and compiled a dictionary of their language, was the first Protestant missionary to enter the new world.
The colony was afterward transferred to Holland, then to England, and finally to William Penn; but up to 1831 it continued to be served by Swedish pastors.

Meanwhile the powerful impulse which Protestant missions received from England in the beginning of the 18th century, also felt in Sweden. In 1818 a mission paper was established, and in 1829 the first small mission society was founded at Göteborg. It was followed in 1835 by the Swedish Mission Society, and in 1845 by the Mission Society of Lund. In 1848 the latter was absorbed by the former, which in 1876 the Swedish Mission Society united with the Swedish Church Mission (founded in 1874), tho it was not wholly absorbed by it. Two other large societies were organized—the Evangelical National Institution in 1856 and the Swedish Mission Union in 1875. Besides these four great associations, quite a number of minor ones, still in their infancy, have sprung up.

I. The Swedish Mission Society (Svenska Missionsälskapet): Headquarters, Stockholm, Sweden. Very soon after its foundation, January 6, 1818, was established, it was able to send out its first missionary to the Finns, Carl Ludwig Tellström, a painter, whose cordial interest in the people was aroused by his summer visits to their camps. Next year he was joined by two other young men, and they visited the tents, preached, and gave some general instruction.

A young Finnish girl, Marie Magdalene Made-daughter, through the preaching of the missionaries, had come to see and understand the misery in which her race lived. She learned Swedish that she might be able to speak to the king, and in 1844 walked two hundred miles to Stockholm. She picked out in the street the first lady who to her eyes seemed to look trustworthy, and in a short conversation she made that lady her patroness. Next day she had an audience with the king, and after talking with a number of influential men during a stay of a few days, she walked back to her native place with money enough to build a house or an asylum, or, as it is called, a "Children's Home," to which she could invite the children of her race to come and stay for some time and be instructed in that which is necessary, and also in something of that which is useful. It was provided her "Home" with teachers, and so successfully did the plan work that it has now a number of such institutions among the Finns.

A considerable portion of its annual revenue the Society draws from the so-called Five-cents Circles. It also has invested funds to the amount of about 150,000 kroner. Its missions to the Finns it directs independently, and since its union with the Swedish Church Mission in 1876 pays the surplus to that Society, and partakes proportionally in the direction of its mission to the heathen.

II. The Evangelical National Society (Den Evangeliska Fosterlandstiftelsen): Headquarters, Stockholm, Sweden. The Evangelical National Institution was founded in 1856 by Pastor H. J. Landborg, as a consequence of a revival within the Swedish Church, produced by the lay preacher Rosenius. Propositions of union were made to it in 1875 by the Swedish Church Mission, but declined. It preferred to make itself the organ of all such free and spontaneous mission movements as may arise among the Swedish people. It consists of a great number of minor societies, generally called "Ansgar Societies," or "Evangelical Lutheran Societies," having a common head in their annual conference, which assembles in Stockholm.

In 1863 it established a missionary seminary at Johannelund, on Lake Målar, a little outside of Stockholm. This is staffed by laymen, and Bishop Gabot, but the great sacrifices and enormous exertions it has cost do not seem to have brought proportional results. The difficulties do not arise from the character of the people, for the Galls have on many occasions shown some sympathy for Christianity, but from difficulty of access.

Fetman, who the Arentsch of Upsala, the door is closed. To the east, and along the coast, live the Somalis, and they and the Galls are instinctively enemies. Notwithstanding these obstacles there were reported in 1900, 32 missionaries, 28 native workers, 7 stations, 5 outstations, 206 communicants, 502 adherents, 14 schools, 305 pupils, 1 physician and 1 hospital. The mission to the Gongs, begun in 1877, on the advice of Dr. Kalkar, in the Central Provinces of India, reported (1900) 36 missionaries, 37 native workers, 5 stations, 9 outstations, 753 communicants, 826 adherents, 9 schools, 500 pupils, 1 higher school and considerable medical work.

III. The Swedish Church Mission (Svenska Kyrkans Mission): Headquarters, Stockholm, Sweden. In 1886 the General Assembly of the Swedish Church (Kyrkans) laid before the king a petition that the whole missionary activity should be organized by law as a function of the Church, the state institution; and September 11, 1874, the king authorized the establishment of the Swedish Church Mission, under a board of seven donors. Fetman, who the Arrentsch of Upsala as its permanent president. Negotiations for a union with the other mission societies already existing did not succeed, but the Church Mission, nevertheless, immediately began work. It draws its revenue from a general collection taken up on a certain day in all Swedish churches, and maintains a mission among the Zulus in Africa, and a mission among the Tamils in India.

The Zulu Mission was begun in 1876, on the advice of Bishop Schreuder, who had long wished to see the whole energy of all Swedish missionary mission societies united into one common effort, made possible by the close relation between the languages and the fundamental unity of the confessions. An estate, "Torne's Drift," was bought in Natal, just on the boundary of Zululand, and the Mission had in 1900 25 missionaries, 28 native workers, 5 stations, 34 outstations, 631 communicants, 19 schools, 281 pupils, and 1 hospital.

The Tamil Mission, also begun in 1876, in close connection with the Leipzig Mission, in Tranquebar, was located at Madura, and was intended only for the Tamil Mission.

IV. The Swedish Mission Union (Svenska Missionsföreningen): Headquarters, Christinehamn, Sweden. The Swedish Mission Union was formed August 2, 1878, in Stockholm, as the representative of the Waldenström's action, which separated from the Evangelical National Society because the latter chung rigorously to the Augsburg
Switzerland

Confession. The Union consists of over 900 minor associations and is managed by a committee of seven, which has its seat in Stockholm and is elected by the annual assembly of delegates from the associations.

The Union maintains a mission school at Christiansted, the headquarters of the Lapps (in Alaska, Canada, and the Arctic regions). The latter mission, however, has principally the character of revival work, with a staff on the south-eastern frontier of the main missionary work. The Lapp Mission was started in 1881 and labored for some time in connection with the Livingstone (see Regions Beyond Missionary Union) Inland Mission. There were reported (1900) 40 missionaries, 62 native workers, 1,573 communicants, 8 stations, 62 outstations, 101 schools, 3,606 pupils, 7 dispensaries, and 20,000 patients. These figures seem to include the work in Lapps among the Jews, which, however, is not large.

Similar in character to this last movement are a number of minor societies, most of them affiliated with the China Inland and Christian Alliance Missions. These include the Swedish Mission in China, the "Swedish Mission in Borneo," founded in 1867 by E. Folke, The Holiness Union (Holgelser-Förbundet), founded in 1890 by a mill owner in Nerike, and which sends missionaries to China and South Africa; a Scandinavian Alliance Mission, on the same lines as the Christian Alliance, which has sent out a number of untrained workers to China, Japan, the Himalayas, and Swaziland, but with little evident result. There are also the Jönköping Society for Home and Foreign Missions, which aids other societies; Friends of the Lapps Mission; the Female Missionary Workers (Kvinnliga Missions Arbetet), organized in 1894, which absorbed a Swedish Woman's North Africa Mission, and is practically the foreign department of the Swedish YWCA. It carries on work, particularly for children, in a great variety of fields, including Lapland, the Caucasus, China, Chukchi, Mongolia, North Africa, the Congo, and France.

Switzerland (French); Mission of the Free Churches of: (Mission des Églises Libres de la Suisse Romande)

In the year 1874, the Synod of the Free Evangelical Churches of the Swiss Canton of Vaud (Presbyterian) resolved to create a mission of its own among the heathen, and accordingly two young missionaries, Messrs. Ernest Creux and Paul Berthoud, were sent to South Africa. They remained for some time with the missionaries of the Paris Evangelical Missionary Society in Basutoland, and in 1875 chose a mission field for themselves in the northern part of the Transvaal Republic, among the Tonga negroes. The work has extended to the Ronga tribes living to the east of the Transvaal, on the Limpopo River, and on the coast of Delagoa Bay. The New Testament and portions of the Old have been translated into the Tonga and Ronga languages, and the work at all the stations has been very successful.

For nine years this mission was under the care of the Free Church in the Canton of Vaud; in 1883 the Free Churches of Neuchâtel and Geneva (both Presbyterian) formed a federation with the Free Church of the Canton of Vaud, and the mission has since been under their joint direction.

The report (1902) shows 53 missionaries, 50 native workers, 9 stations, 30 outstations, 938 communicants, 46 schools, with 1,004 pupils.

Syhét: A town and capital of a district in Assam, India, situated about 62 miles W. of Silchar. It is the terminus of the railway to Cherrapunji, in the hill country. Station of the Welsh Calvinistic Methodists, with (1903) 2 missionaries and their wives, 2 women missionaries, 8 native workers, 6 outstations, 5 places of worship, 3 Sunday schools, 4 day schools, and 43 professed Christians.

Syn-yin: A mission station of the Berlin Missionary Society in Kwang-tung, China, about 140 miles N. E. of Canton (1892), with (1903) 1 missionary, 18 native workers, 9 outstations, 1 day school, and 493 professed Christians, of whom 452 are communicants.

Syria: The geographical term "Syria" seems to have originated with the early Greek traders, who designated by it the land whose chief commercial city was Tsur, Sur, or Tyre. When the Phœnician colonists from the land of accursed Damascus Dimishk esh-Sham, and named the provinces of which they made it the capital Bar esh-Sham. The Christian inhabitants of the land still call it "Suria." The term "Palestine" comes from Peleseth (7679—"land of wanderers"), and refers probably to the nomadic tendencies of the early inhabitants. No form of the word "Palestine" (Philistia, Palestina, etc.) is at present in common use in the country. The term is historical rather than political, and defines that part of Syria which stretches from Dan (near Mount Hermon) to Beersheba, and from the Mediterranean to the Syrian desert.

Geography: Syria in its widest extent, not now locally recognized, however, extends about 400 miles from the Taurus mountains on the north (latitude 37°) to Egypt (latitude 28°), and from the Mediterranean to the Syrian desert, an average width of less than 600 miles, or about 70,000 square miles. It is nearly conterminous with the "Promised Land" and the kingdom of David. It is about the size of New England, Palestine east and west of the Jordan being of the size of Vermont and New Hampshire, and very similarly situated. Mountains on the north, the sea on the west, and desserts south and east give the land a somewhat remarkable geographical unity. The mountain ranges and river basins run parallel with the coast, rendering access easy from north to south. The Taurus Mountains send a spur off to the south not far from the coast. This is broken by the deep gorge of the Orontes (El-'Asi) River. The range takes a new start in the beautiful peak of Mount Casius, near Antioch, and stretches down along the coast, receiving various names at different points. Between Antioch and Tripoli it is called the "Cilician" range, which terminates in Jebel el Hush. A low saddle in the hills comes next, and then the Lebanon range springs suddenly up to the height of over 10,000 feet; and twenty miles across the plain to the east the almost equally massive Anti-Lebanon starts off to follow its undue down the coast for a hundred miles. Lebanon gradually
tapers down from 10,000 feet to 8,000, to 5,000, to 2,000, until it drops into the hills of Galilee, and reaches almost sea-level in the Esdraelon plain. Anti-Lebanon holds its own for over half its length, then drops; but a precipitous northern slope, issuing from Mount Hermon (Jebel esh Shaykh) 10,000 feet into the air. Between these two magnificent ranges runs the fertile valley of Caeso-Syria (El Bukan), from ten to twenty miles in breadth and averaging over 2,000 feet above sea-level. The Orontes drains the northern part of the Bukan, while the Litany (rising not far from the sources of the Orontes) flows southward and breaks through to the sea in the latitude of Mount Hermon. At the foot of this mountain rises the Jordan ("the descender"). This strange stream is delayed in its course by a great marsh called El Halh (Lake of Merom) at about sea-level. Breaking away from this it tumbles down in a few miles over 600 feet below sea-level into the sea of Galilee (Bahr Tabaryeh). After lingering for 10 miles at this level it next plunges down 667 feet in a gorge (the Jordan Gorge) of 66 miles, but winds about 200 miles until it throws its muddy waters into the Dead Sea (Bahr Lut), 1,300 feet below the Mediterranean. To this phenomenal sea (46 miles long and 5 to 15 miles broad) there seems to be no outlet. Alto there is a geological depression from its southern end to the Akabah Gulf of the Red Sea, and alto there are indications that its waters were once on a higher level, the Dead or Salt Sea could not have been connected with the ocean, because there is a rise of ground of 751 feet above sea-level in its valley.

West of the Jordan and south of the Esdraelon valley the hills of Ephraim slowly rise, forming the great backbone of Palestine. A sharp spur is thrown off to the northwest, which ends in the rocky headland of Mount Carmel. But to the south the trend is continually upward past Samaria, Nablous, Shiloh, Bethel, Jerusalem, Bethlehem, until Hebron is reached. Thence the hill-country of Juda falls away into the Sinaitic desert. Deep wadies run off gradually to the Mediterranean, but to the east sharp gorges plunge perpendicularly down into the plain of Jordan valley a thousand or so feet below sea-level.

South of Mount Hermon and to the east of the Jordan, Anti-Lebanon gives place to a moderately high mountain wall, for the most part precipitous on its western side, but sloping away into the Hauran or "plain of Moab". The course of the Jordan valley is through the mountains of Moab and are continued southward to the Arabian border. The Hauran has indications of volcanic action, and has a number of interesting mountain peaks. A few oases in the desert, such as Tabor (Palmyra), belong geographically to Syria.

Population: The population of Syria is in the neighborhood of 2,000,000, and may be roughly divided as follows:

<table>
<thead>
<tr>
<th>Population</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mohammadans</td>
<td>1,000,000</td>
</tr>
<tr>
<td>Druze</td>
<td>290,000</td>
</tr>
<tr>
<td>Maronites</td>
<td>250,000</td>
</tr>
<tr>
<td>Orthodox Greeks</td>
<td>235,000</td>
</tr>
<tr>
<td>Papal Sects</td>
<td>80,000</td>
</tr>
<tr>
<td>Armenians</td>
<td>40,000</td>
</tr>
<tr>
<td>Jewish</td>
<td>30,000</td>
</tr>
<tr>
<td>Ismailiyeh, Gypsies, etc</td>
<td>15,000</td>
</tr>
<tr>
<td>Druze</td>
<td>15,000</td>
</tr>
<tr>

</table>

The larger cities are Damascus (200,000), Aleppo (120,000), Beirut (100,000), Jerusalem (35,000), Tripoli (with its port, 25,000), Homs (20,000), Hamath (20,000), Zahleh (15,000), Nablous (13,000), Sidon (10,000), Homs (10,000), and Antioch (6,000). The western slopes of Mount Lebanon are the most densely populated parts of the country outside of cities.

Race: From the earliest times there has been a notable variety of races in Syria, yet all along the Semitic type has prevaled. It is a race remarkable. Flood-tides of Egyptians, Greeks, Romans, Kurds, Armenians, Persians, Teutons and Mongols have swept the country repeatedly, only to be as repeatedly driven out. The bad blood of many nations has soaked into the soil, and reappears in the face of race, chaliness, and origin. The race type, the modified, has absorbed the remnant of many nationalities so effectively that there is a typical Syrian resultant, which differs widely from the surrounding peoples. With the exception of the Bedouin Arab of the southeast, the Kurd of the northeast, the Turkish of the west, the Armenian merchants, and the so-called Franks, or foreign residents, the Syrian type is universal, modified, it is true, by hereditary religious customs and convictions, but holding its own through the centuries. It is characterized by a certain calculating shrewdness covered with an exterior of extreme politeness. The race is a matter of sharp haggling over prices. The typical Syrian is proud, ambitious, loves display of ornament, cannot be trusted to obey the letter, has a tenacity of action on the basis of slight information, quickly learns to feed in the face of race, and is thoroughly immersed in a gross materialism. A millennium of Muslim dominion and centuries of Turkish oppression have accentuated these faults. But wherever an opportunity has been given, a native force of character has come to the surface, and that is the characteristic. The mountains of Lebanon have been terraced thousands of feet above sea-level, and a restless desire to better their condition has sent whole colonies of Syrians across the oceans to Australia, South America and to the United States. Common school and higher education is having a marked effect upon the country, but the seeds of disunion and mutual hatred were planted too long ago to be materially affected during the short period, comparatively, in which Western Christian influences have been brought to bear on Syria.

Languages: With the Arabs in the 7th century came the Arabic tongue, which immediately became the language of trade. It was thus inevitable that it should become universal in the land. The older Syriac, a closely-allied Semitic dialect, slowly succumbed, leaving behind broad marks of influence in the colloquial Arabic, so that a man's speech betray the locality from which he comes. In the extreme north of Syria, in the region of Aleppo, the Turkish language begins to be heard among the common people, and Arabic is not generally used north of that city. The official language for government is Modern Turkish, while everywhere Muslims of all nationalities use Arabic as their language of worship. Syriac remains the liturgical language of the
Maronites and the Jacobites. North of Damascus there are several villages in which Syriac is still the vernacular. Hebrew is heard frequently in Jerusalem. Linguistically, then, Syria is a unit somewhat resembling, in a manner, the Ephraites region, Arabia, and Egypt.

Commerce: The centers of commerce in Syria are Damascus (which means "seat of trade"), Aleppo, Alexandria, Tripoli, Beirut, Haifa, Nablous, and Jaffa. Home, Hamath, and Jerusalem might also be mentioned. Hence the Hauran is the granary of the country. Olives, figs, licorice, oranges, grapes, and apricots are important crops. Maize, tobacco, and white potatoes are freely raised—America's gift to Syria. Soap from olive oil is made in quantities at Haifa and elsewhere. The silk-worm is busy all over. Mt. Lebanon and the villages on the eastern slopes are alive with domestic weaving establishments. Bethlehem is the seat of work in olive-wood and pearl utensils (souvenirs). Jerusalem is now, as it always has been, a caravansary for pilgrims from every clime.

Political Divisions: Syria (in its widest extent) is divided by the Turkish government into three vilayets—Adana, Aleppo, Syria (proper; called in Turkish Surije), and two mutассарифліks or districts—Jerusalem and the Lebanon. Since 1860 the Lebanon region has been under the protection of foreign powers and is governed by a Christian mutassarif under special foreign oversight. The center of political danger to the Turk in Syria is in the Hauran district, where the Bedouin Arabs, settled and nomadic, have never consented to do military service in the Turkish army and are exceedingly jealous of official interference. However, the telegraphic service has been extended everywhere, even to these remote districts, and Turkish soldiers have easily put down incipient revolts. The Porte has ruled Syria by skillfully playing off one religious sect against another, so that there is not the remotest danger of Nusairiyeh and Maronite and Druze striking hands. French influence since 1860 has been pervasive in the land. Trade has been opened, schools have been fostered, and religion has been subordinated to the needs of the French officials in the land with a care that betokens a desire at some time to control the country. Russia is jealous of this French propaganda, and under Muscovite auspices Jerusalem is being surrounded by towers, churches and hospices, and at present Russian schools are being founded in all the coast cities. The Turkish method of governing Christian sects is to use the church organization in administering them. Each sect commits its affairs into the hands of the head man of the body, who intermediates between the people and the Turkish officials. Woe to a man who falls out with his church! In effect he becomes an outlaw. Hence, when the missionaries entered the country in 1821, hoping to regenerate the decayed Christian Churches, they were compelled to start a Protestant Community so that those who accepted evangelical truth could have the protection of the law, such as it was. For when a Maronite was led to accept the Gospel statement of redemption through Christ alone he was not allowed to remain in that communion. He was driven forth. His neighbors might tax his property and maltreat him without let or hindrance.

Socially: The feudal system has not entirely disappeared from Syria, and princely families have until lately exercised great influence. The prince is patriarchal in his relations to his house, and thus many of the evils of the system are mitigated. But the mass of the people are plebeian. The uneasy equilibrium of social position as would be gathered from the preceding paragraph. The marriage of the secular clergy is almost universal among the Oriental Christian sects; and in the cases where these sects have been won over to the Roman Catholic faith this custom has, by imperial stipulation, been retained. The status of woman has been low.

History: Syria has been from time immemorial the battlefield of nations, and it will be impossible to give in this statement even a chronicle of the great events that have taken place within its boundaries. It and its people have had a mission to perform for the civilized world, second to the mission of no other land and people. The Phenician and the Hebrew stand for the two important elements in all civilization—commerce and religion. As history dawned, the Phenicians were the traders of the world, and had a strong rule along the coast. Innumerable warring tribes divided up the rest of the land among themselves. The Hebrews appeared as a nation in the 15th century B.C., and in the 11th century, under David, conquered the whole of the territory called Syria to-day, with the exception of Phenicia. After the division of the Hebrew kingdom (975 B.C.) the new power of Syria arose, with its capital at Damascus. In the 8th century (721 B.C.) Assyria conquered Northern Syria and overwhelmed the northern tribes. Later Jerusalem fell before the Babylonian power (583 B.C.) and Judah went into captivity. Persia absorbed Babylon, and, until the conquests of Alexander the Great (323 B.C.), controlled the land along the eastern Mediterranean. After the death of the great conqueror, Ptolemy and the Seleucids were rivals in Syria, the power of the latter from their capital of Antioch being finally successful. The Jews rose in rebellion against the attempt to Hellenize their nation, and the heroic era of the Maccabees resulted (168-37 B.C.). The Parthian emperors were much troubled in the east, and were obliged to add Syria to their growing empire. The country was ruled by native kings and Roman governors until it was thoroughly amalgamated in the Eastern or Byzantine empire. The grand duel between Byzantine and Persian (Sassanides) under the Emperor Heraclius weakened the Roman power, so that in the 7th century the armies of Islam made easy work in conquering the land. The Omneid dynasty from Damascus ruled the Muslim world from 661 to 750. Several centuries later, as the Abbassid dynasty was breaking up at Baghdad, Syria was a prey to factions. The Seljuk Turk appeared, reversing the mild treatment the Christians had received at the hands of the Saracens hitherto, and persecution, imprisonment, and butchery aroused the knighthood of Christian Europe to undertake the Crusades (1095-1291). After the failure of the Crusades, Syria was again the scene of Muslim misrule at the hands of the Mameluke sultans of Egypt, and of fiercer raiders from Tartary. Early in the 15th century Tamerlane carried his annihilation on the infidels as far as the Hebr ean. In 1517 the whole land was conquered by Selim I., the Ottoman Turk, and, with the exception of the brief time during which Ibrahim Pasha held
Syria (1832-1841), has been controlled successfully by the Porte.

The first Christian church was at Jerusalem, and at Antioch the name "Christian" arose. The Apostles and their followers carried the Gospel to every portion of Syria, and the faith took root everywhere. The scattering of the Jews and Histaeans was the greatest blow to the Roman dominion in 70 and 130, changed the type of Christianity in Syria materially, but the Faith advanced successfully and at the time of Constantine we find the land dotted with Christian churches.

Some of the greatest church fathers either were born or lived in Syria,—Ignatius, Justin Martyr, Eusebius, and Jerome,—missionary influences went out on every side, the Bedouin Arabs were reached, and Frumentius, a Syrian, was the apostle of the Abyssinians. Constantine and his mother, Helena, were drawn to the land made sacred by so many associations. Jerusalem became attractive to pilgrims. The ascetic spirit, so widespread in those days, took possession of this veneration for the sacred places.

Monasteries sprang up all over the land. Hermits swarmed among the wild gorges of Judea and Galilee, Chorizos, the Persian conqueror, swept over the country he slaughtered Christian monks by the thousands. Then came the Arab, who treated the Christians mildly. The Church of St. John in Damascus, it is true, was converted into a mosque; but Omar at Jerusalem left the Church of the Holy Sepulchre to the Christians, as well as the Church of the Nativity at Bethlehem. But Christianity dwindled. Islam attracted many Syrians into its ranks.

At the time of the Crusades the whole number of Christians in the land was probably not more than half a million. The Roman pontiff had long been desirous to win the Oriental churches, which for the most part refused to acknowledge the universal supremacy of the Pope. During the Crusades the Maronites threw in their lot with the Western Christians, and formed an alliance with the Church of Rome, which has grown closer every century.

Protestantism: Into this seething little world of fierce religious propaganda—Mohammedan, Oriental, and Papal—the new force of Protestantism came in the third decade of the sixteenth century. The Church rather than the state favored it than otherwise—considering it a new tool by which it could work confusion to its enemies. Rev. Pliny Fisk and Rev. Levi Parsons landed at Smyrna in 1819. In 1821 Mr. Parsons went to Jerusalem to make that the headquarters for the work in Syria. In 1823 Mr. Tyler and Dr. Jonas King summed on Mt. Lebanon, and later made Beirut the center for work. In the same year Rev. Wm. Goodell, Rev. Isaac Bird, and their wives landed at that city. Shortly after both Mr. Parsons and Mr. Fisk died, but the work moved on. In 1828 violent persecution (ending in the death of Asaad Esh Shidiak, "the martyr of Lebanon"), political and warlike agitations, the forcible closure of schools at Beirut, Tripoli, and elsewhere, led the missionaries to go to Malta and wait until the storm should blow over. In 1832 the returned and turned to their work with redoubled energy. A printing press was established at Malta, and later removed to Beirut by Rev. Eli Smith; tracts and books were published, a translation of the Bible undertaken, and the land was more fully explored for favorable stations. In 1843 it appeared that greater concentration would make the work more effective, and Jerusalem was handed over to the Church Missionary Society of England. As already stated, the missionaries were compelled to organize a separate church to give protection to their followers under Turkish laws. Ahebi, near Nazareth, was the first place of settlement. The translation of the Bible into Arabic (see Arabic Version) went on. The Syrian Protestant College was founded at Beirut in 1865, having been incorporated in 1863 by the Legislature of New York. A medical class was formed in 1867. In 1873 the present building, situated on Ras Beirut, were first occupied.

But before this, in 1870, when the Old and New School Presbyterians of the United States were united, the American Syrian Mission was handed over by the ABCFM to the PN, because up to this date the New School Presbyterians had contributed largely to the ABCFM. The missionaries found that the work would not be materially affected by the change. In fact, a new impetus came to the mission, and the progress since 1870 has been great, in twenty years more than twice the number of the mission, as well as the number of native adherents. The translation of the Bible was carried on to completion by Dr. Van Dyck after the death of Dr. Eli Smith. Stations are located at Beirut, in the Lebanon, Tripoli, and Sidon.

During these years a large number of native Syrian Protestants have arisen who have done a great work for their land. Among them, besides the martyr Asaad Esh Shidiak, may be mentioned Gregory Wortabed, Butrus Bistany, Dr. Meshakah of Damascus, and a large number of men who are to-day taking the places of these good and learned men whose names will never be forgotten.

The CMS commenced work in Palestine in 1851. It occupies the field from Acre to Hebron and Gaza from Mt. Hermon to Moab east of the Jordan. It has pushed forward under great discouragements, but has made steady progress. It has stations at Jerusalem, Nablous, Jaffa, Gaza, Ramleh, Nazareth, Haifa, Es Salt, etc. It has a number of successful schools. In 1899 education among women received the special attention of the CMS, and medical missions have been fostered.

The London Jews' Society has missions at Jerusalem, Jaffa, Damascus, Aleppo and other places. The Established Church of Scotland has a mission to the Jews at Beirut. At Tiberias there is another Scotch mission to the Jews.

The Irish Presbyterian Mission in Damascus was founded in 1843. The United Presbyterian Church of the United States was interested in this work for many years, but has of late concentrated its mission endeavors in Egypt. The press at Beirut, under Presbyterian management, is of great importance in the Arabic-speaking world, as may be inferred from the following report: The number of pages printed during the year 1900 was 24,882,680, making the total since the beginning, 60,079,507. Of these pages, 17,884,000 were Arabic Scriptures, and of these, 58,500 were bound; 8,193 copies were sold in Syria and 34,657 in Egypt. The entire number of books and tracts sold was 83,749, notwithstanding the fact that, owing to alterations and repairs, the presses were idle for more than two months. The total number of
The British Syrian schools and Bible Mission were established in 1860 by Mrs. Bowen Thompson. Since her death her sister, Mrs. Mott, has had charge of the work. It comprises about 37 schools and 37 Sunday schools, in which over 3,000 pupils are gathered. The principal schools are at Beirut, Damascus, Zahleh, Baalbec, Hasbeia, and Tyre. The Free Church of Scotland has a mission in the Meta district of Mt. Lebanon under the care of Rev. W. Carshaw, M.D. The Society of Friends in England has mission work at Brumana, on Mt. Lebanon, and the American Friends at Ramallah, northwest from Jerusalem. The German Evangelical missions include the German Deaconesses of Kaiserswirth, the Jerusalem Verein of Berlin, and the work of German chaplains in Beirut and Jerusalem. The Kaiserswirth Deaconesses came to Syria after the terrible Druze massacres in 1860, established orphanages in Jerusalem and Beirut, and soon became connected as nurses with the Johan- nes-von-Malabrunn Mission in the last-named city. The Jerusalem Verein has work in Jerusalem and also in Bethlehem. There are girls' schools at Bethle- hem, Nazareth, and Shimlun under the care of a society of English women. Miss Taylor's (Scotch) school at Beirut for Druze and Muslim girls is very successful. There are also a number of special societies or private enterprises. Bible work is carried on in Syria by the American Bible Society, with its headquarters at Beirut, whence it sends Arabic Scriptures over the whole world. Palestine is occupied by the British and Foreign Bible Society. The tract societies of America and England have given most substantial help to the mission in its effort to supply the whole Arab-reading world with Christian literature. The interesting item about all these numerous Protestant societies and work in Syria and Palestine is the fact that they are all working in substantial harmony. There is no more difficult mission field in the world. Jerusalem is the worst city in the world, not because of gross licentiousness, but because of spiritual pride; and the whole land is one romantic tragedy. Syria is at present in a most depressed state, agriculturally and commercially. The last fifty years have seen a leap ahead intellectually, and roads and the telegraph are binding the country together. In the end, the simple Gospel must prevail in the land that gave it birth, but many generations must come and go before Islam will yield, and before the stubborn oriental rites, as well as the papal votaries, will give up the meaningless and injurious human elements that have entered into their worship.

Syrian Language: It belongs to the Semitic family of languages. The ancient Syrian, as used in the Peshito and other ancient versions of the Bible, is at present a purely ecclesiastical and literary language, of great importance to the Biblical scholar. The modern Syrian, a much corrupted form of the ancient language, is the spoken tongue of the Chaldean, Nestorian, and Syrian Christians living in Turkey and Persia. It is written with Syrian letters, but is found in purely dialectical forms. A version of the Arabic Syrian has been printed with Syrian letters and is known as the Karshun version. It is intended for those Syrians who have lost their own language. The scattered condition of the Syriac-speaking peoples has led to the growth of dialects, some of which present marked peculiarities. Little was known of the modern Syrian among Western scholars until 1826, when versions of some books of the Bible were brought to Europe by Dr. Joseph Wolf.

When the American missionaries began their labors among the Syrian Christians in Urmia in 1834, no literature was known to exist in this language, and Dr. Perkins, with his colleagues, proceeded to reduce it to writing and to issue from the press religious and educational works. Later on a few manuscripts were discovered, dating a hundred years back, written in the Elkhosh dialect spoken in the vicinity of Mosul. These proved to be unscholarly paraphrases of the Gospels, or rude poetical renderings of Gospel history. They possess little interest save as throwing light on the development of the language. The whole number of people now using the modern Syrian is estimated at about 100,000.

Syrian Protestant College: This college, established at Beirut, Syria, in 1866, is one of a number of educational establishments in non-Christian lands which are the outgrowth of successful missionary effort. It is chartered under the laws of the State of New York, its corporate name in America being "The Trustees of the Syrian Protestant College." Morris K. Jesup of New York is president of the Board of Trustees. This Board owns the college buildings and the land on which they stand, consisting of about forty acres in the most prominent situation in the city of Beirut.

The work of the College commenced in the autumn of 1866, a preparatory class having been formed the previous year. A medical department was opened in 1867, a preparatory department in 1871, and a commercial in 1900. The number of students in 1896 was 16; in 1903 it was 60. The number of teachers in 1866 was 6; in 1903 it was 37. During the six years of its existence the college has had under its instruction 2,763 students; it has graduated 203 bachelors of art, 189 physicians, 87 pharmacists and 462 preparatory students. Many of these students graduated elsewhere, but remain loyal to their alma mater.

The College draws its students from all the Christian sects of the East, and not a few from the Druzes, the Jews, and the Muslims. The geographical area from which the 650 young men now in the College have come extends from the Black Sea to the Sudan and from Greece to Persia—region as large as the United States east of the Mississippi. The languages spoken by the students are Arabic, Turkish, Persian, Coptic, Hebrew, Yiddish, Armenian, Greek, English, German, and French. Their instructors are, in nationality, American, English, Arab, German, Russian, and French.

The College is Christian but non-sectarian. It educates young men from numerous denominations, and from the fields of a score of different missionary societies. There is a flourishing YMCA among the students which occupies itself with the culture of the student body, neighborhood teaching, and close study of the Bible.
This Association affords a ground on which members of liturgical and non-liturgical churches can meet and engage together in religious work. The graduates of the College, as well as students who have taken a partial course only, occupy positions of commanding influence as civil functionaries, merchants, missionaries, teachers, civil and military physicians, lawyers, judges, editors, and authors. A number of them are in the military and consular service of the United States Government.

The influence of such a body of men, educated according to American methods, on the progress and elevation of the East is obvious. The significance of this great college as an illustration of the existence and zeal of Protestant missions is also worthy of note. The fact that these missions seem to culminate in such institutions of admitted utility has stirred the Roman Catholic and Greek Churches to great activity. France, Italy, and Austria have poured in men and lavish money that they also may found churches and schools, printing presses and publishing houses, primarily, doubtless, for the benefit of those of their own communion, but also for the promotion of their national and ecclesiastical interests. Russia, has done the same in the interests of its politics and the religious advancement of the Orthodox Greek Church. All these efforts unite with those of Protestant missions in contributing effectively to the general advancement of a higher civilization.

The same fact as to the relation of the college to the general missionary movement from which it sprang is seen in the healthy stimulus which it becomes to all native communities. This is seen not only in the praiseworthy efforts of native Protestants in the support of the institutions of the Gospel and the educational work inseparable from these institutions. It can be noted in all the native Christian, and after a little while in the non-Christian sects, taking the form of a general rivalry in matters of humanitarian and educational enterprise. The existence of the college stimulates the increase of Protestant schools. The example of Protestant schools has caused the Greeks and the Maronites to found common schools and, subsequently, colleges. It has led the Jesuits to found the University of St. Joseph at Beirut, with preparatory, collegiate, commercial and medical departments. It has stirred the Turkish Government to establish and enlarge primary and higher schools for boys, culminating in the Rushidye and Idadlye Turkish Colleges of Beirut. But the most surprising result has been the general diffusion of female education. Each of the Christian sects has its complete series of girls' schools, with a collegiate institution at its head. And, most wonderful of all, this has led to the foundation of a society of Muslim men to promote female education and the establishment of schools for Muslim girls in the principal cities of Syria.

SYU-YIN. See SYN YIN.

T

TABASE: A village in Cape Colony, South Africa, situated on the Umtata River, 16 miles S. W. of Tsolo. Station of the Moravian Missions (1873), with (1903) 1 missionary and his wife, 7 native workers, 1 place of worship, 3 day schools, and 37 professed Christians.

TABRIZ: One of the oldest and most important cities of Persia, capital of the Province of Azerbaijan, situated in a valley 4,000 feet above the sea, about 360 miles W. N. W. of Teheran. A large commerce is carried on here, as it is the center of the trade between Persia, Russia and Turkey, and it is on the line of the Indo-European telegraph from London to Bombay. There are few noteworthy public buildings, the numerous mosques, baths and shops are found throughout the city, and one mosque is especially noted. The population is 180,000, chiefly Turks and Armenians, the true Persians being very few in number.

Station of the PN (1873), with (1903) 4 missionaries, three of them with their wives; 5 women missionaries, 7 native workers, 9 outstations, 2 places of worship, 1 day school, 2 boarding schools, 2 dispensaries, 1 hospital, and 65 professed Christians. Also station of the Swedish Mission Society, with 1 missionary, 1 woman missionary and 1 day school.

TA-CHIEN-LU. See TA-TSEHNI-LU.

TAHITI. See Society Islands.

T'AI-AN, or TAI-AN-FU. See TAI-NGAN-FU.

T'AI-CHAU-FU: A town in Che-kiang, China, situated about 70 miles S. S. W. of Ningpo. Station of the CIM (1867), with (1903) 2 missionaries, one of them with his wife; 13 native workers, 13 outstations, 14 places of worship, 1 boarding school, 1 hospital, and 504 professed Christians. Also station of the CMS (1892), with (1903) 3 missionaries and their wives, 33 native workers, 13 day schools, and 1,222 professed Christians, of whom 449 are communicants. Some write the name T'ai Chow.

T'AI CHOW. See TAI-CHAU-FU.

T'AI-HO-HSIEH: A town in Ngan-hwei, China, situated in the N. W. part of the province about 20 miles N. W. of Yeng-chau-fu. Station of the CIM (1892), with (1903) 2 missionaries and their wives, 5 native workers, 1 place of worship, 1 day school, 1 dispensary, and 19 professed Christians. Some write the name T'ai-ho.

T'AI-KANG-HSIEH: A town in Ho-nan, China, situated about 25 miles N. of Chen-chau-fu. The missionaries having been driven out in 1900, a Chinese layman acted as leader of the Christians and kept the church together until it was safe for the missionaries to return. Station of the CIM (1895), with (1903) 1 missionary and his wife, 1 place of worship, 1 day school, 1 Sunday school, and 43 professed Christians. Some write the name T'ai-k'ang.

T'AI-KU: A town in Korea, situated about 100 miles N. W. of Fu-san, on the Nak tung River. Former capital of the southeastern kingdom, and
the chief city of a most fertile and prosperous region. Station of the PN (1898), with (1903) 4 missionaries, three of them with their wives; 3 native workers, 2 outstations, 1 dispensary, 1 hospital, and 4 professed Christians.

TAI-KU-HSIEN: A town of Shan-si, China, situated 10 miles S. of T'ai-yan-fu. The Christians hereabouts were attacked, and many, together with the natives, were killed in 1900. Station of the ABCYM (1883), with (1903) 1 missionary and his wife, 3 native workers, 1 Sunday school, 1 day school, 1 dispensary, 1 boarding school, and 40 professed Christians. Some write the name Tai-ku.

TAINAN: A town and seaport in Japan, situated on the island of Formosa, on the S. W. coast. Population, 139,000. Station of the PCE (1865), with (1903) 7 missionaries, four of them with their wives; 3 women missionaries, 1 boarding school, 1 theological college, 2 dispensary, 1 hospital, 1 medical class, 38 places of worship, 58 native workers, and 4,531 professed Christians. This includes the church statistics of Tai-chu. Some write the name Tainanfu.

TAINANFU. See TAINAN.

TAI-NGAN-FU: A town in Shantung, China, situated 35 miles S. S. E. of T'ai-nan-fu. Station of the North China Mission (SPG auxilliary) (1878), with (1900) 2 missionaries, one of them with his wife, and 1 native worker. Also station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 19 native workers, 8 outstations, 10 places of worship, 4 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, and 304 professed Christians, of whom 100 are communicants. Station also of the Independent Baptist Mission Movement, with 7 missionaries, five of them with their wives, and 1 woman missionary. Some write the name Tai-an or T'ai-an-fu.

TAI-PING-FU: A town in Ngan-hwei, China, situated on the Yangtse River, about 35 miles S. S. W. of Nan-king. Station of the Hauge China Mission (1897), with (1900) 1 missionary and his wife, 1 native worker, 1 place of worship, 1 day school, 1 outstation. Also station of the ME, with 1 native worker, 1 place of worship, 1 Sunday school, and 30 professed Christians. Some write the name Tai-ping-tien.

TAI-PING-FU: A town in Kwang-si, China, situated in the S. part of the province on the Tseo River. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 3 native workers, 3 outstations, 3 day schools, and 177 professed Christians, of whom 156 are communicants. Some write the name Taiping.

TAI-PING. See TAI-PING-HSIEN.

TAI-PING-HSIEN: A town of Che-kiang, China, situated near the E. coast, about 50 miles N. E. of Wen-chau. Station of the CIM (1808), with (1900) 1 missionary and his wife, 4 native workers, 7 outstations, 8 places of worship, 2 day schools, 2 boarding schools, 1 dispensary, and 368 professed Christians. Some write the name Tai-p'ing.

TAI-PING-TIEN. See TAI-PING-FU.

TAI-YUEN-FU: A town in Shan-si, China, capital of the province and important for manufactures. Situated in the center of the province about 250 miles S. W. of Peking. Station of the BMS (1878), with (1903) 4 missionaries, three of them with their wives; 6 native workers, 6 outstations, 3 day schools and 130 professed Christians. Also station of the BZM (1898), with (1903) no occupant. Agency also of the BFB, with 1 agent. Some write the name T'ai-yuan-fu or Tai Yuen Fu.

TAKAMATSU: A town on the island of Shikoku, Japan, situated on the inland sea, N. W. of Tokushima. Population, 34,625. Station of the PS (1893), with 2 missionaries and their wives.

TAKARMA: A village in Chota Nagpur, Bengal, India, situated in Lohardaga District, 55 miles S. W. of Ranchi. Station of the Gossner Mission Society, with (1903) 2 missionaries, 46 native workers, 26 places of worship, 22 Sunday schools, 2 day schools, 1 boarding school, and 5,389 professed Christians, of whom 3,646 are communicants.

TAKASAKI: A town in Japan, situated on the main island, about ten miles S. W. of Mayebashi. Station of the PE (1900), with (1903) 1 native worker and 1 woman missionary.

TAKAYAMA: A town in Japan, situated on the main island, about 40 miles S. of Toyama. Station of the Scandinavian Alliance, with 1 missionary and 1 woman missionary.

TAK-HING-CHAU. See TE-TSING-CHAU.

TA-KU-SHAN: A town in Manchuria, China, situated in the district of Liao-tung, on the coast of Korea Bay, about 35 miles W. of the Yaku River. Station of the Danish Missionary Society (1896), with (1903) 2 missionaries, one of them with his wife; 1 woman missionary, 1 place of worship, 1 dispensary, and 8 professed Christians. Some write the name Da-gu-san.

TA-KU-TANG: A town in Kiang-si, China, situated on the Yangtse River, about 10 miles E. of Kiu-kiang-fu. It is used as a sanitarium for missionaries working in the Yangtse valley. Station of the CIM (1873), with (1903) 1 missionary and his wife, 1 native worker, 1 place of worship, 1 day school, and 8 professed Christians.

TALAGOUNGA: A village in the French Congo State, West Africa, situated on the Ogowe River, about 175 miles from its mouth. The people in the country about are chiefly Fangs, or Palouins, as they are called by the French. Station of the Paris Evangelical Missionary Society (1892), with (1903) 4 missionaries, three of them with their wives; 2 women missionaries, 21 native workers, 11 outstations, 2 day schools, and 341 professed Christians, of whom 72 are communicants.

TALAUT: See TALATAKEL.

TALATAKEL: See TALAUT.

TALCO: A port in Chile, South America, and the capital of the province of the same name, about 180 miles by railroad N. of Concepcion. Population (1901), 29,112. Station of the PN (1876 and 1897), with (1903) 1 missionary and
his wife, 1 woman missionary, 1 native worker, 3 outstations, 1 place of worship, 1 day school, 1 boarding school, 1 dispensary, 1 hospital, and 61 professed Christians.

TA-LI-FU: A prefectural city in the northern part of Yunnan, China, northwest of Yunnan City. Station of the CIM (1881), with (1903) 3 missionaries and 1 place of worship.

TALJHARA: A town in Bengal, India, situated in the Raj-mahal region, about 45 miles east of Bhagalpur. The people are mostly Santals. Station of the CIM (1861) with 3 missionaries, one of them with his wife; 46 native workers, 1 place of worship, 9 day schools, 1 boarding school, 1 theological class, and 997 professed Christians, of whom 352 are communicants. Some write the name Taljhart.

TALLAPUDI: A town in Madras, India, situated in the Godavari District, near the right bank of the Godavari River, W. of Rajmahendri. Climate, hot and malarious. Station of the Evangelical Lutheran General Council (U. S.), with 1 missionary, 1 place of worship, 1 day school, 1 Sunday school, and 192 professed Christians.

TAMAR: A village in Chota Nagpur, Bengal, India, situated 30 miles S. E. of Ranchi. Station of the Gesaper Mission Society, with 1 missionary, 27 native workers, 2 day schools, 10 Sunday schools, and 1,546 professed Christians, of whom 1,497 are communicants.

TAMATAVE: The principal port of Madagascar, situated on the east coast, on a point about 350 yards wide. It is quite cosmopolitan in its character, as representatives of some of the principal European and Asiatic nationalities live within its limits. A low estimate of the foreign residents make their number 1,200. Most of them are creoles from Mauritius, and natives of India of various religions and castes. Not more than 50 are pure British and French. French influence prevails, as there is a French Resident, controller of the customs, and Roman Catholic priests, who teach and preach in French. The native population of about 4,000 is composed of Hovas from the interior, Taimoro from the south, Tandy from St. Marie, and Betsimisaraka from the surrounding districts. The latter are an exceptionally ignorant, superstitious tribe, who have been further debased by contact with the cargoes and crews of the various trading vessels from Mauritius and Réunion which stop at the small ports.

Station of the SPG, with 3 native workers. Church statistics included in Andoveranto, where the missionary resides.

TAMEANGLAJANG: A village in Borneo, Dutch East Indies, situated about 120 miles N. N. E. of Banjermassin. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 4 native workers, 3 outstations, 4 day schools, 1 Sunday school, and 192 professed Christians, of whom 104 are communicants.

TAMI: An island off the E. coast of German New Guinea. Station of the Neuendettelsau Mission Society (1889), with (1903) 1 missionary and his wife and 1 day school.

TAMPICO: A town and seaport in the state of Tamaulipas, Mexico, situated on the River Parano, near its mouth, and 220 miles N. of Mexico City. Population, 5,000, Indians, Spaniards, Creoles. Station of the Associate Reformed Presbyterian Synod of the South (1880), with (1901) 1 missionary and his wife, 2 women missionaries, 3 native workers, 10 outstations, 4 places of worship, 1 boarding school, 1 day school, 1 industrial school, and 223 professed Christians.

TAMSUI: A town and treaty port in Japan, situated in the island of Formosa, on the W. coast and in the N. part of the island. Population, 100,000. Station of the PCC (1872), with (1901) 2 missionaries and their wives, 79 native workers, 56 outstations, 5 places of worship, 6 day schools, 1 college, 1 hospital, and 1,891 professed Christians.

TANABE: A town in Japan, situated in the N. of the main island, about 40 miles N. E. of Aomori. Station of the Cumberland Presbyterian Missionary Society (1883), with (1901) 1 missionary, 1 native worker, 1 place of worship, 2 Sunday schools, and 44 professed Christians.

TANAH-ABANG: A settlement in the island of Java, Dutch East Indies, situated about 12 miles W. of Batavia. Station of the Netherlands Missionary Union (1902), with the outstations formerly connected with Tanggerra. It has (1903) 1 missionary and his wife, 5 native workers, 7 outstations, 12 day schools, and 170 professed Christians. A considerable proportion of the Christians here are Chinese coolies.

TANANA: A settlement in Alaska, situated on the Yukon River, at the confluence of the Tanana. Station of the JPE, with (1901) 1 missionary, 1 native worker, 1 place of worship, 1 day school, 1 printing house, and 52 professed Christians.

TANDIL: A town in the Argentine Republic, South America, situated about 180 miles S. by W. of Buenos Aires. Station of the Missionary Fence Association (1896), with (1900) 1 missionary and his wife, 1 Sunday school, 1 boarding school, and 32 professed Christians.

TANDSCHAUR. See TANJORE.

TANETTEIJA: A town on the island of Celebes, Dutch East Indies, situated on the S. coast about 40 miles S. E. of Macassar. Station of the Utrecht Missionary Society (1897), with (1903) 1 missionary and his wife, 2 native workers, 1 day school, and 8 professed Christians.

TANGA: A town and seaport in German East Africa, situated 30 miles N. of Pangani. It is the terminus of the railroad to Korogwe. It has a German Government School. Population, 5,000. Station of the German East Africa Missionary Society (1896), with (1903) 3 missionaries and their wives, 1 native worker, 2 outstations, 1 place of worship, 1 day school, and 66 professed Christians.

TANGAIL: A town in Bengal, India, situated near the Madhupur jungle and about 50 miles N. W. of Dacca. Station of the Victorian Baptist Foreign Mission Society (1896), with (1900) 1 missionary and his wife, 5 native workers, 1 place of worship, 1 day school, 1 theological class, and 8 professed Christians.

TANGIER: A town and seaport of Morocco, situated on the south shore of the Strait of Gibraltar, 38 miles southwest of the Rock. Population, 10,000. Station of the NAM (1854), with (1903) 3 missionaries, one of them with his wife; 5 women missionaries, 4 native workers, 1
place of worship, 3 day schools, 2 hospitals, and 12 professed Christians. Station also of the Mildmay Mission to the Jews (1889), with (1900) 2 native workers and 1 woman missionary. The BFBs also has an agent and book depot here, with 5 colporteurs.

T'ANG-SHAN. See Tong-shan.

TAN-JAU: A town on the island of He-tan, China, situated in the N. E. part of the island. Station of the CMS (1902), with 2 women missionaries, 7 native workers, men and women, and 4 schools.

TANG-SHAN. See Tong-shan.

TANG-UN. See Tung-ung-hsien.

TA-NING-HSIEH: A town in Shansi, China, situated about 50 miles W. N. W. of Ping-yang-fu. Station of the CIM (1885), with (1900) 2 women missionaries, 5 native workers, 2 outstations, 3 places of worship, 1 boarding school, and 145 professed Christians.

TANJORE: A town in Madras, South India, and the capital of Tanjore District, situated about 46 miles W. of Negapatam. It contains a public works yard noted for some as the finest in India. It is noted for artistic manufactures of repoussé work, copper ware, jewelry and curious models in pith. Population (1901), about 57,870. Station of the SPG (1825), with (1903) 1 missionary, 1 woman missionary, 24 native workers, 5 places of worship, 2 boarding schools, 1 college, and 883 professed Christians, of whom 534 are communicants. Also station of the Leipzig Missionary Society (1858), with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 38 native workers, 13 outstations, 12 places of worship, 11 day schools, 7 boarding schools, and 1,029 professed Christians, of whom 559 are communicants. Germans write the name Tandschaur.

TANNA. See New Hebrides.

TANTA: A town and railway junction in Lower Egypt, situated 60 miles N. N. W. of Cairo. Population, 33,725. Station of the UP (1893), with (1903) 1 missionary and his wife, 3 women missionaries, 23 native workers, 1 dispensary, 1 hospital, 2 boarding schools, 9 day schools and 1 Sunday school. The number of professing Christians is commonly omitted from the published station reports of this Society.

TAOISM: Laotze the philosopher is said to have been born in the year 604 B. C., the date of his birth having been the subject of much discussion. On the other hand, there was some question whether he was or was not a real character. The fact that the names of his village and county or state or province seem to be allegorical, like the names in Pilgrim's Progress, has led to a doubt on this subject. But some allowance should be made, probably, for the tendency among the Chinese to deal in allegorical names. Even the name of the chief city sometimes has been used in this way.

Laotze's history, all things considered, seems real. It is said that he left a son, who won distinction in public office. Laotze's birth occurred about a half century before the birth of Confucius; they were therefore contemporaries. Both are said to have been the sons of very old men.

The condition of China, or of that particular province in which Laotze lived, corresponding to a portion of the present Shantung province, was greatly disturbed by border wars and intestine revolts and intrigues. There was scarcely a vestige of morality, and the political condition of the country was chaotic. Both Laotze and Confucius aimed at reform. Both appear to have been somewhat interested and high-minded. Both were rather impatient, however, with the stolidity and degradation of the people, and with the vices and corruption of the reigning princes.

Laotze always had to have been made, for a time an office as keeper of the archives, as the old records express it; but his mind drifted toward philosophy and political reform, and the position he held was far from meeting his ambition: political engagements were irksome to him.

Comparatively little is known of this truly profound thinker or reformer. He is supposed to have been poor, and for that reason perhaps the more keenly conscious that his nation and his age failed to appreciate him. He was, in short, too morbid in spirit to make the best use and secure the greatest results of his rare gifts. He formed no school of followers, and wrote no books. On the contrary, he withdrew himself from men, was too proud to teach or write, disliked display of any kind, and was in fact a recluse.

Confucius, on arriving at manhood and entering upon his career, sought an interview with Laotze, with a hope of profiting by his great ability, his observation and his experience. He was received coldly, however, and with severe criticism instead of sympathy. Much as the two men were alike, they had wide differences of character, and these were increased by the fact that Laotze was already an old man when Confucius appeared before him. He was not of that mind of attitude to approve or even tolerate what he considered the gushing enthusiasm and crudity of Confucius. He looked upon him as an ambitious, blustering agitator, sounding brass and a tinkling cymbal, and he predicted the failure of his pretentious efforts at reform.

Confucius, on the other hand, was astonished at the churlishness of the old reformer, was perplexed at his involved and incomprehensible theories and mystical speculations, and he could only compare him to the "incomprehensible dragon."

At last, in old age, Laotze's despair at the condition of the country became overwhelming. He had dire forebodings of calamity, revolution, bloodshed, political chaos, and destruction. He had become more and more unpopular as he had grown more and more reproachful toward his countrymen.

He dreaded to witness the ruin which he was sure was coming upon the land, and he fled into voluntary exile, passing westward through the Hankow Pass into the province of Honan. He was induced to stop for a time with the keeper of the Pass, and instruct him in the principles of his philosophy. This gate-keeper seems to have realized that no ordinary person was before him, and he was unwilling that a man who was too morbid and impracticable to write any book or organize a movement, and many of his disciples should pass from the knowledge of men with a report of some substantial results of his thinking. He appears to have taken down from dictation the main principles of the reformer's teaching. This record is known as the Tao Teh King. It embraces all that is known of Laotze's doctrines.
After leaving the Hankow Pass for the west, Laotze passed into obscurity, and, so far as is known, nothing was ever heard of him afterward. Many legends sprang up around the history of Laotze like the young shoots at the root of a dying tree. One of these relates that upon leaving the Pass for his voluntary exile he passed through two provinces in the course of the journey and then continued westward. Learning the plan of his master, was unwilling to accompany him, and in the settlement charged an exorbitant sum as back wages; but as Laotze had by a spell kept him alive far beyond his appointed time, he withdrew the spell, and the servant became so unrecognizable that facing the request of the gate-keeper, who interceded for the servant, he restored him to life, and then found him reasonable in his price. Other absurd legends are preserved, one of which is that Laotze was miraculously born at the age of eighty, and that he was the "Old Boy." He was gray-haired at birth. Certain legends similar to those which are related of Gautama, and which may have been copied, are also given—as that Laotze leaped into the air as soon as he was born. Some of his followers have claimed that he was a spiritual being, and not an actual, ordinary man.

The Character of Laotze: Laying aside all legends, and contemplating the actual life of Laotze, so far as scanty materials enable us to do, we find him a man above reproach in morals, the living in a dissolve age. The parallels between his severe type of philosophy and that of the great names of Greece are quite remarkable. He was uncompromising and exacting in his standards of right and wrong, morose and despondent in temperament, proud and impracticable in his relations to men, and having little tact in approaching them. He was too much of a quietist to be a successful reformer. He had been soured by disappointment and he died in despair. His system had brought him no comfort, he had seen no improvement in the condition of society. He regarded his life as a failure, and yet he seems to have come very near to the truth in many respects.

He approached the sublime ethics of our Savior more nearly than any of his contemporaries, tho they were among the greatest names in history, for Laotze, Mohammed, Pythagoras, Gautama, and, according to Monier Williams, Zoroaster, are supposed to have lived within a century of each other. Laotze taught that real virtue is a spiritual and interior excellence, and not outward doing or speaking. In this respect he fought much the same battle with the objectivity of more formal and immovable customs as our Savior did in His dealings with the Pharisees, and, like Him, He urged the law that is written within, and of which the outward world knows nothing. He taught also that he who foregoes and yields up and forbears is the one who really finds and succeeds, and that he who humbles himself is really exalted.

In general, like our Savior, he exalted the quiet and passive virtues, and he taught the duty of doing good even to those who injure us. In this respect he stood in strong contrast with Confucius. As more than one has represented that of the old Jewish dispensation, which required "an eye for an eye, and a tooth for a tooth." The justice of that dispensation was as high as Confucius felt called to go in his dealings with men; no one placed greater emphasis than he upon justice, but he could not understand the duty of doing good in return for evil. Some terse expressions from the lips of Laotze show the deep subjectivity of character as he conceived it. "It is not necessary," he said, "even to peep through the window to see the celestial Tao." At another time he said, "There is a purified quietude by which one may rule the world." Again, "Lay hold of Tao (wisdom) and the whole world will come to you." Again, "One pure act of resignation is worth more than one hundred thousand exercises of one's own will." The moral elevation of character that is set forth in these unadulterated sayings is admirable. It is worthy of a place in Christian ethics.

There were some points in which Laotze seemed to be at one with Gautama. He taught that even in this life it is possible to completely possess Tao, and that thus the creature may become one with the creator by the annihilation of self, it being understood that to possess Tao is in another sense to be possessed by Tao as an indwelling principle or life, all of which implies a near approach to the Pantheistic absorption in deity which Hinduism also teaches. A general resemblance of the essence of Laotze's teaching and that of Confucius may be expressed thus: Confucius would say, "Practice virtues, and call them by their right names." Laotze would say, "Practise them and say nothing about it." Altho he had great reverence for the ancients, he did not idealize them as did Confucius, and as he has led the Chinese nation to do.

There seems to have been in the interviews of the two sages some little controversy on this point in which Laotze told Confucius, by way of subduing his romantic enthusiasm, that the "ancients were only so many bundles of dry bones; wisdom did not die with them." He illustrated the grace of quietness and the safety which it secures by saying that "the leopard by his brilliant colors, and the monkey by his frivolous activity, only draw the arrows of the archer," and to the loud-mouthed reformer he would say, "You are like a man who beats a drum while hunting for a truant sheep."

One point in which Laotze was far in advance of his age, and abreast with some of the best political thought of later ages, is his maintenance of the theory that kings exist for the good of the people and not for their own selfish ends, which ends the people, like so many dumb beasts, are designed to subservire. "Kings," according to Laotze, "should rule so quietly, and hold the reins so lightly, that the people may forget them as kings, and only think of them as superiors." There should in all government, as he insisted, be a minimum, and not a maximum, of government. Surely these practical and lofty political principles stamped Laotze as a man of prophetic genius.

Confucius said much more than he concerning government: more, certainly, in the number of details; but no counsels of his are so laden with sublime principles as those of his rival, and none of his teachings are more in accord with the truth.

The Philosophy of Laotze: It is as a philos-opher that Laotze most inspires our respect and honor. Tao, which was his ideal of the all-en-compassing and eternal essence of things, means Reason, as nearly as it can be translated; but it means more than that word represents to us. It
Laotze

is the Infinite Reason, in such a sense that it embraces all excellence and glory; it corresponds very near the world Wisdom, the Book of Job and the Ecclesiastes. Tao was defined by Laotze, the in no superstitious sense; and yet it was impersonal; it was apprehended by him in a pantheistic sense. Thus he says: "All things originate with Tao, conform to Tao, and return to Tao."

Tao exerts its influence in a very quiet manner; its influence is still and void, and yet it "encircles everything and is not endangered;" it is ever inactive, and yet leaves nothing undone; nameless, it is the origin of heaven and of earth. It is not strange, perhaps, that with so vague a conception of the supreme force in the world the Chinese mind should have lapsed into a mere general conception of Deity, and that the prayers of the emperors have for ages been addressed to heaven.

Professor Douglas, of the London University, has summarized the elements of Tao as follows: (1) "It is the Absolute, the Totality of Being and Things. (2) The Phenomenal world and its order. (3) The ethical nature of the good man. (4) The nature of his Life. One is reminded of various philosophic schools of ancient and modern times. The "totality of being and things" is about equivalent to the pantheistic conception of the Indian Vedanta. It does not differ materially from the "absolute substance of Spinoza or the "absolute intelligence" of Hegel. It must be confessed that Laotze was a profound philosopher. He has rarely been excelled in the history of philosophy, for in view of his comparatively isolated position we must regard him as eminently original. His system, ascribed to his own authorship in Chinese philosophy. In profundity of thought he far exceeded Confucius, tho he was less practical. Confucius was not a philosopher in the strictest sense; he was only a skilful and eminently practical compiler of ancient wisdom. He did not claim to be more than this, and with laudable modesty he spoke of himself as only an editor. But the Tao Teh King of Laotze came from his own brain.

There is a seeming contradiction in the teachings of Laotze in reference to the past. While Confucius carried his reverence for ancient authorities to an extreme which scarcely seemed to admit the possibility of anything new in the world, Laotze took issue with him sharply, and even poured a degree of contempt upon his extreme reverence. At the same time, tho he admitted no age of antiquity as necessarily authoritative, he looked back, in a general way, to a golden age of simplicity and virtue which had passed away, and his whole idea was to return from the complex wisdom and civilization which he regarded as only a curse, to the better days when men had few wants and lived quietly.

He was in accord with Confucius on one point, namely, the uprightness and dignity of man's original nature. They recognized no doctrine of human apostasy which assumed hereditary form. In logical consistency they both maintained that every man was born without evil bias, and is sound at the core. The continued influences of demoralizing example were supposed to account for the evils which these great sages found in the world about them.

Like the ancient Druids, Laotze propounded his great principles of life in triads, and the three precious virtues which comprehended compassion, benevolence, and humility, all of a quiet type. He did not believe in intellectual brilliancy of any kind, much less in any show and pomp of conscious power, and he had little to say of prowess; his ideals were not the great and ambitious and mighty, as men are reckoned to be mighty, but those, rather, who practiced the passive virtues, the gentle and retiring graces of human life.

There is a difference of opinion as to Laotze's idea of God. Professor Douglas thinks that he had no conception of a personal divine being, at least that he recognized no such being; but on the other hand, Professor Legge of Oxford seems confident that the supreme "heaven" or God in heaven was involved in his idea of Tao. He maintains that Laotze often spoke of heaven in a non-material sense, and that in one instance he explicitly names of God itself.

One thing is certain: whether Laotze regarded Tao as personal or not, he assigned to it providential oversight and care and all forms of beneficent interest. Says Professor Legge: "Tao does more than create. It watches over its offspring with parental interest. It enters into the life of every living thing. It produces, nourishes, feeds, etc."

Laotze's doctrine of creation seems a little vague. He says: "That which is nameless is the beginning of heaven and earth. Tao produced One, and One is the first great cause; One produced Two, the male and female principles of nature; Two produced Three, and Three produced all things, beginning from heaven and earth." This strikingly resembles the Shinto notion of the origin of all things, according to which there is one absolute the unknown, from whom emanated two, male and female, and from these the world of beings was produced. Both Confucius and Laotze speak of heaven both as material and as personified.

According to Professor Douglas, Laotze would agree with the Darwinians as to the creative indifference of the Deity or deified influence which is characterized as heaven. "It has," he says, "no special love, but regards all existing beings as 'grass dogs' made for sacrificial purposes." Yet he adds, "it is great, and compassionate, and is ever ready to become the Savior of men."

If the question whether Laotze was really religious in his thought were dependent on such statements as this, we should be compelled to answer in the affirmative, for the being or power which is regarded as "great and compassionate and ever ready to become the Savior of men" is an object of religious contemplation, surely.

As to the physical laws of the world, Laotze maintained that the earth is held together, not by gravitation, but by Tao. If this be true, supposing Tao to represent the infinite force, for gravitation is but a second cause. The expression "the earth is held together by Tao" is nearly equivalent to the declaration that "God holdeth the earth in His right hand." Something like the Buddhist idea of an eternal round of life and death seems to be intended by Laotze's doctrine that existence and non-existence constantly originate each other.

We have alluded to some similarities between the teachings of Laotze and those of Christ, especially in the gentle virtues of kindness,
humility, forbearance, etc. The differences, however, which appear are more striking than the resemblances.

Christ showed a balance of truth. He taught the Taoist virtue of non-action, but also the active ones, which Laotze did not. He made for righteousness and secrecy in prayer, and yet the duty of active influence. "Let your light so shine," etc. This was not for self, but for others. Confucianism was active, Taoism passive, Christianity was both. The fatal defect in Taoism was its lack of divine recognition, and its line of thought was recessed. Its ethics were high, but it had no love for God, and therefore none for man.

The Tao Teh King: This is a short treatise, already referred to, embracing the sayings of Laotze which were recorded by the keeper of the Hankow Pass as the great teacher was about to go into exile. It is very brief, only about the length of the Sermon on the Mount. In its general character it is exceedingly intricate, and often obscure. The best scholars feel little confidence in their interpretations of it. Here is a specimen: "If the Tao (the way) is悖 keeps, standing and complete before the birth of heaven and earth. How still it was and formless, standing alone and undergoing no change, proceeding everywhere, and in no danger of being exhausted. It may be regarded as the mother of all things. In its real state, this Tao is incomprehensible and corresponds remarkably with one found in the Rig Veda, in which the original chaos is described as being brooded over by the infinite Brahm, the "Only Existing One," breathing quietly. The vagueness of the philosopher's conception is well set forth in this passage: "I do not know the name, but designate it the Tao (the way) and forcing myself to frame a name for it, I call it the Great. Great, it passes on in constant flux; so passing on it becomes remote; when remote it comes back." Modern Taoism: There could hardly be a stronger contrast than that which is presented between the ancient and the modern Taoism. Laotze was virtually rationalistic, but the present system is the most irrational of the great existing religions; it is a mass of superstitions of the lowest type. It is only the name of Taoism applied to a mixture of Buddhism and the ancient ancestor-worship and other superstitions of China. Speculation seems to have spent itself in the few centuries which followed the life of Laotze. Having first run wild in theories, it degenerated into low superstitions. The principle in Laotze's teachings which seems to have suggested the prevalence of spirits and ghosts in all nature, animate and inanimate, was his declaration that the presence of Tao is universal. He gave it a pantheistic omnipresence and indwelling in all beings and things. He little thought, probably, that this would lead to the notion that every object in nature is haunted, and thus cause the land to swarm with polytheism. A Taoist is afraid of his shadow. In the woods or in dark ravines he imagines he is about to be pounced upon by sprites or demons. The trees have souls, the very air is laden with a mysterious influence. Telegraph wires cannot pass through the open spaces nor steeples be reared without disturbing "fung-shui," nor can the earth be excavated for the purpose of mining or the introduction of any modern improvement without great risk that this omnipresent something shall be disturbed.

Taoism continued to be a philosophy for some time after the death of Laotze, but it was a changed and ever-varying series of speculations. In the opinion of Dr. Legge, it did not become a religion, strictly speaking, until after the introduction of Buddhism in the 1st century. It had a priestly character, but was never anything like a religion. It was sorely in need of being reinforced by something higher. So far as history informs us, no successor of Laotze seemed to correctly interpret or propagate his teachings. His standard was too high, his theories were above the reach of his successors' intellect and his transcendentalism was alike failed to be appreciated. Professor Douglass has a very different estimate of the followers of Laotze from that ascribed to the immediate successors of Confucius. While the latter drew multitudes of the best men of the age about him, Laotze's camp was a Cave of Adulam to which the discontented and erratic resorted. His teachings, therefore, were left in the worst of hands.

Among the most influential Taoists in the next generation was Leitze, who argued Laotze's pantheistic philosophy, and the fanciful idea of an "asie aspiration, and live for to-day; live in the freedom of the beast," would express his general view. Laotze had said: "Lie aside pomp and circumstance; live simply and with little pre- tense." Leitze carried the idea to extremes. He also gave a licentious interpretation to the pantheism of Laotze, assuming that "if Deity lives and acts in us, then we are Deity, and are above restraint; we are as free as the gods." The development of this extreme logical sequence of pantheism has not been confined to Taoists or to any particular country. The Spanish pantheism of the Hindus led to the same results by the same logical process; men came to regard the soul as beyond the reach of sin or stain. Even in the extreme fanatism which sometimes attaches to Christian doctrine, notions of liberty and perfection lead to the abandonment of law, and to general laxity of life. Leitze attached great importance to dreams. They constituted one mode of his teaching. He represented the emperor Hwang-te as dreaming that he was in a world where men lived in the freedom of their ghosts and still possessed them. These wonders led to the art of conjuring, and Leitze wrung from Yin He, the Hankow gate-keeper, his assent to these arts, and his endorsement of them on the alleged authority of Laotze. In all this Leitze wholly misrepresented the great philosopher and his principles. As a result of these frauds there swept in that flood-tide of jugglery which swamped the principles of Taoism, and opened the way for the old national superstitions.

Leitze did not fail to encounter the rising Confucianism or to try old tactics of his master Laotze; he endeavored to put down Confucianism with ridicule. He had no better weapons than those of borrowed sarcasm. As it seemed necessary to his prestige that he assume the role of a philosopher, he developed a theory of the universe, but it was puerile and failed to win respect. His favorite method of argument was that of dialogue, in which his view was always made to triumph. He was forever fighting men of strav of his own manufacture. In one of these the superior wisdom of pursuing sensual enjoyments while one can is shown to the best advantage. Yet this man, by his intellect and vigor, won great influence for a time.
He was followed by Chwangtze. He was inclined to return from Leitsze to a position more like that of Laotze. He discoursed on the vanity of life, and bitterly opposed the superfluous homilies and showy benevolences of Confucianism. "Said he," he said, "turn round and round, to be benevolent and kick and struggle to become righteous, and the people suspect their very earnestness. They bow and distort themselves in their endeavors to act with propriety, and the empire begins to break up." The satire which permeates all this is keen, and has a measure of truth.

There are some resemblances between the theories of Chwangtze and the Vedanta philosophy of India. He treated wakeful and conscious life as an illusion, and doubted the substantial reality of all things. And to this day there is a belief among Taoists that there is an inner and invisible soul in all objects; the unseen appears to be quite as real as the visible. As an illustration of this doubt as between the tangible and the invisible, he related a dream in which he seemed to be a butterfly, flitting about in the air, and he felt no little surprise on waking to find that he was no butterfly, but Chwangtze. "But then," he says, "the thought came to me, on the other hand, was that really a dream, or am I now dreaming that I am Chwangtze and not a butterfly?"

In the 3d century before Christ, Taoism had gained such influence that the reigning emperor ordered a general conflagration of all sacred books except those of the Taoists, but the doctrine as then held was not that of Laotze. It had undergone successive changes until it had become a system of childish superstitions. It was believed that immortality might be gained by charms and spells. The emperor Chwangtze believed this, and also that in the western seas there were happy isles where genii dispensed the elixir of immortality to all who came. This emperor sent expeditions to these imaginary isles to bring back the elixir. The period of his reign was a great harvest-time for all Taoistic frauds. The priests claimed the most astonishing of occult arts.

Taoism was now neither a philosophy nor a religion; it was a system of jugglery. Under the reign of Wu, 4th century B. C., the Han dynasty, who also became an implicit believer, the system still flourished, even down to about 100 B. C. This emperor also sent expeditions to the happy islands; alchemy and the quest for the elixir of life were at their height. It will be remembered that in Europe, also, similar fanaticisms have at various times been rife; but the wildest of them never equaled that of the Taoists of China in the reign of Wu. From the emperor down, all classes were seeking this elixir. Business of every kind was for a time neglected and the fields were untended. Only the astrologists and priests were thrifty. The emperor lavished fortunes on their wild schemes.

Under these fanatical emperors Confucianism was bitterly persecuted. Many distinguished Confucian philosophers were burned alive, and some of their books were burned. But at the death of Wu a great reaction took place and Confucianism was revived and reinstated.

In the 1st century the first high-priest or pope of the Taoists was appointed, and the office has descended in his clan to this day. He is elected by the priests of the clan; he is not bound by rules of celibacy or any particularly ascetic requirements.

Taoism became a religion, strictly speaking, soon after the advent of the Buddhists, somewhere about the close of the 1st century. Like Buddhism, it had great powers of absorption, and from having been at first a philosophy and then a system of jugglery it now borrowed certain religious elements from Buddhism. The two systems, both of which were rather absorbent than creative, formed a sort of charade of religious relations with each other. They at length came to have so much in common that their priests united in the same services, and it is stated by Prof. Legge that an emperor of the Chi dynasty strove to unite them by ordering Taoist priests to adopt the precise and the habit of the Buddhists. Some were put to death for refusing to conform. Taoists have persistently refused to submit to the full ritual of Buddhism, and their monks have withstood the requirement of celibacy. Low and degraded as Taoism had long been, it never sank into idol-worship until it came into contact with Buddhism. Neither the followers of Confucius or Laotze ever worshiped an image until the custom was borrowed from the Buddhists. Now the temples of Taoists vie with those of the Buddhists in this respect.

One of the most noticeable effects of Buddhism upon the Taoist system is seen in the adoption by the latter of a trinity. Buddhism had images in its temples representing Buddha, the Law and the Sanga, tho at a later day they came to be regarded as representing Buddha past, present and to come. At length there appeared in the Taoist temples a trinity of colossal images, representing the Perfect Holy One, the Highest Holy One, and the Greatest Holy One. Monasteries and nunneries were unknown among the Taoists until after the introduction of Buddhism; the doctrine of transmigration was also derived from the same source. The Buddhist notion that women distinguished for virtue and character shall be rewarded at the next birth by being born as men, was also adopted by Taoists.

In one view a doctrine of eschatology seems out of place in Taoism, since it maintains that rewards and punishments are not to be expected in the present life. For example: the so-called "Book of Rewards" makes punishments consist almost invariably in shortening the period of the present life; immortality is spoken of, but it is something treated as of little account. Nevertheless, in each provincial temple of the Taoists may be seen what is called a Chamber of Horrors—a Purgatory. This, doubtless, is an esoteric conception, and is borrowed from Buddhism.

The real spirit of Taoist superstition is seen in the writings of an old author of the 4th century named Ko Hung. He says that "mountains are inhabited by evil spirits who are more or less powerful, according to the size of the mountain. If a traveler has no protection he will fall into some calamity. He will see trees move, the not by the wind, and stones will fall from impeding rocks without any apparent cause; he will be attacked by sickness or pestilence by night or day. A mirror should be carried, since the mischievous elves are afraid to approach him thus equipped, lest their true character should be discovered. Taoism has experienced great vicissitudes.
During the reign of the emperor Whan, 147-165, great favor was shown to this system, and the custom of offering imperial sacrifices to Laozte at Koko, his birthplace, was begun. Many attempts were made to save life by charms, and in order to increase their power, legends borrowed from Buddha and Laozte. Among other things it was claimed that after he left the Hanking Pass he spent three nights under a mulberry tree under temptation of the Evil One; lovely women, also, were his tempters.

The system again sank into neglect in the reign of Taikou, 1568-1572. Orders were issued against both Taoist and Buddhist monasteries, and no doctrine could be taught but Confucianism. Again, under the Wei dynasty, Buddhism and Taoism were reinstated. In the reign of Tai Wute there was a return to the notion of an elixir of life, and the emperor became a Taoist. In this reign Buddhist asceticism began to be copied by Taoists. The emperor Tai Ho, 477-500, built temples and monasteries for this sect.

The emperor Wu, 506-578, abolished Buddhism and Taoism because their jealousies and stratagems threatened the empire. They were reinstated the two religions on equal grade. Under the Tang dynasty Taoism again held for a century the ascendancy over Buddhism, and Laozte was canonized. In 625-627, the Taoists, having become insolent, were banished to the provinces of K-wang-sung and K-wangs, but under Hswey Chang they were reinstated, and Buddhism was stigmatized officially as a foreign religion. Under the Sung dynasty, 960-976, Taoist priests were forbidden to marry. Hwetsung ordered the Buddhist priests to adopt Taoist names for the Confucian Manchu dynasty, following next in order, persecuted the Taoists, but Jenghis Khan promoted them; also Kublai Khan, in the 13th century. Hung Che, 1488-1506, was very hostile. The present Manchu dynasty has also been hostile, and has passed various edicts against Taoist jugglery.

The sacred book of Taoism, known as the "Book of Rewards," inculcates ethics which are on the whole commendable. The precepts are generally in negative form, but notwithstanding the morality of the "Book of Rewards," the moral code of the Taoism is incompletely learned.

Among the virtual deities at the present time are, first of all, Laozte, who is supremely revered. But a god of providence having general charge of human affairs is found to be necessary, and, accordingly, Yunwang Shangti, or the Precious Imperial God, is assigned to that place. The constellation of the Great Bear is also worshiped as a representative of the sidereal powers; also various forces of nature, as the Mother of Lightning, the Spirit of the Sea, the Lord of the Tides, etc. The dragon is a great object of worship with Taoists. His images are everywhere; serpents are his living representatives. Even Li Hung Chang, great statesman as he was, worshiped a serpent which crept into a temple in Tientsin in time of a flood in 1874. Chang Chun, a disembodied sage of the past, is now worshiped as a god of literature; a great hero of the past is worshiped as the god of war, and a third deity is the god of medicine. But altogether the most popular is Tsaichin, the god of wealth. Every store and shop has a little altar for burning incense to him. This suits the average Chinaman better than the transcendentalism of Laozte, or the lofty ethics of Confucius, or the nirvana of Buddhism. The boasted millions of Buddhists in China all believe supremely in Tsaichin.

The polytheism of China is still further rami- fied under the influence of Taoism, embracing gods of the sea, of the village, of the heart, of the kitchen, and demigods to represent all virtues; in other words, deified men, heroes, scholars, etc.

A remarkable influence has been produced by these superstitions upon the Buddhism of China, as shown in the fact that the Buddhist temples are full of the same images of ideals, of virtues, and of heroic men. In the great Buddhist temple of Honan in Canton there are hundreds of full-sized figures of deified men.

The facts of Taoism which press most weightily upon the missionary are: (a) Its vague ideas of a Supreme God, which leave the people practically without such a conception; (b) its substitution for God of a multitude of spirits of various qualities and purposes, and endowed with knowledge, activity and power; (c) The absence of the idea of Divine love in any form or of human love to the Creator and Preserver, and the certainty which it is that the spirit from the worshipper looks are without sympathy even when they are not malicious toward man; (d) The concentration of attention upon devices for thwarting or placating the spirits so as to make ingenuity more important than conduct; (e) The filling the future life with an army of spirits that repels as much as death itself. With all this there is an occasional help to moral excellence in men in the wise saws that contain principles of right intended for immediate use.

TARKASTAD: A town in Cape Colony, South Africa, situated about 40 miles W. of Queenston. Station of the UFS (1869), with (1903) 1 missionary and his wife, 3 outstations, 1 day school, 1 Sunday school, and 96 professed Christians.

TARN TARA: A town in the Punjab, India, situated about 15 miles S. E. of Amritsar. It is a very sacred place to the Sikhs and a holy fair held there every month. Population, 6,000. It was visited by the CMS in 1892. Station of the CMS (1885), with (1903) 1 missionary and his wife, 9 native workers, 1 place of worship, and 521 professed Christians, of whom 44 are communicants. Station also of the CEZ (1858), with (1903) 5 women missionaries, 12 native workers, 3 day schools, 1 boarding school, 1 dispensary and 1 hospital.

TARPUM BAY: A station of the WMS, on Elethera Island, Bahamas, with (1903) 1 missionary, 15 native workers, 3 Sunday schools, 3 places of worship, and 530 professed Christians.

TARSUS: A city of Asiatic Turkey; situated in the province of Adana, 20 miles from Mersine. The birthplace of the apostle Paul. Population, Turks, Armenians and Nusiriye. In 1889 an institution called St. Paul's Institute was founded there with the financial support of Mr. Elliott F. Shepard of New York, and has done good work in educating young men for business and for service as teachers. The present is under the care of the ABCFM, and serves as a preparatory school for the Central Turkey College at Antabt.

TARTAR: A corruption of the name Tatar, a
word derived, according to some, from the Mongol tribal name, Ta-ta. Turks accept this derivation, merely adding that the tribal name should be followed by or or er (man) so as to make full sense. The word Ta-ta-ar (man of the Ta-ta tribe) would thus be the identical word now in use. The form Tartar is a play on words introduced by the tellers of the Middle Ages who could imagine no source but Hell or Tartarus for the hordes who striped them. The term has been loosely applied to any inhabitants of Central Asia, and does not carry with it any ethnological or political significance. Many writers discard it altogether. It seems better, however, to use it in a wide sense, including both Mongol and Turkish tribes, since these are allied, yet not the same. As things now are the term Mongol is made to do double duty, describing the genus as well as the species. Silence is better than loose speech that confuses. The word “Tartars” as applied by popular writers to the Tatars of Western Asia (the Kazar, Astrakan, Kipchak, Nomgi and Crimean Tatar) means neither more nor less than “Turks.” As applied to the Siberian nomads and those of North Turkestan, it means “Mongols.” See Mongols and Turks.

TASIK MALAJA: A town in Java, Dutch East Indies, situated about 50 miles S. by W. of Cheribon. Station of the Netherlands Missionary Union (1898), with (1903) 1 missionary, 1 native worker, 1 day school, and 24 professed Christians.

TASMANIA: A British colony in Australasia, formerly called Van Diemen’s Land, and including the island of that name and several smaller ones lying, for the most part, in Bass Strait. Area, 26,215 square miles. The estimated population, about 150,000, is composed of Tasmanians, English, Australasians, Chinese and Germans.

The island is traversed by mountain ranges with fertile valleys. The climate is mild and not subject to extremes. It was made a penal settlement in 1849, but transportation of criminals ceased in 1853. The aborigines are entirely extinct. Hobart, the capital, had a population of 21,118 in 1881, and Launceston had 12,752.

The people are now nominally Christian, the majority belonging to the Church of England, the remainder being Roman Catholics, Wesleyan Methodists, Presbyterians and others.

The SPG maintains a mission here, and the Wesleyan Methodists have several hundred churches in Victoria and Tasmania together.

TA-TSIEU-LU: A town in Szechwan, China, situated 68 miles W. of Ya-chau-fu. Station of the CIM (1897), with 3 missionaries and 1 place of worship. Also written Ta-chuen-lu.

TA-TUNG-FU: A town in Shan-si, China, situated on a branch of the Pai-ho, 170 miles W. of Peking. All the missionaries in this region were killed in 1900 and the work is slowly being taken up again. Station of the CIM (1886), with (1903) 1 missionary and his wife, 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 18 professed Christians. Some write the name Ta-Tung.

TAUNG-NGU: A town in Burma, India, 170 miles from Rangoon by railroad. It has very extensive suburbs and a sheet of water more than a mile long lies within its walls. It was formerly the seat of an independent king. Altitude, 181 feet. Population, 17,500, nearly all being Buddhists.

Station of the ABMU (1853), with (1903) 3 missionaries and their wives, 2 women missionaries, 255 native workers, 87 outstations, 161 places of worship, 73 Sunday schools, 68 day schools, 5 boarding schools, 1 dispensary, 1 hospital, and 17,000 professed Christians, of whom 4,849 are communicants. Also station of the SPG (1873), with (1903) 4 missionaries, one of them with his wife; 108 native workers, 6 day schools, 4 boarding schools, and 2,903 professed Christians, of whom 2,368 are communicants. Station of the CMS, with (1903) 4 missionaries, one of whom his wife and 108 native workers, 6 day schools, 5 boarding schools, and 2,903 professed Christians, of whom 2,368 are communicants. Some write the name Toongoo.

TAUNGS: A town in Bechuanaland protectorate, South Africa, situated on the Hart River, 40 miles S. of Vryburg. Station of the LMS (1865), with (1903) 1 missionary and his wife, 8 native workers, 5 day schools, and 2,000 professed Christians, of whom 130 are communicants. Some write the name Taung.

TAUWANGA: A town in New Zealand, situated on North Island on the N. coast, about 90 miles S. E. of Auckland. Station of the CMS, with (1903) 1 missionary and his wife, 9 native workers, 5 day schools, and 1,000 professed Christians, of whom 158 are communicants. Grants of the CMS to the New Zealand native congregations ceased in 1902.

TAVETA: A settlement in British East Africa, situated S. E. of Mt. Kilima Njaro, about 60 miles S. W. of Tavoi on the railroad from Mombasa to Uganda. It is a wild country where a part of the missionary’s duties consists of shooting the lions and leopards that attack the people. Station of the CMS (1893), with (1903) 2 missionaries and their wives, 1 woman missionary, 6 native workers, 1 outstation, 121 professed Christians, of whom 41 are communicants; 1 place of worship, 3 day schools, 1 industrial class, 1 dispensary, and 1 printing house.

TAVOY: A town in Burma, India, situated in Tenasserim, on the Tavoy River, 30 miles from its mouth. The town lies low, and its northwestern and southern portions are flooded at high tide and swampy during the rains. It is laid out in straight streets, and the houses are generally built of timber or bamboo, thatched with palm leaves. Its trade is principally in rice. Population, 3,372, mostly Buddhist.

Station of the ABMU (1828), with (1903) 2 missionaries and their wives, 1 woman missionary, 50 native workers, 23 outstations, 24 places of worship, 24 Sunday schools, 20 day schools, 1 boarding school, and 1,727 professed Christians.

TA-YE: A village in Hsii-pei, China, situated about 45 miles S. E. of Wenchang-fu. Station of the WMS, with (1903) 1 missionary, 11 native workers, 7 outstations, 2 day schools, 11 places of worship, and 130 professed Christians, of whom 105 are communicants.

TE-AUTE: A settlement in New Zealand, situated on the North Island in the Hawkes’ Bay district, about 24 miles S. W. of Napier. Station of the CMS, with (1903) 2 missionaries, one of them with his wife; 29 native workers, 1 college, and 1,450 professed Christians, of whom 130 are communicants. The native congregations in this region are under the charge of the local church, grants for which ceased in 1902.

TEGWANI: A settlement in Rhodesia, Africa,
situated about 70 miles S. W. of Bulawayo. Station of the WMS, with (1903) 1 missionary, 5 native workers, 15 outstations, 15 places of worship, 4 day schools, and 130 professes Christians, of whom 22 are communicants.

TEHERAN: The capital of Persia, situated due S. of the Caspian Sea in latitude 35° 40' north, longitude 51° 25' east. It is a walled city, with narrow, ill-paved streets, the here and there Parisian boulevards and European houses present striking contrasts to the native quarters. The water supply is good and abundant, and public baths are numerous. The population of 250,000 consists of Persians, Turks, Armenians, and a few Jews and Parsees. The government established a polytechnic school here in 1849, with a certain number of European professors. Its students receive a liberal education. There is also a military school and Civil Service school, the latter opened in 1900.

The Imperial Bank of Persia has its chief offices in Teheran. It is an English establish-ment. Russian capital has also established two banking houses there. There is a railway of six miles length leading out of the city, and two canals draining ninety-five square miles north and south.

Station of the London Jews' Society (1888), with (1903) 1 missionary and his wife, 4 native workers, 2 day schools, also station of the PN (1872), with (1903) 4 missionaries, three of them with their wives; 17 native workers, 3 outstations, 1 place of worship, 2 day schools, 2 dispensers, and 40 professed Christians.

TEKENIKA: A settlement on Hoste Island, about 65 miles N. W. of Cape Horn. This is almost the last existing settlement of the Yahgans, who are becoming extinct. Station of the SAMS (1892), with (1903) 1 missionary and his wife, 1 place of worship, 1 boarding school, 1 orphanage, and 50 professed Christians.

TEKKALI: A town in Madras, India, situated in the district of Vizagapatam, about 30 miles N. E. of Chinecole. Station of the BMP (1898), with (1902) 1 missionary, 16 native workers, 1 outstation, 5 Sunday schools, 5 places of worship, 7 day schools, and 72 professed Christians.

TELLICHERI: A town and seaport on the Malabar Coast, India, situated 10 miles northwest of Calicut. A healthful and picturesque town built up upon a group of wooded hills running down to the sea, protected by a natural break-water of rock. It has a good harbor and an excellent trade. Population, 26,410, Hindus, Muslims, Christians.

Station of the Basel Missionary Society (1839), with (1903) 4 missionaries, three of them with their wives; 52 native workers, 6 outstations, 8 day schools, 3 boarding schools, and 591 professed Christians, of whom 324 are communicants. The name is written by Germaine Talatcheri.

TELUUS: A non-Aryan or Dravidian race inhabiting the east coast of the peninsula of Hindustan, India, north of the city of Madras and south of the Godavari River, and extending nearly 200 miles westward from the coast of the Bay of Bengal. The language of the Telugu is refined and has been called the Italian of Hindustan. The number of Telugu is placed at about 20,000,000 by the census of 1901.

TEMBE: A settlement in Portuguese East Africa, situated on the Tembe River, about 20 miles S. of Lourenço Marques. Station on the Swiss Romande Mission (1898), with (1903) 1 missionary and his wife, 1 woman missionary, 7 native workers, 7 places of worship, 7 Sunday schools, 7 day schools, and 417 professed Christians, of whom 102 are communicants. This place is at times spoken of as the Tembe.

TEMBER: A large village in the province of Cobels, Dutch East Indies, situated in the Minahassa district near Menado. Station of the Netherlands Missionary Society (1819), with (1902) 1 missionary and his wife and 1 theological class.

TEMPLE, Daniel: Born December 23, 1789, at Reading, Mass. Died August 9, 1851. The perusal of Dr. Buchanan's Christian Researches in India at his conversion led him to the decision to become a missionary to the heathen. He studied at Phillips Academy, Andover; Dartmouth College, and Andover Theological Seminary. He was ordained October 3, 1821, and embarked January 2, 1822, as a missionary of the ABCEM for Syria, reaching Malta February 22. Here he remained till 1833, the political condition of Turkey and Syria rendering it unsafe for a missionary family to settle there. He prepared books and tracts for circulation in Italy, Greece, and Turkey, which were printed on the press he took with him, widely distributed, and well received. In 1828, by invitation of the Prudential Committee, he visited the United States, and engaged in an agency for the Board for two years, returning to Malta in 1830. In addition to the superintendence of the press, he had during almost his whole residence here two services on the Sabbath in English in his own house, a Sabbath school which he taught himself, and also a lecture Friday evening. In 1833, by direction of the Society, he removed the Greek and Armenian part of the press plant to Smyrna. From 1822, when the press was established in Malta, to the time of its removal, were issued 350,000 volumes containing 21,000,000 pages. Nearly the whole had been circulated, and additional supplies of some of the works were urgently demanded. The arrival at Smyrna of a vessel with presses and printing materials, and an ordained missionary, aroused the fanaticism of the Greeks, and Mr. Temple was ordered by the government to leave the city in ten days. But after some correspondence with the consul the storm passed away. The Greek Ecclesiastical Committee brooke with the authorities, and permitted from six to eight hundred children, and forbade the teachers to remain with the missionaries, threatening them with imprisonment or banishment if they refused to obey. In 1837 Mr. Temple commenced the publication of a monthly magazine in Greek, The Repository, which met with much favor. The Greek patriarch forbade all his church members to read any of the missionaries' translations of the Scriptures in Turkish, Arabic, Servian, Bulgarian or Slavonian. During this year the plague raged with terrific violence at Smyrna. The Board shortly afterward decided to abandon the specifically Greek department of the mission. This left Mr. Temple no option but to return to the United States, which he did in 1844. He preached in Concord, N. H., and at Phelps, N. Y., but resigned his pastorate on account of ill-health December 27, 1849.

TE-NGAN-FU: A town in Hu-pei, China, situated about 50 miles N. W. of Hankow. Station of the WMS, with (1903) 1 missionary, 1 woman missionary, 7 native workers, 1 outstation, 6
places of worship, 1 day school, and 160 professed Christians, of whom 120 are communicants. Some write the name Tehogan.

TE-TSING-CHAU: A town in Kwang-tung, China, situated on the Hsi-kiang, about 90 miles W. of Canton. Station of the Reformed Presbyterian Missionary Society (1897), with (1900) 1 missionary and his wife and 2 native workers. Some write the name Tak Hing Chau.

TETUAN: A town belonging to Spain, in Morocco, situated on the N. coast, about 50 miles S. of Tetuan. Station of the GMA (1879) with (1903) 4 women missionaries, 1 Sunday school, 2 day schools, 1 dispensary, and 10 professed Christians.

TENG-CHAU-FU: A city in Shantung, China, on the coast of the Gulf of Chi-fu, 55 miles north-west of Chi-fu. This city is one of the most healthful places for Europeans in China. Station of the PN (1861), with (1903) 8 missionaries, seven of them with their wives; 2 women missionaries, 55 native workers, 19 outstations, 10 places of worship, 20 Sunday schools, 1 printing press, 20 day schools, 2 boarding schools, 1 college, 1 dispensary, 1 hospital, and 1 medical class, and 64 professed Christians. The college is to be removed to Wei-hsien. Also station of the SGC (1860), with (1903) 3 missionaries with their wives, 2 women missionaries, 6 native workers, 5 outstations, 4 places of worship, 2 Sunday schools, 3 day schools, 1 boarding school, and 220 professed Christians.

TEZPUR: A town of Assam, India, on the Brahmaputtra, 75 miles above Gauhati. The town is built on a plain between two low ranges of hills, upon which the houses of the European residents are built. It is an important seat of trade, where the river steamers touch to take on board tea, and to leave stores of various kinds to be distributed among the neighboring tea-gardens. Of late years the character of the houses and sanitary condition of the town have been much improved. Population, 2,910. Station of the SPG (1862), with (1903) 1 missionary, 24 native workers, 6 places of worship, 17 day schools, 1 boarding school, and 783 professed Christians, of whom 110 are communicants. Some write the name Tezapore.

THABA BOSIGO: A village in Basutoland, South Africa, situated 18 miles N. E. of Morija. Station of the Paris Evangelical Missionary Society (1837), with (1903) 1 missionary and his wife, 3 women missionaries, 20 native workers, 13 outstations, 14 day schools, 1 boarding school, and 2,029 professed Christians, of whom 1,379 are communicants. Some write the name Thaba-Bossou.

THABA MORENA: A village in Basutoland, South Africa, situated about 20 miles S. of Morija. Station of the Paris Evangelical Missionary Society (1892), with (1903) 1 missionary and his wife, 21 native workers, 10 outstations, 11 places of worship, 10 day schools, and 1,382 professed Christians, of whom 896 are communicants. Some write the name Thaba-Morena.

THABA'NCHU, or THABA NCHU: A settlement in the Orange River Colony, South Africa, situated about 30 miles E. of Bloemfontein. Station of the Wesleyan Methodist Missionary Society, with (1901) 1 missionary, 90 native workers, 6 places of worship, 6 Sunday schools, 12 day schools, 57 outstations, and 2,774 professed Christians.

THABOR: A town in Madras, India, situated in the district of Salem, about 15 miles N. of Salem. Station of the Danish Mission Society (1883), with (1901) 1 missionary and his wife, 1 place of worship, 1 Sunday school, 1 outstation, and 36 professed Christians.

THARAWADI: A town in Burma, situated in the district of Pegu, about 20 miles E. of Heng-zade. Station of the ABMU (1876), with (1903) 2 women missionaries, 64 native workers, 37 outstations, 27 places of worship, 10 Sunday schools, 15 day schools, 1 boarding school, and 1,524 professed Christians, of whom 902 are communicants. Some write the name Tharrawaddy.

THARRAWADDY. See THARAWADI.

THAYETMYO: A town on the Irrawaddi River, Burma, 25 miles from Prome. In the rains the place looks fresh and green, but during the dry season it presents a dreary appearance. Climate healthful, but excessively hot. Population, 5,379, who are mostly Chins. Station of the ABMU (1887), with (1903) 1 missionary and his wife, 7 native workers, 2 places of worship, 1 Sunday school, 2 day schools, and 170 professed Christians.

THLOTSE HEIGHTS: A settlement in Basutoland, South Africa, in the district of Leribe, near the Orange River, and about 15 miles E. of Ficksburg. Station of the SPG (1876), with (1903) 2 missionaries, 1 college, and 154 professed Christians.

THOBURN, Miss Isabella: The first missionary appointed by the Woman's Foreign Missionary Society of the ME Church after its organization in March, 1869. She was appointed to India and assigned to Lucknow, where she opened a boarding school for girls, beginning with one pupil. Before she died she saw completed and paid for the commodious building which now houses the great college for girls which has grown out of that humble beginning.

Altho Miss Thoburn's work was largely educational, her energies were not limited to that department. She was a born leader, encouraged and aided Zenana work, Sunday school work, and other forms of city missions, and made her home a place of recource to the tired worker and the poor, the weak and the fallen. She had a mighty influence among all classes, Christian and non-Christian, and through this influence on her scholars she impressed upon them her own spirit in a marked manner.

THONG-THAUAH: A village in Kwang-tung, China, situated about 50 miles S. E. of Canton. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 day school, and 125 professed Christians, of whom 110 are communicants.

THONZE: A town in Burma, India, situated in the district of Pegu, about 6 miles S. of Tharrawadi. Station of the ABMU (1855), with (1903) 1 woman missionary, 7 native workers, 3 outstations, 4 places of worship, 1 Sunday school, 1 day school, and 379 professed Christians. Some write the name Thongze.

THURSTON, Asa: Born at Fitchburg, Mass., October 12, 1787. Died at Honolulu March 11, 1868. Graduated at Yale College 1816, Andover
Theological Seminary 1819: embarked as a missionary of the ABCFM 1819, with others, who formed the first band of missionaries for the Sandwich Islands. As a missionary Mr. Thrus-ton ever labored with great usefulness and success. The nature of the native language and character was most thorough; and as a laborious preacher he was much beloved by the native Hawaiians. In the early years of the mission his labors as a translator were arduous and successful. He was stationed at Kailua, the ancient residence of the Hawaiian kings, and there for more than 40 years he continued to reside and as the honored pastor of a large and very important parish. He was the instructor for a time of both Kamehameha II. and Kamehameha III., and his influence over them, especially the latter, was great. Never once leaving the islands for 48 years, he was honored by natives and foreign-ers alike as a faithful, patient, persistent worker. Only when advanced age and repeated strokes of paralysis had rendered him incapable of service did he consent to resign his pastorate at Kailua, that he might spend the closing years of his life in Honolulu.

TIBERIAS, or TUBARIYE: A town in Palestine, Asiatic Turkey, situated 14 miles S.W. of the Sea of Galilee, about 35 miles E. by S. of Acre. Station of the U.S. Mission to the Jews (1884), with (1901) 2 missionaries, 13 native workers, 1 Sunday school, 2 day schools, 1 dispensary, and 1 hospital.

TIBET: One of the possessions of China, claimed to be an integral part of the Chinese Empire. It is a country of which very little is definitely known. Surrounded by high mountains, it has been to a great degree isolated from the rest of the world. Tibet is a corruption of the Chinese name; the people themselves call it the "land of Bed." The Kwanhn Mountains bound it on the north; on the east are the Chinese provinces of Szechwan and Yunnan; the Himalaya Mountains bound it on the south, and Kashmir on the west. Little Tibet does not properly belong to Tibet, tho it is claimed by Chinese geographers. The greater part of the surface consists of high tableland (elevation 11,510 feet), divided into two parts by mountain chains: the valley that is Indus, the west, between the Hindu Kush and Himalaya Mountains; the high desert land, almost uninhabitable and wholly unknown, lying between the Kwanhn and Himalaya Moun-tains; and the basin of the Yari-tsangbu on the east, consisting of high ridges and deep gorges, mountains and valleys. Numerous peaks of perpetually snow-capped mountains are here found, of which Mt. Kailasa (26,000 feet) is the highest.

The principal river, the Yari-tsangbu, drains the whole of southern Tibet between the first and second ranges of the Himalayas, and is supposed to empty into the Brahmaputra. The explorations have not yet been extensive enough to decide the truth. The Indus, the Yangtse, the Brahmaputra and other large rivers of Southern and Eastern Asia find their source in Tibet. In the central part are numerous lakes. The climate is varied, but in general the air is pure and excessively dry. Snow and ice last for most of the year, but in the middle of summer the valleys, even between the snowy mountains, are excessively hot. In the southern part moisture and vegetation are found, and sheep, goats and yaks are raised.

The government is conducted by two high commissioners appointed at Peking, but these confer with and are guided by the two grand officers of the Tibetan hierarchy, the Dalai-Lama and the Teshu-Lama: the former, known generally as the Grand Lama, is usually a child (supposed to be the reincarnation of the last Grand Lama) who is not suffered to live more than seven or eight years in his high office; and the latter being a regent who rules during the minority of the little Dalai-Lama. The power is practically in the hands of the priests or lamas, whose numbers have been calculated to 40,000, the name of the "kingdom of priests." The southern frontier is strongly fortified, and communication between Tibet and India or the intervening states is forbidden. On the Chinese frontier the same strictness is exercised, for the policy of exclusion is fostered alike by the British and the Chinese—the one because they wish to preserve their religious supremacy and fat offices, the other because they wish to retain their political power, faint tho it be. The present Dalai-Lama, as an exception to the policy of the last hundred years, has been permitted to spend a short time in Peking, and was sent back to India. Late in 1903 he went to Tibet again to insist upon a favorable answer. This time he was escorted by troops. The Tibetans refused to negotiate, and finally in March, 1904 attacked the embassy with armed force. This began a war with the British, which can only result in destroying, at last, the barriers erected by this strange people against the world.

Lhasa, the capital, has only once been visited by an Englishman—Thomas Manning, in 1811—and its location has but recently been fixed with accuracy. It lies in latitude 29° 45' N., and longitude 91° 55' E. It stands in a fertile plain, at an altitude of 11,700 feet, encircled by mountains. It is noted for the number of its monas-teries, boxxes and lamas, filthy streets and mean buildings. The population is estimated at from 40,000 to 80,000, and the population of the whole of Tibet, while unknown, is estimated at 6,000,000. The people belong to the Mongol race, and they are intensely religious. Their religion is of two kinds: the old original religion called the "Bon," of which little or nothing definite is known, and that form of Buddhism called Lamaism. The social customs of the people differ greatly from that of their neighbors on the east and south, particularly in the position which women hold. Here polyandry is the custom instead of polygamy, the wife being usually selected by brothers. In general, education is restricted to the priests, but the women, who conduct most of the traffic, learn writing and arithmetic. In some of the northern provinces the chieftainship is held by the women.

The language of Tibet is derived from the Sanskrit, is alphabetical, and reads from left to right. Thirty consonants are recognized,
with four additional vowel signs. Tibetan literature, as well as Tibetan customs, have been influenced to a great degree by China.

Missions are not permitted in Tibet. In former times the Roman Catholic Church made noble efforts to enter the forbidden land, and was for a time successful. In 1330 the apostle of Tibet, Father Zan, an Italian, reached Lhasa, the capital of Tibet, and found missionaries already in the city of Lhasa, who had gone there, it is supposed, early in the preceding century. In the 17th century a mission was commenced from India, and the reigning prince was favorable to the new religion; but his apostasy was made the pretext for his overthrow. Various attempts at evangelization have been made since that time. The most noteworthy one was in 1845, when Fathers Gabet and Huc penetrated to Lhasa after a journey of eighteen months, only to be arrested by the 734 mission and thrown into prison, to Canton.

From that time the Roman Catholic Missions have made numerous attempts both by way of India and China to enter the kingdom; but after suffering persecution and the massacre of their priests they have given up the effort, and one may judge by the few remaining stations where they work among the Chinese and such Tibetans as are there found.

The Moravian Brethren occupy three stations in Little Tibet—Leh, Poo, and Kailang—where they are waiting for opportunity. In Turkistan, One or two attempts have been made at great risk, but have proved ineffectual. They have studied the Tibetan language, and there are now several works which will aid the future missionaries to Tibet when the country is opened. A Tibetan-English grammar, a Tibetan grammar, and a New Testament in Tibetan have all been published. A prayer union has been formed among the Moravians, whose object is to pray for the opening of the land of priests to the preaching of the Gospel. The members of the Tibeto-English grammar, in whose work an impressive essay on the eastern frontier, in the province of Sz-chuan; the Christian and Missionary Alliance, located in Kansu, on the northeastern border; the Scandinavian Mission Alliance of North America; the Church of Scotland, the LMS, the CMS, and the American Foreign Missionary Society, have made preparatory efforts to enter this field. There is now some prospect that the Forbidden Land may soon be open to missionary enterprise.

Huc (L'Abbé E. R.), Travels in Tibet, Tartary and China (Translated from the French), 2 vol., London, 1846; Bower (H.), Diary of a Journey Across Tibet, London, 1871; Welleslly (O. A.), The Buddhism of Tibet, London, 1880; Lord (A. B. S.), In the Forbidden Land, London, 1899; Rinhart (E. C.), With the Tibetans in Tend and Temple, London, 1891; Cory (W.), and Taylor (Miss A.), Travel and Adventure in Tibet, London, 1903; Das (Sarat Chandra), Journey to Lhasa and Central Tibet, London, 1902.

TIEN-TAI-HSIENT: A town in Che-chiang, China, situated about 18 miles N. by W. of Tai-chau-fu. Station of the CIM (1898), with (1905) 1 missionary and his wife, 1 native worker, 4 places of worship, 1 Sunday school, 1 day school, and 170 professed Christians.

TIENTSAN: One of the most important cities of North China, situated at the junction of the Grand Canal with the Pei Ho, 30 miles from the sea and 80 miles southeast of Peking. It is the port of and "key" to the capital, and is famous as the place where in 1858 the treaties were made, and where in 1900 the allied forces encountered long and fierce resistance on attempting to move for the relief of Legations in Peking. As a result of the fighting at this place a considerable part of the native city was destroyed. The walls of the city were razed to the ground and fine roads constructed in their place. Since the restoration of peace the foreign settlements at Tientsin have expanded, and the place became quite a handsome town. Climate healthful and pleasant; maximum temperature 100°F. Population, 900,000.

Foreign missions entered the town in 1859, when the Methodist New Connexion sent their first missionaries to China. The CIM was followed by the ABCFM (1850); LMS (1851); ME; CIM (1888); Church of England (SPG); North China Mission (1890); the Scandinavian Alliance, and the Christian and Missionary Alliance. These two societies last named do not publish clear statistics. The other societies named above have (1903) in Tientsin and dependencies 37 missionaries, 45 native workers, 25 places of worship, 12 day schools, 7 boarding or special schools, 2 hospitals, 5 dispensaries, and 718 professed Christians. The YMCA has a station here and the BFBS and the National Bible Society have agents and a large force of colporteurs.

TIERRA DEL FUEGO: An archipelago at the extremity of South America, separated from the mainland by the Strait of Magellan. The islands are divided into three groups: East Fuegia, including one large island 200 miles long from north to south; South Fuegia, a triangle of numerous small islands, with Cape Horn at the apex; and West Fuegia. The climate of most of the archipelago is cold and disagreeable, and fogs and high winds make navigation difficult. A line from Cape Espiritu Santo due south to Beagle Channel divides the archipelago between the Argentine Republic on the east and Chile on the west. Three races are recognized among the inhabitants: the Onas, the Alacalufs, and the Yahgans. They are all on a low scale of mental and moral life; they wear little or no clothing, kill the old women and eat them, throw their children overboard to propitiate the storms, murder, and indulge in other barbaric customs. The language has been reduced to writing by the missionaries, and is said to contain 30,000 words. The South American Missionary Society works among the Yahgans almost exclusively, from Ushuaia, a station on Beagle Channel, on both sides of which this race is found. The Yahgans are rapidly dying out, and while there are many interesting cases of conversion and many promising children in the mission schools, the future does not seem to offer permanency of results.

TIFLIS: A town in Asiatic Russia and capital of Transcaucasia, on the Kur River. It is a mixture of Asiatic and European, with the old part being built of sun-dried brick, and containing all the bazaars and business life of Tiflis, the modern part resembling any European city. Tiflis was for centuries a stronghold of refuge for Eastern Christianity when attacked first by the Persians and later by Islam. Its population is now (1905) largely made up of Armenians. Its situation is extremely picturesque, forming a depression surrounded on all sides except the north by mountains. Altitude, 1,350 feet. Population (1892) 146,790. Station of the Swedish National Missionary Society (1852), with 2 missionaries and their wives, 1 place of
worship, 3 day schools, and 1 Sunday school. The restrictions of Russian law against missionary effort prevent much work outside of the recognized Protestant families. Climate hot and unhealthy, but the place is popular on account of the warm mineral springs in the vicinity.

TIFOE: A village on the island of Buru, Moluccas, Dutch East Indies, situated on the S. coast in the extension of the Dutch settlements. Under Mission Society (1888), with (1903) 1 missionary and his wife, 9 native workers, 11 outstations, 10 day schools, and 1,748 professed Christians.

TIKARI: A town in Bengal, India, situated in the Gaya district, 50 miles S. of Patna. Station of the BZM (1885), with (1903) 2 women missionaries, 10 native workers, 2 Sunday schools and 3 day schools.

TILLIPALLY: A large town in Ceylon, East Indies, on the north shore of the peninsula of Jaffna, at the northern extremity of the island. Climate tropical, damp, but very healthful for young children. Population, 21,698. Caste rule is rather relaxed here, so that one is not expelled from the caste class for marrying a woman of another caste. Station of the ABCFM (1831), with (1903) 1 missionary and his wife, 54 native workers, 5 outstations, 29 day schools, 1 boarding school, and 365 professed Christians.

TINANA: A settlement in Cape Colony, South Africa, situated in Griqualand East, about 12 miles W. of Bokha and 3 miles S. of Fletcherville. Station of the Moravian Mission Society (1875), with (1903) 1 missionary and his wife, 20 native workers, 2 outstations, 3 places of worship, 2 Sunday schools, 5 day schools, and 338 professed Christians.

TINDIVANAM: A town in Madras, India, lying about 25 miles N.W. of Pondicherry and 75 miles S. W. of Madras. Station of the RCA (1868), with (1901) 1 missionary and his wife, 89 native workers, 39 common schools, 34 Sunday schools, 1 high school, 38 outstations, and 629 professed Christians.

TINNEVELLI: A district in the southeastern part of the Madras Presidency, in India. It contains an area of 5,381 square miles, at the southeastern point of Hindustan, bounded on the south and east by the sea, on the west by the Chats, which separate it from Travancore, and on the north by the district of Madura. The history of the district is involved with that of Madura. After centuries of Hindu rule the Mohammedans came, and after them came a half-century of anarchy, which was ended in 1801 by thecession of the whole region to the English. The population of the district (1891) is about 1,916,000. Christianity has taken firmer root here than in any other district in India. Statistics show that between 1871 and 1881 the Hindus lost 21 per cent., while the Mohammedans gained nearly 6 and the Christians over 57 per cent. The number of baptized Christians connected with the SPG and CMS missions was 59,203 at this time, of whom 13,265 were communicants. There were also about 40,000 more under instruction for baptism. Ninety-five per cent. of them belong to the Shinar caste, who live by the culture of the Palmyra palm. Protestant missionary work was begun in the town of Tinnevelly about 140 years ago, by the Danish missionaries at Tranquebar, who, with their native preachers, made occasional tours to the south. But no Christian preacher seems to have resided there permanently before 1771, when a native preacher took up his residence in Palamkotta, three miles from the town of Tinnevelly; no European missionary was stationed there until the year 1788, when Rev. J. D. Jaenicke was sent there. He died in 1800. The missionary Schwartz also traveled in the district. The SPG maintained the mission at Palamkotta about 1827, when it became the Madras Church Missionary Society, and in 1825 it transferred its work in the town of Tinnevelly to the SPG. These two societies have since divided the work in the district between them. Christianity had begun to exert no small degree of influence at the time the work was transferred to the societies that now conduct it, and since then the work of conversion has proceeded with great vigor. About the year 1877 Rev. R. Caldwell, D.D., of the SPG, and Rev. E. Sargent, D.D., of the CMS, were consecrated bishops assistant to the Bishop of Madras, for the purpose of affording better episcopal supervision to the work of their respective societies in that district. In 1896 the Bishopric of Tinnevelly and Madura was instituted, and the supervision was thus simplified.

The CMS (1819), the SPG (1825) and the CEZ (1874) are working in the Tinnevelly district, with (1903) 38 missionaries, men and women; 1,497 native workers, men and women; 697 day schools, 26 boarding schools, 1 orphanage, 1 theological training school, 2 colleges, and 90,813 baptized Christians. Among the special lines of work may be mentioned the schools for the blind carried on by the CMS and the Palamkotta School for the Deaf and Dumb, established by the CEZ.

TINNEVELLI: A town in Madras, India, the capital of Tinnevelly district, situated about 40 miles W. S. W. of Tuticorin. Population, 23,221. Station of the CMS (1820), with (1905) 1 missionary and his wife, in the district 681 native workers, 413 day schools, 1 college, and 54,970 professed Christians, of whom 13,493 are communicants. The congregations in the surrounding district are united in a Native Church Council, of which the chairman is the CMS missionary.

TIRUKOVLIR: A town in Madras, India, situated in the S. Arcot district, 50 miles N. W. of Cuddalore. Station of the Danish Mission Society (1869), with (1903) 2 missionaries and their wives, 1 Indian missionary, 9 native workers; 2 places of worship, 2 day schools, 1 boarding school, and 402 professed Christians. Some give to this place the name Siloam.

TIRUMANGALAM: A town in Madras, India, situated about 10 miles S. W. of Madura. Station of the ABCFM (1838), with (1903) 1 missionary, 59 native workers, 50 outstations, 24 places of worship, 29 Sunday schools, 19 day schools, 1 boarding school, and 1,500 professed Christians.

TIRUPATI: A town in Madras, India, situated about 77 miles S. E. of Cuddapa. Station of the Hermannsburg Missionary Society (1877), with (1903) 1 missionary and his wife, 36 native workers, 2 outstations, 1 place of worship, 3 day schools, 1 boarding school, and 160 professed Christians, of whom 144 are communicants.

TIRUPATUR: A town in Madras, India, situated in Salem district, about 65 miles N. E. of Salem. Population, 14,278 (Tamil). Station
of the LMS (1861), with (1903) 1 missionary, 26 native workers, 11 outstations, 5 Sunday schools, 11 day schools, and 197 professed Christians, of whom 123 are communicants. Some write the name Tripatoo.

TIRUVALUR: A town in Madras, India, situated in the North Arcot division, about 24 miles W. of Madras. Station of the Leipzig Missionary Society, with (1903) 26 native workers, 15 places of worship, 20 day schools, 14 outstations, and 1,914 professed Christians, of whom 707 are communicants. Also station of the WMS, with (1903) 2 missionaries, 2 women missionaries, 118 native workers, 27 outstations, 44 places of worship, 64 Sunday schools, 72 day schools, 2 boarding schools, 1 hospital, and 928 professed Christians, of whom 484 are communicants.

TIRUVANNAMALAI: A town in Madras, India, situated in the S. Arcot district, about 50 miles S. of Vellore. Station of the Danish Missionary Society (1899), with (1903) 1 missionary, 5 native workers, 1 day school, and 22 professed Christians.

TIRUWALLUR. See Tiruvalur.

TIRUWELLA: A town in Trivancore, India, situated 20 miles S. E. of Allepia. Station of the CMS (1849), with (1903) 1 missionary and his wife, 62 native workers, 40 day schools, 2 boarding schools, and 7,000 professed Christians, of whom 1,957 are communicants. The churches in this vicinity are joined in a Church Council of their own.

TJIDERES: A village in Java, Dutch East Indies, situated about 50 miles S. E. of Cheribon. Station of the Netherlands Mission Union (1878), with (1903) 1 missionary, 3 native workers, 1 outstation, 1 hospital, and 191 professed Christians, of whom 77 are communicants.

TOBAGO: An island in the West Indies, lying northeast of Trinidad, of which it is a dependency. It is a rocky mass rising abruptly to a height of 900 feet. There are several good harbors. It was settled by the Dutch in 1654, taken by the French and finally by the English in 1763. Area, 111 square miles. Population (1892) 19,594. Missions are carried on in the islands by the Moravians (1790).

TOBELO: A village on the island of Halmahera (Jilolo), Moluccas, situated in the N. part of the island. Station of the Utrecht Missionary Society (1897), with (1901) 1 missionary and his wife, 14 native workers, 10 day schools, and 21 professed Christians.

TODAS: These people, who live in the Nilgiri hills in India, are generally looked upon as a remnant of the primaeval race of Mysore, existing, like driftwood, on the heights above a changeable world. They belong to the Dravidian race which has peopled the land from time immemorial. A description of their characteristics is given by one of the missionaries as follows: The Toda is striking in appearance, with well-marked features, hazel eyes, and an abundant growth of wavy hair, hanging to its full length in well-oiled ringlets. The single unbleached cloth which envelops him often presents a study in sepias, as he wears his cloth, and rarely himself, from birth to death. The fine in physique, the tribe is numerically small; yet not so small as to preclude the existence of at least five castes, observing the usual social restrictions. The form of marriage known as polyandry is still prevalent, one woman marrying all the brothers of a family. Only eighty years have passed, a way since the barbarous custom of female infanticide was discontinued, through the moral influence of the first English who penetrated these benighted regions.

The odorous abode of the Todas consists of scattered "munds" or villages of from three to five persons, and extends after a style of architecture peculiar to the tribe. The hut, twelve feet square, has a capacity which is truly marvelous, for the accommodation of relatives of both sexes and all ages. The only ventilation is derived from the diminutive doorway, two-and-a-half feet by one-and-a-half, and the most of ingress and egress can scarcely be called dignified.

It has been said, in regard to the religion of the Todas, that there exists "a partiality to the regard of light—apart from fire—as par excellence, the manifestation of deity." The bell worn by a succession of sacred cows is revered as the "chief god." Only members of the priestly clan are permitted to tend the sacred buffaloes, and officiate as "pujarris" or priests to the Bell-god, assuming the title of "Goon-patra," and they have not, so far as yet, allowed the simple faith of their forefathers to be adulterated with Hinduism and assumes the form of the worship of spirits which are feared as capable of evil.

Content if he may know enough to tend his father's buffaloes in the "male sex," the Toda resort not of personal improvement or social duties. In true Eastern placidity he lives, in hope that, at the end, the "Lord of life" will receive him into "the other district," as he calls the unseen world. There he believes he will dwell under conditions similar to those of the present, for the buffaloes at his decease are supposed to supply him with milk and ghee in the new life; and the coins burnt with the body are intended for the keeper of the thread-bridge, which the soul must pass on its pilgrimage—tho they mostly fall into the hands of the mahout village sweeper.

A curious feature of the Toda social system is their custom, still preserved in some degree, of demanding and receiving a dole of grain at harvest from the surrounding farmers. The grain is demanded as tribute for the use of the land. It is paid at harvest as charity.

The name of this curious people is sometimes written Todar and Todawar.

TOGOLAND: A German possession in West Africa, lying on the Gulf of Guinea, and having an area of 33,160 square miles and a population estimated at from one to two millions. The coast line is but 22 miles, the country widening to several times that dimension in the interior. It is situated between the French colony of Dahomey on the east and the British Gold Coast Colony on the west, and extends back from the coast some 250 miles. It was declared a German protectorate in 1884. The coast climate is unhealthful for Europeans; the interior hilly and well watered with streams. Good roads connect Lome, now regarded as the capital, with Misahahe and Atakpame, and there is a narrow gage railway between Lome and the Little Popo. Telegraphs connect the chief towns and extend into Dahomey and the Gold Coast Colony, thus providing cable communication with Europe. The German Government is represented by the Hamburg and Bremen traders, settled in the seaports, who cannot as yet vie with the village
chiefs and fetish priests in influence over the people. Two tribes between the Ogun and Volta Rivers belong to the Ewe family, and from them the region takes the name "Ewene."

The North German Missionary Society has 4 stations in Togoland and the Basel Society 1 and the WMS 1. The whole force of missionaries and native workers is 170, with 69 schools and about 3,500 communicants.

**TOKAT:** A town in the province of Sivas, Asiatic Turkey, situated about 76 miles S. of Samsun. Henry Martyn died and was buried here. Population, 10,000. Outstation of the ABCFM. Statistics given under Sivas. Station of the FCMS (1884), with (1900) 1 missionary, 4 native workers, 5 outstations, 3 places of worship, 4 day schools, 5 Sunday schools, and 233 professed Christians. Some write the name Tocat.

**TOKELAU ISLANDS:** A group of small islands in Polynesia, N. of the Samoan Islands, southeast of the Ellice group. These islands, together with the Ellice and Gilbert groups, are visited annually by missionaries of the LMS at Samoa. Native ministers and elders are admitted to membership in the church membership of 3,374 (1903) in the three groups, and several thousand pupils are in the Sunday and day schools.

**TOKYO:** Capital of Japan, formerly called Yeddo. It is situated in the center of a great plain, which extends back from the water to the mountains for a distance varying from twenty to sixty miles, and borders the shores of the Bay of Tokyo for about a hundred miles. There is thus no want of land over which the city may extend. Already it occupies about 28 square miles, and as far as the extent is concerned, it is second only to London. The city lies at the northwest end of the Bay of Tokyo. Through the city runs the O-gawa, or Great River, dividing it into an eastern and a western part. Numerous canals penetrate the city at various points, and on the coast is another river, Naka-gawa. The city is divided into various sections for purposes of government and postal delivery. Here are found the numerous palaces and public buildings of the government; the temples of Buddha, Confucius, and various Japanese deities representing the old civilization and the old religion; but side by side with these stand the distinctively Christian buildings, together with the Imperial University, School of Engineers, and the numerous other institutions of learning, whose influence is rapidly lessening the number of worshipers at the ancient shrines, so that a few years from now they will probably be museums of antiquities rather than temples to which worshipers are drawn through fear and superstition. The rapid strides which European civilization is making in Japan can be seen nowhere better than in this city. Alongside the old stone wall, surrounding the race grounds, with its moat—one tortuous ribbon of variegated colors from the lotus flowers, which bloom there in summer—stand the electric wires for the telegraph and telephone. The puffing smoke of the railway-engine overcomes the pungent odor of the lime in the temples; gas is used for lighting streets and places of entertainment; with its attendant conveniences and luxuries, is thoroughly permeating the life and habits of the citizens. Not only is Tokyo within easy reach of Yokohama, 10 miles away by rail, but it is an important railway center. One of the numerous bridges which span the watercourses of the city is called the tokyo bridge, the technical name for the giant suspension bridge over which trains are connected, with which all distances are reckoned. The population (1908) is 1,440,121.

Missionary societies commenced their work in Tokyo almost as soon as the empire was opened to the outside world. At present the societies engaged in work in Tokio and its surroundings are the following, with the date of their entrance upon work in the city: PN (1869); ME (1872); PE (1873); SPG (1875); ABM (1874); CMS (1874); RCA (1876); Evangelical Association (1877); MOC (1879); RCUS (1880); General Evangelical Church of Germany (1885); APFM (1885); Christian Church (1888); PB (1888); Universalist, U. S. (1900); ABCFM (1890); FCMS (1891); UB (1895); SDA (1896); Methodist Protestant (1900); ELUS; Scandinavian Alliance; Synod of the Norwegian Evangelical Lutheran Church of N. A. The YMCA also has an agency here, with two men and their wives; the Salvation Army has a post, and the Mission to Lepers in India and the East cares for a leper hospital. Connected with these societies there are (1903) in the aggregate in Tokio and its outstations 168 missionaries, men and women, 309 native workers, men and women; 102 places of worship, 23 day schools, 25 boarding or special schools, 2 hospitals and dispensaries, 4 publishing houses and 7,937 professed Christians, including baptized children.

**TOKUSHIMA:** A town in Shikoku Island, Japan, situated on the E. coast. Population, 59,969. Station of the CMS (1888), with (1903) 2 women missionaries, 7 native workers, and 205 professed Christians, of whom 105 are communicants. Also station of the PS (1889), with (1903) 2 missionaries and their wives and 2 women missionaries.

**TOYKO.** See Tokyo.

**TOLEDO:** A village in British Honduras, situated on a small bay about 60 miles S. by W. of Belize. Station of the WMS, with (1908) 1 missionary, 2 outstations, 3 places of worship, 4 Sunday schools, 72 day schools, and 72 professed Christians, of whom 69 are communicants.

**TONG-AN.** See Tung-nan-hsien.

**TONGA ISLANDS** (Friendly Islands): A group in the South Pacific, extending from 18° 5' to 22° 29' south latitude, and from 173° 52' to 176° 10' west longitude, was discovered by Tasman in 1643, and named Friendly Islands by Captain Cook, but is now called Tonga, after the principal island. There are about 150 islands in three separate groups, comprising a total area of 374 square miles. Part of these are of volcanic nature, but a majority of the islands are level and covered with rich, productive soil. The principal island is Tonga or Togatahu, 128 square miles in area, on which is situated the capital, Nuku'alofa. Earthquakes are frequent, and at times volcanic eruptions have taken place. The climate, like that of Fiji, is warm and humid. Southeast trade-winds blow except for a few months in the winter. The islands are now Christianized, and the government is under the protectorate of Great Britain. Formerly Tonga was noted for cannibalis, infanticide and other crimes characteristic of savages. The people are intellectually far in
advance of most of the Polynesian race, and have at one time and another conquered many of the surrounding islands. Nearly every one can read, and many can write. Many families are wealthy, and skillful sailors. They number (1901) 19,000, of whom 300 are Europeans. The triumphs of the Gospel in Tonga, the devoted zeal of the king, and the proud position which Tongan converts have held as pioneers of Christianity to Fiji and other Polynesian groups are striking testimonials to the civilizing and regenerating power of Christian missions. In these islands colleges have been established, where young men and women are being trained for Christian service.

The evangelization of the Tonga Islands is one of the fruits of the effort of the WMS. The Tonga churches are now, however, a district in connection with the Australasian Methodist Missionary Society.

TONGAREVA, or PENRHYN ISLAND: A small island in Polynesia, east of the Tokelau Islands, west of the Marquesas, and north of the Society Islands. It is visited from Raratonga.

T'ONG-CHI. See Tung-chi-hsien.

TONGOA: A settlement in the S. W. part of the island of Espiritu Santo, New Hebrides. Station of the New Hebrides Missionary Society, with (1901) 2 missionaries, one of them with his wife; 1 woman missionary, 28 native workers, 3 outstations, 2 places of worship, 1 day school, 1 theological class, and 730 professed Christians.

TONG-SHAN: A town in Chi-hi, China, situated about 70 miles N. N. E. of Tientsin, on the road to Manchuria. Station of the Methodist New Connexion Society (1884), with (1901) 2 missionaries and their wives, 25 native workers, 43 outstations, 44 places of worship, 8 day schools, 1 boarding school, 1 hospital, and 541 professed Christians. Also station of the PB, with (1901) 3 missionaries, two of them with their wives, and 1 woman missionary. Some write the name T'ang-shan.

TONKIN (Tonquin): A French colony in Asia, on the borders of the Gulf of Tonkin, lying between the Chinese provinces of Kwang-tung and Yunnan on the north and Annam on the south and west. It was annexed by France in 1885. It is divided into three administrative divisions, with an estimated population of 6,000,000. Hanoi, the chief city, is a union of many villages, with an aggregate population of 150,000. The Roman Catholics are at work in Tonkin, and claim a large membership.

TOONDEE: A village in Bengal, India, situated about 40 miles S. of Mandhepur. Station of the U.T.S., with (1903) 1 missionary, 12 native workers, 1 boarding school, 7 day schools, 1 dispensary and 1 printing press. The church statistics are included under Santalia.

TOOOGOO. See Taung-nou.

TURREON: A town and railroad junction in Mexico, situated in the State of Coahuila, close to the border of Durango, near Lerdo. Station of the SBC (1890), with (1903) 1 missionary and his wife, 5 native workers, 22 outstations, 6 places of worship, 6 Sunday schools, 1 theological class, and 471 professed Christians.

TOTTORI: A town in Japan, situated near the N. coast of the main island, about 90 miles N. W. of Kioto. Station of the ABCFM (1890), with 2 missionaries, one of them with his wife; 5 native workers, 2 outstations, 2 places of worship, 3 Sunday schools, 1 boarding school, and 62 professed Christians.

TOY, Robert: A missionary of the LMS to Madagascar from 1862 to 1880; stationed at Atanarantso (1863). In 1863 he organized a native church at Ambohipotse, in the capital, and of the connected country churches. In November, 1868, the Memorial Church at Ambohipotse was opened, of which he took charge, and besides his other duties was occupied in a revision of the Malagasy version of the Bible and other literary work in the Malagasy language. The theological seminary for native ministers was founded by Mr. Toy in 1869, with the efficient aid of Mr. G. Cousins. His health failing, he went to England in 1870. Returning in 1873, he resumed his work in the theological institution, and in addition assisted in the revision of the Malagasy Bible. In 1877 the church at Faravohitra and its surrounding districts was added to his college work. In 1879, his health having seriously failed, he again sailed for England, and died on the voyage, April 19.

TOYOHASHI: A town on the main island, Japan, situated on a bay of the S. coast and on the railroad between Nagoya and Shizuoka. Station of the CMS (1896), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, and 38 professed Christians, of whom 14 are communicants. Also station of the ME, with (1903) 1 native worker.

TOZER, William George: Universities' Mission; Bishop of Central Africa. Born in Devonshire, 1829. Died, 1899. He was consecrated on February 2, 1863, in Westminster Abbey, and in the summer of that year he arrived in the Shiré district. Zanzibar was selected as the most favorable point from which to carry the Gospel to the tribes of Central Africa.

All the principal towns of the East African coast are situated on islands; and Bishop Tozer appreciated the fact that Zanzibar, the chief commercial center of East and Central Africa, would afford special advantages for a settlement of European missionaries. He arrived here in August, 1864, and from the beginning of his work he foresaw the necessity of training up a native ministry in Central Africa, where, in less than forty years, the mission lost six bishops, twenty-seven members of the clergy and forty-six lay workers. To this work he addressed his best energies. Having somewhat organized the work on the island, Bishop Tozer turned his attention to the mainland, and there he had the privilege of first planting the Church. The country of Usambara, north of Zanzibar, with its ports of Pangani and Tanga, seemed to be the most accessible and favorable district, and here he established flourishing mission stations. The success of the mission at Zanzibar was interrupted in 1868 by cholera, and in 1872 a terrible hurricane "left everything a complete wreck." All the mission party were safe, and, led by the Bishop, order was soon restored, and the mission work resumed. For six years Bishop Tozer, enfeebled in health, made his home in London; in 1879 he attempted episcopal work in the dioceses of Jamaica and Honduras, and in 1888 he became vicar of South Ferry, the regaining his health. The end came after two strokes of paralysis.

TRACY, William: Born at Norwich, Conn.,
June 2, 1807; studied at Williams College and at Princeton Theological Seminary; was ordained April 12, 1836; sailed November 23, 1836, for India as a missionary of the ABCFM, and, after spending two months at Madras, reached Madage, October 9, 1837. He worked there twenty-two years of Mr. Tracy's life were spent. More than 250 young men passed through the course of study. Few classes left him in which nearly all were not Christians, a large number of them engaging in evangelistic work and others occupying honorable posts in government service. Mr. Tracy was an efficient member of the Revision Committee of the Tamil Bible. He died at Tirupuvanam, South India, November 28, 1877, aged seventy, and in the forty-first year of his missionary service.

**TRAINING SCHOOLS for Missionaries:** Every young man and woman who is physically fit to be sent to the mission field has, upon a mission basis, reason to expect at least twenty-five years of active service. How to make every one of these years most effective is the problem both for the individual and the society which commissions him. His preparatory work must be done partly at home, partly after his arrival at his station. The whole of his equipment cannot be secured before reaching the field. But it is surely advisable to get in the homeland as thorough a training as possible in those subjects and methods which are essential to the best work.

**Adequate Preparation** is a needed watchword in the missionary movement. It is easily conceivable that a year of special training may double the missionary's power in every one of those twenty-five or more years of service; two years may quadruple it. To neglect or belittle this truth is foolish and hurtful. That it has been too lightly esteemed in the past is admitted by those most skilled in the science of missions and most experienced in their operation. Dr. Gustav Warneck said in the Ecumenical Conference of 1906: 'What we need beside expert mission directors is a whole new breed of missionaries capable for their great work.'

**The petition that the Lord of the harvest should send forth laborers into His harvest has also reference to their quality.**

If appeal be made to the missionaries now in action, most of them will complain that however much general education they may have received, they lacked training to meet most effectively the conditions existing in their fields of labor.

In order to raise materially the standard of missionary qualifications two things are essential: **stimulus** and **machinery.** The former must be furnished mainly by the societies which decide upon the qualifications of candidates. These may, at will, raise the standard of requirements for obtaining commissions. The latter must consist of schools managed and equipped according to the highest science and strength of the Christian Church.

Missionary training schools are numerous. A comprehensive list of them may be found in Dr. Dennis' *Centennial Statistics.* Most of these are of great service to the men and women who seek their aid to qualify for mission work, city, home, or foreign. Do these meet the requirements of the time and the cause? No invidious distinctions shall here be drawn nor dogmatic opinion expressed. A noted secretary of one of the largest American Foreign Mission Boards writes: 'It is impossible to find a school that we have in our minds has not as yet been utilized.'

**We feel the need of some institution that will train our young women and laymen satisfactorily and also give some opportunities for finishing off young men from the theological schools.'**

An attempt is here made to indicate what 'the ideal school' must give to those purposing to join the missionary ranks. All will agree with Dr. Warneck when he says: 'Spiritual equipment is, of course, the chief consideration.' This is a matter that cannot readily be included in a scheme of subjects. In one sense too much emphasis cannot be placed upon the preparation of heart; yet this further statement from the same eminent authority is no less weighty: 'The experience of more than a hundred years should prevent us from falling into the mistake of thinking that this alone suffices without a thorough training.'

**Quality of the Preparation:** The special training needed by missionaries is indicated by the abnorm...
3. History of Missions and the principles on which they are conducted.
4. Psychology and Pedagogy: Most missionaries teach or supervise schools. Many must train native teachers. There are 100,000 pupils in mission boarding and training schools, many of whom are preparing to be teachers. They should have the best training. All who deal with the abnormally ignorant classes have special need of acquaintance with the laws of mind and of teaching. Kindergarten training is most helpful. Rev. J. L. Barton, D.D. Secre-
tary of the I.M.M.T. "I heartily believe in a pedagogical course for the most of our mission-
aries."
5. Elementary medicine, surgery and nursing: There are special schools for regular physicians and nurses. The Missionary Training School is to give all other students such training as will fit them to render intelligent "first aid" to the sick or injured.
6. Principles of Hygiene, or Health Lectures.
7. Technical craft and business methods: "I have been training in carpentry, photography, and stereopticon management, agriculture or at least gardening, book manufacture, and even in blacksmithing. Both men and women should have drill in bookkeeping and in modern methods of filing correspondence and other documents.
9. Language of the people to be reached: It is not practicable to teach many oriental vernaculars in the home schools. But such comprehensive languages as Arabic, Chines, Hindustani and Turkish might be given. As showing that such a scheme is not impracticable two actual courses are her given, one for men, the other for
10. Church Missionary Training College at Islington. In addition to regular instruction, in theology, a course is given in (1) Elementary Medicine and Surgery; (2) Principles and Practice of Teaching; (3) Vocal Music; (4) Carpentry, Bookmaking, Printing, Tinsmithing and Blacksmithing; (5) Religious Systems of the pagan world.
11. The Training Institute for Women of the U.M.S., which gives instruction in (1) The Study of Scripture; (2) Christian Doctrine; (3) Introduction to the Bible; (4) The Hindustani Language; (5) Theory of Education, Kindergarten Principles, Nature Studies, Class Teaching and School Visiting; (6) Voice Culture and Singing; (7) Account Keeping; (8) Drill Exercises; (9) Nursing; (10) Care of Health; (11) History of Missions; (12) Non-Christian Religions; (13) Sociology, from the missionary standpoint; (14) Evangelistic Theology.
"Missionaries must be weighed, not merely counted," says Dr. Warneke. "Thorough training" is his prescription for their need. The vital question presses: have the 17,000 missionaries in the foreign mission service the weight obtain-
able through a practicable preparation? The ordained men number more than 5,000. Has the theological school given a training specific enough for their needs? The physicians, men and women, are more than 700. Have they been fitted most effectively to minister to the darkened spirits in the sick bodies? Unor-
dained men, not physicians, to the number of about 10,000, are most numerous. They are an equal number; married women, more than
4,000. How many of these are lamenting the lack of "thorough training"? The best prepara-
tion is none too good for the missionary; it will not be wasted upon the Master's work for the heathen.

TRANSVAAL COLONY: A colony of Great Britain in S. Africa, conquered from the Boers, who governed it as the South African Republic prior to 1900. At the date of annexation the area was 119,139 square miles, but in 1903 about 7,000 square miles, constituting the provinces of Vryheid and Utrecht and a part of the Waker-stroom district, were annexed to Natal. The State Almanack of the Transvaal for 1898 gives the population at 1,094,156, with a stock of 245,397 are returned as whites. The population has undoubtedly decreased in consequence of the war.

The colony lies between Matabilland on the north and Natal and the Orange River Colony on the south, west from Portuguese East Africa to Bechuanaland. It lies about 50 miles from the ocean at Delagoa Bay, and has a mean altitude of over 3,000 feet. The upland region drained by the Vaal River (Hooge Veld), from 4,000 to 7,000 feet high, includes most of the richest mineral districts, and has a healthful climate. The eastern ter-
trace lands (Banken Veld) include Swaziland and the Upper Maputa Valley. These lands are low-
lying, some being not more than 2,000 feet high. Bosch Veld, the inner plateau, 3,000 to 4,000 feet high, is a steppe land, and suitable for grazing. On the whole, the climate is invigorating. Along the river valleys and in the low-lying dis-
trees fever is endemic. The rainfall is unequally distributed. The land is fertile. Thesettlers have chiefly housed themselves in upland country. The rainfall proves very destructive in the river tracts and terrace lands. A steppe belt 40 miles wide along the Limpopo bars the progress of settlement in that direction.

The missionary societies operating in the Transvaal are the Berlin Mission Society, the Mission Romande (French Switzerland), the Hermannsburg Missionary Society, the WMS, the SFG, the African Methodist Episcopal Church, the National Baptist Convention, the South African Baptist Society, and the ABCFM. These societies occupy 40 missions, of which 24 are stations of the Berlin Society. The ag-
gregate working force is 611 missionaries and native workers, men and women, with 61 schools of various grades and about 5,000 communicants.

TRANCHEBAR: A town in Madras, India, on
the edge of the Bay of Bengal, about 150 miles
south of Madras. It is situated in the delta of the Caveri River, 22 miles N. of Nagapatan. The town, with a small area of country, was obtained by the Danish East India Company in 1616, and held by the Danes until 1815, (with the exception of a few years), when, with Serampur in Bengal, it was sold by them to the English. Under Danish rule it was a place of some political and commercial importance, which in recent years, by the diversification of business to other centers, it has almost wholly lost. The popu-
lation is about 5,000, chiefly Hindus. The chief interest which Tranchebar possesses for us con-
ists in the fact that it is the earliest Protestant Missionary station in India. Here Bartholomew Ziegenbalg and Henry Flutschau, the pioneers of the great army of Protestant evangelists, settled in 1706. They labored under the greatest difficulties, and yet within three and a half years a Christian community had been gathered, numbering 160 persons, which rapidly grew. The publication of books was begun at once. Ziegenbalg completed the translation of the New Testament in 1711, and when he died in 1719 he left behind him a translation of the Old Testament as far as the Book of Ruth. A church was built by his efforts, which is no longer in existence, its site having been undermined by the sea. The mission was manned for many years by men of superior attainments and character, among whom was the great Schwartz, and exerted a profound influence in South India. For a long time it received pecuniary aid from England through the Society for Propagating Christian Knowledge. In 1847 the mission passed into the hands of the Leipzig Missionary and Evangelical Lutheran Mission. Station of the Leipzig Missionary Society (1841), with (1903) 6 missionaries, 4 of them with their wives; 28 native workers, 4 outstations, 4 places of worship, 4 day schools, 1 boarding school, 1 printing house, and 759 professing Christians in 1,411 Christian communicants. The name is also written Trancebar.

TRAVANCORE: A native state in India, occupying the extreme southwestern portion of the peninsula. Its limits of north latitude are 8° 4' and 10° 22', and of east longitude 76° 12' and 77° 38'. Its boundaries are, on the north, the native state of Cochin; on the east, the British districts of Madura and Tinnevelly, belonging to the Madras presidency, from which districts it is separated by a mountain range; on the south and west, the Indian Ocean. The length of Travancore from north to south is 174 miles, and its greatest breadth 75. It embraces an area of 6,730 square miles, with a population of 2,952,157 in 1901; 73 per cent. were Hindus, about 21 per cent. Christians, and a triffe over 6 per cent. were Mohammedans. The Christian population includes a large number of adherents of the Unitarian Church of Travancore that half of the whole; nearly a third are Romanists and the remainder Protestants. As to language, Malayalam— a Dravidian tongue allied to Tamil— is used by about four-fifths of the people, and Tamil by the rest. The chief town and capital is Trivandrum, with a population of 41,173. Travancore has been ruled from time immemorial by Hindu princes of approved orthodoxy. It has never—like all the rest of India—come at any time under the sway of the Mohammedans. In the latter part of the 18th century it was attacked by Tippoo Sultan of Mysore, but, with the aid of the English, it successfully resisted him. Treaties, made early in the 19th century with the English, have firmly cemented this old connection and made English influence powerful within its borders, tho there was armed opposition in 1809. An English resident is maintained at the court of the Maharajah of Travancore, and an annual tribute is paid to the "paramount power." The Government of Travancore, tho the Hindu, is intelligent, efficient, and progressive. Its native rulers have studied to good advantage the example set them by the English rulers of adjacent regions. There is a good system of education in vogue, as a result of which the people of Travancore show about as high an average of intelligence and as large a proportion of persons able to read and write as many British provinces in India. The people are chiefly agricultural; rice, the coconut, and pepper are the principal productions, and the exports are largely derived from the coconut tree, the pepper, ginger, cardamom, timber, and some other articles are included among them.

The forms of Hindu worship usual throughout India some years since used in Travancore, mingled, however, to a greater or less extent, with the rites of demon-worship, which prevail extensively in South India and Ceylon, especially among the aboriginal tribes. Missionaries in Travancore have had to encounter among their converts far more of the ideas and notions of these old habits and associations, rooted in this ancestral demonolatry, than their fellow-laborers among Hindus in other regions.

Mission work was commenced in this state in 1816 by the CMS. The plan was to work in alliance with the old Syrian Church of Malabary, but the plan failed, and twenty-five years later the Society turned its attention to the people at large, with great success.

The London Missionary Society's operations in Travancore began in 1806. Rev. Mr. Ringeltaube, a member of the company of missionaries which this Society sent to India. He labored in Travancore until 1816, when a Christian community of 900 persons had been formed. Mr. Ringeltaube's health then broke down and he left the country. In 1818 the Society sent out other missionaries. Col. Munro was then resident, and continued the aid of the mission which his predecessor had begun; without such aid from the representative of British power it is hard to see how the mission could have started in the face of Hindu resistance, on the part of the Brahmans and the Hindu Government. The converts rapidly increased—largely from among the low-caste Shanars. From 1827 to 1830 violent persecution was experienced, and the low-caste people in Travancore never, unless perhaps in 1806, been admitted to the privileges of the public schools maintained by the government. The progress of the mission in late years has been rapid and its usefulness great. In 1838 it was allowed to begin a station at Trivandrum, the capital; and since 1844 it has drawn many converts from the higher castes. Rev. Samuel Mateer, one of its most distinguished members, published, in 1871, a full account of the country and people of Travancore, with historical sketches of missionary work within its borders, under the title "The Land of Charity."

TREBIZOND: Seaport and capital of a province in Asiatic Turkey, situated on the Black Sea. By reason of its location, it has been an important center for the trade from Persia and Central Asia to Europe. The climate is temperate, and its location is picturesque. The city is divided into the old quarter, inhabited by Mohammedans; the modern, or Christian, quarter; and the commercial quarter. Behind the city is the rocky height with flattened top which gave the place its ancient name of Trappus. At this point Xenophon reached the Black Sea on his retreat from the Persians. From 1203 until nearly the end of the 15th century Trebizond was an independent and autonomous power. Population said to be
about 35,000, of whom 18,000 are Mohammedans and 15,200 Christians. Station of the ABCFM (1838), with (1903) 11 native workers, 1 day school, and 148 professed Christians.

TRICHINOPOLI: A town or municipality in Madras India, one hundred miles from the sea, 186 miles southwest of Madras City. It is a place of much historic interest, having been the scene of many sieges. Besides the fort and cantonment it consists of seventeen separate villages. Inside of the fort is the holy road, or raiwallah, which rises near the foot above the street at its foot and which has on its summit a small temple. Numbers of pilgrims always attend the annual festival. It is well known for its cigars, and for its peculiar and beautiful gold jewelry. Heber, the Protestant Bishop of Calcutta, is buried here (1526), and the place is the scene of great missionary activity. Population (1901), 104,721, of whom about 72,000 are Hindus, 17,000 Christians and 10,000 Muslims.

Station of the SPG (1825), with (1903) 1 missionary, 1 woman missionary, 21 native workers, 40 boarding and day schools, and 301 professed Christians. Also station of the Leipzig Missionary Society (1864), with (1903) 1 missionary and his wife, 14 native workers, 6 outstations, 7 places of worship, 6 day schools, 2 boarding schools, and 745 professed Christians. Station also of the WMS, with (1903) 1 missionary, 1 woman missionary, 52 native workers, 5 outstations, 1 place of worship, 15 Sunday schools, 16 day schools, and 267 professed Christians, of whom 165 are communicants. Germans write the name Trichinopoli.

TRICHUR: A town in Cochin, India, situated at the head of a chain of canals and inland waterways which give safe navigation for small boats as far as Trivandrum. It is a great stronghold of Brahmanism. Station of the CEZ (1818), with (1903) 2 women missionaries, 35 native workers, 7 day schools, and 1 female helpers' training class. Also station of the CMS (1842), with 1 missionary and his wife, 47 native workers, 8 day schools, and 3 boarding schools.

TRINIDAD: An island belonging to Great Britain in the West Indies, at the mouth of the Gulf of Paria, off the northeast coast of Venezuela, north of the mouth of the Orinoco. Area, 1,871 square miles. Population, 165,551 (1901). Temperature, 70° to 80° Fahrenheit. Soil, fertile, Capital, Port-of-Spain. Mission field of the UFS, the PCC, the SDA, and the Moravian Missions, with stations at Port-of-Spain, Arouca, and San Fernando—3 churches, 379 church-numbers, 600 scholars. There are 191 schools, 16,000 pupils, under the Government grant of £16,783. The Queen's Royal College has 65 students. The Roman Catholics have also a college with 220 students.

TRINITARIAN BIBLE SOCIETY: Headquarters, 7 St. Paul's Churchyard, London, E. C. England. This Trinitarian Bible Society was organized in 1831, for the translation of the Word of God, translated from the originals only, to the exclusion of all versions from the Vulgate. No person is admitted to the management of the Society who denies the doctrines of the Trinity and the Atonement. The work of the Society is chiefly the translation of the Psalms into which it has prepared a Spanish Bible in several editions, and a Portuguese Bible with references. The first translation of the Bible into the Breton language for the Breton Evangelical Mission was printed by the Society; also Salkinson's Hebrew translation of the New Testament, of which 100,000 copies have already (within three years) been distributed among Jews in all countries.

The Society avoids colportage as far as possible, its work of distribution being mainly carried on by agents of other societies.

TRIPOLI: A province of the Turkish Empire in North Africa. It is bounded on the northwest by Tunis, on the east by the Nubian Desert, which separates it from Egypt, and it includes within its southern border the oases of Kufra, Fezzan, etc. It covers an area of about 400,000 square miles, and has a population variously estimated at from 800,000 to 1,300,000. The dervish order of the Senoussis, whose capital was used to be Jarabub, in the Fared Ghah Oasis, is the Libyan Desert, is the dominant power in the whole country. It has 15 stations in Morocco, 25 in Algeria, 10 in Tunis, 66 in Tripoli, and 17 in Egypt. The Sultan of Wadai is one of the most fervent Moslems in Africa. It does not confine itself to the white race; the blacks have also been drawn into its numerous schools, founded in the Sudan, which have extended their influence from Senegambia to Timbuktu, Lake Chad, Bahr-el-Ghasel, and even to the country of the Danakils, the Gallas, and the Somalis.

Tripoli is naturally divided for administrative purposes into four provinces. The country is made up of vast sandy plains interrupted by rocky ranges, with a fertile strip adjacent to the sea, and here and there in the desert a depression, where the springs of water are sufficient for few inhabitants and their groves of date palms. The principal products are corn, barley, olives, saffron, figs, and dates. The climate is variable, resembling that of southern Europe, and generally salubrious. The population consists of Arabs, Berbers, Negroes (brought from the interior as slaves), Turks, and Jewish and European (Maltese) traders. A few uninfuential Coptic groups are found. The North Africa Mission has 1 station in Tripoli.

TRIPOLI: A seaport town of Syria, situated 2 miles from Mina its seaport, on the Mediterraneo, 40 miles N. N. E. of Beirut. It owes its name to the three separate coasts which are included in remote history. Many remains of ancient buildings are still found there. It was taken by the Crusaders in the 12th century, at which time its library was burned. It is one of the nearest towns to Syria, and is surrounded by many gardens and groves of orange and other fruit trees, but the ground in the neighborhood is marshy, and the climate is unhealthy at certain seasons. Population, 26,000, one-half Greek Catholics. Station of the PN (1848), with (1903) 3 missionaries and their wives, 2 women missionaries, 43 native workers, 18 outstations, 13 places of worship, 20 day schools, 2 boarding schools, 1 dispensary, 1 hospital, and 724 professed Christians.

TRIPOLI: Capital of the Turkish province of T. in Africa, called by Turks Tarabulus-i-Ghab. It is the starting point of caravans for the Sudan as far west as Timbuktu and a center of a flouring slave trade, with which it is connected by a Turkish officials. It is a picturesque town, population (estimated), 40,000. Station of the North Africa Mission (1889), with (1903) 2 missionaries with
TRIVANDRUM: A town and capital of Travancore, India, situated about 38 miles S. E. of Quilon. It is a stronghold of Brahminian influence, which centers in the fort where the palaces of the reigning family are found, besides the chief pagoda and the residence of many high-caste people. The English resident and other foreigners live among gardens outside the fort. Population (1901), 57,522. Station of the LMS (1838), with (1902) 2 missionaries and their wives, 127 native workers, 64 outstations, 50 Sunday schools, 74 day schools, 2 boarding schools, 1 hostel, 1 dispensary, 1 lepers' asylum, and 14,751 professed Christians, of whom 1,975 are communicants. Also station of the O&Z (1862), with (1903) 2 women missionaries, 28 native workers, 1 dispensary, 1 hospital, and 1 boarding school, which is in an old palace in the fort, the gift of the Maharajah. Some write the name Trevandrum.

TROWBRIDGE, Tillman Conklin: Born in Michigan, January 28, 1831. Died at Marash, Turkey, July 26, 1888. Studied at Rome, Michigan, and at the Theological Union, Chicago. Appointed missionary of the ABCFM in 1856, and sailed for Constantinople. After learning the language he engaged in itinerating among the Armenians of Eastern Turkey. Returning to Constantinople in 1861, he married a daughter of Dr. Elas Riggs. He had charge of the city work of Constantinople for six years, and in 1868 was transferred to Marash to assist in the instruction of the Theological Seminary. In 1872 he visited England and America to raise funds for the Central Turkey College at Antab. In 1876 he was appointed president of the college. From that time to his death, with the exception of a brief visit to England, he devoted himself with energy to promoting its interests, as well as to the material, moral, and religious improvement of the people of Turkey. His well-known good judgment, his quick and contagious sympathy, his unfailing cheerfulness and optimism, his ready pen and persuasive tongue, united to give him a wide influence, and the Central Turkey College owed to his energetic labor a large share of its present position and power.

TSAKOMA: A settlement in the Transvaal, South Africa, situated in Zoutpanesberg District, about 100 miles N. E. of Pietersburg. Station of the Berlin Missionary Society (1874), with (1903) 2 missionaries, 9 native workers, 3 outstations, 1 day school, and 206 professed Christians, of whom 89 are communicants. Some write the name Tschakoma.

TSAO-SHIH: A town of Hu-pe, China, situated about 50 miles W. of Han-kau on a little lake connected with Han River. Station of the LMS (1880), with (1903) 2 missionaries, 1 of them with his wife, and 1 dispensary. Church statistics are included with Han-kau.

TSHAKOMA. See TSAKOMA.

TSCHI-CHIN: A town in Kwang-tung, China, situated about 130 miles N. by E. of Canton. Station of the LMS Missionary Society (1888), with (1903) 1 missionary, 14 native workers, 11 outstations, 1 day school, and 803 professed Christians, of whom 359 are communicants.

TSCHOMBA. See CHOMBALA.

TSCHONGHANGKANG. See TSONG-HANG-KANG.

TSCHONGSTSHUN. See TSONG-shun.

TSCHOU-TONG-AU: A town in Kwang-tung, China, situated about 80 miles E. by N. of Canton. Station of the Berlin Missionary Society (1891), with (1903) 2 missionaries, 19 native workers, 8 outstations, 1 day school, and 352 professed Christians, of whom 356 are communicants.

TSHAPO. See BERLIN, CAPE COLONY.

TSHIFAY: A town and district of Madagascar, situated in the Imerina province about 15 miles S. of Antananarivo. Station of the Paris Evangelical Mission Society (1897), with (1903) 1 missionary and his wife, 113 native workers, 4 Sunday schools, 55 day schools, 2 boarding schools, and 900 professed Christians.

TSL-HO: A town in the province of Hu-pe, China. Station of the Hauges Synod's China Mission (1900), with (1903) 1 missionary and his wife, 1 place of worship, 2 day schools. Some write the name Tze-ho.

TSI-NAN-FU: A town in Shan-tung, China, situated 175 miles S. of Tien-tsin. It is walled. Its trade is in silks and in imitation precious stones. Temperate, healthful. Population, 150,-000. Mongolian Chinese chiefly. Station of the PN (1872), with 4 missionaries, three of them with their wives; 3 women missionaries, 1 native worker, 2 outstations, 2 places of worship, 12 day schools, 2 boarding schools, 2 hospitals, and 573 professed Christians. Some write the name Chinan-fu.

TSIN-CHAU: A prefectural city in the province of Kansu, China, situated 62 miles S. E. of Kung-chung-fu. Station of the CIM (1878), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 51 professed Christians.

TSING-CHAU-FU: Town in the province of Shantung, China, 160 miles W. S. W. of Chi-fu. It was formerly the capital of the province, and has still a large silk industry. Station of the BMS (1877), with 7 missionaries and their wives, 2 native workers, 80 outstations, 1 dispensary, 1 hospital, 24 day schools, 2 boarding schools, and 1,618 professed Christians. Also station of the BZM (1893), with (1903) 4 women missionaries, 1 boarding school, and 15 day schools. Some write the name Ching-chow.

TSING-KIANG-FU: A town in Kiang-su, China, situated on the Grand Canal about 10 miles N. W. of Hwei-ngan-fu. Station of the CIM (1869), with (1903) 2 women missionaries, 5 native workers, 1 place of worship, 1 Sunday school, 2 day schools, and 26 professed Christians. Also station of the PS (1897), with (1900) 3 missionaries and their wives.

TSING-NING-CHAU: A town in Kansu, China, situated about 100 miles E. S. E. of Lan-chau-fu. Station of the CIM (1897), with 1 missionary and 1 place of worship.

TSI-NING-CHAU: A town in Shantung, China, situated on the Grand Canal in the S. part of the province, 150 miles S.W. of Tsian-fu. Station of the Independent Baptist Mission, with (1901) 2 missionaries and their wives. Also station of the PN (1892), with (1903) 3 missionaries, one of them with his wife; 21 native workers, 2 day schools, 1 dispensary,
1 hospital, and 169 professed Christians. Some write the name Chining Chow.

TSING-TAO: A town in Shan-tung, China, situated in the German district at the N. side of the entrance to Kiao-chau Bay. It is the terminus of the German Shan-tung Railway. Station of the General Evangelical Protestant Missionary Society (German) (1898), with (1903) 3 missionaries, 2 of them with their wives; 1 hospital, 10 native workers, 1 day school, 1 dispensary, 1 hospital, and 1 place of worship.

Also station of the Berlin Missionary Society, with (1903) 2 missionaries, 22 native workers, 1 woman missionary, 2 outstations, and 233 professed Christians, of whom 186 are communicants. Some statistics include Kiao-chau. Station also of the PNM (1898), with (1903) 2 missionaries, 1 of them with his wife; 2 outstations, 2 places of worship, 19 day schools, and 100 professed Christians. Some write the name Tsingtou or Tsing Tau.

TSIN-YUN-HSIEN: A town in Che-kiang, China, situated 55 miles N.W. of Wen-chau. Station of the CIM (1898), with 1 missionary and his wife, 4 native workers, 1 outstation, 1 place of worship, 1 Sunday school, and 2 professed Christians.

TSIVORY: A town in Madagascar, situated in the S. part of the island, about 55 miles N.W. of Port Dauphin. Station of the Lutheran Free Church (U. S. 1901), with 1 missionary and his wife, 2 native workers, and 2 outstations. Some write the name Tsivory.

TSOLO: A town in Cape Colony, South Africa, situated in Pondoland West, 50 miles N.W. of Port St. John's. Station of the Episcopal Church in Scotland (1865), with (1903) 6 missionaries, 2 missionary women, 46 native workers, 27 outstations, 4 places of worship, 23 day schools, 1 boarding school, and 1,573 professed Christians. Statistics are also included in the SPG. Some use the name St. Cuthbert's for this station.

TSOMO: A town in Cape Colony, South Africa, situated in the Transkei region, about 55 miles S. E. of Queenstown. Station of the Episcopal Church in Scotland (1890), with (1903) 1 missionary, 17 native workers, 17 day schools, and 753 professed Christians. Statistics are included in the SPG also. Station also of the NCB, with (1900) 1 missionary, 1 woman missionary, 1 place of worship, 1 Sunday school, and 60 professed Christians. Also station of the South African Wesleyan Methodist Missions, with (1900) 1 missionary, 111 native workers, 16 outstations, 26 places of worship, 6 Sunday schools, 21 day schools, and 1,462 professed Christians.

TSONG-HANG-KUNG: A town in Kwang-tung, China, situated about 50 miles S. E. of Canton. Station of the Basel Missionary Society (1883), with (1903) 2 missionaries, 1 of them with his wife; 9 native workers, 5 outstations, 3 day schools, and 388 professed Christians, of whom 262 are communicants. Some write the name Tschong-hang-kang.

TSONG-HUN: A village in Kwang-tung, China, situated about 100 miles N.W. of Swatow. Station of the Basel Missionary Society (1864), with (1903) 2 missionaries, 1 of them with his wife; 16 native workers, 7 outstations, 8 day schools, and 676 professed Christians, of whom 380 are communicants. Some write the name Tschongshun.

TSOU-PING-HSIEN: A town in Shan-tung, China, situated about 45 miles E. by N. of Tsinan-fu. Station of the BMS (1889), with (1903) 8 missionaries, 7 of them with their wives; 51 native workers, 23 Sunday schools, 2 dispensaries, 1 hospital, and 2,117 professed Christians. Also station of the BZM (1894), with (1903) 2 women missionaries, 3 outstations, 3 day schools, and 4 native workers. Some write the name Chow Ping.

TSO-YUN-HSIEN: A town of Shan-si, China, situated 15 miles S. S. E. of So-ping-fu. Station of the CIM (1895), with (1903) 2 missionaries, 3 places of worship, 2 Sunday schools, and 22 professed Christians.

TSUEN-CHAU-FU: A town in Fo-kien, China, situated near the coast about 45 miles N. E. of Amoy. Station of the FCM (1898), with 10 missionaries and their wives, 2 dispensaries, 2 hospitals, and 1 medical class. Some write the name Chinchew.

TSUN-I-FU: A town of Kwei-chau, China, situated 85 miles N. by E. of Kwei-yang-fu. Station of the CIM (1902), with 2 missionaries, 1 of them with his wife, and 1 dispensary.

TUAMOTU ISLANDS: A cluster of small islands east of the Society Islands, Polynesia. They were acquired by France in 1880, together with the Gambier Islands, and form part of the French establishments in Oceania. The two groups have an area of 390 square miles and a population of 5,946. The people are many of them Roman Catholics, and there are a few Mormons at Anaa. The Paris Evangelical Society missionaries tour among the islands in their missionary cruiser, The Southern Cross, and they have stationed a preacher at Anaa.

TUBETUBE: An island of the D'Entrecasteaux group, about 50 miles off the S. E. point of New Guinea. Station of the Australian Wesleyan Methodist Missionary Society, with (1901) 1 missionary and his wife, 6 native workers, 1 outstation, 6 places of worship, 6 day schools, 5 Sunday schools, and 55 professed Christians.

TUCAMAN: A town in the Argentine Republic, South America, situated about 700 miles N.W. of Buenos Aires. Population 50,000. Station of the PB, with 2 missionaries, 1 of them with his wife. Some write the name Tucuman.

TUCKER, Miss Charlotte Maria: Born in 1821. Died at Amritsar, India, December 2, 1883. Miss Tucker (better known as A. L. O. E.) was famous as a writer of captivating stories before 1875, when, at the age of fifty-four, and at her own expense, she went to India as a missionary. She studied Urdu before going out to India, and almost from the first day of her arrival there she turned her thoughts to writing parables and stories for the natives; with wonderful ease adopting their modes of thought and style of
language, and entering into their prejudices and difficulties. Thousands of her tracts and books were sent out in the shape of a number of books and tracts. At the special request of the Christian Vernacular Education Society for India, she wrote a volume, explanatory of our Lord's Parables, entitled "Pearls of Wisdom," and it was published also in separate tracts, to enable the poorest to purchase it. She first entered upon her missionary work at Amritsar, but soon went to Batala, where she labored among the large Mohammedan population. She did much evangelistic work from house to house. She would find her way to a zenana, and, on gaining admission, would seat herself on the floor with true Oriental ease and grace, the native occupants of the dwelling gathering round, curious and expectant; and then she would fix their attention by a pleasing story or beautiful pictures, until she drove home some helpful Gospel truth. She took a special interest in the High School for Boys, and for some years she lived in the school-building, which was formerly the palace of Maharaja Sher Singh. She taught the boys the Bible, literature, and history; and from her own private resources she extended the influence of this and other institutions of learning. Miss Tucker showed active pity for the Muhats (sweepers), who are the very lowest caste in society—the opposite end of the social scale to the Brahmins; and she made an effort to carry the Gospel to the thousands of convicts on the Andaman Islands, but the plan had to be abandoned, as the Government could not sanction religious proselytising among the political prisoners. One of the last projects in Batala which received Miss Tucker's sympathy and aid was the new CEZMS Dispensary. For eighteen years this consecrated woman, who resolved to spend the "sunset of her life" among the women of the Punjab, labored far from her earthly home until she entered her heavenly home.

TUCUMAN. See TUCUMAN.

TUH-SHAN. See TU-SHAN-CHAU.

TULBAGH: A town in Cape Colony, S. Africa, about 75 miles northwest of Cape Town. Population, 660. Station of the Rhinen Mission Society, with (1903) 1 missionary and his wife, 12 native workers, 1 Sunday school, 2 day schools, and 851 professed Christians, of whom 350 are communicants.

TULLIAR: A town in Madagascar, situated on the W. coast, north of St. Augustin Bay. Station of the Norwegian Missionary Society (1874). Some write the name Tulear.

TUMKUR: A town in Mysore, India, situated 40 miles N. E. of Bangalore. Population, 11,170. Station of the WMS, with (1903) 1 missionary, 2 women missionaries, 98 native workers, 11 places of worship, 8 Sunday schools, 24 day schools, 1 boarding school, and 253 professed Christians, of whom 232 are communicants.

TUNAPUNA: A village in Trinidad, situated 10 miles E. of the Port of Spain in the plantation district where East Indian coolies are found in numbers. Station of the PCC (1881), with (1903) 1 missionary and his wife, 1 waman missionary, 11 native workers, 2 outstations, 16 day schools, 1 boarding school, and 150 professed Christians. Also station of the SPG, with (1903) 1 missionary, 2 native workers, 3 outstations, and 3,500 professed Christians, of whom 657 are communicants.

TUNG AN. See TUNG-NGAN-HSIEH.

TUNG-CHAU: A city in Chi-li, China, at the head of navigation on the Peiho, 13 miles east of Peking. Population, 50,000. Station of the ABCFM (1867), with (1903) 7 missionaries, 6 of them with their wives; 2 women missionaries, 9 native workers, 2 places of worship, 4 day schools, 2 boarding schools, 1 theological class, 1 college, 1 dispensary, 1 hospital, and 213 professed Christians. Some write the name Tung-cho.

TUNG-CHAU-FU: A town of Shen-si, China, situated about 65 miles N. E. of Hsi-ngan-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife, 4 women missionaries, 5 native workers, 1 outstation, 2 places of worship, 1 Sunday school, 1 boarding school, 1 dispensary, and 25 professed Christians.

TUNG-CHI-HSIEN: A town of Kan-su, China, situated in the E. part of the province, about 50 miles E. N. E. of Ping-liang-fu. Station of the CIM (1899), but there has been no resident missionary since the troubles of 1900. Some write the name T'ung-chi.

TUNG-CHO. See TUNG-CHAU.

TUNGKUN. See TUNG-KWAN-HSIEH.

TUNG-KWAN-HSIEH: A town in Kwang-tung, China, situated about 35 miles S. E. of Canton. Station of the Rhinen Mission Society, with 4 missionaries, 3 of them with their wives; 6 native workers, 3 day schools, and 314 professed Christians, of whom 250 are communicants. Some write the name Tungkun.

TUNG-LU: A town of Che-kiang, China, situated about 30 miles S. W. of Yen-chau-fu. Station of the CIM (1902), with 1 missionary.

TUNG-NGAN-HSIEH: A town in Chi-li, China, situated about 30 miles W. N. W. of Tien-tsin. Station of the LMS (1897), with (1901) 1 missionary and his wife, 12 native workers, 2 places of worship, 1 dispensary, and 180 professed Christians. Some write the name Tung An.

TUNG-NGAN-HSIEH: A town in Fo-kien, China, situated about 25 miles N. by E. of Amoy. It is a walled town, with a large population in its suburbs outside the walls. Station of the RCA (1895), with (1903) 1 woman missionary, 11 native workers, 9 outstations, 11 places of worship, 2 day schools, and 290 professed Christians. Some write the name Tong-An.

TUNI: A town in Madras, India, situated in the district of Vizagapatam, about 40 miles N. E. of Cocanada. Station of the BOQ (1878), with (1903) 1 missionary and his wife, 1 woman missionary, 22 native workers, 7 outstations, 3 places of worship, 16 Sunday schools, 7 day schools, 1 boarding school, and 183 professed Christians.

TUNIS: A protectorate of France in Africa, lying on the Mediterranean, which bounds it north and east, with Algeria on the west and Tripoli on the east. It has an area of about 51,000 square miles and a population of about 1,900,000, mostly Bedouin Arabs and Kabyles. The French have large garrisons, including soldiers and sailors of the ships and garrisons. There are about 60,000 Jews. The physical and climatic conditions are much the same as in Algeria. Protestant missions are carried on in
Tunis by the North African Mission and the London Society for Promoting Christianity among the Jews, with 4 stations.

**TUNIS:** Capital of the country of the same name in Africa, is situated on the western side of a bay and is connected with its port, Goletta. A deep-water canal 7 miles long runs through the lake, allowing sea-going vessels to come up to Tunis. The ancient city of Tunis contains several historically interesting buildings, as the Kasba, a castle formerly used as a residence for Christian captives and now occupied by the French garrison, and the palace of the Bey, etc. This part of the city is separated by the Bab el Bahr (sea gate) from the European quarter, known among foreigners as La Marine.

Tunis is commonly called a healthful town, but typhoid fever and diphtheria are very common. Population, 145,000, of whom 45,000 are Jews, 11,000 French, and 8,000 Maltese and other foreigners. Station of the London Jews' Society (1833), with 1 missionary and his wife, 2 women missionaries, 8 native workers, 1 place of worship, Sunday school, and 2 day schools. Also station of the NAM (1885), with (1903) 2 missionaries and their wives, 2 women missionaries, 125 native workers, 92 outstations, 93 places of worship, 63 Sunday schools, 87 day schools, 1 boarding school, 1 dispensary, 1 hospital, 1 printing house, and 5,645 professed Christians, of whom 3,835 are communicants.

**TURKESTAN AND TARTARY:** These terms which have been loosely applied to all that part of Central Asia which lies east of the Caspian Sea, south of Siberia, west of Manchuria or China, and north of Tibet, India, Afghanistan, and Persia. The name Tartary is a barbarism which is gradually falling into disuse as the formerly unknown plateaus and steppes of Central Asia are being more thoroughly explored, but the term Turkestan can still be retained as applying to that part of Central Asia which includes three divisions: (1) West Turkestan, (2) East Turkestan, and (3) Jungaria.

West Turkestan includes in its territory the highlands of Thian Shan, the plains of the Balkash, and the lowlands between the Aral and the Caspian Seas. It comprises Russian Turkestan, the provinces of Samarcand, Fergana, Semirechey, Syr-Daria, Khiva, Bokhara, and Kokland; the Chinese oasis of Kuldja, and some parts of Afghan Turkestan. It includes an area of about 1,600,000 square miles, with a population estimated at 8,500,000, of which 279,032 square miles are in the Russian provinces or dependencies, having a population of about 3,500,000. The physical features of this large area vary greatly—from mountain peaks of perpetual snow to deep gorges and valleys, with every variety of climate and vegetation. Prairies and lowlands alternate with deserts, over which the dry winds, at times scorching hot and then again icy cold, blow sand and dust over all vegetation. The population of this territory is very mixed. Aryans and Mongols are both found, the former principally in the cities, while the latter are wandering tribes. To the Turanian group belong the Turcomans, Kirghiz, Uzbegs, and Sarts. The Mongolians include the Kalmouks and Torgots. To the Aryan race belong the Tajiks, who are Sunnite Mohammedans, Persians, British Indians, and Russians. The principal cities are Kokand, Marghilan, Tashkend, Khojend, Bokhara, and Khiva. The two latter have each from 30,000 to 100,000 inhabitants.

East Turkestan includes that large depression in the plateau of Eastern Asia which lies between Western Turkestan and those parts of Asia which have received distinctive names, and whose boundaries have been defined. Its boundary on the northeast is the Thian Shan range; on the southwest and south the Kunlun mountains; on the southeast to Lake Lob-nor, the Altyn-Dagh, and on the northeast the mountains which run east-northeast from the Thian Shan range. It includes a territory of about 465,000 square miles, with a population of 1,000,000, of which 431,800 square miles, with a population of 580,000, is part of the Chinese Empire. The climate is severe; there is no great fertility of the soil, and consequently the whole district is very sparsely populated. The few inhabitants are representatives of both the Aryan and Turanian groups of the human race. The Mongol element predominates toward the northeast. Turkish mixed with Chinese is the prevailing tongue. Yarkand and Kashgar, in Chinese Turkestan, are the chief towns, and here the Swedish Mission (Swenska Missionföreningen) has stations. The first representative of the Swedish Society came in 1891, work was not regularly organized until 1894. The Bible has been translated into the Kashgarian language, medical work has begun, and the good seed is bringing forth fruit.

Jungaria or Songaria lies to the north of East Turkestan, and is a deep valley leading from the lowlands to the central plateau. It includes 147,950 square miles, with a population of 600,000, and is a dependency of the Chinese Empire.

**TURKEY:** The Turkish, or Ottoman, Empire covers extensive territories of Southeastern Europe, Western Asia, Northern Africa, and the islands of the Eastern Mediterranean and Egean Seas. Certain of the provinces in Europe and Africa, however, are only nominally a part of the Empire, being either autonomous or under the general supervision of European governments.

Taking first the Empire in its fullest sense, we notice,

**Turkey in Europe:** This extends from the Adriatic Sea on the west, across the Balkan Peninsula, to the Black Sea on the east, and includes Albania, the three provinces corresponding in general with ancient Macedonia, Adrianople, and the Principality of Bulgaria, with Eastern Rumelia.

**Turkey in Asia** is bounded on the north by the Black Sea and by the east by Russia (Trans-Caucasia) and Persia, on the south by Arabia and the Gulf of Aden, and on the west by the Mediterranean and Egean Seas and the straits
of the Dardanelles and Bosporus. Both eastern and southern boundaries are somewhat vague, the former because the two empires have not succeeded in drawing a satisfactory line through the mountains of Kurdistan, the latter because of the uncertain limits of the Sultan's authority in Arabia outside of the coast provinces of Hejaz and Yemen.

**Turkish Possessions in Africa:** These consist of Tripoli with the Fezzan, and Egypt, which is Turkish by virtue of paying an annual tribute to the Sultan.

**Islands of the Eastern Mediterranean:** include the islands of the Archipelago, Crete and Cyprus. All the islands of the Archipelago, except Crete and Samos, are included in the tables among the Asiatic possessions. Samos is a tributary principality, with an area of 210 square miles. Crete, with an area of 3,326 square miles, is ruled by a prince under supervision of the European powers, atho still (1903) nominally a province of Turkey.

Tabulating the whole we have the following:—

**Immediate Possessions of the Empire:**

<table>
<thead>
<tr>
<th>Region</th>
<th>Square Miles</th>
</tr>
</thead>
<tbody>
<tr>
<td>Europe</td>
<td>65,850</td>
</tr>
<tr>
<td>Asia</td>
<td>729,179</td>
</tr>
<tr>
<td>Africa</td>
<td>989,573</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>1,191,503</strong></td>
</tr>
</tbody>
</table>

**Tributary States:**

<table>
<thead>
<tr>

<tr>
<td><strong>Total</strong></td>
<td><strong>10,247,796</strong></td>
</tr>
</tbody>
</table>

**Total:** 32,171,696

Here, too, mere estimates are possible. A census in the East is in a great degree an anomaly, and altho the Turkish Government has taken two, its efforts have not been crowned with the greatest success. The fact that in some provinces, especially in Asiatic Turkey, the males are reported as 20-50% in excess of the females, indicates the great difficulty of the census-taker. For a division of these totals among the different races and religions, see below.

**Physical Characteristics:** Albania, Arabia, Bulgaria, Egypt, and Syria are described under their several heads.

European Turkey is for the most part a mountainous region belonging to the same physical system as Albania. The province of Adrianople, however, includes the great plains extending from the Rhodope to Constantinople.

Asia Minor is largely occupied by the western extremity of the vast belt of mountains and high plateaus which extends from east to west through the whole continent of Asia. South of this region lie the great plains of Mesopotamia with the highlands of Syria shutting them off from the Mediterranean. The northern part of the country is mostly a high tableland, covered with ranges of mountains. The tableland is highest on its eastern and southern sides, diminishing in altitude as it approaches the Mediterranean on the west and the Black Sea on the north. Egypt is one unbroken plain, and in Tripoli the rocks and desert seem to vie with each other as to which shall possess the land.

**Climate:** The Turkish Empire has every variety of climate, from the severe cold of the Balkans and the highlands of Armenia to the almost equatorial heat of the Red Sea and Baghdad. In the greater portion, however, it is temperate, not varying very much from that of corresponding sections of the United States. In general, Mesopotamia and the Syrian coast may be called hot, and the sections bordering upon them are affected in a great degree by the winds that blow over their plains. Central Asia Minor is temperate, its great plains being warm in summer and cold in winter, but day and night generally equalizing the temperature. The same is true of European Turkey, where the coast regions about Salonica are the only parts that have a notably warm climate.

The climate is undoubtedly greatly affected by the almost entire absence of trees over the great plains and even most of the mountains. The soil having to a great degree been washed down into the plains and valleys, the hills and mountain sides are barren, and the reflection of the sun from them in summer is intense. Especially is this true in some places, as Aintab, Urfa, Mardin, and Erzerum, where the summers are very hot.

**Soil and Productions:** The Turkish Empire includes probably some of the most fertile land on the globe. From the plains of Bulgaria to the valleys of the Nile and the Tigris, the soil is wonderfully rich. The people of the region of the great central tableland of Asia Minor near Cesaras have a proverb: "If the world is hungry, the Bozok region can satisfy it, but if the Bozok is hungry, the world is not sufficient." The wheat of Bulgaria and Rumelia is well known in the markets of Europe, and America is finding rivals in Asia Minor and Mesopotamia, as improvements in means of communication now these regions an outlet. Mesopotamia is especially rich, and any one who goes down the Tigris by raft and watches the line that marks the depth of the rich loam in the river banks will not wonder that empires succeeded each other with such rapidity in that whole section, or that the mountaineers of Persia looked with such longing eyes on the fields of Assyria. Aside from wheat there is a large amount of barley raised, and in Eastern Turkey a good deal of millet. Near the coast in Northern Syria, and
within Asia Minor, cotton is raised to some extent, and on the plains of Western Asia Minor there are large fields of poppies for the opium trade. The common vegetables are rice, cabbage, onion, turnip, and okra, but the potato is being widely introduced. Tobacco is cultivated everywhere, the best coming from Northern and far the greater part of the Black Sea coast and Macedonia.

Turkey is especially rich in fruits, many of which originate in that territory. Grapes, melons, figs, olives, peaches, pears, quinces, pomegranates, dates, etc., are of the finest.

As far as in the great Circassian leader, multitudes of Circassians found their way into Asia Minor, bringing with them the rough carts they had used in the Caucasus. These made roads for themselves, and gradually, as renewed pressure was brought to bear upon the Turkish Government, road building was recommenced, so that now there are fairly good carriage roads from Trebizond to Erzerum, and from Samsun to Diarbekir and Mardin, with branches to all important cities.

The first railroad in Asiatic Turkey was from Smyrna to Aidin. That was followed by one from Smyrna to Manisa, and from Constantinople to Nicomedia, and one from Mersine to Adana. The railroad from Constantinople to Nicomedia has been extended to Angora and Konia (Jenin), with branches connecting with the lines running out of Smyrna. This line extended from Constantinople to Adrianople and Philippiopolis, now extended to Sofia, Pirat, Alexinzat, Belgrade, Pest, and Vienna; and one from Salonica to Uscup, and so joining the last named line.

The postal and telegraphic communications: These are entirely in the hands of the Turkish Government, so far as the interior is concerned, the mails being carried in wagons, under the escort of an armed guard. Both mail and telegraph are under a rigid censorship, which sometimes violates letters, and always refuses "code" or cipher telegrams.

The foreign postal service is a curious anomaly resulting from the peculiar treaty relations between Turkey and the various powers. So long as there was no regular Turkish service a independent foreign postal service was absolute, essential, and the English, French, Austrian, Russian, Italian, and Greek Governments established post-offices of their own in the various seaports, and sent their own bags of mail matter. As the international postal system came into vogue, each post-office took mail matter for every country in the Postal Union. By that time the Turkish Government also had organized a complete postal system, and, as it had been admitted to the Postal Union, it pressed its claim that the foreign post-offices should retire. This has not been found possible, owing to the Turkish claim of a right to read letters passing through the mails.

Social Conditions: To describe in detail the mode of life of the people of Turkey is scarcely within the province of this work. The city life approaching so nearly in its buildings, its customs, its dress, and food to that of Europe; the country life, with its adobe houses, sometimes with a single room, sometimes more pretentious with its upper chambers; the tent life of the Kurds,—have all been described over and over again. A few general statements will suffice here.
Except in the poorest parts of the Kurdish mountains and in some of the villages of northern Syria or Mesopotamia, the people live in comparative comfort. To be sure, what is ample for them seems to the foreigner a very meager supply, but it is still true as a rule that they are in good food and that the supply of worldly needs is concerned. Their food is simple, but wholesome, and there is ordinarily enough of it. It is rarely the case that they suffer from hunger, except as drought and poor transportation cause famine. It is very seldom that the traveler finds the traveler supplies to the smallest hamlet, and even in the smallest hamlet the provision of proper food for the people is assured. Their houses are rough, the furniture scanty, the bedding and clothing coarse, but they serve usually to keep the people warm. It is when sickness and old age bring weakness and distress that the discomforts principally appear. Taken as a class, the Turkish peasant, whether Muslim or Christian, probably fares as well as the peasant class of any non-Christian land; in some respects he is better off. There are few, if any, in Turkey, even in the great cities, as wretched as are the miners of Europe or many of the poor of London.

If we look now to the relations of the different classes, we find them exceedingly democratic. There is no hereditary aristocracy in Turkey. There is absolutely nothing to hinder a farm-hand or a pedlar from becoming Grand Vizier, if he be a Muslim; or Patriarch, if he be Armenian or Greek; and should he thus rise he will never find his low birth a cause of shame or regret. The castes of India are unknown. In every part of the Empire there is the freest intercommunication between the different races, and between the different parts of the same race. Not that this intercommunication involves good feeling. The Turk despises the "dog of a Christian," the Armenian hates the Greek; and the Jew, Nasairiyeh and Yezidi are the contempt of all. Intermarriage between Muslims and Christians is unknown, except as Christian girls are drawn into the harems of wealthy Turks. There is no social intercourse of the families of different races, yet business relations and social courtesies between the men are common, and in that one is in most cases just as good as in the ruling class.

Races: The population of the Turkish Empire presents some very interesting features to the student and especially to the missionary. To trace back through the centuries the influences that have converged from all the surrounding countries, and have resulted in the races of to-day, would be beyond the limits of this article. We can only give the barest sketch of the peoples now before us.

In a general sense, the inhabitants of Turkey are either Mohammedan or Christian, and if we assume the population of the direct possessions of the empire to be about 22,000,000, we shall have about 16,000,000 Mohammedans and 6,000,000 Christians. Both Mohammedans and Christians, however, include widely different races. Greeks and Armenians are hardly more diverse than are Turks and Albanians; Jacobites and Bulgarians are as little alike as are Kurds and Kabyles. This great diversity gives rise to much of the misconception in regard to the country, its history, and its political relations. We note now these different races very briefly.

I. The Mohammedans comprise the Turks proper, or Ottomans or Osmanlis, as they call themselves. The word Turk is a general term applied almost indiscriminately to the general Tatar races that from different sections of Central Asia, and at different periods, have poured in upon the richer countries of Asia Minor and southeastern Europe. They include the Ottomans, who are more properly the Turks proper, the Turks of the Caucasus, the Karakurchaks, the Circassians, the Tatar, and the Yezidis. The Tatars, however, are absolutely a separate race, and we do now with that tribe called Ottomans or Osmanlis, from their first sovereign, Othman or Osman, whose tomb is one of the sacred places of the city of Broosa. As has been said, only estimates are possible, but it the number of Ottoman Turks is 8,000,000. The number is far from the truth. They are found chiefly in Asia Minor, comparatively few living in European Turkey, or in Kurdistan, Mesopotamia, or Syria. The so-called Turks of European Turkey are mostly Albanians or Slavs who have accepted Islam; those of Kurdistan are Kurds, or Christians forced to become Muslims in one of the massacre periods, and the same is true of "Turks" in Syria. This fact should be distinctly kept in mind in forming an estimate of the Ottoman Turk. The unpeachable Turk of the Batak massacres in Turkey was the Alavites (Albanians), of Pomak; of the Druze massacres of Syria, an Arab. The Ottoman peasant of Asia Minor is a man far different from the ordinary conception. As a rule quite peacefully inclined, a hard worker, a faithful servant, courteous and dignified in his bearing, rather proud of his assumed superiority to the "meanesses of his Christian fellows," there is still an inherent element of ferocity in his nature, and when religious fanaticism is roused, he is a most dreaded enemy. The Ottoman of the city is, however, quite a different man; with as much Christian as Tatar blood in his veins, influenced by the strife of Western with Eastern civilization, studiously polite, easily adapting himself to the circumstances of his associates, he develops a power of intrigue, a facility for deception, an unblushing delight in bribery that makes him the scorn of his sturdy compatriot of Anatolia. There are notable exceptions, but as a rule, and this is the testimony of those who have traveled most in the interior of Asiatic Turkey, the native unadulterated Ottoman Turk is a man with many noble qualities, and few of the ordinary defects and liabilities for Christian influence. Of the other elements making up the Muslim population the most important races in Asia are the Arabs and Kurds, in Europe the Albanians. These races have been described under separate heads. As a rule they are hostile to the Turks, feeling that the latter are oppressors, and even their recognition of the Sultan or Caliph is weakened by race enmity and the sense of subjection. Next to them in importance are the Circassians, including the Circassians proper and the Andakhuzes who have emigrated from the Caucasus to Asia Minor. They furnish a most turbulent element of the population, and by far the greater amount of the depredations committed in Asia Minor are by them. There are also large numbers of Turkomans (another Turkish race), chiefly found in northern Syria. The Druzes and Nasairiyeh of Syria and the Yezidis of Mesopotamia probably represent the small remnant of the ancient paganism of the Levant which has accepted the form, tho not the spirit, of Mohammedanism. The original races of Asia Minor are represented among the Mohammedans by a
number of tribes, of somewhat uncertain extent and character, found chiefly in the mountains of the Caspian Sea, of the Nuruz of Bithynia, and the Zeibeks of the region of Smyrna. The Kabyles of Tripoli in Africa, of the Berber race, are scarcely recognized as Turkish subjects.

The Christians include the Armenians, Greeks, Syrians, Jacobites, Copts, Bulgarians and Protestants. The Armenians are a race by themselves, as distinct to-day as at any time in their history. Formerly occupying the north-eastern part of Asiatic Turkey, they have spread until they are found all over Asia Minor. The Greeks are found chiefly in Western Asia Minor and along the shores of the Black Sea. They, too, have kept their race distinction, and retain many of the characteristics of their ancestors who founded the Pontic and Doric colonies. Sharp, keen in enterprise and speculation, the commerce of Turkey is largely in their hands, while the traders and bankers are chiefly Armenians. The Greeks of the interior are of a higher grade of character than those at the seaboard. The term Jacobite is distinctive of the remnants of the Monopoly sects found in southern Syria about the Tis (Elisee), and in the Nomophilos. The term Syrian is often a very indefinite one, applied generally to all the Christians of Syria and Mesopotamia. Specifically it refers to those churches in communion with the Roman Catholic Church, such as the Maronites, the United Greeks of Syria, and some of the Yezidis, who are Jacobites who have left their old communion for the Romish Church. The term Syrian is also applied, tho incorrectly, to the Assyrians or Nestorians who are found in the Middle East. The Yezidis, especi-ally are found only in Egypt. The Bulgarians are a Slav people inhabiting European Turkey. They belong to the Orthodox or Greek Church, but are independent of the Patriarch. Of the Christian peoples of Turkey the only ones whose race distinc- tion have been preserved are the Armenians, Greeks, and Bulgarians. The rest are races, properly speaking, but religion-political divisions of the descendants of those of the original inhab- itants who accepted Christianity under the rule of the Byzantine Empire. The religions of the Ottoman Empire have been nominally noted under the articles Armenian Church, Greek Church, Maronites, Mohammedanism, Nusairi- yeh, Yazidis. It remains here to add a few words as to the political relations of the Greek, Roman Catholic, and Protestant Churches.

The Greek, or "Orthodox," Church is the direct descendant of the Byzantine Church. In general doctrine, as found in the creeds and confessions, it is in sympathy with the Protestant Church, and only separated from the Armenian by a distinction so shadowy that it is claimed by some Armenians that the theological difference was a pretext, rather than an occasion, for the separa-
tion, the real reason lying in the effort of the Byzantine church to compel the Armenians to use the Greek liturgy. However that may be, it is certain that the age of theological contro-
versy between the different Oriental churches has passed. The question now is not of "one Nature or two," "one Will or two," but of nationality. Under the rule of the Muslim Caliph every Christian sect has become a nationality, and every apostate is also a traitor. The position of the Greek Church in Turkey is thus primarily political. In its religious aspect it is practically a part with its fellows, and a stranger could hardly tell the difference between the services of any two sects.

Ecclesiastically, the Patriarch of Constantin-ople is the head of the Church in all its different branches, but the Holy Synods of Russia, Greece, and Serbia practically ignore him, while the Exarch of Bulgaria is ignored by him. In fact the Greek Church of to-day is split up into frag-
ments, each fragment claiming absolute inde-
pendence, and each characterized by the same formality and absence of spiritual life.

The Roman Catholics of Turkey, aside from the Maronites, include sections of the Arme-
nians, Greeks (Uniates), and Syrians or Chaldeans, who, chiefly for political reasons, have made their peace with the Papacy. They have suc-
cceeded, by special dispensation from the Pope, in preserving the use of their national language in their liturgy, in return for their political allegiance to Rome, and, except in the dress of their priests, are not distinguishable from their fellows of the old faiths. France is the recog-
ized protector of all Roman Catholics in Turkey.

The Protestantism of Turkey needs no special description, for the Ottoman Sultan and his government have been willing to allow the existence of all the lines of the evangelical churches of America and England. Except in rare cases there is little emphasis laid upon creeds. Of the doctrines, perhaps the one that is most prominent is the one that Luther pressed so hard—Justification by Faith, and for the same reason. There has been no effort to establish new dogmas. The new church was a civil even more than a religious necessity. See Protestant Community. In most cases every effort has been made to avoid antag-
ognism to the old churches, in the belief that the emphasis laid upon truth would crowd out the error. The Protestant Churches of Turkey are distinguished from the old churches rather by their conception of sin, its character and hein-
ousness, the absolute necessity of a change of heart, and the idea of individual communion with Christ, as a personal Redeemer and Savior, than by elaborate creeds or confessions. Church services take on the non-liturgical form, partly because that has been the habit of the mission-
aries, partly because of the natural repulsion of the soul, awakened to a sense of its personal need, to a religion where everything is in forms that had practically lost their meaning.

Government: The Government of Turkey is often called "Theocratic." In the sense that the Sultan as Caliph is the head of the Muslim religion, as well as of the Turkish Empire, and that all civil authority centers in the ecclesi-
asical, this is correct. Mohammed claimed to derive his power from God by special dispensa-
tion through the archangel Gabriel, and com-
mitted his authority to the Caliphs. The Sultan, as Caliph or "successor" of the Prophet, has for one of his titles "The Shadow of God on Earth." But as for any personal relations between the Sultan and Deity, they are no more than those of the meanest of his subjects. He is the repre-
sentative of divine authority, but by no means its medium.

Both theoretically and practically the Sultan is the head of the government. He has the usual number of Ministers, but none is inde-
pendent in responsibility for the minutiae of his special department of Foreign Affairs, the In-
terior, Finance, Commerce, War, Marine, Public
Instruction, or Evkaf. The Cabinet meetings are presided over by the Grand Vizier; but any question must be referred to the Sultan, and he keeps his eye on all the different lines of government policy. So, too, the Sheikul Islam and the Ulema guide the civil department, but whether in civil or ecclesiastical affairs, the Palace is constantly the most potent factor, liable at any moment to interfere with the best-laid plans of subordinates, and assume direct control even of the minutiae of administration. That administration, in its civil department, is, in general, on much the same plan as that of the European governments, at least in the cities of the seaboard. The interior is divided into provinces, whose boundaries are constantly modified to suit political exigencies of many kinds.

Side by side with the civil administration, the judicial and ecclesiastical, and the three are often so intermingled that it is impossible to distinguish between them. The judicial is based in some respects upon the Code Napoleon, but in others on the Canon Law derived from the Koran. Where one ends and the other begins it is often impossible to decide. The Canon Law alone applies in questions affecting real estate. Landed properties in Turkey are divided into three categories, the miri, or royal domain, the muilk, or unlimited, and the vacouf, or dedicated property. Miri property is transferable only to the royal domain; muilk property is transferable in full, but that of vacouf property only on condition of perpetual payment of the annual rent and perpetual obligation to surrender the title on the failure of direct heirs. It will readily be seen that this arrangement prevents the transfer of such property to corporations, since such a transfer would prevent ultimate reversion of the land to the mosque. It also gives for the same reason opportunity for local officials to hinder or prevent the erection of church or school upon sacred grounds. But such arrangements have been erected in Turkey is a marked evidence of the wisdom and patience of the missionaries who have gained the permission for their construction.

Relations of the Turkish Government with its Christian subjects and with unbelieving foreigners residing in Turkey are peculiar. When the Mohammedan conqueror captured Constantinople the question became grave of the attitude which it was most expedient for him to take toward those of the vanquished population who refused to accept his creed. To push them to the sword was a fruitful source of theCanon Law if he thought best. But to do this would depopulate the land, and would deprive the Government of much income as well as of the services of useful artisans whose places could not be filled by Turks. Yet aliens in religion could not be admitted to the privileges of citizenship in a divinely guided nation whose laws are an expression of divine justice.

In this emergency the Sultan adopted the practice of the Roman Empire toward religious dissenters and aliens. The unbelievers were told that in all relations between themselves and in matters of which their ecclesiastical law took cognizance they must get along as best they could under the jurisdiction of their own church authorities. Their religious chiefs thus received recognition as civil functionaries of the empire and responsible representatives of their spiritual flocks. With this, the state, or foreign horde, application through the officials charged with the conduct of foreign affairs. The result was that the Christian subjects of Turkey became nationalities distinct from each other and from the Muslim population whose privileges were denied to them. As relations with foreign nations became more frequent, and the same test was applied in their relations of foreign residents in Turkey to the Turkish Government. Such residents were not entitled to the privileges of Mohammedan law, and were left under the control of their own laws, being made amenable to their own consular officials only. This system, which places the persons and property of foreign residents in Turkey beyond the jurisdiction of Turkish officials, was consecrated in agreements and treaties known as "the Capitulations" in the 17th century and later. The resulting condition of "extra-territoriality" protected foreign residents in Turkey in some degree from the inequitable religious partisanship of Mohammedan Canon Law, and especially from the arbitrary and lawless exactions of corrupt officials. It is in fact an essential condition of business stability and even of personal safety to foreign residents in Turkey. This "extra-territoriality," first applied as a stigma of inferiority to foreigners and to Christian subjects living under the rule of the Sultans, has become a precious privilege which it is the constant effort of recent Turkish rulers gradually to obliterate that, as the Muslims may be under control of the Canon Law courts and may be forced to satisfy the greed of Turkish officials.

History: The history of Turkey is of the utmost importance to the students of Christian missions. Only by a careful survey of it from the time when the Byzantine Empire commenced to decay can he understand how the present condition is but the crystallization of conditions that existed many centuries ago. The capture of Constantinople by the Turks marked the establishment of the internal regulations of the empire on the basis of an absolute union of church and state, or rather of an absorption of the state by the church (for not only the Muslim, but the Christian) acted upon the social, civil, and religious condition of the land. As Mohammedanism always acts upon the lands that it conquers, like a sudden petrifying power. When the 19th century opened it found a country which had practically slept for nearly four centuries. The modern era of Turkish history, which is all that space and the general purpose of this article will allow, commences with the reign of Mahmoud II. (1808). More than any of his predecessors, Mahmoud realized the value of modern progress, and he understood very clearly the situation in which he found his empire. Napoleon had just uttered his famous prophecy that Europe was destined to be either all Cossack or all republican. The French Revolution on the west, Russian aggression on the east, were influences that must be fatal unless they could be checked. Internally there was commotion. The Janissaries had ruled so long that the mounting of their excesses was a more serious affair than a death in the Palace. The feudal
chiefs of Asia Minor were growing more and more arrogant, and the army was in danger of disorganization, through their refusal to send recruits to the order of the Sultan. Greece was feeling the impulse of the strife for freedom. Mohammed Ali was laying the foundation of his protectorate at Adrianople, the Albanian principality independent under Ali Pasha of Janina. A less vigorous, clear-headed man would have succumbed, and the Cossack would have carried the day. Mahmoud set himself to his task with courage, but the forces against him were too strong. He succeeded in overpowering the Janissaries, reorganized his army, and successfully withstood an attack from Russia; but England and France interfered and forced upon him the Treaty of London, 1827, and the Treaty of Adrianople, 1829. Greece was declared free, and the Danubian principalities of Moldavia and Wallachia were placed under the protection of Russia. Meanwhile Mohammed Ali was increasing in power. The traditional hostility of England and France manifested itself more and more in the Mediterranean. France espoused the cause of the Pasha, while England supported the Sultan. The rivalry became open war, and the Albanian leader threatened the very existence of the Turkish Empire. Just at this crisis Mahmoud died (1839), leaving Caliph's sword to his oldest son, Abdul Medjid, an amiable but weak and irresolute man. England and France saw at once that the danger foreseen by Napoleon was upon them. The "Cossack" was an immediate probability, the "republican" (Louis Philippe was then reigning) a remote possibility. Accordingly they united their forces, and by the treaty of 1841 confirmed Mohammed Ali in the possession of Egypt as vassal to the Sultan, and assumed a European protectorate over the Turkish Empire.

No sooner was this settled than intrigues opened again. England, realizing the necessity of the situation as affecting her relations with India, placed one of her strongest men at Constantinople, Sir Stratford Canning (afterward Viscount Stratford de Redcliffe) was an able, far-sighted, Christian gentleman. Not only did he comprehend the general political bearings of the situation, but he understood clearly their social, civil, and religious relations. He realized that for the Christian races of Turkey it was in a sense a choice between two evils—the despotism of a weak Sultan amenable to influence and under obligation to Christian nations, or that of the Czar, secure in his position and utterly beyond the reach of any motives except those of aggrandizement and supremacy. With marvelous patience and skill he subjected himself to his task of strengthening his hold upon the Sultan, French, and Russian ambassadors alike had to yield to the great "Elchi," as he was called. One after another, reforms were introduced. The Hatti Sherif of Gulhané announced the speedy establishment of institutions "which should insure to all the subjects of the Sultan perfect security for their lives, their homes, and their property, a regular method of collecting the taxes, and an equally regular method of recruiting the army and fixing the duration of service." But procrastination was one thing, enforcement another. Palaces in Istanbul were left unoccupied. The Turkish officials saw their opportunities for oppression and bribery disappearing, and offered to the new reforms an Oriental shrug when they did not positively refuse obedience. Genuine advance was, however, made. Torture and the death penalty for apostasy from Islam were abolished, and the bastinado was forbidden in the schools. Finally, the Czar, Christian evidence in courts of law was removed, if not always actual, and there appeared possibilities for the future where hitherto there had been absolutely no hope. Then came the stirring scenes of 1848 and 1849. Kossuth and some associate took refuge with the Porte, which refused to give them up to the power that had crushed the Magyar Government. Nicholas, flushed with his victory, looked forward to the speedy extinction of Turkey, and in 1853 proposed to the British ambassador at St. Petersburg a plan for the division of "the Sick Man's" inheritance as soon as he should expire, and claimed the right of a protectorate over the Greek Christian subjects of the Sultan. This was naturally objected to by the Porte, and was followed by the entrance of the Russian army into the European territory. England took up the side of Turkey, and France, stirred by the effect of Russian championship of the Greek Church in a contest between Latin and Greek priests in Jerusalem, added her forces to those of the Sultan, while Sardinia took her share for the first time as one of the powers of Europe. The victory of the allied powers in the Crimea resulted in the Treaty of Paris, which affirmed the neutrality of the Black Sea, the independence and integrity of Turkey, abolished the Russian protectorate over the Danubian principalities, closed the Bosphorus and Dardanelles to foreign ships of war, and reassured and emphasized the principles of the Hatti Sherif of Gulhané, guaranteeing complete religious liberty and the execution of the reforms already promulgated.

The most fruitful result of the Crimean War, however, was its destruction for a large part of the Turkish people of the illusion that a Mohammedan nation must be superior in knowledge and power to all Christian nations. Scientific knowledge possessed by the masterful allies of Turkey was seen to be good, and the Mohammedan dogmas that all useful knowledge centers in the Koran. Government schools were established to instruct Mohammedans in Western science out of books translated from Western languages, and to teach the languages of the infidels which gave young Muslims access to the literature of the West. By such iconoclastic results the Crimean War undertaken by Europe in order to bolster up for selfish reasons the failing Mohammedan power, must be regarded in its outcome as the most deadly blow ever given to Mohammedan principalities.

England and France and Italy now made the mistake of ceasing to try to lead Turkey into a wise use of the opportunity which they had won for the Sultan at the point of the bayonet. Formal interference with Turkey in its execution of the promised reforms was forbidden by the Treaty of Paris. The Western powers designed from informal influence, and left the field clear for Russia, whose one policy since that day has been to encourage Turkey in following every path that leads to national suicide.

England and France and Italy now made the mistake of ceasing to try to lead Turkey into a wise use of the opportunity which they had won for the Sultan at the point of the bayonet. Formal interference with Turkey in its execution of the promised reforms was forbidden by the Treaty of Paris. The Western powers designed from informal influence, and left the field clear for Russia, whose one policy since that day has been to encourage Turkey in following every path that leads to national suicide.
of national extravagance. Hitherto Turkey had been an almost unknown factor in the stock markets of Europe, but now investors began to crowd in. The adoption of the Code Napoleon on civil courts, and the introduction of customs revenues, etc., resulted in the employment of numbers of Europeans, who looked upon the Turks as legitimate prey. Financial propositions of every sort were made; loans were offered upon Treasury bonds, and the government launched upon a financial career to the management of which it was an utter stranger. When Abd ul Medjid came to the throne he had reversed the usual custom of his ancestors, and spared the life of his brother, Abd ul Aziz; and he, on the death of Medjid, in 1861, became Sultan. A morose, selfish man, bent upon gratifying every whim of the moment, he lent a ready ear to the adventurers that thronged Constantinople. Palaces and public buildings of various kinds sprang up on every hand. A fleet was necessary and it was furnished, while contractors in every department grew rich. One of the most remarkable operations was that initiated by the hitherto unheard of possibility of borrowing unlimited sums of money, went into the wildest extravagancies. Meanwhile the Druze massacres of 1860 had resulted in the French occupation of Syria. Wallachia and Moldavia united in the principality of Roumania, and, like Servia, became autonomous provinces. The Russian Embassy was practically supreme, Sir Henry Bulwer, Sir Henry Austin Layard, and Sir Henry Elliott being utterly unable to cope with Count Ignatieff. The year 1869 saw the completion of the Suez Canal, intensifying England's interest in keeping her connections with India clear, and the collapse of France in the war of 1870 made it possible for Lord Beaconsfield to secure from the spendthrift Khedive a controlling money interest in that great waterway.

The internal administration of Turkey became worse and worse. Two parties became clearly developed, the Young Turkey party, favoring reform and looking to England for moral support, and the Old Turkey party, opposing reform and, like the Sultan, looked to Russia because a reactionary policy must destroy the Turkish Empire. Numerous efforts were made by the Western powers to secure real reform, but in vain. Revolt broke out in Bosnia and Herzegovina (1875), and produced disquietude and plots of sedition in Bulgaria, which were repressed by terrible massacres that aroused all Europe (1876).

Mithad Pasha, a leading member of the Young Turkey party, now contrived a plot to replace the Sultan Abd ul Aziz by his nephew Murad. The Sultan had proved himself by his senseless extravagance to be incapable, and the revolution was easily carried through. Sultan Murad V, was placed upon the throne in May, 1876, and was pledged to introduce constitutional government in the Empire with real equality of civil rights for Christians. He was quickly adjudged insane, perhaps because of his liberal views, and three months later was deposed, giving place to his brother Abd ul Hamid II., the present (1903) Sultan. Mithad and his companions were promptly exiled, conveniently dying shortly after, and the Old Turkey party remained in triumphant ascendancy.

Svisla now declared war upon Turkey, and the European powers consulted together in conference at Constantinople as to a means for pacifying the Balkan provinces. The Sultan in vain proclaimed a constitution, and later convoked his grand vizir, Grand Vizier. But nothing was achieved. The Young Turks were the victors. They were at first assailed, but they were supported by France, and they were then driven to an alliance with Russia to satisfy. The Sultan, in vain, took refuge in the Crimea, and there were any negotiations. The Russian fleet took service with the Young Turks. The Sultan, in vain, took refuge in the Crimea, and was finally forced to remember that his autocratic powers were in vain. He was defeated again, and was finally forced to sign a treaty, which was afterwards, and was replaced by Prince Ferdinand. Later, Crete followed the manifest destiny of the Greek and was given autonomy under a prince of Greece.

Since then there have been no great territorial changes except that Eastern Rumelia was joined to Bulgaria in 1885, and Prince Alexander, who proved not as amenable to Russian influence as was desired, was seized, forced to abdicate, and was replaced by Prince Ferdinand. Later, Crete followed the manifest destiny of the Greek and was given autonomy under a prince of Greece.

The 'Eastern Question,' which after all is nothing more than the question of securing some means of living in peace while a Turkish neighbor holds to religious principles that demand war, still exists in all of its disturbing aggressiveness. The present (1903) situation in Turkey may be briefly summed up:

The ruling classes among the Turks represent neither of the parties of a few years ago. Taking as his motto 'Muslim Turkey for Muslim Turks,' the Sultan, with a persistence, patience, and skill that place him among the greatest of the rulers of Turkey, is endeavoring to give his power to the Mohammedan and weaken the Christian elements of the population. Every concession of political equality or civil rights not contemplated by the Koran for unbelievers living under Muslim rulers has been wrung from Turkey by force. The principle followed by a Muslim ruler in such a case is to serve the interests of Islam by granting the demand when he cannot meet force with force, and then to serve Islam again by withdrawing the concession so soon as circumstances permit. In obedience to this rule many of the concessions granted by the Hatti Humayoun of 1856 (formally recognized by the Treaty of Paris in that year) have been gradually withdrawn. Christian Pashas have been allowed to die out, Christian officials have been weeded out from all positions of administrative responsibility. Since the assumption of power by the Christian government office has been the large proportion of Christians in certain sections, a feverish activity
has been shown in introducing Mohammedan colonists into Christian districts in Asiatic Turkey. Circassians from Russia, Pomaks from Bulgaria, Tatars from Roumania, and Kurds from Persia have been offered inducements to remove to Turkey with a promise that this will affect the balance of power. The right to establish schools at will, which was guaranteed to Christians by the Hatti Humayoun, has been quietly withdrawn, and existing Christian schools are restricted in their course of study and closed on pain of imprisonment. At the same time the greatest energy is displayed in increasing the number of fanatically Mohammedan schools whose expenses are largely borne by special taxation of Christians "for education," in which they cannot participate. The number of outrages committed by Muslims upon Christians has been not only increased, and the punishment of such outrages is more than ever difficult. In fact, capital punishment for murder of Christians by Muslims has been done away, an imprisonment for fifteen years having taken its place, with the understanding that at least one-third of such a sentence will be remitted by imperial clemency.

It is not a matter of surprise that the Christian populations of Turkey have become restive under such conditions. In 1895 the European powers undertook to interfere in behalf of the six Christian provinces of Asiatic Turkey, but the Armenians are most numerous. The Sultan granted the demands of Europe. That very week a series of massacres began which destroyed the flower of the Armenian population of every city and of many of the villages in each one of the six provinces. Insurrectionary tendencies were alleged as a reason for these massacres, in which at least 40,000 Armenians fell victims. It has not, however, been shown that anything is worse than deep dissatisfaction, or at most plans for organization which might have been checked a few arrests, existed among the Armenians. The massacres ended every pretense at reform. An attempt of Bulgarian patriots to excite insurrection in Macedonia in 1903, for the sake of compelling Turkey to grant reforms long since promised, failed in the face of European powers, and the granting of these demands was followed by a similar systematic and terrible massacre of Bulgarian inhabitants of Macedonia. Whether this, as in the case of Armenia, will be allowed to terminate the validity of the promise of reforms, it is not at present to prophesy. All that can be said is that the same internal conditions which have kept the Eastern Question alive in the past remain active to-day in Turkey, and are likely to remain so until Mohammedans are willing to admit that their mission in the world is other than the subjugation and plunder of unbelievers. Meanwhile, certain influences are at work among all classes, modifying each, sometimes silently, but not the less surely; often unnoticed, yet which at no distant day may be most potent factors in a political situation.

Of these the most prominent perhaps is education. The presence of Robert College on the Bosphorus, the American College for Girls in Scutari, the Syrian Protestant College at Beirut, and the many American and European colleges throughout Asia Minor have had some influence in stirring the popular demand, until there is not a city in the Empire, scarcely a town or village, where there is not a certain amount of education. This education is not always thorough or complete, but it is opening the eyes of the people to truths that have hitherto been unrecognized, and no efforts of ecclesiastics or government officials to repress it have been effective. The vigorous French language has occasioned a great influx of French literature and French phrases, and it is not infrequent to hear some Armenian, Greek, or even Turk, boast of being a "libre penseur." Free-thinking is spreading, and with it the ideas of modern socialism. As yet confined chiefly to the cities and the seaboard, these are spreading into the cities and towns of the interior, and are exerting an influence which it is impossible to measure, but which is not less potent.

Next to education as a very positive element in influencing the political condition of all classes of the Empire is the introduction of European modes of life. The change in this respect is most marked; and the detailed notice is out of place here, the fact that the Oriental simplicity of manners, from which has come in no small degree the vigour of the Ottoman race, is fast becoming a thing of the past is of more political import. Parallel with these is the growth of infidelity. This will be especially noticed below, under the head of Mission Work, but it should be mentioned here as a most important element in politics. The condition of the Turkish Empire, as regards the government, and the Turkish inhabitants, is rapidly assuming the complexion of the later Roman Empire. Religion is a good thing for the masses, but for the educated, the leaders, it continues only as a political bond. In the consciousness of this among the more sincere Mohammedans of Kurdistan, Arabia, and Africa lies the ground for such movements as those of the Mahdi, and of the rebellious Arabs of Yemen, who declare that the Caliph has fallen from his high estate and no longer deserves to hold his position.

The subject races, divided among themselves, grasping at anything that seems to offer them any help, are waiting, sometimes patiently, sometimes impatiently, for the action of the European powers, or for the action of this slow, dignified, and sincere Mission Work. The general history of missions in the Turkish Empire is sufficiently noted in the articles on the missionary societies named below. It is needful here to give merely an outline of the work as a whole, and show its relations to the peculiar problems, political, social, and religious, of this interesting field of foreign missions.

The territory of the Turkish Empire is well covered by the mission societies. The ABCFM, the oldest in the field, also occupies the largest territory—the whole of European Turkey, together with Bulgaria south of the Balkans, Asia Minor, Eastern Turkey, and Mesopotamia. These fields have constituted for many years about one-fourth of the entire territory occupied by this Board throughout the world. The Presbyterian Church (North) occupies Syria and a portion of Eastern Turkey, where Nestorians are found in Kurdistan. The Methodist Episcopal Church has its work in Bulgaria, north of the Balkans. The Reformed Presbyterian (Covenanter) Church of America has its stations in Northern Syria and Southern Asia Minor. There are also stations among the Jews, under the Foreign Christian Missionary Society (Disciples) in Asia Minor, and a few Baptist churches.
at one time under the care of the American Baptist Publication Society. The Church Missionary Society, which has a station in Palestine, the Friends of England have a mission in Syria, and a single medical missionary among the Armenians of Constantinople. The Reformed Presbyterian Church of Ireland has a station at Damascus and one at Idlib, near Antioch, and the North African Mission one at Hums in Syria. There are also a number of English schools in Syria supported by the Lebanon Schools Committee and British Syrian Schools Association. The missions to the Jews of the various English and Scotch societies at Constantinople, Smyrna, Adrianople, and in Palestine, are specially noted in the article on the Jews.

The Bible work of the Empire is carried on by the American and the British and Foreign Bible Societies, and the National Bible Society of Scotland. The American Bible Society occupies the territory covered by the American mission societies, except Bulgaria, while the BFBS works in European Turkey, the western coast of Asia Minor, and Palestine. Constantinople and Smyrna are shared by the two societies. The National Bible Society of Scotland has a depot at Salonica in European Turkey. In Asiatic and the Scotch and English societies at work. Nine of these are American, nineteen are British and two are German.

If we turn now to the population, we find that the work for the Armenians is carried on chiefly by the ABCFM; for the Greeks by the ABCFM; for the Bulgarians by the ABCFM and the Methodist Episcopal Church; for the Maronites and Syrians by the Presbyterian Church and the various English and Scotch societies and committees; while the Mussiriyeh are the chosen field of the sturdy Scotch Covenanters. The Turks, Arabs, Kurds, Yezidis, etc., have been the care of all the societies, tho the CMS is the only one that has made a special effort to establish mission work distinctively for Muslims.

Not merely is the territory thus provided for in its whole, but it is well covered in its different parts. True to the best policy, the missionaries have from the beginning sought the centers. Not always the largest cities on the basis of a census, but those which for one reason or another furnish most opportunities for reaching the widest circle of people.

There are of course sections where there is comparatively little accomplished, but those are few. In the main, the Turkish Empire is well covered, and it may be truly said that there is scarcely a village, except in the mountains of Kurdistan and some parts of Mesopotamia and Syria bordering on Arabia, that does not have at least occasionally the opportunity to hear the Gospel, while in some cities, notably Aintab, Marash, Harpo or, the evangelical element is so strong as to be a very important factor in the general life of the people. Mission work in the Turkish Empire thus has passed the exploring, introductory stage and reached that of development. It is no longer experimental; it has settled down to the same problems that meet the Church in other lands, affected yet by a sort of national quiescence, which is still prevalent among the immense majority of the people, and looked upon with varying degrees of distrust by the greater part of the remainder.

We will look now at the relations that mission work in Turkey holds to the different classes of people whom it seeks to influence.

The Jews. Up to 1819, when the English and Scotch missionaries entered the Levant, their special message was to the Jews. Not many years passed, however, before that branch of the work was given up by them as manifesting less opportunity for success than others. At present it is chiefly educational. Large schools are supported by the Scotch and English societies especially in Constantinople, Smyrna, Salonic, and Jerusalem. There are also numerous preaching services, and there is enough of success manifested in the Christian life of converts to keep the laborers from being discouraged in their work or giving up the hope of a redeemed Israel, apart from their faith in the promises of the Scriptures. Mission work among the Jews is, however, so distinctively sectional, and confined to them as a race, that it enters as a comparatively unimportant factor into the question of the conversion of the Empire as a whole.

II. The Oriental Churches: When missionaries first turned their attention to the Christian churches of Turkey, their one idea was to secure reform within the churches themselves. So close to the creeds and confessions of the Reformation were those of the Armenians, Greeks, Nestorians, that it seemed to them a comparatively easy task to show the incompatibility between those confessions and the actual practices of the church. Thus every effort was made to come into cordial relations with the people, and all idea of a separate communion was rejected as already disclaimed. This course was favored also by the eagerness with which these churches looked for foreign sympathy and aid in their bitter struggles with their Muslim rulers.

It was not long, however, before the ecclesiastics saw that the new ideas would inevitably result in loosening and ultimately destroying their control over their followers. Then they massed their power against the new doctrines. An excommunicated man had no rights that a Turkish cannon could not destroy. He was nobody; could neither marry nor be buried; could not buy, sell, or employ. He had absolutely no status as a citizen. The result was that the formation of a Protestant civil community became absolutely essential to the very life of Protestants, whom other influences began to come in. The introduction of Europeans into the commercial and governmental affairs of the Empire brought with it the introduction of French and German thought. With increased ease of access to Europe more and more the Armenian and Greek youth sought education in Paris and Vienna. Returning, they brought with them the free-thinking of the day, and the grip of the Church, not only on their belief but their life, began very perceptibly to loosen, and the ecclesiastics began to think that perhaps they had not been absolutely wise in their repudiation of evangelicalism. In the meantime it became evident that these Protestants were not less national in their feeling than the orthodox; indeed, had an even clearer conception of what a true national life was. Here was clear proof that the study of the Bible was not only necessary for the spiritual but also for material development of every nation; that it was capable of good work for his people. The result has been that in very many sections of the Empire there is a constantly growing cordiality between the evangelical and the orthodox communities. Bishops and priests
are preaching Gospel sermons; in some cases Sunday-schools and Bible classes are started, in order to satisfy the growing desire for religious instruction. With infidelity staring them in the face, the Mohammedan missionaries are coming more and more to look upon the missionaries and the native evangelical churches as allies rather than enemies.

The problem of missions in Turkey, in their relations to the old churches, is, on the one hand, to establish the evangelical churches in faith and life that when a reunion with the others comes they shall not be borne away and swallowed up; on the other, to convince the old churches that their one aim is to establish the kingdom of God, not a temporal organization, and at the same time to set forth in the evangelical churches as clear and accurate an idea as possible of what constitutes a true church life.

III. Mohammedanism: The general relations of evangelical missions to Mohammedanism are few to point. It is needful here to note only such points as are specially brought out in the Turkish Empire.

The first feeling of the Muslims of Turkey toward the new sect was one of amused and rather tolerant indifference. Indeed, in not a few instances Turks who saw the simplicity of the evangelical worship, the absence of ritual, of pictures and priestly rule, the stress laid upon spiritual worship, said: "Why, these are Muslims." The use of the Bible in distinction from the creeds of the Church compared favorably in their eyes with the position they accorded to the Koran, and a Kurdish chief once said: "Why do not the Bible Societies print and bind the two books together? then we should have the complete revelation." For a while this cordial feeling for Protestants as distinct from the Eastern Church rather increased, except when the influence of ecclesiastics secured special hardships for those who had dared to brave the power of the Church. The missionaries had great influence, because the Turkish officials recognized, in many cases, their freedom from political motives, and were, therefore, with many, Shrewd Mollahs saw, as Armenian and Greek bishops had already seen, that these new people were exerting an influence for stimulating mental processes among the people, and that an intellectual awakening must in time cut the ground entirely from under their whole system of belief and government. Then commenced a most determined and bitter opposition. Not in appearance,—that was in most cases friendly,—but in the form of hindrance. Censorship of publications was made increasingly stringent. The necessary permits for buildings, churches, schools, and even private dwellings were refused or delayed as long as possible. Any Turks who manifested a leaning toward or an interest in the Bible were quietly arrested on some fictitious charge and spirited away. Spies were everywhere. Occasionally some Mohammedan more bold than his fellows, or feeling more secure in his position and relations with Porte or Palace, would give expression to his feeling that the work of the missionaries was really a good thing for the Empire, but means were generally found to forestall or nullify such advancement, not a few instances laws were promulgated especially directed against the missionaries. Vexations upon vexations were put upon them. The result has been that there have been very few conversions of Muslims to Protestant Christianity. There have come, however, from every side constantly increasing testimonies to the fact that Mohammedanism is getting upon the people of the land. The number of Scriptures sold to Muslims indicates a profound interest in the Bible, which cannot fail to bring forth fruit in Christian life.

Islam in its historic inception was in a great degree a protest against a devitalized polytheistic Christianity. If Muslims are to be brought to Christ, it must be largely through the example and influence of a living Christian church. The problem of missions in Turkey in their relation to Mohammedanism is that of developing a native church freed from the political quality of the old churches, strong in its belief in the unity of God, manifesting in its daily life an educated Christian faith.

In meeting this problem, missions in Turkey rely upon five special agencies: (1) Evangelical preaching; (2) Bible distribution; (3) Education; (4) Publication; (5) Social influence.

1. The Evangelical preaching of Turkey is very largely, in most cases almost entirely, in the hands of the native pastorate. The pastors, educated in the different seminaries and colleges, are taking a position of constantly increasing importance. Men of large views, earnest Christian spirit, they have done much, not only to build up the native evangelical churches, but to convince others that Protestant Christianity is a genuine power in the world for good. Not only in the larger cities but in the smaller places they are doing a great and often unheralded work, laying foundations in Christian character for future building.

2. Bible Distribution: There is probably no mission field where this department of mission work is more thoroughly organized so as to reach periodically every portion of it than the Turkish Empire. This has been already spoken of in the articles on the American and the British and Foreign Bible Societies.

3. Education in connection with the missionary work was a matter of great importance. Frequent primary schools were first started. Schools, called theological, to educate native ministers and teachers soon followed, and were free to the class for which they were designed. Girls' boarding-schools were also established early, the first in 1840. All this work was rudimentary. In 1863 Robert College was opened on the Bosphorus, and, almost simultaneously, the Syrian Protestant College at Beirut. These institutions mark the beginning of serious educational work in Turkey on the basis of requiring pupils to pay reasonably for their instruction, and on a plan of thorough training with an ample and well-prepared curriculum.

They had much to contend against in the as yet feebly developed desire among even the people of the seaboard for a college education. They had also to meet the opposition of many Christian men—missionaries and supporters of missions—who, in their zeal for the largest development of the evangelistic work, were jealous of an elaborate course of collegiate training. The first years of those colleges were marked by a slow growth. Classes of five, three, two, in one case of only one pupil were graduated.

In the course of a decade of years the increase was abnormal. There was a plethora of raw
material which had to be in part eliminated that what remained might be assimilated.

The institution at Scutari, Constantinople, now known as the American College for Girls, which at that time was opened, is delineating, through difficulties and limitations similar to those from which the college on the Bosphorus had emerged.

Between 1871 and 1875 two colleges in the interior of the country were projected, and in the latter year were opened, namely, the Oriental and Turkey College, at Aintab, south of the Taurus Mountains, and the Armenia—now Euphrates—College, at Harput, east of the Euphrates River. These colleges show points of resemblance and of unlikeliness to each other and to Robert College. Their course of study is not quite so full as that of the colleges on the seaboard. German and Italian are not needed in the interior, and much better work is done at Robert College in the physical sciences and in chemistry than is yet possible in an interior college. But the colleges of the interior have the advantage of being in contact with the races to be reached and moulded by them.

This growth of education, especially within the last seven or eight years, has developed the following noteworthy results:

a. The youth of Turkey can pay for their education; where terms are made light, according to location of the college, and such proportion of aid is given, through scholarships and by furnishing work, as is done in colleges in this country.

b. This securing of the privilege of Christian education through strenuous exertion on the part of pupils and their friends is one of the most essential conditions of realizing that growth in manly, self-reliant, aspiring character and that establishment of a vital, self-propagating Christianity, with which education nowhere is blessed. The plan of education now adopted has already yielded excellent results in this way. The more men, or races of men, are held down by the incubus of poverty, the more urgent is the necessity of rousing the will-power to self-help, by every right device and measure.

c. It is the stand taken and the work done by Americans in the recent years in the matter of education which has won the confidence of the best men of all races in Turkey.

d. It is this influence alone which can fit the schools for their future, and hold in harmonious relation one to another all those whose vital interests are identical.

e. These American colleges furnish in large part the models in education for all the Christian communities in Turkey, and train large numbers of the teachers. It was after Americans gave the signal that Armenians, Greeks, and Bulgarians established for themselves any schools worthy of the name. The Turks have ideal capacity for establishing excellent schools on paper, and ideal incapacity for establishing them in any other way. They also are already recognizing the American leadership.

f. All discussion among missionaries and their supporters relative to the utility of education and to the comparative value of educational and evangelistic work has ceased.

In the interior there are two centers of missionary publication in the Turkish Empire: Constantinople and Beirut. The work at Beirut is entirely Arabic; that at Constantinople includes Turkish, Armenian, Greek, Bulgarian, Judæo-Spanish, Kurdish, etc. In each place some of the best of missionary strength has gone into these works, and their religious books, but periodical literature, educational works, and such general literature as a growing Christian community is constantly demanding, and in ever-increasing quantity. Aside from the work of Bible translation in these different languages, the work of the Tur- key is telling all over the Empire in the correction of erroneous views, not by antagonizing their errors, but by presenting the truth.

3. Social Influence: This is an ever-increasing power in Turkey. The ready access gained to all classes of people, the power of personal presence and actual contact among the Turks, and doing a great deal toward preparing the way for the entrance of the Gospel. Many old-time prejudices against those that “having turned the world upside down, are come hither also,” have quietly but absolutely disappeared before the presence in and around Armenian, Greek, Maronite, and Turkish home of a simply dressed, unassuming Christian lady. Many an ecclesiastic has found it impossible to harangue against one whom he knew from personal acquaintance to be a Christian gentleman in the Turkish Empire the gates are open. It is only necessary to hold the vantage-ground gained and to make steady advance, in order to solve the deepest problems of the Eastern Question, by building up the kingdom of God in the lands where it was first established.

As we dwell upon past achievement and present encouragement, we feel that the future of Christian missions in Turkey is hopeful. The words of Dr. Jessup point to the light in the cloud: “Protestant missions have given the entire population the Bible; have trained hundreds of thousands of readers; published thousands of useful books; awakened a spirit of inquiry; set in motion educational institutions in all the sects of all parts of the Empire, compelling the enemies of education to become educators, and the Central and Oriental clergy to devote mosque and convent property to the foundling of schools of learning. Protestantism has forced Oriental patriarchs, bishops and priests to modify, if not abandon, their arbitrary oppressions and exactions. Protestantism has made ignorance unfashionable and persecution disgraceful. It has broken the fettas of womanhood, created directly and indirectly the system of female education spreading over the Empire and let light into unnumbered homes where women before had been consigned to ignorance and inferiority.”

Every evangelical church is a provocation and stimulus to the old sects, a living epistle to the Mohammedans with regard to the true nature of original apostolic Christianity. The Protestant translation of the Kuran into Arabic by Des. Ed. Smith and Cornelius Van Dyck forced the Jesuit Father Von Ham to make another translation based on the Vulgate. Encouraged by the spirit of reform and modern progress, even the Mohammedan doctors of Constantinople have issued editions of old Mohammedan authors which recount the fabulous stories of Muslim saints and Welys are to be expurgated or suppressed and not to be reprinted.”
The number of foreign missionary workers in the Ottoman Empire is 367. Proportion of these missionaries to the population is 1:37,416.8.

The statistical summary for 1903 is as follows: Ordained men, 125; unordained men, 108; mission women, 278; native workers, both sexes, 1,505; stations where missionaries reside, 122; outstations or substations, 526; communicants, 18,367; adherents not communicants, 51,244; day schools, 767; pupils, 36,719; higher institutions, 51; students in same schools; female physicians, 35; foreign women physicians, 3; hospitals or dispensaries, 63; patients reported during year, 159,737.

TURKISH LANGUAGE: This is an important member of the Ural-Altaic family of languages. It is thoroughly typical of the family (1) in tolerating no change or obsolement of the root through inflection, (2) in adding syllables or particles to the root for purposes of inflection, and (3) in giving the leading root of the vowel domination over the vowels and even consonants of such added syllables so as to secure euphony in the whole combination.

In etymology the Turkish is remarkable for the regularity of its declensions and conjugations, and for the abundance of the forms of the verbs, especially in the Osmanli Turkish. There is, properly speaking, but one conjugation of verbs. The verb is conjugated in great fullness of moods and tenses, with abundance of participial forms and verbal nouns. Moreover, by the incorporation of certain particles the simple verb may give rise to new verbs signifying a reflexive and a reciprocal quality of action. Another particle gives causative significance to the original or the derived verbs. And, finally, by the use of the appropriate particle with each of the verbs of the three series, each one is made to produce a new verb with a negative and one with an impossible signification. Each verb may be conjugated in all the moods and tenses and in the active and passive voices exactly on the model of the simple verb, producing some 20,000 tenses, number, and person forms from each simple verb. The variety and compactness of expression thus secured is extraordinary.

The principle of agglutination has its application also in the formation of adjectives, adverbs, and nouns, giving great basis and power in the use of the language within its limited vocabulary. Most pronouns and all prepositions in Turkish are used in accordance with the same principle, following the noun which they limit as suffixes and having a regular place in the building of the word.

The Turkish language lacks the relative pronouns and articles, being defective in the comparison of adjectives, and is defective in the relative pronouns.

In syntax the characteristic of Turkish is that while the subject occurs at or near the commencement of a paragraph, the sense is held in suspense while qualifying phrases and particulars of the most diverse description are brought in, the whole being hung at the very end of the paragraph, serving as the key to the whole enigma.

The Eastern Turks of Turkestan and Mongolia once had an alphabet derived, perhaps, from the Syrian taught by early Nestorian missionaries. However, Arabic letters are used for writing Turkish, a dot or two being added to five of them in order to express consonant sounds not found in Arabic. This alphabet, being without vowels, is quite unsuited to writing Turkish. Various attempts have been made without success to invent Arabic words and phrases. The Bashkir Turks of the Volga have adopted the Russian alphabet to some extent. Christians living in Turkey who have adopted the Turkish language use the alphabets of their ancestors in writing. Hence we meet with Greco-Turkish and Latin alphabets which are merely Turkish written with Greek or with Armenian letters.

The Turkish vocabulary is of limited extent, suggesting the limited range of ideas of pastoral peoples. All the dialects borrow freely from Persian, Arabic and Aryan languages. In the Osmanli Turkish, used in the Turkish Empire, this appropriation of Persian and Arabic words has been carried to a greater extent, and in the literary usage has borrowed phrases and grammatical forms to a degree which has raised the literature far above the comprehension of the unlearned, and has even threatened to destroy the very basis of the language.

For late years, however, a strong movement has set in at Constantinople for rejecting the use of unnaturalized Greek and Latin words. This tends to bring the literary Turkish back within the comprehension of the masses, and promises important results.

The domain of the Turkish language is remarkable for its extent. Turkish is spoken in varying程度 with Greek-Turkish usage in a wide belt extending from Chinese Mongolia westward to the Adriatic Sea. Its dialects are numerous, but on the whole may be classed as Eastern and Western, the dividing line being the Caspian Sea. The Eastern Turkish shows the language in its earlier stages of development, still preserving in Chinese Turkestan the words added to roots in lieu of declension of nouns, which have become in the Western Turkish mere case endings. The Uighur of Kashgar and the Uzbek or Jagatai of Bokhara and Khiva are dialects closely related to the Osmanli or Ottoman Turkish, but not easily intelligible to the Ottomans because of grammatical differences and a curious substitution of related consonants, as "p" and "b" in the west for "p" and "m" in the east, etc. The Azerbaijani Turkish, found in Persia and on the western side of the Caspian Sea, and the Nogai Turkish and the Krim-(Crimean) Tatar dialect spoken in Russia between the northern end of the Caspian and the Black Sea, are so closely allied to the Osmanli or western language that Turkish newspapers published in the Crimea have subscribers in Constantinople. The Kvas Turkish, spoken in the Caspian and Black Sea regions, is mutually intelligible with the Kazan Turkish, spoken in the plains of the Volga, belong rather to the eastern type. At
Kazan, by the way, is the present center of literary activity in the Eastern Turkish. As we proceed northward we find in the Ural mountain regions the Bashkirs, Chuvash, and the Chuvash, which are strongly tinged with Finnish words. In the extreme northeastern Siberia, along the Lena River, the Yakut Turkish is strongly Mongolian in its affinities. The same is true of the Kirghiz dialects used by the nomads of the steppes.

TURNER, Rev. George: Born January 22, 1818. Died May 19, 1891. A prominent missionary of the LMS. His heroic labors in the South Seas, amid the daily peril of life among the people who had recently been the murderers of John Williams, form a thrilling chapter in the annals of missions. In 1818 he entered the South Sea Islands. The establishment of the Malua Institution for training native evangelists was mainly due to his influential labor; and from this institution have gone forth many well-equipped preachers of the Gospel of Christ. Dr. Turner was not only a devoted missionary of the Cross, but from his pen the people of the South Sea Islands received a large supply of Christian literature. After his retirement his literary labors for the benefit of Samoa continued until his last brief illness, when he left a manuscript on the claims of this people, which was printed by the LMS.

TURTON, William: A native of Barbados, who, after serving for a time as a minister in the colonies on the American continent, returned to the West Indies in 1755, and devoted his life to working for the negro slaves, first at St. Bartholomew and afterward at New Providence in the Bahamas. He encountered bitter opposition from planters and from clergy of the established Church because he was a Methodist. Having collected a congregation in St. Bartholomew he induced the WMS to place it on their list of stations. He then, in 1801, began a similar work in New Providence, and, notwithstanding the influence of those who sought to impede his labors, met with great success until, worn out with exposure and privation, he was obliged to call on the WMS to send men to his aid. Thus this humble worker was the founder of two of the stations of that society in the West Indies.

TU-SHAN-CHIAU: A town of Kwei-chau, China, situated in the extreme S. E. of the province near the borders of Kwang-si. Station of the C.M. (1893), with (1903) 1 missionary and his wife, 1 place of worship, 1 woman missionary, and 10 professed Christians. Name also written Tui-shan.

TUTICORIN: Town on the coast of Madras, India, 35 miles E. by N. of Tinnevelly. The appearance of the place and its neighborhood is very unattractive, since in parts the subsoil is so shallow that no plants or trees will grow, and elsewhere there is nothing but heavy sand, with palm trees and a few bushes. During the southwest monsoon the dust is intolerable. In value of its foreign trade Tuticorin is second in Madras and sixth in all India. Its harbor, the shallow, is secure. Population, 25,100, of whom 15,000 are Hindus. Station of the SPG (1878), with (1903) 22 native workers, 6 places of worship, 6 day schools, 2 boarding schools, and 1,500 professed Christians, of whom 504 are communicants.

TUULIA: An island of the Sanom group belonging to the United States. Station of the LMS (1836), with (1903) 1 missionary and his wife, 2 women missionaries, 38 native workers, 2 boarding schools, 42 Sunday schools, 34 day schools, 1 dispensary, and 3,841 professed Christians, of whom 1,525 are communicants.

TUTURA: A village in Cape Colony, South Africa, situated in the Transkei region S. of Butterworth. Station of the UFS (1885), with (1903) 1 missionary and his wife, 29 native workers, 12 outstations, 5 places of worship, 10 Sunday schools, 13 day schools, and 500 professed Christians.

TYLER, Josiah: Born July 9, 1823. Died in 1866. Entered Amherst College in 1841, where he graduated in 1845. While he was taking his theological course at East Windsor Seminary he decided to enter the foreign field. He was ordained in 1849, and soon afterward, with his wife, he sailed from Boston for Cape Town. He was associated with Messrs. Wilder, Lindley, Aldin Grout and Lewis Grout in the Zulu Mission. Dr. Tyler labored forty years in Natal, and his "Forty Years Among the Zulus" is a standard and most interesting record of missionary life and labors. He founded the Esidumini station, the fiftieth anniversary of which was celebrated in 1901.

TYRE, or ES SUR: A town in Syria, situated on the coast of the Mediterranean Sea, 20 miles N. by E. of Acre. Station of the British Syrian Mission Schools (1869), with (1903) 2 women missionaries, 9 native workers, 4 outstations, 1 place of worship, 4 day schools, 1 dispensary.

UDAIPUR: A town and capital of the state of the same name in Rajasthan, India, situated about 120 miles S. of Ajmer. Pop. (1881) 38,145. Station of the UFS (1877), with (1903) 2 missionaries, one of them with his wife; 30 native workers, 1 outstation, 4 day schools, 1 dispensary, 1 hospital, 1 orphanage, and 124 professed Christians.

UDAPI. See Ud rip.

UDAYAGIRI: A town in Madras, India, situated in the district of Nellore, about 50
miles W. of Kavalli. Station of the ABMU (1885), with (1903) 1 missionary and his wife, 19 native workers, 11 outstations, 1 place of worship, 2 Sunday schools, 1 day school, 1 boarding school, 1 dispensary, and 334 professes Christians, of whom 325 are communicants.

UDIPI: A town in South Kanara, India, situated near the west coast, about 35 miles N. of Mangalore. Station of the Basel Mission Society (1854), with (1903) 6 missionaries, four of them with their wives; 44 native workers, 10 outstations, 18 day schools, 1 boarding school, and 1,857 professes Christians, of whom 1,440 are communicants. Some write the name Udapi.

UDUPITTY: A settlement in the Jaffna district of Ceylon, about 12 miles N. of Chavakacheri. Station of the ABCFM (1847), with (1903) 1 missionary and his wife, 43 native workers, 2 outstations, 18 day schools, 1 boarding school, and 1,665 professes Christians.

UEN-CHAU. See UEN-CHAU-FU.

UE-WU. See Yu-wu-hsien.

UGANDA: A British protectorate in Central Africa, lying at the northern end of Lake Victoria Nyanza. It is bounded on the south by German East Africa and by the 1st degree of S. latitude (on the lake); on the east by a line drawn through the middle of Lake Rudolf and by the British East African Protectorate; on the west by the Congo Free State, and on the north by the 5th degree of N. latitude, at the frontier of the Egyptian Sudan. It has an area of about 80,000 square miles, and a population of about 4,000,000 natives, one-fourth of whom belong to the Bantu race, who call themselves Baganda. There are about 300 Europeans in the protectorate. For administrative purposes it is divided into five provinces, of which the kingdom of Uganda forms the southernmost. This kingdom is recognized by the British as a native kingdom under a ruler called a Kabaka, and entitled to be addressed as "Highness." The present Kabaka is a grandson of Mutesa, and is a baptized Christian named Daudi Chua. Since he is a minor, a regency rules the land. In all five of the provinces the British encourage the native chiefs to govern their own subjects. mopani is the capital of the kingdom of Uganda, and Entebbe, about 20 miles from Mvogo, is the seat of the British administration. Uganda is connected by railway with Mombasa. Steamers on the Nile ascend from Khartum to Gondokoro, in the northern part of the protectorate, and the Uganda post office has been admitted to the general postal union. The soil is very fertile, for the most part, and the climate agreeable. The altitude of the Lake Victoria Nyanza is 3,800 feet.

The history of Uganda illustrates in some degree the service rendered by missionaries in pioneer work for civilization. The country was first visited by Henry M. Stanley, who, in 1875, sent word to England that King Mtesa of Uganda was anxious to have missionaries sent there. The CMS at once sent a party of missionaries, who landed in East Africa in 1876. The leader and one other member of the party were killed almost at once, but the mission was established in Uganda in July of 1877. There is no question that their arrival decided the destiny of the land. In 1879 a party of Roman Catholic missionaries arrived, and the Arab traders and slave-dealers endeavored to thwart both parties by inducing the king to become a Mohammedan. The situation was one suited to rivalries and intrigues, and these did not fail to appear. In 1884 King Mtesa died, and his successor, Mwanga, was soon taught suspicion of the CMS missionaries. He caused Bishop Hannington to be murdered in 1885, and persecuted the Protestant native Christians with great cruelty. The Mohammedans saw an opportunity in these proceedings, and in 1888 they drove Mwanga and the Roman Catholic, as well as the Protestant, missionaries out of the country. The Christians, however, stood firm, and one year later drove off the Mohammedans, and brought Mwanga back by armed force. The missionaries returned with Mwanga, and the power of the Christian party increased, and its peaceful development made steady progress. The British East Africa Trading Company now appeared on the scene, where mission influence 21 so far been the sole civilizing force. A sort of supervision of the government was established by the Trading Company in 1890, but failed to prevent intrigues and strife among the three religious denominations, and a condition of anarchy threatened, according to the time-service vocations of the King Mwanga. A British protectorate was declared in 1894. In 1897 King Mwanga fled from his capital with the intention of freeing himself from British control. He was at once declared deposed, and the infant Chua was proclaimed king. It was feared that the Mohammedan troops in British employ might for a time the whole foreign colony was in the greatest danger. After some sharp fighting, in which the Christian Ugandans rendered efficient aid, the mutiny was quelled. The British Government now maintained armed force in Uganda of Indian troops and native levies under British officers.

During the whole of this period the CMS mission has been making steady growth. It now (1903) has, in Uganda, 24 stations, 76 missionaries, men and women; 2,229 native students, in all grades and of both sexes, 49 schools, an industrial school, a printing house, a hospital, 5 dispensaries, and 38,844 professes Christians, of whom 11,145 are communicants. The characteristic of the Uganda Christians is their readiness to labor for the extension of the Kingdom of Jesus Christ, and their eagerness to possess and read the Bible. Of course, among so large a number of professes Christians many are in a low stage of development. Yet the development of Christian character is remarkable, seeing that the first convert was baptized only in 1882.

UGANDAN LANGUAGE: Belongs to the Bantu family, and is spoken by the people of Uganda, Central Africa. It has been reduced to writing by missionaries of the CMS, and is written with Roman letters. The beginnings of a literature have already been created. Some writers speak of this language as belongs to the "Bantu family of the Langa." Since Uganda has become the accepted name of the protectorate, there appears to be no reason for confusing English readers by forcing them to form the name of the language of that
country by Bantu, instead of by English, grammatical rules.

**UIN-HO.** See **YUN-HO-BSIEN.**

**UJJAIN:** A town in Central India, situated about 35 miles N. by W. of Indore. A very sacred city to the Hindus, who reckon longitude from here. Population, 32,932. Station of the POC (1893), with (1903) 1 missionary and his wife, 2 women missionaries, 7 native workers, 1 place of worship, 5 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 27 professed Christians.

**UKHRUL.** See **UKRUL.**

**UKRUL:** A village in Assam, India, situated in the state of Manipur, in a salubrious position among the lower Naga hills about 40 miles S. E. of Kohima. Station of the ABMU (1896), with (1903) 1 missionary and his wife, 1 native worker, 1 day school, 1 place of worship, and 16 professed Christians. Some write the name Ukhrul.

**ULU:** A settlement on Duke of York's Island, in the Bismarck Archipelago. Station of the Australian Wesleyan Methodist Missions, with (1901) 1 missionary, 90 native workers, 2 mission stations, 28 places of worship, 40 Sunday schools, 41 day schools, 1 theological class, and 822 professed Christians.

**ULUBARIA:** A town in Bengal, India, situated W. of Calcutta, and in its suburban region. Station of the Churches of God (1889), with (1901) 1 woman missionary, 5 native workers, 5 outstations, 1 day school, and 5 professed Christians.

**UMBALA.** See **AMBALA.**

**UMHLANGENI:** A settlement in Natal, South Africa, situated in the southern part of the colony, about 8 miles S. W. of S. Shepstone. Station of the Hannover Lutheran Free Church (1900), with (1901) 2 missionaries, 1 place of worship, 1 day school, and 100 professed Christians.

**UMSINGA:** A settlement in Natal, South Africa, situated in the N. part of the colony, about 35 miles E. of Ladysmith. Station of the UFS, with 3 missionaries, 2 women missionaries, 49 native workers, 22 outstations, 1 place of worship, 21 day schools, 1 dispensary, 1 hospital, and 662 professed Christians. Some use the name Gordon Memorial for the station.

**UMTALI:** A town in Rhodesia, Africa, situated on the railroad, about 160 miles N. W. of Beira and 170 miles S. E. of Salisbury. The present is the second new Umtali, the town having been twice removed by the Government. Station of the SPG (1891), with (1903) 1 native worker and 54 professed Christians. Also station of the ME, with 6 missionaries, four of them with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 1 industrial school and farm, 1 dispensary, 1 hospital, and 16 professed Christians. Some use the name New Umtali.

**UMZINTO:** A village in Natal, South Africa, situated near the coast about 45 miles S. W. of Durban. Station of the South Africa General Mission (1899), with (1901) 1 missionary and his wife, 3 native workers, 2 outstations, 1 place of worship, 1 day school, 1 dispensary, and 40 professed Christians. Some use the name Duma in this station.

**UMZUMBI:** A settlement in Natal, South Africa, situated about 70 miles S. W. of Durban, on the Umzumbi River. Station of the ABCFM (1861), with (1901) 2 women missionaries, 19 native workers, 1 place of worship, 6 day schools, and 1 boarding school. Some write the name Umzumbe.

**UNALAKLIK:** A settlement in Alaska, situated on the W. coast of Norton Sound, about 170 miles S. E. of Cape Nome. Station of the Swedish Evangelical Mission Covenant (1888), with (1901) 2 missionaries and their wives, 1 woman missionary, 3 native workers, 1 place of worship, 1 day school, and 87 professed Christians.

**UNDUP:** A settlement in Sarawak, Borneo, situated on the Batang Lupar River, about 40 miles from its mouth. Station of the SPG (1863) with (1903) 1 missionary, 5 native workers, 9 places of worship, 1 boarding school, and 1,164 professed Christians, of whom 481 are communicants.

**UNG KUNG.** See **YANG-KANG.**

**UNITED BRETHREN IN CHRIST; Home, Frontier, and Foreign Missionary Society of the:** The first mission work under the name of United Brethren in Christ was in the home field, but in 1853 a society was organized for the prosecution of home, frontier, and foreign work. Its first foreign mission field was Shenghe, on the west coast of Africa, in the colony of Sierra Leone, where work was begun in 1855. Later a temporary mission was commenced in China, and in 1895, after the disastrous revolt in Sierra Leone, work was begun in Japan, which has developed into a most successful mission. In 1900 the Society established a station in Porto Rico.

The Mission in Africa from the first had many trying experiences, as did also the Mendi Mission of the American Missionary Association, also in Sierra Leone. The trying climate, the unsettled political conditions combined to hinder the work, but notwithstanding everything, it prospered. In 1888 the American Missionary Association withdrew from its foreign work, and transferred the Mendi Mission to the United Brethren. A revolt on the hut tax question, by the interior tribes, brought heavy loss, and for a time there was question as to the Society's continuing its African work. It decided to do so, and as a result (1903) 4 missionaries and 16 native workers report 8 organized churches, with 321 communicants in 9 stations, each one of which has a circuit subjoined. There are 8 day schools, with 464 scholars, and every department shows decided gain.

In Japan there are 6 missionaries, 11 native workers in Tokio and Kioto, 1 organized church, 130 communicants. A considerable amount of evangelistic work has been carried on in the district about Kioto, special emphasis being laid upon temperance, in connection with representatives of the World's Woman's Temperance Union.

In Porto Rico a commodious church building has been dedicated, and the four missionaries speak very hopefully of the outlook. The Woman's Missionary Association of the United Brethren in Christ has work undertaken by the Woman's Missionary Association of the United Brethren in Christ has work undertaken by the Young People's Union is also a strong auxiliary.
UNITED METHODIST FREE CHURCHES' FOREIGN MISSIONS: The Missionary Society of the United Methodist Free Churches of England was formed in 1857, by a union of the Wesleyan Association with certain churches of the Wesleyan Reformers. The Wesleyan Association had, at the time, several missionary stations in Jamaica and the Australian colonies, continued by the united body, which also opened in a few years missionary operations in the new fields of New Zealand, East and West Africa and China.

In the West Indies, after the abolition of slavery, missions were opened, and in 1852 there were in Jamaica and at Bocas del Toro 11 missionaries, 379 native workers, 3,559 church members, 10 stations, 37 schools. The work in Australia and New Zealand has been merged in that of the Australian Wesleyan Missionary Society.

The admission, in 1859, of a body of native Christians from the South, Long into the missionary connection turned the attention of the Society to Africa. Accordingly the Rev. Joseph New was sent out, and shortly afterward Rev. Charles Worboys. The work of these two men was of short duration, but their places in the mission were ably filled. natives were found by the Negroes and had been found willing to risk the climate, so unfavorable to Europeans, and have carried on the work with much success. The report (1902) shows 7 missionaries, 276 native workers, 3,358 church members, 8 stations, and 12 outstations in the Windward.

The Rev. Chas. Cheetham of Heywood brought before his denomination the necessities of East Africa, as represented by Dr. Krapf, and so interested his brethren in the object of his own attention, that in 1861 the Methodist Free Churches, who were then seeking to send out missionaries to a heathen field, applied to Dr. Krapf for advice as to a sphere of labor. He promptly replied, suggesting the Ribé region, and volunteered to conduct thither and establish firmly among the natives the church if the church would send them; and so, in that same year, the Revs. Thomas Wakefield and James Woolner, accompanied by two young Swiss, sailed for Africa. Ere long the failing health of Drs. Krapf and Woolner made their return necessary. The two Swiss shortly followed them. Thus Dr. Wakefield was left alone until the latter part of 1862, when he was joined by the Rev. Charles New. In 1874 Mr. New attempted to open a mission on the Tana; was cruelly treated by a savage chief, and died alone, when trying to return to Ribé, before any one could come to his assistance. Then followed an attempt to work among the Wa Nyika race, dwelling near Ribé and along the coast of the Indian Ocean, which met with disaster, but others took the places of those who had fallen, and on the Tana the mission among the Gallas was pushed forward, notwithstanding the unsettled state of the country.

The East Africa work is now carried on in two districts, Ribé and Tana, in 6 stations, with 3 missionaries, 11 native workers, and 361 church members.

The China mission was opened in 1864 by the Rev. Wm. Fuller, at Ningpo. Here he was joined after a short time by Rev. John Mars and the Rev. F. W. Galpin. Later a station was opened at Wenchow, and, while there was much hostility, through fear of foreign influence, and work was pushed until 5 outstations were occupied. The report (1902) shows 6 missionaries, 200 native workers, and 5,257 church members.

UNITED PRESbyterian CHURCH; Board of Foreign Missions: The Board of Foreign Missions of the United Presbyterian Church dates from the organization of the Reformed Presbyterian Church in 1810. It was formally organized in Philadelphia, June 15 of that year, and was incorporated by the Legislature of the State of Pennsylvania April 12, 1866, under the title of "The Board of Foreign Missions of the United Presbyterian Church of the United States of America." This Board consists of nine members, each elected by the General Assembly of the church for a term of three years. The Corresponding Secretary, who is also appointed by the Assembly for a term of four years, is a member of the Board of Directors.

For a number of years this Board had under its care missions in Trinidad, Syria, China, Egypt, and India. At length it concentrated, under the direction of the General Assembly, its whole foreign work upon the latter two of these fields—India and China.

India: This mission was commenced at Sialkot in 1855 by Rev. Andrew Gordon. The work (1902) occupies 12 districts: Sialkot, Pasur, East and West Gujranwala, Gurdaspur, Pathankot, Jhelum, Zafarwal, Khangar, Dogran, Bhera, Rawal Pindi and Lyallpur. There are 59 missionaries, 303 native workers, 23 organized congregations, 209 other preaching places, 9,493 church members, 13,810 adherents. There is a theological seminary at Jhelum and a college at Rawal Pindi, with 5 boarding schools, 2 industrial and 134 day schools, with a total of 8,752 scholars, 7 dispensaries and hospitals, and 2 sanitariums. Zenana and other departments are fully equipped.

Egypt: The mission was begun by the arrival in Cairo of the Rev. Thomas McClure and his wife, on November 15, 1854, and in December of the same year they were joined by Rev. James Barnet, who had been laboring in Damascus for several years in connection with the same Church. It was a favorable time for establishing a mission in Egypt, as Said Pasha was well disposed toward European civilization, and seemed not the least afflicted with that jealousy and hatred of Europeans so common among Mohammedan officials. For some years little was accomplished in mission work, except the opening of a school for girls, which no other for boys, and the conducting of regular religious services on the Sabbath, at which, however, very few attended. In 1856 Rev. Julian Lansing and Miss Sarah B. Dales also removed from Damascus to Egypt. Later, the work carried on at Alexandria, under the United Presbyterian Church of Scotland, and Miss Pringle's girls' school, supported by the Ladies' Society of Paisley, Scotland, both passed over to the American United Presbyterian Mission, together with two missionaries, Dr. Philip and Mr. John Hogg. Up to the year 1860 the missionary operations of the United Presbyterian Church were, for the most part, confined
to Cairo and Alexandria. A few evangelistic trips for the sale of Scriptures and other religious books, and for preaching the Gospel in an informal way, had been made both north and south of Cairo, and unsuccessful attempts had been tried to open regular mission work at Benisouef, Luxor, and Alexandria. At Asnioc, where a Coptic church was threatened against any break-out against the mission's native agent there, and thirteen Muslims were imprisoned a year for beating him in open court. The Coptic hierarchy had begun to truced and malign the missionaries and decry their labors; while excommunication was threatened against any Copts who were disposed to read Protestant books, or meet with those who had joined the little Protestant church, and all who had professed openly their belief in Protestant principles were made the subjects of the church's anathemas. In 1860, and from that time onward for several years, other recruits from America joined the mission. The work began to prosper, the schools grew in the number of pupils and in efficiency; the attendance at divine service on Sabbaths steadily increased, the property at the "mosque" of Mooski, given by Said Pasha, was repaired and fitted up as mission premises, containing residences for the missionaries and rooms for the schools, and a comfortable and commodious place for religious services. The central position of these premises, separated but not far from the Coptic and Greek churches, and in the very line of traffic and travel, helped to swell the number of visitors and inquirers; persons from all parts of the country visited the mission book-depot on the Mooski on week-days, and the mission chapel on the Sabbath. Additions by procession were made every few months. A commencement was made in training young natives for mission service. Sabbath-school work was prosecuted with vigor and success, and the organization of the first native Protestant church was effected in Cairo in the year 1865.

Assiout was occupied in 1865; Koes, near Luxor, in 1865; Medinet el Fayoum, and Mansura, in the Delta, in 1866; Esne and Erment, south of Luxor; Kossir, on the Red Sea, in 1876; Mansaloot in 1878; Minieh and Tanta, in 1880; Benisouef, in 1882; Zagazig, in 1885; Assiout was visited in 1887. With the capture of Khartoum by the British, the mission sought to enter the Sudan. For a time they were much hindered by the refusal of the Government to allow any mission work in that region. Still Mr. and Mrs. Giffen were located at Omdurman, and found work in caring for their own people who had come for trade, and gradually the restrictions were removed, and in February, 1902, permission was given to occupy a station on the Sobat River, in the Fashoda district of Sudan.

Special emphasis is laid upon school work, book distribution, evangelistic and Zerara, work. It has been the policy of the mission to leave to the natives themselves the primary education of their children, and in consequence a large number of parochial or free schools have been established, supported entirely, superintended, and taught by them. The mission restricts its operations in the line of education for the most part to the training of teachers, and to giving instruction in the higher branches. Most of the teachers in the parochial schools were taught in the Mission Training-school or College at Assiout. There are also academies and seminaries for boys and girls at Alexandria, Mansura, Cairo, and Assiout, where instruction and training are given sufficient to enable pupils to prepare for school-teaching, or for taking positions in the government service. In these, as in all the mission schools, an hour every day is devoted to religious instruction, in addition to the compulsory, and to this end opened depots for the sale of books in a number of places, and employs a large number of colporteurs, making special arrangements with the British and American Bible Societies.

The general type of the Mission's educational work has won from Lord Cromer, the British resident, the heartiest commendation, and was probably the basis of the permission to establish stations in the Sudan.

The report for 1902 shows 74 missionaries, 495 native workers, 52 organized congregations, 171 other preaching places, 25,000 church members, 25,000 adherents, 170 schools, 12,942 scholars, 3 hospitals and dispensaries.

The Women's General Missionary Society of the United Presbyterian Church of North America is auxiliary to the General Board of the church. It was organized in 1883 and has done a notable work in Zenana, educational, and medical missions. It is represented in India by 30 missionaries and in Egypt by 19.

UNITED PROVINCES: One of the great divisions of provinces of the Anglo-Indian Empire. Its ruler is a lieutenant-governor, who is appointed by the viceroy and governor-general of India, to whom he is directly subordinate. The former kingdom of Oudh is included in the United Provinces. The territory extends from north latitude 23° 52' to 31° 7', and from east longitude 77° to 84° 24'. It reaches from Bengal on the southeast to the Jumna River on the northwest. On the northeast the independent kingdom of Nepal forms part of the boundary, while farther west the area extends clear up into the Himalayas themselves, and impinges last on Tibet. Near the southern edge run the great Ganges, the Yamuna, and the Jumna. As the province lies south of that river. Thus a vast extent of the Upper Ganges valley is included in these provinces, and the great tributaries of that river flow through them. The area of the provinces is 107,164 square miles. The population is (1901), 47,691,782. The country is largely flat, sloping gradually toward the southeast. In the extreme north, however, it becomes mountainous as it approaches the Himalayan region, and several mighty peaks of that great range lie within the limits of these provinces in the highest being Nandi Devi (25,661 feet). In this vicinity are located several sacred and favorite places of European resort and residence. In this same region also, at the locality known as Hardwar, far among Himalayan defiles, the Ganges takes its rise. This is a confluence of three rivers, the Bhagirathi, as being the source of their most sacred river. On the mountain slopes hereabouts tea is grown in large quantities; this industry is mainly in the hands of Europeans and supported by European capital. The Jumna River has its rise, like the Ganges, in the Himalayas; and, after meandering southerly, takes a southeasterly course, nearly
parallel to the Upper Ganges, the gradually approaching it; and farther west it joins the greater river at Allahabad, which is now the capital city of the province. This point of union is another famous place of Hindu pilgrimage. The right bank of the two rivers (known as the "Doab," or Two Waters), is the granary of the Northwest. The rainfall of the whole territory is only twenty-five inches a year, and confined within three or four months. This fact renders artificial irrigation necessary to ensure the fertility of the soil. The rainfall has supplemented the smaller labors of the native husbandmen in this direction by establishing large canal systems fed by the great rivers of the provinces, and often large enough to be of use for navigation as well as for irrigation. Besides wheat and the other cereals usual to Indian agriculture, large quantities of opium are grown near Benares, and in other parts of the provinces, and in Oudh. Two hundred and fifty thousand acres, or six per cent. of all the land under cultivation, was reported a few years since as devoted to its growth. This is a government monopoly here, as elsewhere in India.

The population is largely Hindu.

Historically, these provinces present many points of great interest. Of the very earliest inhabitants few remnants now are left; the aboriginal tribes (Kols and others of this and adjacent regions) are almost certainly their representatives. The Aryan invasion, pouring in from the northwest through the Punjab, dispossessed the former dwellers on the soil, founded great cities, of which the ruins of some remain (such as Hastinapura and Kanauj), and established kingdoms and dynasties, whose wars and achievements form the basis of fact for the great Hindu poem of the Mahabharat. At Kapila, in Oudh, Gautama Buddha was born early in the 6th century before Christ, and at Kasia he died half a century later. The territory of this province formed a part of the realms of the great King Asoka, who, in the 3d century before Christ, gave his political support to Buddhism, and made it the prevailing religion of Hindustan. In the 11th century after Christ, the Mohammedans began to invade the Punjab through the northwestern door as the Aryans before them. The upper portion of these provinces became a few centuries later the central seat of their power; the city of Delhi, their greatest capital, once just within the northwestern boundary of the Northwest Provinces, has more recently been transferred to the Punjab. Late in the last century, when the great Mogul power had sensibly declined, and was disintegrating into weak and petty principalities, the English authority, then firmly established in Bengal under Warren Hastings, began to creep up the Ganges. Benares became theirs in 1775; a part of Oudh was ceded in 1801; other districts followed; but the details we need not here repeat. A British cantonment was established at Cawnpur as early as 1778, which became the nucleus of the present great city. The districts thus annexed to the English territory were first governed from Bengal; but in 1833 the plan was formed of erecting them into a fourth presidency; this plan was abandoned two years later in favor of that still in force, by which they constitute a province of similar rank to the province of Bengal. The lieutenant-governor, governor, subject to the governor-general. In 1856 the continued misgovernment of the King of Oudh caused that territory to be annexed and placed under the charge of a chief-commissioner.

The great Indian mutiny of 1857 raged more fiercely within the borders of this province than elsewhere in all India. It was at Mirzah, in its last stages, that the great battery of Mogul cavalry broke into open and violent rebellion on the 10th of May, 1857. After massacring their officers and many others, they started for Delhi. There the native infantry joined them. The city was seized by them, the old Mogul Empire was proclaimed, and the fire of rebellion spread rapidly over the whole province. In September of the same year Delhi was recaptured, and Lucknow was relieved the next March. The rebellion was wholly quelled before the end of 1858. But the siege of Delhi, the defense of Lucknow, under Lawrence and his little band, with its subsequent relief by Havelock, and the massacres at Cawnpur, are destined to perpetual memory.

Hindi is the principal language, subject in different localities to marked dialectic variation. The Mohammedans mostly use Urdu or Hindustani, as also in Oudh, a government monopoly here, as elsewhere in India.

The BMS, CMS, American Presbyterian, American Methodist, and the LMS have been actively at work for years; and a German mission has accomplished great good. Education, promoted by government and mission, is making progress.

UNITY OF BRETHREN (Bruder-Unitat). See MORAVIANS.

UNIVERSITIES' MISSION to Central Africa: The Universities' Mission to Central Africa was proposed by David Livingstone in 1857, and undertaken in 1859, after a second appeal by Robert Gray, Bishop of Cape Town. In 1861 Charles Frederick Mackenzie, Archdeacon of Natal, was consecrated bishop of the mission, and by him, under the guidance of Livingstone, the mission was started at Magomerez, south of Lake Nyasa, a colony of released slaves forming its nucleus. The place chosen being found unsuitable, on account of the climate, the site was twice changed, but both places proving too unhealthy for the European missionaries. Bishop Tozer, who succeeded Bishop Mackenzie in 1862, then resolved to settle in Zanzibar, and there to devote himself to the training of released slave children, in the hope of forming with them Christian settlements on the mainland at a later date.

About ten years of quiet preparatory work was carried on in Zanzibar, under Bishop Tozer and Dr. Steere, in the education of rescued slaves, the preparation of grammars and dictionaries, and the translation of portions of the Scriptures.

In 1874 Bishop Steere succeeded Bishop Tozer, and in 1875 a station was opened at Magila (Masalabani), in the Usambara region, on
the mainland northwest of Zanzibar, by a colony of released slaves trained by the mission. With a view to the formation of stations in the interior, a half-way station was made at Masiśi, in the Rovuma region far to the south of Magila, in 1876, and in 1879 the Rev. W. P. Johnson settled along the eastern shore of Lake Nyasa, but was expelled in 1881 by the chief of the country. In 1882 a station was opened on the east shore of Lake Nyasa, at Chitiįį, and was maintained for eighteen months under great danger, owing to the repeated attacks of the natives.

In 1883 Charles Alan Smythies was appointed bishop to the mission. Following the Rev. W. P. Johnson, a steamer was purchased for the use of the mission on Lake Nyasa, and in 1885 a station was begun on the island of Likoma, in the lake, where are now the headquarters of the Nyasa Mission.

The work is now carried on in two dioceses—Zanzibar and Likoma—and in the two outlying districts of Usumbara and Rovuma, in German East Africa. The two dioceses are in constant relations with those of Mombasa and Uganda, and there is in anticipation the formation of a West African province which shall more thoroughly unify the work of the Church of England in that section.

Educational work is kept well provided, a new industrial house having been established at Zanzibar, completing the general scheme, with St. Marks Theological College at the highest grade. A new steamer has been added to the lake service, and special attention is paid to evangelistic work on the shores of the lake. In providing for the boys and girls in the schools, so far as practicable, native customs are preserved. Considerable difficulty is experienced from the unfriendliness of the Portuguese officials and their disregard of justice in dealing with the natives. The Mission staff (1902) consists of two bishops, 33 English and 16 African clergy, 22 laymen, 52 women, and 204 native readers and teachers. In the schools, homes, and workshops there are gathered nearly 5,000 children, 800 being supported by the Mission. The number of communicants is over 3,700, and of adult catechumens baptized, etc., over 12,000.

UNOCCUPIED FIELDS: This phrase is misleading, since there is, on the one hand, no land at all which is not some representative, while on the other, scarcely a country among those where many missionary societies are found has more than a handful of workers,—so meager a proportion of laborers that not more than the corners of great harvest fields are touched.

I. Considering first the lands where work is established but in which few, comparatively, are affected by it, the following countries may be placed, the order being that of populations as yet unexplored. Lowest in the list are such countries as Persia, Mexico, Central America, and the islands of Borneo, New Guinea, Sumatra, and Madagascar. For years, or in some cases decades, these countries have been the objects of missionary endeavor, but for various reasons few have heard the Gospel message. Save in New Guinea there is no sufficient excuse for such a state of affairs. South America is truly a "Neglected Continent," yet the portion of its inhabitants that is most neglected is the one which in a sense most needs the Gospel, viz., the more than six millions of Indians, who constitute about sixteen per cent. of the entire population. These are usually open to the missionary, so far as any governmental opposition is concerned. As for the Spanish and Portuguese-speaking populations of South America, they, too, have been largely neglected, except for the presence of a few mission stations along the river. The number of missionaries of the Protestant faith are in the proportion of 1 to 54,985 of the entire population. The Dark Continent comes next in number of those who are unreachèd by missions. Neglecting the vast expanse of the Sahara, which is so sparse of Christian influence that it need not be considered, there are the adjacent stretches of the Sudan, in most sections densely peopled, where a population two-thirds as great as that of the United States cannot reach a Protestant mission station. In other sections of the continent there are extreme districts: first, a single missionary or native Christian, India, the oldest mission field of the world of any great size, comes next in the numbers that are beyond the influence of the missionary. Here there are about seventy-four thousand to every Protestant worker from foreign lands.

While in most cases the nearness of mission stations, especially in South India, and the ease of reaching a Christian center because of railroads, etc., seem to place a larger responsibility on the unevangelized, it should be remembered that poverty and the obstacles due to the caste and to the village system militate against such a quest. As China is the most populous empire in the world, so within her confines is found the largest number practically beyond the pale of Christian influence. One Protestant missionary to 146,290 Chinese, and the fact that the province where mission stations were nearest together in 1898 gave each station a territory larger than Rhode Island, suggest how largely unoccupied this great empire is, and that, too, when there exists no western, single missionary to native Christian, or native Christian to native Christian, a numerical obstacle, nor any serious difficulty in the way of climate, or in the attitude of religions and the people.

II. Turning to those fields where scarcely a beginning of missionary effort has been made, the most extensive area is found in Siberia. In a territory of nearly 68,110,740 square miles, or about as much as would be contained in forty United Kingdoms, the population is so sparse as to lack nearly a million of equaling that of Greater London. It is true that the Russian Church is nominally active, but its influence is nil on that portion of the population most needing the Gospel. Shamanism is the practical religion of the people in the north, and vices are hurrying the aboriginal peoples to their grave. Such characteristics as the burial alive of widows or motherless children, the exposure of helpless old people, who in exceptional cases have been eaten by their own offspring, and the fearful cruelty of men who slay their enemies in revenge, are by no means universal; but they display a nature which sadly needs the principles of love and common humanity not to speak of other virtues. Southward from this Russian territory lies Central Asia, including Turkestan. All this territory is under Russian influence, tho in the eastern portion China is a more prominent factor in the life of the Mohammedians and a weak form of Confucianism.
are the main religious stays of the people. As these races are nomadic and predatory, they constitute a confessedly difficult population to reach. Tibet, the almost inaccessible pinnacle of Asia, is even more isolated because of the exclusive policy which forbids all treaties and trading and from her territories all save a mere handful of adventurous travelers and equally brave missionaries. Lamaism, which even in Mongolia has proven so great an obstacle to missions, is here found entrenched against all other religions, and the very soil seems to be so imbued with the spirit of the land that the isolation which must always be the lot of missionaries in that land, will further work against the missionary occupation of Tibet. The adjacent countries of Afghanistan and Baluchistan are as fanatically Muslim as Tibet, and even in that portion of the territory under British influence or control. Hatred of Christianity is the prime article in the creed of the bulk of the people, and this will always be a serious difficulty; the mission work here is altogether new. It is therefore that the Afghans are open to its benevolent and salutary influences, Arabia is sufficiently cut off by sandy wastes on the north to merit the appellation of the natives, who call it "The Island of the Arab." Its area, extending one-third that of Europe, or that part of the United States east of the Mississippi, is contained in the world-zone of maximum heat, and it boasts the two great high-places of the Muslim world,—both facts constituting serious obstacles to missionary occupation. The southern and southeastern seaboard, however, are so largely under British influence that Muslim interference and persecution are not much to be feared. As containing the Holy Land of the Mohammedans, this peninsula in a peculiar manner challenges the Christian Church. In Europe the fact that it has but little more than eight million inhabitants. Asia's southeastern peninsula, French Indo-China, while under European control, is yet in great religious need. Upward of twenty-two millions of people are without any religion or missionary work, except Bible colporteurs and a few individuals bring the Gospel to their knowledge. India's earlier influence, which at one time was so dominant, is yielding to the ancestor-worship and Confucian ethics from China.

A little is being done for these lands; yet what are the labors of four societies and their twenty-seven representatives among populations aggregating nearly fifty millions? Naturally most of the work done has been of an elementary character, or else has been very limited in its territory. The Bible, and particularly in Russian and French possessions, has been the great dependence. Unaided by any human factor, this book has proven the power of God unto the salvation of a few, thus planting the tree of healing in lands of death. Russian non-conformists in Siberia are an evangelical factor that counts for more than all that is being done by missionary societies elsewhere in the lands here under consideration. If Professor G. Frederic Wright's estimate in 1901 is correct, the half million non-conformists with liberty, and a little money and this portion of his prophecy may be realized: "The conditions of a new country rapidly filling up with settlers are so favorable to the adoption of new customs and the reception of new light that the coming century may see Siberia leading the whole Empire into purer and more spiritual religion." Medicine in Europe is changing in a large degree the spiritual value of a filling wedge of great value. It leads to not a few cases of "double cures," as it does also at the Tibetan outpost of Leh. Tibet is becoming encircled with missions, which are able to send in through natives of the country the Tibetan prophecies, the Bible, and even some of the great truths charged by the dynamics of the Gospel. Were it not for the recent Russo-Chinese treaty, hope for Tibet's future would be bright. Its third article, however, is ominous, not merely for this country, but also for all other regions, especially North China, where Russia's influence is felt. The first sentence reads thus: "Entire liberty in what concerns Russian Orthodox, as well as Lamaist, worship will be introduced in Tibet; but all other religious doctrines will be absolutely prohibited." In making preparations for the landing of missions in the Laos country, the work is being taken up by the native church, a fact of considerable significance and hope.

III. Some of the obstacles to missionary enterprise in the lands named are serious, but some are only apparent. Not considering the countries which contain numerous missionaries but whose territory is far from occupied, the health obstacles in the others are not to be compared with what has been overcome in certain coastal regions of South America and Africa, where fevers have been exceedingly deadly. Even Indo-China is healthful compared with some other sections of the missionary world fully occupied. Sparsity of populations is characteristic of some of the unoccupied fields; but this is not more than has confronted missionaries in Greenland, in some portions of British America and Alaska, in the southern extremity of South America, and elsewhere. The ferocity of the inhabitants of these lands is no more marked than that of the Idaho Indians, or the aborigines of New Guinea and the New Hebrides, where missionaries have brought the work to a happy stage of progress. Religious fanaticism, it is true, is a problem in such countries as Afghanistan, Baluchistan and Arabia, while the attitude of the state religion in Siberia, Indo-China, and Tibet is an obstacle which is most serious. In the last named countries a widespread missionary movement is at present impracticable.

A serious question may be raised here, namely, that of the wisdom of expending force in overcoming the difficulties connected with all these lands, except possibly Arabia, when the missionary contingent is so meager and is needed so sorely in countries where there is perfect freedom of action and greater numbers without the Ganges. Thus the Malay Archipelago, Persia, and China are really far more strategic and actually needy fields than are the practically unoccupied lands where it is so difficult to carry on missionary work. It is not to be forgotten that parts of a great continent having in other regions a goodly number of missionaries may already be going to missionary enterprise, as is French Indo-China, or Arabia. Such an instance is found in the Sudan, already spoken
of, which is really the greatest unoccupied field of the present day, and one, too, which has in it nearly all the elements called for in a strategic position of the highest importance. While these considerations are not to be forgotten, the fact that less important unoccupied fields should not be entirely forgotten. The angel of God still calls upon men to turn away from white harvest fields and “go toward the south unto the way that goeth down from Jerusalem unto Gaza: the same is desert.” To minister, as did Philip, unto a single man, has a place in the Divine purpose which cannot be neglected in the wide scheme of preaching the Gospel to the whole world.

IV. It should not be forgotten, in considering the unoccupied fields, that there are certain portions of the population that are often un-reached, the scattered widely in lands where missionaries are laboring in force. Thus the Mohammedans are scarcely thought of in China, where, according to the “Stateman’s Year-Book,” some 30,000,000 of them are found, mostly in the northeast and southwest. They are largely true of Mohammedans in Africa. While there may be a valid excuse for neglecting these religions in the Turkish Empire and Persia, there is no less reason for passing by those resident in China than in British India, where Mohammedan missions are so fruitful. Neglected classes are no less worthy of special consideration than are unoccupied lands.

UNUNJAMBI: A settlement in Natal, South Africa, situated N. of Tugela River, about 25 miles N. W. of Eshowa. Station of the Norwegian Church Mission of Schreuder, with (1901) 2 missionaries and their wives, 2 women missionaries, 3 native workers, 1 place of worship, 1 day school, 1 boarding school, and 115 professed Christians.

UNWANA: A settlement in Southern Nigeria, West Africa, situated on Cross River, about 85 miles W. of Calabar. Station of the UFS (1888). The station was opened in 1889 with (1903) 2 missionaries, 2 women missionaries, 4 active workers, 1 place of worship, 1 day school, 1 dispensary, and 1 hospital.

UPOLU. See Samoan Islands.

URAMBO: A district in German East Africa, situated in the Umaymwezi country, about 175 miles E. of Ujiji on Lake Tanganyika. It was formerly a station of the LMS, but was transferred to the Moravians after they opened stations in German East Africa. Station of the Moravian Missionary Society (1897), with (1903) 2 missionaries and their wives and 1 place of worship. Some use the name Kilmanji for this station.

UARWA: A town in Japan, situated on the main island, about 10 miles N. of Tokio. Station of the PE (1903), 1 missionary, 1 native worker, 1 Sunday school, and 23 professed Christians.

URDU LANGUAGE: A language which arose from the mingling of races produced by the Mohammedan conquest of India. It is closely allied to the Hindi, but, being used by the Mohammedans, where Hindi is the language of the Hindus, it is very much farther from the Sanskrit than even the Hindi. It has a large number of Arabic and Persian words. It is the official language in Western India, and serves as a medium of general intercourse between different races. It is written with the Arabic letters. The name Urdu means “camp” and is applied to the language as the “language of the camps” of the time of the Mogul conquerors of the 11th century and their followers. It is also called Hindustani.

URIPIV: A mission station of the New Hebrides Missionary Society, on Mallicolo Island.

URIYA LANGUAGE: The language of about 8,000,000 inhabiting the province of Orissa, India. It belongs to the Indo branch of the Aryan family of languages, and is closely related to the Bengali. Sometimes, in fact, it has been classed in a dialect of Bengali. Reasons exist, however, for regarding it as a distinct language. It is written with the Uriya character.

URMIA: A town in Persia, situated in the N. W. part of the country near Lake Urmia, 450 miles W. by N. of Tehran. It is the reputed birthplace of Zoroaster. Population, 35,000. Station of the PN (1835), with (1903) 8 missionaries, four of them with their wives; 4 women missionaries, 164 native workers, 112 outstations, 53 places of worship, 63 Sunday schools, 56 day schools, 7 evening schools, 1 theological class, 1 college, and 2,719 pupils. Annual examination, dispensary, 1 hospital, 1 printing house. This station was founded by the ABCFM in 1835 and transferred in 1871. Also station of the Archbishop’s Mission to the Assyrians, with (1903) 1 missionary, 2 native workers, 1 boarding school, and 1 theological class. Some write the name Urmia.

URUGUAY: The smallest republic of South America, is situated on the east coast, and is bounded by Brazil on the northeast, and the Atlantic Ocean and the La Plata River on the south, and on the west by the Uruguay River, which separates it from the Argentine Republic. The country is divided into 19 provinces, with a total area of 72,110 square miles and a population of about 750,000. Seven per cent of the population are native-born, consisting principally of half-breeds; the remainder are Spaniards, Italians, French, Brazilians, and Argentines. Montevideo, the capital, situated near the entrance of the river La Plata, has a good harbor and roadstead, and a population of nearly 150,000. Uruguay was formerly a part of the vice-royalty of Spain, then became a province of Brazil, but declared its independence in 1825, which was recognized by the treaty of Montevideo (1826). By the terms of the constitution, adopted 1830, a president, elected for four years, and a parliament, composed of two houses, constitute the government of the republic.

The territory is one vast pasture-land. On the rolling plains great numbers of cattle and sheep are raised, and the principal wealth and exports of the country consist of live stock and the resulting products. Agriculture is carried on to a limited extent. The climate is in general healthful. In the coast districts there are no great extremes of heat and cold; in the interior the thermometer ranges from 80° in summer to 35° in winter. Extensive roads, more than 1,000 miles of railway, an active commerce, and a good climate are doing much for the advancement of Uruguay.

The state religion is Roman Catholic, but there is complete toleration, and the general condition of education is very satisfactory.

Uruguay is blessed with a prosperous branch
VACAOHS: A town in Mauritius, situated about 25 miles by railway S. of Port Louis. Station of the CMS, with (1900) 1 woman missionary.

VAKADU: A town in Madras, India, situated in the District of Nellore, about 16 miles E. of Gudur. Station of the Hermannsburg Missionary Society (1871), with (1903) 1 missionary and his wife, 5 native workers, 1 place of worship, 3 day schools and 90 professed Christians, of whom 76 are communicants.

VALADEZIA: A settlement in Transvaal, South Africa, situated in the Zoutspanberg District, about 80 miles N. E. of Pietersburg. Station of the Swiss Romande Mission (1875), with (1903) 2 missionaries and their wives, 1 woman missionary, 10 native workers, 5 outstations, 6 places of worship, 6 Sunday schools, 6 day schools and 505 professed Christians, of whom 120 are communicants.

VALPARAISO: An important city of Chile, S. America, situated on a bay of the same name. It is the chief Chilean seaport. It has many institutions of learning; the streets are narrow, but usually well paved, and the houses present a gay appearance with their bright colors and overhanging balconies. A railroad connects it with Santiago. Population (1895) 122,435.

VAN: A town in Asiatic Turkey, on the east shore of Lake Van, 145 miles southeast of Erzroom, 350 miles southeast of Trebizond. Climate, mild, healthful; elevation 5,000 feet. Population, 30,000, Armenians, Kurds, and Turks. It is now, as it always has been, the center of Armenian influence in Eastern Turkey. On the picturesque rock behind the city are a large number of inscriptions in cuneiform, dating back even earlier than many of the Assyrian inscriptions, and relating to a kingdom that preceded the Armenian occupation. Near Van is the island of Agtamar, the seat of an Armenian Catholicos, whose spiritual rank is equal to that of the Catholicos of Etchmiadzin. His influence, however, is small. Station of the ABCFM (1872), with (1900) 2 missionaries and their wives, 1 woman missionary, 25 native workers, 2 outstations, 2 places of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 industrial school, 1 hospital, 1 dispensary and 66 professed Evangelical Christians. It has not been the policy of the missionaries to advise Armenians to join the Evangelical Church if they adopt evangelical ideas.

VANDERKEMP, John T.: Born in 1747 at Rotterdam, Holland, where his father was pastor of the Dutch Reformed Church; studied at the University in Leyden; spent 16 years in the army, where he was captain of horse and lieutenant of dragoons. After leaving the army he went to Edinburgh, where he became distinguished for his attainments in the natural sciences and modern languages. He then returned to Holland and practised medicine with great success. He was converted as a result of the death of his wife and child by a shocking accident. He then offered himself to the LMS for service in
South Africa, was ordained, and in 1798 he sailed with three others for Africa, in a convict ship. On the voyage he and his companions ministered to the spiritual as well as the temporal wants of the convicts. Arriving at Cape Town in March, 1799, Dr. Vanderkemp commenced at once to labor among the natives while at the same time he awakened a deep interest in missions among the Europeans. He laid the plan of building a city for the interior. After some weeks he reached the Great Fish River, where he obtained permission from the native king Geiha to open a school. The king ordered him to leave a year later, and with some 60 followers he retired to Graaf Reinet, arriving there early in 1801. His work was especially among the Hottentots, of whom he soon collected a congregation of over 200. His efforts in behalf of this despised race aroused the enmity of the colonists, but by his wise conciliatory policy they were pacified, and he continued his work unmolested. Buildings were erected and Graaf Reinet was made a permanent station, but the privileges afforded to the natives at that station bade fair to stir up another rebellion, and Dr. Vanderkemp saw the necessity of removing the Hottentots to a place of safety, where they would form a colony by themselves. The government gave the mission a grant of land near Algoa Bay, and in June, 1804, Van der Capeldorp was removed to the new place. The station of Bethelsdorp was founded in 1803, and in 1810 the number of people who assembled there for worship was fully a thousand.

The cruelties which the Hottentots had so often suffered at the hands of their Boer masters excited the deepest pity in the heart of the doctor, and it is said that in the course of three years he paid no less than $5,000 for the redemption of slaves from bondage, and by his exertions, with the help of other missionaries, the Hottentots were finally set free. Almost the last public service which the doctor was able to render to people was in testifying in the courts at the Cape to the wrongs practised upon the Hottentots.

He died on the 15th of December, 1811, in the midst of active preparation to enter upon a new field of work in Madagascar. It was said of him that as combining natural talents, extensive learning, and unexampled energy, ardor, and benevolence, unshaken perseverance, unfeigned humility, and primitive simplicity, Dr. Vanderkemp has perhaps never been equalled since the days of the Apostles. As Mr. Moffat wrote about him: "He came from a university to teach the alphabet to the poor, naked Hottentot and Kafir; from the society of nobles to associate with beings of the lowest grade of humanity; from stately mansions to the filthy hovel of the gressy African; from the army to instruct the fierce savage in the tactics of a heavenly warfare under the banner of the Prince of Peace; from the study of medicine to become a guide to the Balm of Gilead and the Physician there; and, finally, from a life of earthly honor and ease to be exposed to perils of waters, of robbers, of his own countrymen, of the heathen, in the city, in the wilderness. His period of service was short. His work was done. He died in the prime of life, and his enemies were nominal Christians quite as often as heathen savages. But his work remained. Those who later built on the foundations prepared by Vanderkemp were the first to acknowledge the value of the influence of this devoted man.

Van Dyck, Cornelius Van Alan: Born in Kinderhook, Columbia County, New York, August 13, 1818. Died November 13, 1892. He entered Jefferson Medical College in Philadelphia, and at the age of twenty-one was appointed medical missionary of the ABCFM in Syria. Only one medical missionary, Dr. Asa Dodge, had preceded him in Syria, and Dr. Dodge, who arrived in February, 1833, died in Jerusalem January, 1835, so that for five years, until the arrival of Dr. Van Dyck, there was no American physician in this land.

Dr. Van Dyck arrived in Beirut April 2, 1840, and spent the month of May in a tour in Northern Syria with Messrs. Thomson and Beadle, going to Tripoli, Hums, Hamath, Antioch, Latakia and Aleppo.

In July he went to Jerusalem with three of the missionary families, and in his absence Beirut was bombarded by the allied English and Austrian fleets. In January, 1841, he returned to Beirut and spent the summer in Deir el Komar, with Dr. Eli Smith and Mr. Wolcott, opening a school for the sons of the Druze chiefs. In June, 1843, he removed to Abeeih, with Dr. Thomson, remaining there for eight years, teaching in the newly-founded Abeeih Seminary, making journeys to Southern Lebanon, Merj Aiyun, and Hasbeia, attending the sick in all parts of the field, translating and writing text-books of the people in Arabic, and studying the Arabic language with constant assiduity and enthusiasm. In the wars of 1840 and 1845 he was called to attend the wounded and suffering.

On January 14, 1846, he was ordained in Abeeih to the Christian ministry.

During the year 1847 a committee on behalf of the mission prepared and sent to the United States an appeal in behalf of undertaking the translation of the Bible in the Arabic language, the work to be entrusted to Dr. Eli Smith. The document is long, and now of great historical value.

The work of Bible translation was begun in 1848-49 by Dr. Eli Smith, who continued the preparatory work for eight years, until his death, January 11, 1857, but stated before his decease that he was only willing to be responsible for the translation of the first ten chapters of Genesis, which had been corrected and printed under his own direction.

In 1851 Drs. Thomson and Van Dyck were transferred to the Sidon station, having the care of the Hasbeia and Tyre districts. Dr. Van Dyck stated that he wished to "give himself now more fully to the ministry of the Word." For the following six years his labors were abundant, and Dr. Thomson stated that their "station was on horseback." A church was organized in Hasbeia, a Bible class was maintained in Sidon, attended by large numbers of the people. At this time his well-known Arabic geography was published.

In 1853 he visited the United States with his family. In July, 1854, he returned to Syria, and on the decease of Dr. Eli Smith, in January, 1857, he was called by the unanimous vote of his mission and the Board of Directors to superintend the work of the Arabic translation of the Scriptures.

God, in His wise providence, had been preparing him for seventeen years for this work. He had read and mastered a whole library of Arabic books, poetry, grammar, rhetoric, logic, history, geography and medicine; had published Arabic
books on algebra, geometry, higher mathematics, geography, logic and prosody, besides religious tracts and sermons, and the printing of the whole Arabic Bible was finished in March, 1865.

The event was celebrated in the old American Press building, and in the upper room where Dr. Smith had labored on the translation eight years, and Dr. Van Dyck eight years more, the assembled missionaries gave thanks to God for the completion of this arduous work.

The printing of the Arabic Scriptures was now carried on, but the press could not keep up with the demand, and Dr. Van Dyck went to New York in 1865 and spent two years in electrotyping the royal octavo edition of the Bible, and during his stay gave instruction in Hebrew in the Union Theological Seminary.

On his return to Beirut, in the fall of 1867, he superintended the electrotyping of various editions of the Arabic Bible, conducted the weekly Arabic journal, and entered upon his duties as professor of the medical department of the Syrian Protestant College, continuing his connection with it in abundant labors, in teaching the theory and practice of medicine and chemistry, founding the Astronomical Observatory, and witnessing the growth and development of the institution, and the graduation of 12 medical classes, until his resignation.

His labors in the St. John's and the Greek hospitals are too well known to need more mention here. He labored in Syria over 55 years.

**VANITYAMBADI:** A town in Madras, India, situated in the N. Arcot district, about 40 miles S. E. of Vellore. Station of the German Evangelical Lutheran Synod of Missouri, etc. (1897), with (1901) 1 missionary and his wife, 3 native workers, and 3 day schools.

**VAN LENNEP, Henry John:** Born at Smyrna, Turkey, April 18, 1815. Died, January 11, 1889. He came from an old Dutch family long connected with commerce and trade in the East. At the age of fifteen he was sent to America for an education. He graduated at Amherst College in 1837, and Andover Theological Seminary in 1839; was ordained at Amherst, and embarked for Turkey the same year as a missionary of the ABCFM. He was stationed first at his native city, removed in 1844 to Constantinople, and in 1854 was sent as a pioneer missionary to Tokat, Asia Minor. In 1863 he was again stationed at Smyrna, where he remained till his final departure for America. His main work was preaching and education. He was distinguished as a linguist, preaching acceptably in four foreign languages—French, Armenian, Greek, and Turkish. He was a proficient in music, drawing, and painting, which were his favorite sources of recreation. He excelled as an instructor of youth. Numbers of the most successful professional men among the evangelical Armenians and Greeks of Constantinople and Asia Minor—ministers, physicians, and instructors of youth—were his pupils. After retiring from his work abroad he secured to twenty-five Asiatic facilities for higher education in the United States. His warm sympathy with the people among whom he worked won their respect and love to a marked degree. Dr. Van Lennep was honored with the degree of D.D. by his Alma Mater, Amherst College, in 1862.

**VATÉ LANGUAGE.** See Ebaté Language.

**VATORATA:** A station in British New Guinea, situated on the S. W. coast, about 40 miles S. E. of Port Moresby. Station of the LMS (1894), with (1903) 2 missionaries, 11 native workers, 6 outstations, 6 day schools, and 169 professed Christians.

**VAYYURU:** A town in Madras, India, situated in the Kistna delta, about 16 miles N. W. of Masulipatam. Station of the BOQ (1891), with (1903) 1 missionary and his wife, 1 woman missionary, 32 native workers, 12 outstations, 23 places of worship, 24 Sunday schools, 15 day schools, 1 boarding school, and 1,234 professed Christians. Some write the name Vuyyuru.

**VELLORE:** A town in Madras, India, situated in the N. Arcot district, 82 miles W. of Madras. It was the scene of a massacre of English soldiers by native mutineers early in the 19th century. The SPG established a Church station here in 1796. This was neglected after 1803, during about 20 years, until the care of the district was transferred to the SPG in 1835. In 1855 the chapel was sold to the RCA, and since 1855 the SPG has had no mission there. Population, 38,032. Station of the RCA (1854), with (1903) 1 missionary and his wife, 3 women missionaries, 142 native workers, 24 outstations, 27 places of worship, 30 Sunday schools, 28 day schools, 1 boarding school, 1 college, and 1,876 professed Christians, of whom 504 are communicants. Also station of the Loventhals Mission (Dutch) (1872), with (1903) 1 missionary and his wife and 3 native workers.

**VENEZUELA:** The most northerly of the South American republics, lies between British Guiana and Colombia on the east and west, with Brazil to the south and the Caribbean sea to the north. In size it is larger than France and Germany taken together, and is about equal to the Gulf States plus Kentucky, Arkansas, and Tennessee, and is divided into eight states, two national settlements, and eight territories. In 1899 it was decided to restore a former division into twenty states, and this work is still in progress (1904). Its estimated population is between 2,000,000 and 3,000,000. The government is modeled after that of the United States of America, with more freedom given to the provincial and local governments. Education is compulsory and gratuitous, and illiteracy is fast decreasing. The state religion is Roman Catholic, and the other religions are tolerated, they are not permitted any external manifestations. The people are engaged in agriculture, cattle and sheep raising, and mining; there are very rich deposits of gold and silver, copper and iron. Caracas, the capital, has a population of about 75,000. Altho the American Bible Society commenced the work of the distribution of Bibles in Venezuela in 1876, but little progress was made until 1886, when Mr. Milne and Mr. Ponzotti canvassed the republic. Emilio Bryant, who came from Spain to Caracas in 1854, may be called the pioneer of missions in this land; and his heroic life did much for the cause of truth. Workers of the Brethren and of the Christian and Missionary Alliance have accomplished much good by their
faithful ministrations. The PN and the Scandinavian Alliance of America also have missionaries in Vangvieng.

VENGURLA: A town in Bombay, India, situated in the Konkan region, about 30 miles N. by W. of Goa. St.ation of the PN (1900), with (1903) 1 missionary and his wife, 4 women missionaries, 1 native worker, 1 day school, 1 dispensary, 1 orphanage, and 15 professed Christians. Some write the name Vengurle.

VENKATAGIRI: A town in Madras, India, situated about 30 miles S. W. of Gudur. Station of the Hermannsburg Missionary Society (1869), with (1903) 1 missionary and his wife, 10 native workers, 3 outstations, 1 place of worship, 4 day schools, and 195 professed Christians, of whom 194 are communicants.

VERBECK, Guido Fridolin: Born January 23, 1830, in the province of Utrecht, Netherlands. Died March 9, 1898. On May 7, 1859, he sailed from New York for Japan as a missionary of the RCA, and on the following November he arrived at Nagasaki. From this time until his death, nearly forty years afterward, his life was identified with the work of Protestant Missions in Japan. It was Nagasaki that first came in contact with Wakasa, the Japanese officer who, while commander-in-chief of the forces at Nagasaki in 1854, picked up a floating copy of the New Testament in English, became interested in the life and teachings of Christ, and, in 1860, was baptized by Dr. Verbeck.

During a part of his residence in Nagasaki he taught two classes of young Samurai, the "two-sworded." These young men afterward became prominent in the new government which succeeded the revolution of 1868. Remembering his instructor, they summoned him from Nagasaki and sought his aid and advice in framing their new institutions, and in 1869 he removed to Tokio, or Yedo, as it was then called. For nine years thereafter he remained in close connection with the government, giving shape to and supervising the government university and the system of education as at first established. He accompanied the first deputation of Japanese to the outside world, on their tour among the nations of Europe. In recognition of his services in this and other directions, he received from the government the decoration, of the third class, of the Rising Sun, which entitled him to appear at all public and court receptions.

In 1889-90 Dr. Verbeck visited the United States, and his addresses on the evangelization of Japan made a deep impression. In the translation of the Old Testament he bore a conspicuous part; but he took most pleasure in lectures and evangelical preaching. He did much toward the planting of Christianity and the development of a new civilization in the "Sunrise Kingdom."

VICTORIA (Kamerun): A trading station on the coast of the Kamerun Colony, West Africa, situated about 35 miles W. of Kamerun River. It has a botanical garden, is connected with Buea, the capital, by telephone, and is the terminus of the railway to Lisoka. Station of the Basel Missionary Society (1886), with (1903) 2 missionaries and their wives, 5 native workers, 6 outstations, 6 day schools, and 115 professed Christians, of whom 85 are communicants. Also station of the German Baptists of Berlin (1891), with (1903) 1 native worker and 1 place of worship.

VICTORIA (Mexico). See CIUDAD VICTORIA.

VICTORIA FALLS: A settlement in Rhodesia, situated on the Zambesi at Victoria Falls. Station of the Paris Evangelical Missionary Society (1898), with (1903) 1 missionary and his wife. The station, also called Most or Thunya, is merely a place of transit for all the upper river country.

VIKARABAD: A suburb of Haidarabad, the capital of the native state of Haidarabad, India. Station of the ME, with (1903) 1 missionary and his wife, 11 native workers, 5 Sunday schools, 2 day schools, 1 orphanage, 158 professed Christians, of whom 79 are communicants.

VIKTORIA. See VICTORIA (Kamerun).

VILLUPURAM: A town and railroad junction in Madras, India, situated in South Arcot, about 35 miles by railway from the French port of Pondicherry. Station of the Leipzig Missionary Society (1875), with (1903) 2 missionaries, one of them with his wife; 17 native workers, 7 outstations, 11 places of worship, 8 day schools, 2 boarding schools, and 699 professed Christians, of whom 322 are communicants. Some write the name Wulupuram.

VINTON, Justus Hatch: Born at Willington, Conn., February 17, 1806. Died at Rangoon, Burmah, March 31, 1858. Graduated at Hamilton Literary and Theological Institution, 1829; appointed in 1832 missionary to Burma by the ABMU; studied with Dr. Wade and two native converts, a Burman and a Karen, who were then in the United States; sailed with Mrs. Vinton July, 1834, reaching Maulmain in December. Having studied the language at home and on the voyage, they began their work at once. Within a week they left for the jungles, traveling for three months from village to village, making known the Gospel of Christ. Mr. Vinton's labors were not confined to the Karens. He studied Burmese that he might preach to the Burmans. During the rainy season, when travel is impossible, he labored among the English soldiers in garrison, preaching and distributing tracts among the Burmans, and translating the New Testament into Karen, or writing his commentary. In six weeks he distributed 8,000 copies, and by his efforts among the troops resulted in the conversion of many, both among the common soldiers and the officers. In Maulmain Mrs. Vinton had in her school pupils who had come 200 miles for the sake of learning to read God's Word in their own language, threading the forests by night, not daring to travel by day.

The failure of Mrs. Vinton's health made a visit to America necessary in 1817. On their return to Burmah in 1850 Rangoon was chosen as the center of his operations. War between Burmah and England broke out in 1852, and the Burmans wreaked their vengeance for defeat upon the Karen Christians. As soon as the English had captured Rangoon, Mr. Vinton went there and took a leading part in the work of aiding the persecuted Karens, and restoring confidence among them. During this work Mr. and Mrs. Vinton had to provide for the sick in an epidemic of smallpox. In all this work they laid the foundation of the needy won the hearts of the Karens, and ensured the success of the new station established at Kemmendine, in the outskirts of Rangoon. In 1854, at Mr. Vinton's suggestion, the Karens of the Rangoon district organized the Karen
Home Missionary Society, the first of the kind ever formed in Burma, designed for aggressive work among the heathen, the natives already supporting their own pastors and schools. In May, 1855, the corner-stone of a church was laid by Mr. Vinton in the presence of a large assembly of native and English friends. A substantial church of brick was erected, with funds contributed in America, England, and Burma, at Kem- mundane by Mr. Vinton, Governor-General of India. In the mission premises at Kemmendine, Mr. Vinton now has the work of training young men for the ministry. He also toured among the villages in the mountains, and in one of these tours contracted the fever which caused his death. Mr. Vinton is regarded as one of the most zealous and successful missionaries ever sent to heathen lands by the Baptists of the United States.

VINUKONDA: A town in Madras, India, situated in the district of Kistra about 45 miles N. N. W. of Ongole. Station of the ABMU (1883), with (1903) 2 missionaries and their wives, 1 woman missionary, 56 native workers, 49 stations and residences, 34 day schools, 1 boarding school, and 3,878 professed Christians. Also station of the ELGS.

VIZAGAPATAM: A town and seaport in Madras, India, situated about 100 miles N. of the Godavari delta and about half way between Madras and Calcutta. Population (mainly Telugu), 30,291. Station of the LMS (1806), with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 22 native workers, 3 outstations, 7 day schools, 3 Sunday schools, and 108 professed Christians, of whom 78 are communicants.

VOGELSTUIKSP: A settlement in the Transvaal Colony, S. Africa, situated in the district of Lichtenburg. Station of the Hannover Lutheran Free Church Mission, with (1903) 1 missionary and 4 outstations.

VOHEMAR: A town and seaport in the N. part of Madagascar, situated on the E. coast. Station of the American Board (U. S. A.) (1838) with (1903) 1 missionary and his wife, 4 native workers, 4 outstations, 1 place of worship, and 37 professed Christians. Some write the name Vohimary.

VOLUNTEERS OF AMERICA, THE: A philanthropic and religious organization, inaugurated in March, 1896, by Commander and Mrs. Ballington Booth in response to numerous requests on the part of American citizens. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government, having as its ideal the Constitution of the United States of America.

The organization is under the command of Ballington and Mrs. Booth, who are elected by its directors as President, and by its members as Commanders-in-chief. The national headquarters are at No. 38 Cooper Square, nearly opposite Cooper Institute, New York City. The Volunteers have six regiments, under the command of six territorial and regimental officers and their wives. These embrace nine companies or central socie-
ties that have met the higher requirements before becoming chartered by the corporation, and nearly 100 self-supporting posts or societies throughout the country, not including outposts.

Some of the statistics gathered at the close of the fiscal year in the month of September, 1903, may furnish some larger idea of the excellent results of the Volunteers' mission to men. It has philanthropic institutions in Chicago, Juliet, Austin, Fort Dodge, Kansas City, Pueblo, Worcester, Boston, Lynn, Malden, Toledo, Erie, Pittsburgh, Buffalo, New Castle, Philadelphia, Newark, Flushing, New York City, and other centers. During the year closing September, 1903, over 400 women have been cared for, and over 3,000 beds have been provided for young women in the Homes of Mercy. There have been 479 children received into and cared for in the children's homes, and 3,400 children have been helped with clothing. The Volunteers and workers have visited and aided 29,084 families during the year in and around the poorer sections of the large cities where they labor. No less than 180,555 persons were lodged during the year in the Homes and institutions for working and destitute men and women, not counting the many hundreds sheltered during the floods in St. Louis, Kansas City and other centers. There were 273,428 persons fed with substantial meals at a nominal cost in these institutions, and 81,900 persons were given temporary relief and food. Over 4,000 quarts of fresh milk were donated, principally to sick children.

Over 14,000 prisoners living reformed lives have been enrolled in the Volunteers' Prison League. Mrs. Ballington Booth has the entire oversight of this branch of the work. They are in touch by correspondence and services with 28,000 men within the walls. Tens of thousands of poor people and children were given an outing into the fresh air during the year through the organization. The Volunteers attracted 1,077,965 persons to their Sunday and week-night services inside their halls, and despite the almost unprecedented wet season 2,557,349 to their 13,064 open-air services during the year. In addition to the Volunteer Reading Rooms, thousands of copies of religious and secular literature are circulated in States' prisons, jails, hospitals, soldiers' homes, and children's homes. Not by any means least, as an evidence of the permanence of the work, $97,085.40 were contributed by the poor people, irrespective of the national receipts, in support of their own Volunteer societies and local cause.

If the foregoing figures, taken from the reports of the field commanders, do nothing else, they justify the existence of the Volunteers of America, and are in themselves eloquent testimony to the work accomplished in one year.

VUGA: A settlement in German East Africa, situated in the Usambara region, about 53 miles E. and N. of Mount Kilimanjaro, in the German East Africa Mission (1895), with (1903) 5 missionaries, three of them with their wives; 1 woman missionary, 1 native worker, 2 outstations, 1 place of worship, 1 day school, and 103 professed Christians. Some write the name Wuga, and call the same place Ngazi.

VUYYURU. See VAYYURU.
WADAI: A native state of Africa under the protection of France, lying between the Egyptian Sudan and the Lake Chad basin, containing 170,000 square miles, and a population of about 2,000,000. The state is semi-civilized. It is a rigidly Mohammedan region, with a strong tendency to destroy any person dissenting from Islam. No missionary has ever visited Wadai unless in disguise or with military force.

WADAL: An ancient city in Bombay, India, 26 miles northeast of Ahmadnagar. It was formerly of some political importance. Station of the ABCFM (1855), with (1903) 1 missionary and his wife, 43 native workers, 15 outstations, 12 places of worship, 16 Sunday schools, 1 boarding school and 257 professed Christians. Some write the name Wadale.

WADE, Jonathan: Born at Otsego, N. Y., December 10, 1798. Died at Rangoon, Burma, June 10, 1872. Graduated at Hamilton Literary and Theological Institution 1822; ordained February, 1823; embarked as a missionary of the ABM for Burma, June 22, 1823; reached Rangoon December 5 following. At the commencement of the first Burmese war, soon after his arrival, he and Mr. Hough were arrested, imprisoned, and put in irons, then dragged to the place of execution, and compelled to kneel before a Burmese executioner, who had received orders to strike off their heads at the discharge of the first British gun on Rangoon. Panic-stricken at the sound of the cannon, the executioner, alarmed for his own safety, left his prisoners and fled. They were afterward seized by the Burmese officials, but rescued by the advancing British troops. They went to Calcutta, remaining till the close of the war. Mr. Wade occupied himself during this interval in the study of the language, translation of books, and superintending the printing of useful works. He preached also in English in the Circular Roads Baptist Chapel. At the close of the war he returned to Burma, making Amherst his home until the transfer of the mission to Maulmain, where he labored thirteen years. In 1830 he returned to Rangoon. In 1831 he visited Kyook Phyoo in Arrakan, and began the work which was continued by Mr. Comstock and others. He received the degree of D. D. in 1852 from Madison (now Colby) University. In the absence of Dr. Binney in the United States he had charge of the theological seminary for Karens at Maulmain. In addition to preaching the Gospel, he reduced to writing the two Karen dialects, Sgaw and Pwo, and prepared important theological and educational works—among them a Karen Thesaurus, a work in 5 volumes, the last volume completed in 1850. This he designed to be for the Karen language what Dr. Judson’s Dictionary was for the Burmese, and to his revision he devoted his powers as long as he was able to work. He visited the U. S. twice, returned to Maulmain from the second of these visits in 1852, and during twenty years more, the suffering from an incurable malady, he continued his literary labors for the Karens. Only six days before his death did he lay down his pen.

WADHWA: A town in Bombay, India, situated in the Gujarat region, about 65 miles S. W. of Almadabad. Station of the PCI (1895), with (1901) 1 missionary and his wife, 6 native workers, 2 Sunday schools, 2 day schools, 1 orphanage and 17 professed Christians.

WAHAIJER: A settlement in Assam, India, situated in the Jaintia Hills, S. E. from Jowai, and giving access to the Mikir and Bhoi hill tribes. Station of the Welsh Calvinistic Methodist Mission, with (1903) 1 missionary, 22 native workers, 17 outstations, 28 places of worship, 18 Sunday schools, 32 day schools and 1,055 professed Christians, of whom 344 are communants.

WAIF: A town in Bombay, India, situated about 20 miles N. N. W. of Satara. Station of the ABCFM (1872), with (1903) 2 women missionaries, 14 native workers, 1 outstation, 3 places of worship, 6 Sunday schools, 1 boarding school and 22 professed Christians.

WAITHLSITINGMANYALWA: A station of the SABC (1892) in the Chaco, Paraguay South America, situated about 57 miles W. of the Paraguay River and 140 miles N. W. of Asuncion. It has now (1903) 4 missionaries with their wives, 1 place of worship and 1 day school. It is also called the Central Station of the Chaco Mission.

WAKAYAMA: A town and seaport in Japan, situated on the main island about 40 miles S. W. of Osaka. Station of the Cumberland Presbyterian Mission (1877), with (1903) 1 missionary and his wife, 4 native workers, 1 outstation, 2 places of worship, 2 Sunday schools, 1 dispensary and 142 professed Christians. Also station of the PE, with (1903) 1 missionary, 1 place of worship, 1 Sunday school, 1 day school and 28 professed Christians.

WAKEFIELD, Thomas: Born at Derby, England, June 23, 1836. Died December, 1901. In the year 1861 he was accepted by the Methodist Free Church for pioneer missionary service in Eastern Africa. The district of Ribë, eighteen miles from Mombasa, was decided upon for the first mission station; and here, for six months, Mr. Wakefield bravely grappled with the difficulties of a pioneer missionary in the Dark Continent, unaided and alone. Besides acquiring several African languages, and preaching the Gospel among the scattered peoples around Ribë amid many discouragements, Mr. Wakefield in 1865 made a most interesting journey across the plains to the Galla country, and his experience on this trip was published in a work entitled Footprints in Eastern Africa. The Galla Mission was established at Golbanti in 1884; but the Masai warriors came down upon the station on May 3, 1886, and besides putting to death Mr. and Mrs. Houghton, the missionaries settled there by Mr. Wakefield, massacred several native Christians, who had volunteered to reside there that they might assist in the establishment of the mission. In 1887, having completed twenty-five years of service for the East Africa Mission, he returned to England, and during the following year he received the highest honor his denomination could confer upon him, being elected to the Presidency of the Assembly at its annual gathering. For many years he was a member of the
Missionary Committees, and he was elected a Fellow of the Royal Geographical Society and of the Royal Historical Society. In the year 1891 he reoffered himself for Eastern Africa, and he would have returned to his adopted land if his medical advisers had consented for him to do so. Thus began this Church’s Missionary work in Africa; and his instruction on his life gave utterance to these words: “He not only laid the foundation of our East African Mission; he also lifted the missionary ideal of our churches to a high standard.”

**WALAJABAD:** A town in Madras, India, situated in Chingleput Division, about 6 miles W. S. W. of Conjeeveram. Station of the UFS, with (1903) 1 missionary, 80 native workers, 10 outstations, 72 professed Christians, 1 place of worship, 10 day schools, 1 dispensary and 1 hospital.

**WALFISH BAY:** A settlement on the coast of German S. W. Africa, which belongs to Great Britain, together with the land immediately surrounding it, pop. 68,000. It is about 300 miles to the north of the Equator and 700 negroes. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 3 native workers, 2 outstations, 2 day schools, 1 Sunday school and 512 professed Christians, of whom 216 are communicants. Some write the name Wali'sh.

**WALLINGER, Miss Amelia Anne:** Born in England, November 13, 1839. Died in India, March 3, 1894. Miss Wallinger was the only daughter in a home of refinement and wealth, and after the death of her parents, having an abundant income at her command, she commenced her home charitable work among the orphan daughters of professional men. From 1870 to 1882, entirely at her own expense, she made her home and school for a large number of girls of gentle birth, whose means were not sufficient to educate them for the position to which they belonged. Afterward, she entered into active home mission work, and under her supervision were held mothers’ meetings, children’s sewing classes, and missions for the lowest classes of society. Altho advanced in years, she decided to give up her English home and its ties of friendship, and go to the foreign field. She set out, as a missionary of the CEZ, for Utakamund, South India, in 1886. Not only did she go at her own charges, but she bore the expense of another missionary who accompanied her. After remaining in Utakamund for a year, she and her colleague, Miss Ling, made a tour in the Wynaad, a wild country inhabited largely by Malayalam, Tamil, and Kanarese-speaking people, and having as its principal towns Gudalore and Devala. Plans were formed, not only to do missionary work in the lower plateau of the Wynaad, but also among the mountain tribes of the Nilgiri Hills. The chief tribe of this race, the Todas, are believed to have been the Lords of the Hills, and Miss Wallinger and Miss Ling were the first women evangelists to these neglected men of the jungles. She and her companion would creep on hands and knees through the entrance-holes of the houses of these wild tribes; and amid indescribable degradation, they would tell the story of Divine love. During a visit to England, the year before her death, she awakened a new interest in the Nilgiri work, and almost all of the developments of this mission were in her instigation, and largely assisted by her means. Her last two periods of residence in India were spent in Coonoor, and by the special request of the native Christians, they were allowed to carry her body to its last resting-place in the Coonoor churchyard.

**WANGEMANNSHOH:** A settlement in German East Africa, situated in the Konde region N. of Lake Nyasa. Station of the Berlin Missionary Society (1891), with (1903) 8 missionaries, of whom 5 are foreign and 3 to be stationed later; 7 native workers, 2 outstations, 1 Sunday school, 1 day school, and 53 professed Christians.

**WANHSIEN:** A town in Sze-chwan, China, situated on the Yangtze River, 65 miles E. S. E. of Sui-ting-fu. Station of the CIM (1888), with (1903) 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 outstation, 1 place of worship, 1 Sunday school, 1 day school, and 23 professed Christians. Some write the name Wan-hien.

**WANICA:** A station of the Moravian Mission (1886) in Paramaribo, Dutch Guiana, South America. Statistics are included under Paramaribo.

**WANIYANKULAM:** A town in Madras, India, situated in Malabar, 20 miles W. of Palghat. Station of the Basel Missionary Society, with (1903) 2 missionaries, one of them with his wife; 27 native workers, 4 outstations, 1 Sunday school, 3 day schools, and 170 professed Christians, of whom 94 are communicants.

**WANNARPONNAI:** A station of the WMS Missionary Society in Jaffna, Ceylon.

**WARD, William:** Born at Derby, England, October 20, 1769; died at Serampur, India, March 7, 1823. Mr. Ward was a printer by trade. Having studied for the ministry, he was appointed missionary to India to the BMS, and sailed in May, 1799, with the second party sent out by that Society. Owing to the opposition of the East India Company, the missionaries established themselves at the Danish settlement of Serampur, on the Hugli River above Calcutta. Here they were joined by Carey and Thomas, who had preceded them to India, and in March, 1800, Mr. Ward printed the first page of Carey’s Bengali translation of the New Testament. The work of giving the Bible to the people proceeded with astonishing rapidity. According to Mr. Ward’s report in 1809, besides the whole Bengali Bible, parts of the Bible had been printed in Sanskrit, Urdu, Hindustani, Marathi, Sikh, and blocks had been cut for the Gospel of Matthew in Chinese. The printing office was finely equipped with type for Arabic, Persian, Hebrew, Greek, and English, besides the languages named above. The building used for the printing house was 200 feet long.

The tremendous energy of this first of missionary printing offices was shown when, in March, 1812, the whole establishment, with twelve fonts of Indian type, stores of books, printed sheets, paper, etc., was destroyed by fire. Fifty thousand dollars was a low estimate of the loss. The matrices for casting type were saved. Recovering the matrices and type-metal from the ruins, the missionaries began casting type at once. In two weeks’ time Mr. Ward was able to begin printing the Scriptures again in one language. In two months the fonts of type were so far restored that the printing was resumed on a large scale, with presses going day and night.
This catastrophe was, in fact, a blessing to the mission. It not only won instant sympathy for the men who could derive new energy from misfortune, but it made the mission and its beneficent work widely known, and brought help from every quarter.

Mr. Ward was not a mere printer, but a historian of the mission, and a true missionary in the general work. After twenty years of such service his health became impaired, and he returned to England for rest in 1870. In 1881 he was again at his post in Serampur, but his work was done, and two years later he passed away.

WARDHA: A town in the Central Provinces of India, and capital of the district, situated about 50 miles by railway S. W. of Nagpur. Station of the Mission to Lepers (1896), with (1903) 1 lepers' institute. Also station of the UFS, with (1903) 1 missionary and his wife, 18 native workers, 4 outstations, 5 day schools, 2 dispensaries, and 1 hospital.

WARMBAD: A village in German S. W. Africa, situated in the S. about 25 miles N. of the Orange River, and 70 miles N. E. of Springkopf, terminus of the railway to Port Nolloth. It was first occupied as a mission station by Dutch missionaries in 1806. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 station, 1 day school, 1 Sunday school, and 30 professed Christians, of whom 156 are communicants.

WARREN, Charles Frederick: Born at Margate, Kent, 1841. Died at Fukuyama, June 8, 1899. In 1873 was sent to the Osaka Mission, Japan, under the CMS. The first missionary at Osaka, he was principal of the theological college at that place. For a year he was appointed to the ministry of St. John's, Ashbourne, on account of the illness of Mrs. Warren; but after her death he returned to Japan, in 1888, as Secretary of the Mission. He was appointed Archdeacon of Osaka and Central Japan. Mr. Warren exerted a great influence in the Foreign Concession of Osaka, in the municipal council of which he was, for years, the president; and his ability was recognized, more or less, throughout the Japanese Empire, and, owing to his previous residence and work in China, in the Far East generally. He was a prominent member of several committees for the translation or revision of the Bible, prayer-book, and hymn-book; and as one of the originators of the Christian Conference (on Keswick lines) at Arima, his ripe experience and wise counsel proved most helpful. Under the blessing of God he lived to see the fruit of his twenty-five years' life at Osaka in the organized work of the CMS, in the development of the Osaka Settlement into the model of a Christian civilized community, and in the better understanding of all Christians for the redemption of Japan. He was author of Family Prayers for a Week, in Chinese; Scripture Catechism of Faith and Duty, in Japanese; Book of Prayers for Family and School Use, in Japanese; and he was one of the translators of the prayer-book into Japanese, and a member of the revising committee for translation of the Old Testament into Japanese.

WARTBURG: A town in Cape Colony, situated in Kaffraria, about 10 miles N. of Stutterheim. Station of the Berlin Missionary Society (1858), with (1903) 1 missionary, 8 native workers, 3 outstations, 1 day school, 1 Sunday school, and 387 professed Christians, of whom 163 are communicants.

WATERBERG: A village near the railway, between Pretoria and Pietersburg, at the foot of the Waterberg Mountains, on the S. slope of which is Warmbad, with its hot spring. The mountains give name also to a mission of the WMS, of which statistics are given under Makanap. Station of the Berlin Missionary Society (1867), with (1903) 1 missionary, 16 native workers, 7 outstations, and 498 professed Christians. Some call the station Modimolle.

WATERLOO: A town in Sierra Leone, West Africa, situated about 15 miles S. E. of Freetown. Station of the CMS (1819), with (1903) 23 native workers, 10 outstations, 1 place of worship, 1 Sunday school, 9 day schools, and 1,374 professed Christians, of whom 600 are communicants. Also station of the UMFC (1879), with (1900) 1 missionary and his wife, 32 native workers, 3 places of worship, and 283 professed Christians, of whom 192 are communicants. Also station of the WMS, with (1903) 12 native workers, 3 outstations, 8 places of worship, 3 Sunday schools, 3 day schools, and 434 professed Christians, of whom 345 are communicants.

WATERLOO: A settlement in Dutch Guiana, South America, situated on the bank of the river Nickerie. Station of the Moravian Mission Society (1859), with (1903) 1 missionary and his wife, 22 native workers, 2 places of worship, 1 day school, and 224 professed Christians.

WAU: See N'GOMBE.

WAZIPARAB: A town in the Punjab, India, situated about 30 miles E. by S. of Sialkot. The town is comparatively new, and has only recently risen to importance. It is much better and more regularly built than most native towns, although the houses are mostly made of sun-dried or kiln-burned bricks. Population, 16,462. Station of the Church of Scotland Foreign Missions (1863), with (1901) 1 missionary, 15 native workers, 8 outstations, 4 day schools, and 25 professed Christians.

WEASI: A station in the northern part of Tanna, New Hebrides.

WEI-HAL-WEI: A seaport and military post in Shan-tung, China, situated at the entrance of the Straits of Chili, and temporarily occupied by Great Britain until 1879, when it passed to France, with (1903) 3 missionaries, two of them with their wives.

WEI-HSIEN: A town in Shan-tung, China, situated about 150 miles S. W. of Teng-chau-fu, an important center, which will be a station on the German road from Kiao-chau. Population, 100,000. Station of the PN (1882), with (1903) 4 missionaries and their wives, 4 women missionaries, 88 native workers, 124 outstations, 20 places of worship, 48 day schools, 9 boarding schools, 1 dispensary, 1 hospital, and 3,000 professed Christians. The college from Teng-chau-fu is to be removed to this place. Some write the name Wien.

WEI-HWEI: A town in the province of Ho-man, China, situated on the Wei River, about 50 miles S. by W. of Chang-te-fu. Station of the PCC (1903), with 3 missionaries, 1 place of worship, 1 dispensary, and 37 professed Christians. This town takes the place of Hui-n'cheng in the list of the Society's stations. This latter place is now an outstation of Wei-hwei.
WEIPA: A settlement on the W. coast of Cape York Peninsula, Australia. Station of the Mission of Federated Churches of Australia and Tasmania, with (1901) 2 missionaries, one of them with his wife, and 1 woman missionary. Station of the Wesleyan (1909) 1 missionary and his wife, 1 woman missionary, and 1 place of worship.

WELSH CALVINISTIC Methodists, Foreign Missions of: The Calvinistic Methodists of Wales began to take an interest in missionary work at the time when the London Missionary Society was established. They contributed liberally to its funds, and several of the most useful missionaries of that Society had been trained in their churches. But the growing desire that the connection should have a mission of its own led ultimately to the organization of the Welsh Calvinistic Methodist Foreign Missionary Society in Liverpool in January, 1840. In 1834 the British Government completed a treaty with the chiefs of the Khasi Hill tribes in the extreme northeastern part of Hindustan, and a military post was to be established at Cherrapunji; and a road made across the Khasi Hills to the British territory of the Brahmaputra Valley. When the Welsh Foreign Missions were planned in 1840 the attention of the directors was called to the Khasi Hills as a new and promising field. Accordingly, the plan seems to represent a missionary of the Society, the Rev. Thomas Jones, left for Cherrapunji in November, 1840. Missionaries were also sent out in 1842 and again in 1845; but at times, owing to various circumstances—defection, illness, and death—only one or two men were left to carry on the work. In 1849 it was decided to limit the operations of the mission to the hill country, and until 1887 the large district around Sylhet was left unoccupied, when in that year the mission was again enabled to resume its work there. The mission field in India is divided into 15 districts: 10 in the hills, and 5 in the low country, to the southward, which was transferred from Bengal to Assam in 1879. Day schools, evangelical work, publishing, and medical work are all features of the mission.

An indication of the growth of the work is given by the fact that the districts have doubled since 1890. There are now (1902) 439 preaching stations, against 136; 331 Sunday schools and 16,161 scholars, against 140 schools and 7,294 scholars. There are now 5,616 communicants, while the total attendants at churches number 13,625. There are 3 ordained ministers, in the hills and 2 women missionaries, and in the plains, 5 ordained and 5 women missionaries.

Recently work has been commenced in the Lushai Hills, in the extreme southwest of Assam. Two missionaries are located here, but their enterprise is still in its infancy. There are 12 native ministers, and 48 preachers who have been admitted to the presbytery, some of them being pastors and others in charge of schools. There is a theological institution at Cherra, and there are 401 day schools, with 8,241 scholars (2,809 girls), and a medical mission in the Jaintia Hill district.

In 1842 the Society organized mission work among the Bretons in Western France, and still maintains a small mission work in Brittany. There are 3 stations, each with 1 missionary, 5 churches, 74 converts, and 71 adherents not admitted to membership. The influence of the work, however, extends far beyond the immediate Protestant community.

There is a woman's branch of this Society, with headquarters at 20 Sherlock Street, Liverpool, which aids in the collection of funds, but does not carry on independent work.

WEN-CHAU-FU: A town and treaty port in Che-kiang, China, situated about 160 miles S. S. E. of Hang-chou, China. Population (1901) 80,000. Station of the CIM (1867), with (1903) 2 missionaries and their wives, 4 women missionaries, 17 native workers, 22 places of worship, 1 day school, 1 boarding school, and 488 professed Christians. Also station of the UMF (1877), with (1905) 3 missionaries, three of them with their wives, 166 native workers, 9 stations, 6 day schools, 7 Sunday schools, 1 dispensary, 1 hospital, and 3,294 professed Christians, of whom 1,294 are communicants. Some write the name Wenchow.

WEN-LI: Name applied to the classical or book language of China, as distinguished from the colloquial. To write in the same natural way as one would talk is contrary to Chinese teaching and practice; and the classical book style so abounds in stilted, condensed, epigrammatic phrases, that a man who has not mastered the literary style is unable to understand the sense, even the he may be able to recognize the character or ideograms. A variation of the Wen-li is the Easy Wen-li, which is not so severely independent of the spoken dialect.

WEN-SAN, or GEN-SAN: A town and seaport in Korea, situated on the E. coast, about 120 miles N. E. of Seoul. Station of the PCC (1893), with 2 missionaries and their wives, 2 women missionaries, 1 native worker, 1 outstation, 1 place of worship, 2 day schools, 1 Sunday school, and 125 professed Christians, of whom 77 are communicants. Also station of the MES (1900), with 1 missionary and 1 native missionary, 1 dispensary, and 205 professed Christians, of whom 55 are communicants. The station of the ME was transferred to the MES in 1902.

WEN-TENG-HSIEN: A town in Shan-tung, China, situated about 12 miles S. of Wei-hai-wei. Station of the PB, with (1900) 1 missionary and his wife.

WESLEYAN METHODIST Missionary SOCIETY: History: The first distinctively foreign missionary of Wesleyan Methodism was Dr. Coke. As early as 1744, through the efforts of Whitefield, special hours of prayer were held for the outpouring of the spirit of God upon all Christian churches and upon the "whole inhabited earth," were observed, and John Wesley went to North America to preach. From that time onward missions in the British possessions in North America were carried on, and numerous preachers were sent out. These missions were, however, more for the benefit of British colonists, and missions to the heathen were not undertaken until 1786,
when Thomas Coke, destined by the Methodists in England for Nova Scotia, was driven to the British West Indies, where a mission to the negro slaves was at once commenced. In his hand the conduct of the Wesleyan missions was mainly placed until 1804, when, upon his departure for America, a committee of three was appointed by the Conference to undertake the management of the work. It was at Dr. Coke's instigation that a mission to West Africa was undertaken in 1811, and after crossing the Atlantic eighteen times, when he was 76 years old, he again sailed, with six other missionaries, November 15, 1813, to Ceylon to found there the third Methodist mission. His death, early in the following year, made necessary other arrangements for carrying on the work; the Society was accordingly reorganized, and in the course of a few years was placed on its present permanent footing.

The management of the missions and the collection and disbursement of funds are entrusted to a committee appointed annually by the Conference, as are also the general secretaries and two treasurers, a minister and a layman.

The extent of Work: Before the death of John Wesley, his teachings had been extended into Ireland, Scotland, the Shetland Isles, and the Channel Islands; and the first years of the new century saw the Methodists at work among the French prisoners in England and in the French prisons. As early as 1807 a society of seventy persons was reported at Arras, France, and Methodism rapidly extended to other parts of the country. Work was begun in Germany in 1830 by Christopher Gottlob Müller, who had been converted through the instrumentality of a Wesleyan minister; in Switzerland in 1859, by the Wesleyan missionaries already at work in the south of France; at Gibraltar in 1809, from whence Spain and Portugal were reached; and in Italy in 1869, after the revolution in the civil government had allowed a measure of religious liberty to the people. In 1766 the first Methodist sermon was preached in Australia by Denmark Embury at his house in New York City. In 1789 Methodism was carried to Canada by a local preacher, and not long after missions were established among the Indians in Canada, and, later, in Hudson Bay Territory, British Columbia, Nova Scotia, New Brunswick, Prince Edward's Island, and Newfoundland. Upon Dr. Coke's recommendation a missionary was sent to the Bermudas in 1799. The mission to India at Ceylon was undertaken by Dr. Coke in 1813. The first scheme for the establishment of a mission to West Africa, devised by Dr. Coke in 1769, proved a failure, but in 1821 a second attempt was made at Sierra Leone, which was eventually successful; in 1821 a second mission was established on the river Gambia, and in 1834 a mission to the Gold Coast was undertaken. In the year 1814 the Society sent the Rev. John McKenny to Southern Africa. December 14, a station was established in Little Namaqualand, and from this point the work extended by degrees throughout Southern Africa. In 1812 the committee received an appeal from two schoolmasters who were teaching in New South Wales, by order of government, to send out Wesleyan preachers to undertake a mission among the convicts, and the Rev. Samuel Leigh went for this purpose to Sydney in August, 1815. Missions were sent to Samoanias in 1821, to Victoria in 1838, and to Queensland in 1850. The mission to the cannibals of New Zealand was commenced in 1822; in the same year a missionary was also sent to the Friendly Islands, but it was not until 1826 that a missionary was stationed there. As soon as this work was on a firm basis, the missionaries endeavored to do something for Fiji, but some years elapsed before the mission to Fiji became an actual fact. Work in China was undertaken in 1855.

As a result of this development the Foreign Missions of the Wesleyan Methodist Missionary Society are classed in three departments:

A. Missions originated by the Society but now entirely independent and under the direction of Colonial Conferences: Canada, Australia, New Zealand, and the South Sea Islands.

B. Missions under the immediate direction of local Conferences but aided by the Society: Ireland, France, West Indies, and South Africa (Cape Colony, Natal, Orange River Colony).

C. Missions still under the immediate direction of the British Conference: Europe (Italy, Spain, Portugal, Gibraltar, Morocco), Ceylon; India (North and South); China; South Africa (Transvaal, Swaziland, Rhodesia); West Africa (Sierra Leone, Gold Coast, Lagos); Western Hemisphere (Bahamas, Honduras and the West Indies).

A. Missions originated by but now independent of the WMMs.

Canada: The work in this country was from the first chiefly colonial, and the organization of the Canadian Methodist Missionary Society in 1824 early took the care of the work among the Indians from the parent Society.

Australia: It is perhaps doubtful whether a mission was ever commenced in any part of the world under more discouraging circumstances than was that of the Wesleyan Society to Australia. New South Wales was chiefly a community of convicts, with wandering tribes of savages beyond its borders. The free settlers and squatters, widely scattered and entirely destitute of religious instruction, were only a few degrees above the convict population. Up to the time of the arrival of the first Wesleyan missionary the government had been occupied in erecting jails, barracks, and other public buildings necessary for the civil, military, and convict establishment, but very little had been done for the religious and moral improvement of the people. Indeed, the whole aspect of affairs—the state of society, the mode of government, the discipline adopted in the management of convicts, and the temper and spirit of everything and everybody—appeared cold, cruel, and repulsive in the extreme. Nevertheless, Mr. Leigh (1815), having secured the countenance and protection of the colonial government, began to arrange his plans, and mapped a circuit in which to itinerate. From Sydney he extended his labors to Paramatta, where he met the Rev. Samuel Maraden, one of the four chaplains appointed to minister to the troops and convicts, and afterward identified with missions to New Zealand. Assistance was given by Methodists in Australia, reinforcements were sent from England and
the work prospered. In 1864 funds were secured for a Wesleyan College at Sydney, and the formation of the Australasian Methodist Missionary Society (organized in 1822 as an auxiliary and in 1855 as a separate Society) relieved the Wesleyans of responsibility for work in that section of the world. The fields specially under the care of this Australasian Society are Samoa, Fiji, New Britain, New Guinea, China, the Chinese in Victoria, New South Wales, and Queensland; and the districts of Cool Islands in Fiji. In 1855 the Bible Christians of Australia united with the Methodist churches, and the combined forces (1898) represented 55 missionaries, 3,903 native workers, in 22 principal and 1,411 outstationes, with 100 organized churches and 35,275 communicants.

**New Zealand:** In 1818 the Rev. Samuel Marsden persuaded Mr. Leigh to take a trip to New Zealand, and as a result on a visit to England he laid before the committee a proposal for the commencement of a mission to the cannibals of New Zealand. The Society was at that time laboring under a heavy debt, but Mr. Leigh and Mr. Marsden appealed to the friends of missions in many parts of England, obtained contributions of goods of various kinds, which in New Zealand would be more valuable than money itself, and the Society undertook to commence the new mission without delay. About this time two Maori chiefs arrived in London with Mr. Kendall of the Church Missionary Society; their appearance gave a new impetus to the plans for New Zealand; the necessary preparations were soon completed, and the party of missionaries—consisting of Mr. and Mrs. Leigh, Mr. and Mrs. Horton, appointed to Tasmania, and Mr. Walker—sailed from England on April 28, 1821. Work was commenced at Wangaroa in 1822. Up to 1830 the mission met with no success, and for a time the work was broken up. Then there came a change and the advance was most marked, and when in 1855 the work was passed over to the Australian Conference there was a large community of European and Maori Wesleyans. Subsequently the Maori church was greatly depleted, but after the establishment of the New Zealand Conference (1874) it revived.

**South Seas:** These missions include those in the Friendly Islands, Samoa, Fiji, and New Britain (Neu Pommern). In June, 1822, about twenty-two years after the last surviving agent of the LMS had escaped from the Tonga or Friendly Islands, the Rev. Walter Lawry, with his family, sailed from Sydney, and in the following August anchored off Tonga. Among the hundreds of natives who came off from the shore in their canoes was one Englishman, named Singleton, who had lived sixteen years on the island, being one of the survivors of the ill-fated "Port-au-Prince," whose crew had been massacred in 1806. He had become a thorough Tonga man in manners and language, but became very useful to Mr. Lawry as an interpreter and in other ways, and before long himself accepted the Gospel. Mr. Lawry was kindly received by chief and people, and the habitual fickle-ness of the people manifested itself, there was some success and in 1826 other missionaries were sent out by the Society. Urgent calls come from other islands, and at Vavau, Hapai and Maui the progress was phenomenal. Special attention was paid to education and the preparation of Christian literature, and in 1870, it was affirmed that not a single heathen remained in the Tonga Islands.

One of the results of the revival in the Friendly Islands in 1834 was the commencement of a mission to Fiji, which was undertaken by the missionaries (one of whom, Mr. Watkins, went to England to plead there the cause of "poor Fiji"), endowed by King George and some other zealous disciples from Tonga. The Fijians at that time were atrocious cannibals, even exceeding the people of New Zealand, the New Hebrides, and other islands in this and in war, polygamy, adultery, murder, suicide, deception, fraud, theft, and many other crimes. In October, 1835, Messrs. Cross and Cargill, with their families, several converted Friendly Islanders, and a few Fijians returning to their own country, embarked in a small schooner, the "Blackbird," and, landing at Lukamba, commenced the work destined to be so hard and perilous, but also so blessed. Perhaps there never was a harder struggle between light and darkness, truth and error, than that which took place in the course of the Fiji Mission, but the missionaries persevered and pushed forward, and had their reward in the victory which crowned their efforts at last. The islands to Great Britain in 1874 facilitated the work, which has been continued under the auspices of the Australasian Society.

As the mission to Fiji was the outgrowth of the work in the Friendly Islands, so that in New Britain resulted from the work in Fiji. Commenced in 1875 by a company largely made up of native teachers from Fiji, there were the usual experiences of hostility and bloodshed, but the courage of the little band never faltered, the places of those who had fallen were soon filled and the work has grown under the care of the Australasian Society. The Society has also some work in Savaii and the adjacent islands, commenced in 1883, the never developed as fully as that of the LMS.

**West Indies:** In January, 1758, Mr. Wesley preached in the house of Nathaniel Gilbert, Esq., the Speaker of the House of Assembly in Antigua, who was at that time residing in England. Several of Mr. Gilbert's negro servants were also present and appeared much affected by the sermon. Later on, two of these slaves were baptized by Mr. Wesley, Mr. Gilbert, too, became identified with the Methodist people, and upon his return to Antigua commenced at once to hold religious meetings for his own people and those of the surrounding estates, and in every possible way labored for their good until his death. Two of the slaves kept up the work, and Mr. Bussey and Mr. West, his preachers, did what he could. Repeated appeals were made to England, but it was not until 1786 that Dr. Coke, driven out of his course to Nova Scotia by a storm, landed at Antigua, became interested in the situation there and in the neighboring islands. The result was that missionaries were sent out in 1786, and from the late 1790's to the end of a few years almost every colony was reached.
In 1885 the British Conference, contrary to the judgment of the Missionary Committee, decided that the time had come for a West Indies Conference, and accordingly the entire work of the Society, in that section, excepting Bahamas and Honduras, was divided from the rest. Separate conferences were found, a Western, including Jamaica, Haiti, San Domingo, Panama and Costa Rica, and an Eastern, including Antigua, St. Kitts, St. Vincent, Barbados, Trinidad, and British Guiana. All of these sections have suffered heavily in the war, and while the churches, notably in Guiana, have been ordinarily prosperous, the general situation is such that (1903) it has been decided to bring them back under the care of the British Conference.

South Africa: In 1815 the Rev. Barnabas Shaw was appointed to commence a Wesleyan Mission in Cape Colony. Permission to preach was refused, but he took matters into his own hands and preached without the governor’s sanction. His congregations, however, were composed principally of soldiers, and his greatest desire being to preach Christ to the heathen, he gladly availed himself of every opportunity. He came to Great Khoin through Mr. Schmelen of the LMS, to go to Great Namqua-

land. In September, 1815, Mr. Schmelen and Mr. Shaw, with their families, attendants, and supplies, set out on their long journey. On the 4th of October, after crossing the Elephant River, Mr. Shaw unexpectedly found his sphere of labor in meeting the chief of Little Namaqua-

land, accompanied by four men, on his way to Cape Town to seek for a Christian teacher, so that his tribe, like others, might have the advantages which he had seen follow the introduction of the Gospel. Mr. Shaw agreed to go with the chief to his mountain home and to remain with him and his people, while Mr. Schmelen continued his journey to his own station in Great Namqua-

land. About three weeks later the chief and his party reached Lily Fountain, on Kamiesberg, the principal home of the chief of the tribe of Little Namaquas. They were met by a party of natives who had come out to welcome them, and from that introduction the work prospered, and was extended by tours into Great Namaqualand and Damaraland. An attempt to establish a mission at the Cape River, полуночно, and this was the murder of the company of missionaries and native teachers, but another effort was more successful. Subsequently, on the entrance of German societies, the work beyond the Orange River was transferred to the Rhenish Society.

In the year 1820 a second attempt was made to start a Wesleyan Mission in Cape Colony, and Mr. Edwards was directed to proceed thither from Little Namaqualand. With the cordial permission of the governor to preach to and instruct the slave population of the town and neighborhood, he began his work, which he continued with success, and in which he was succeeded by other missionaries sent out from England. Chapels were built in various parts of Cape Town, with which were connected prosperous day and Sunday schools. The work has extended also into the Graaff-Reinet and Queenstown districts. Mission work was commenced in Bechuanaland in 1822, tho it was some little time before it was successful. In 1841 a Wesleyan missionary accompanied the British troops into Natal, and after a time of service for the English and Dutch inaugurated a work among the natives. The churches in the entire section, English and Kafir, grew rapidly, and in 1882 the South African Conference was organized and assumed the entire care of the mission work in South Africa, excepting that in the Transvaal, Swaziland, and Rhodesia, which remained under the direction of the parent Society.

C. Missionary Conference.

1. Western Hemisphere.

(1) Honduras: In British Honduras four stations are occupied: Belize, Corozal, Stann Creek, and Toledo. In Spanish Honduras the stations are Roatan and San Pedro Sula. The work is among the foreign population and among the natives, including the mahogany and sawdust cutters. There are (1903) 32 chapels, 17 other preaching places, 8 missionaries and assistants, 41 teachers, 48 catechists and local preachers, 1,737 communicants, 26 schools, 1,453 scholars (including S. S. scholars, 2,254), attendants on services, 6,180.

(2) Bahamas: The work here was commenced in 1803 by Rev. William Turton, a native of the West Indies, at New Providence. It has been extended until there are stations at Nassau, Rock Sound, Tarpum Bay, Governor’s Harbor, and New Providence, with preaching stations on Great Harbour, Spanish Wells, and Eleuthera, and on the uninhabited islands of Spanish Wells, Great Guana, and San Salvador. There are (1903) 29 chapels, 9 other preaching places, 12 missionaries and assistants, 7 teachers, 111 local preachers, 3,561 communicants. The number of day schools is small—4, but special attention is paid to Sunday schools, which number 30, with 3,795 scholars; attendants on services, 11,520.

(3) West Indies: As mentioned above, the British Conference is now taking charge of this work, for some time cared for by local Conferences.

2. Ceylon: Notwithstanding repeated appeals, the Society did not find it wise to undertake work in India, until Dr. Coke offered to lead the enterprise and to provide the necessary initial expense, to the amount of £6,000. In 1813 he and six young missionaries started. Dr. Coke died on the voyage, but his colleagues resolved to carry through the undertaking. They reached Colombo, Ceylon, were kindly received by the governor, and several places were named to them as greatly in need of the Gospel and of schools for the training of native children. It was decided to open schools at Colombo, Galle, and Matura in the south, among those of the native population who speak Sinhalese, and at Jaffna and Batticaloa in the north, where the Tamil language is in common use. In a very short time the missionaries were able to preach to the natives, and also to Dutch and Portuguese colonists. Schools were organized, a printing-press was set up at Colombo, a Sinhalese grammar and dictionary were prepared, and the work flourished in all its departments—literary, evangelical, and educational. In addition to those already mentioned, important stations were established in Southern Ceylon, at Negombo, Kandy, Caltura, Pentura, Seeduwa, Morotto, Welwetta, and other places; while in North Ceylon, where the Tamil language had been conquered and several native teachers trained for the work, stations and schools were established, not only in the villages adjacent to Jaffna, but also at places at a considerable distance, which were afterward occupied as separate stations. As at present organized the work is divided into four districts: Colombo, Kandy, Galle, and Jaffna.

There are two colleges, Wesley College, at Colombo, and Richmond College, at Galle. There
are also several industrial schools and medical work is developed, while the system of day schools is well arranged. Considerable attention is paid to the needs of the English and Portuguese communities, and many Chinese, in the Tamil and Sinhalese languages. The report (1903) shows for the four districts 69 chapels, 245 other preaching places, 68 missionaries and assistants, 4,738 communicants, 986 day school teachers in 379 schools, with 29,061 pupils, and about 15,000 attendants on services.

3. India: The first Wesleyan mission work in India was begun in Madras in 1817. It has since developed until there are eight districts, Madras, Negapatam, Haiderabad, Mysore, Calcutta, Lucknow, Bombay, and Burma. Special attention is paid to education: witness Ruyapetah College, in Madras, and Findlay College, at Mannargudi; also training institutions and general schools in the different districts. Street preaching in Madras and tours through the villages of Haidarabad have brought good results. Medical work, too, has been pressed. In Burma the chief work is at Mandalay. In all, work for the English residents takes an important place. The report shows for the 8 districts 152 chapels, 267 other preaching places, 130 missionaries and assistants, 224 daily communicants, 570 day schools, with 27,886 scholars, and more than 20,500 attendants at services.

4. China: In 1852 Mr. Piercy, who had for some time labored in China at his own expense, offered his services to the Wesleyan Society, was accepted by them, and appointed to Canton, where he remained until the war between England and China forced him, with other missionaries, to take refuge in Macao. During the two years spent there he continued the study of the language with zeal, and upon the restoration of peace, in 1858, reoccupied Canton, as a station of the Society. In 1860, upon the receipt of a legacy intended expressly for the India and China missions, the Committee was enabled to largely extend its work. The staff of workers was increased in numbers, and a new station was commenced at Fat-shan. In 1862 a mission for North China was established at Hanka. Later Wu-chang, Han-yang, Sui-chow, Wu-isheu and other stations were occupied, and more recently a station has been opened in Huan at Chang-sha. In this work the Society has the assistance of the Central China Wesleyan Lay Mission. In the two districts, Canton and Wu-chang, including Hu-nan, the report (1903) shows 79 chapels, 27 other preaching places, 34 missionaries and assistants, 51 local preachers, 2,507 communicants, and 52 teachers in 42 day schools, with 1,011 scholars.

5. South Africa: The missions in South Africa, retained under the care of the British Wesleyan Conference and thus controlled by the Missionary Society, include the Transvaal and Swaziland, and Rhodesia districts. The former is divided into the central section, Johannesburg, Pretoria, Middelburg, etc.; the northern and eastern section, Zoutpansberg, Swaziland, Delagoa Bay, etc.; the southwestern section, Potchefstroom and Klerksdorp; British Bechuanaeland section, Mafikeng. The latter district is divided into the Mashonaland and Matabilende districts. The report (1903) shows in the two districts 151 chapels, 282 other preaching places, 53 missionaries and assistants, 599 local preachers, 51 catechists, 9,683 communicants, 61 day schools, with 56 teachers and 2,970 scholars. Especially in the Transvaal section it is impossible to distinguish between the work for English and Dutch and the Bantu section. In the year 1811 the Rev. George Warren and three school teachers were sent to Sierra Leone. Upon their arrival in the colony they found about one hundred persons, chiefly free blacks from Nova Scotia, who had received the Gospel at the hands of Wesleyan missionaries in America. They had already built a chapel, and had sent repeatedly to England for a missionary. After eight months of labor Mr. Warren died of fever, and for many years there was much loss of life from the climate. Eventually, however, this was to a good degree overcome, the work was developed into the surrounding country, including a settlement at the mouth of the Gambia. The principal stations are Freetown, Wellington, Waterloo, Sherbro, etc., in Sierra Leone, and Bathurst in the Gambia section.

6. West Africa. (1) Sierra Leone and Gambia: Dr. Coke's first scheme (1769) for the civilization of the Fulas, in the neighborhood of Sierra Leone, proved a failure. Some of the company sent out died of fever before reaching their destination, others contracted smallpox, and the rest returned home. In the year 1811 the Rev. George Warren and three school teachers were sent to Sierra Leone. Upon their arrival in the colony they found about one hundred persons, chiefly free blacks from Nova Scotia, who had received the Gospel at the hands of Wesleyan missionaries in America. They had already built a chapel, and had sent repeatedly to England for a missionary. After eight months of labor Mr. Warren died of fever, and for many years there was much loss of life from the climate. Eventually, however, this was to a good degree overcome, the work was developed into the surrounding country, including a settlement at the mouth of the Gambia. The principal stations are Freetown, Wellington, Waterloo, Sherbro, etc., in Sierra Leone, and Bathurst in the Gambia section.

(2) Gold Coast: The work of the Society in this section commenced in an effort to provide for some native boys who had learned to read the Bible in the Government school. In 1845 the Rev. Henry Wharton, a native of the West Indies, went out, and, with the help of several native missionaries and some Europeans, the foundations for a successful work were laid. Stations were formed at Cape Coast Castle, Accra, and a number of other places, while the Lagos region, including Abeokuta, Yoruba Interior, Porto Novo, etc., was apart for the separate mission of the Niger. The report (1903) shows in the three districts 212 chapels, 787 other preaching places, 61 missionaries and assistants, 109 catechists, 777 local preachers, 214 teachers in 159 day schools, with 11,748 pupils, and 19,189 communicants.

7. European Missionary Work: The Society is carried on in three sections: the northern at Rome, Spezia, Parma, Bologna, Padua, Milan, Luino, Simplon, etc.; the southern at Naples, Salerno, Potenza, etc.; the Sicily at Palermo, Messina, Catania, etc.

(3) Spain: Barcelona, Palma de Mallorca and Minorca.

(4) Mediterranean: Gibraltar, Malta, and Cairo. A considerable amount of the European work is for English residents, and of that at Malta and Gibraltar for the soldiers.

The report for the European Missions (1903) shows 24 chapels, 75 other preaching places, 44 missionaries and assistants, 10 catechists, 62 teachers in 42 day schools, with 2,325 scholars, and 2,199 communicants.

The Wesleyan Society emphasizes Sunday school work, and in mostcases the number of Sunday school scholars exceeds the number of those in the day schools.

The Women's Auxiliary of the Wesleyan Methodist Missionary Society, organized in 1858, carries on its work in closest connection with the general society.

The Central China Wesleyan Lay Mission, which for some years represented a number of independent workers along the lines of the CIM,
was, in 1899, merged in the general Society, tho in some cases the funds remain distinct.

WEST, Henry S.: Born at Binghamton, N. Y., January 21, 1827. Died at Sivas, Turkey, April 1, 1876. He studied at Yale College and the College of Physicians and Surgeons in New York City. After practising medicine for some time, he was appointed by the ABCFM a missionary to Turkey and sailed in January, 1859. He was stationed at Sivas, at the western edge of the Armenian highlands; but he journeyed far in every direction to heal the sick. In fact his missionary career of 17 years was remarkable. His surgical skill, combined with his willingness to ride a hundred miles to help a desperately sick man, made him famous. The blind eyes which he opened were past counting; the deformed, the crippled, the diseased who were relieved or cured by him would make a great host if assembled together. His operations in lithotomy alone were 150 or more, with barely half a dozen unfavorable results. Wherever he went the diseased, the halt, the blind thronged him, for they thought his powers miraculous, like those of Jesus. Probably no physician in the Turkish Empire enjoyed an equal reputation among the whole people. In addition to ceaseless labors of this sort he trained quite a body of skilled native physicians, who in the main did credit to their teacher. While Dr. West treated the poor with great and sympathetic liberality, he always insisted on proper payment from Pashas and others able to pay. But for himself he received nothing but his missionary salary, paying over all his professional earnings into the treasury of the mission. In all of his career he was a warm-hearted, sincere and earnest Christian and a faithful missionary. He never showed nervousness in the most difficult operation, and he never flinched from duty. His devotion to duty cut short his life. It was while attending one of the very poor in Sivas that he contracted the typhus fever which resulted in his death.

WEST, Maria Abigail: Miss West was born in Pulmyra, New York, March 27, 1827. She embarked from Boston under the ABCFM for Turkey December 22, 1852, being appointed to Constantinople. She had charge of the female boarding school at Hasekeuy in that city for about ten years. In 1862 she was stationed at Constantinople, at Marsovan, and at Harpoot, engaged in all of these places in work for women and girls, and for a time was in charge of a female seminary at Harpoot. She was a woman of great energy and rare ability. Her book on the Romance of Mission, or, Life and Labor in the Land of Ararat, is based upon her experiences in various parts of Turkey, and has had great influence in developing missionary zeal on both sides of the Atlantic. The first primer in the Armenian language for children in the mission schools was written by Miss West, and has been used in some of them more than a generation in many of the schools using Armenian in different parts of Turkey. After leaving the service of the ABCFM she organized coffee-houses in Smyrna and Constantinople for sailors and others. She was preeminently a pioneer, with great power of initiative and great missionary life. Miss West died in London June 28, 1894.

WEST INDIES: This group of islands extends in a rude bow-like form from the coast of Florida, U. S. A., to the coast of Venezuela in South America. The larger and more important islands belong to one or other of the great European nations, with the exception of Haiti, and this political division will be followed in the more detailed account of the islands, while some facts which are true of all will serve as a preface to the special description of them as English, Danish, Dutch, Spanish, or French possessions.

The population of these islands is composed of Europeans and Americans, together with negroes and other Africans, Hindus and Chinese. Diversity of tongue, of character, and of life is consequently so great that there is little attempt at cohesion or federation, even where the islands are under the same flag. In the years just subsequent to their discovery, evil of the most pronounced character was the business of the men who invaded these shores, and all that selfish greed and fiendish cruelty could suggest was done to exterminate the mild aborigines. Hardly a trace of them is now to be found.

Then the islands became the battlefields of the rival powers of Europe. Piracy was rife, and the commerce of Europe suffered from the marauding buccaneers, who smelted from the wrongs they suffered at the hands of the civilized as well as the guilty. The slave trade had its origin here, and the hardly less cruel importation of coolies has left its curse on the lands. The occupation of the West Indies has afforded the material for a black chapter in the history of the conquests of European nations. Harmless savages were put to death in the name of Christ. Into this moral sewer was swept the refuse of Europe. Hundreds of Hindus and Chinese were lured to this region of faithless promises. The African was dragged here to die of pestilence. No wonder that the burden of debt which weighs down the different administrations is the despair of statesmen.

Patient and heroic hands early planted the Gospel in this miry soil. From the earliest time when Christians saw the image of God in the sable body, to the present day, the conflict between the forces of good and the powers of evil has been fierce and bitter. Prejudices of the white and superstitions of the black races united to render the work excessively difficult. The faithful preacher of Christ was never free from all the persecutions that malignity and hatred could devise or ignorance and superstition suggest. Even his own race insulted, beat, and imprisoned the missionary, and the people he came to succor betrayed him into the hands of his enemies. The results now seen in the islands are but additional proof that the Gospel is suited alike to the moral and the immoral, to the wise and the foolish, to the black as well as to the white man.

Porto Rico: This island lies at the Eastern extremity of the chain of the Greater Antilles. It was ceded to the United States by Spain in 1898. It has an area of about 3,668 square miles and its population (1899) is 953,243.

Cuba is the largest and one of the richest of the islands in its natural resources.

The island of Haiti is divided between the two republics of Santo Domingo and Haiti. The republic of Santo Domingo was founded in 1844, and included the eastern portion of the island. The religion of the state is Roman Catholic, but other forms of worship are permitted.
Haiti became a republic in 1807. It occupies the western portion of the island, with an area of 10,204 square miles. The inhabitants are negroes and mulattoes. The capital, Port au Prince, has a fine harbor. The religion is nominally Roman Catholic.

British West Indies.—The Bahamas: These are twenty inhabited and many uninhabited islands off the southeast coast of Florida. The total area is 5,450 square miles. The principal islands are New Providence, which has been much depopulated by blockade-runners, and San Salvador, supposed to be the island first discovered by Columbus. On the west side of the island are quite a number of intelligent Africans. Eleuthera is over 200 miles long. Great Abaco is the most northerly island. Andros is the largest of the group, with a length of 90 miles and a breadth of 40 miles at its widest part. The remaining islands are: Great Bahama, Harbor Island, Long Island, Mayaguana, Great Inagua, Ragged Island, Rum Cay, Fortune Island, Exuma, Crooked Island, Bight of Santa Cruz, and Berry. The population is (1901) 51,358. The government is in the hands of a governor assisted by an Executive Council of 9, a Legislative Council of 9, and an Assembly of 29 representatives.

Jamaica: The island of Jamaica is about 150 miles long, with an average width of 50 miles. On account of its mountainous character the scenery is beautiful, and there is abundance of fresh water. The sagacity of Oliver Cromwell saw the future value of this island, and secured it to the British Government. Its area is 4,200 square miles, with a population (1902) of 775,242, of whom 500,000 were blacks. The capital is Kingston (46,542), and some of the other principal towns are Spanish Town, Montego Bay, and Port Maria. Attached to Jamaica for administrative purposes are the following smaller islands: Turk’s and Caicos Islands, area 224 square miles, population 5,000; Cayman Islands—Grand Cayman, Little Cayman, and Cayman Brac—with a total population of 3,500, the Morant Cays and Pedro Cays.

Barbados lies to the east of the Windward Islands, and has an area of 166 square miles. The island is very beautiful and almost the entire island is under cultivation. Population (1901) 195,000, of whom 115,000 were blacks. Bridgetown, the capital, has a population of 30,000, and is beautifully situated on the shores of the bay. The English began to exercise authority here in 1655. Since 1885 it has been separated from the Windward Islands, to which administration it formerly belonged, and has now a government of its own.

Leeward Islands lie to the north of the Windward Group and southeast of Porto Rico. The islands are: Antigua, 170 square miles; Barbuda and Redonda, 62 square miles; Virgin Islands, 58 square miles; Dominica, 291 square miles; St. Kitt’s or St. Christopher, 65 square miles; Nevis, 50 square miles; Anguilla, 35 square miles; Montserrat, 32 square miles. Population (1901) 127,403.

Windward Islands: These islands, with their area and population, are: Grenada, 120 square miles, 64,288; St. Vincent (q. v.), 122 square miles, 41,000; and the Grenadines. The principal cities are: Kingston, the capital of St. Vincent; Castres, the chief town of St. Lucia, and St. George, the capital of Grenada.

Trinidad lies immediately north of the mouth of the Orinoco. It is an island of extreme beauty and great fertility. In 1802 it was finally handed over to British rule by the peace of Amiens. Its area is 1,754 square miles, with a population of (1901) 255,148. Port-of-Spain is the capital (54,100). Tobago was annexed to Trinidad on January 1, 1889. It has an area of 114 square miles, with a population of 15,750.

The chief islands of the Leeward and Windward groups includes, besides the British Islands already mentioned, St. Thomas and its dependencies, belonging to Denmark, Guadaloupe and Martinique, with several smaller islands, belonging to France. These islands collectively have an area of 1,207 square miles, and a population (1901) of 416,420. Like the other islands of this chain these are of volcanic origin. Martinique was the scene of the terrible eruption of Mt. Pelée in May, 1902.

In addition to the lines of missionary work actively prosecuted by the Moravians and British and American societies, and the three races on the islands, the three of European birth or descent are not being neglected. The Wesleyans and the Jamaica Church of England Home and Foreign Missionary Society are especially interested in this growing class; and the latter is largely doing this work through the agency of catechists, superintendent by about 100 clergy, who are one-third Englishmen-born and two-thirds Jamaica-born. The past and present influence of Romanism among the peoples of these islands is one of the greatest hindrances to the spread of evangelical truth; but as in Protestant Jamaica, we may hope that ere long the Bible may be the book most commonly found throughout the islands.

Whately, Mary L.: Born at Halesworth, Suffolk, England, the second daughter of Archbishop Whately. Died March 9, 1889. After the father’s appointment to the See of Dublin the family removed thither. She was given the highest educational training, mental, moral, and religious, by her parents, and from her childhood was distinguished for uncommon activity, energy, and intelligence. She early gave herself to the service of Christ in works of kindness to the needy. After the Irish famine, she and her mother and sisters spent most of their time in the ragged schools. In Dublin, having acquired Italian, she was much occupied with teaching and visiting the poor Italians, who were numerous in that city. In 1858 she visited Cairo and the Holy Land, and in 1860 was ordered by her physician for her health to a southern climate. In Cairo she opened a school for neglected Muslim girls, the first attempt of the kind in Egypt. Taking with her a Syrian Protestant matron, she went into the streets and lanes near her home, and persuading the mothers to let their girls come to learn to read and sew, she gathered nine little pupils into her school. Later, home duties required her return, and while at home she read to her father the proofsheets of her second volume of Ragged Life in Egypt. Her father having died, she returned to Cairo. She soon opened a boys school also. In 1868, at the suggestion of the Prince of Wales, she visited her relations in Paris, and went to Rome as a tourist. She was delighted with the art and antiquities, the walls, and friends in England aided her in the erection of a spacious building. The school increased to six hundred, half the boys and two-
thirds of the girls being Muslins, the rest Copts, Syrians, and Jews. All were taught to read and write Arabic, and all learned the Scriptures and Copts in the vernacular. In addition the boys received an excellent medical education, and the girls were taught plain and fancy needlework. Two branch schools have also been established. Pupils of the boys' school are found all over the country, filling important positions in the railway and telegraph offices, mercantile houses, police under-government, and in other situations of trust. In 1879 a medical dispensary was added to the schools, and with her own private means Miss Whately built a dispensary and patients' waiting-room, where several thousands of sick and suffering poor have been treated gratuitously and where she herself daily read and expounded the Scriptures to such as were willing to listen. Miss Whately's schools are now carried on by the CMS.

WHEELER, Crosby Howard: Born September 8, 1823. Died October 11, 1896. Entered Bowdoin College in 1843; graduated in 1847; entered Bangor Theological Seminary in 1849, completing his course in 1852. In 1857 he married his wife sailed for Turkey as missionaries of the ABCFM. In July, 1857, Mr. Wheeler and Mrs. Wheeler, with Mr. and Mrs. O. P. Allen, entered upon their work at Harport, and there they labored, with Mr. and Mrs. H. N. Barnum, for thirty-nine years. After the Turkish massacres in 1895 the circle was broken, Mr. and Mrs. Wheeler returning to the homeland. Dr. Wheeler mastered the Armenian language with unusual speed; shortly after entering the Harport field he mingled freely among the Turks, Armenians, Syrians, and Kurds, obtaining the seeds of truth; and he was early impressed by the need of schools for boys and girls. In the basement of their hired house Dr. and Mrs. Wheeler began a school, and immediately discussions and controversies arose on every side, and much bitter opposition was shown, especially by the Gregorian clergy; but the pupils increased in number. For nearly two score years he worked for the multiplication of schools, and the improvement of their grade, and when, broken in health, he returned to this country, he was president of Euphrates College, which had come up among the papers in which there were over five hundred pupils of all grades, over one hundred of whom were in the collegiate department, and about half of whom were girls. At this time there were in Harport alone over eleven hundred pupils, and in the territory covered by the station nearly five thousand. Soon after reaching Armenia, Dr. Wheeler insisted that "native pastors must be ordained over native churches and supported by them, and native churches must be ultimately self-governing and self-perpetuating." He gave the best thought and effort of his long missionary life to this policy; and by his book, Ten Years on the Euphrates, he did much toward impressing this important principle upon the mission boards in all parts of the world. Dr. Wheeler was a man of remarkable versatility. He was a preacher of unusual power; he possessed fine executive ability; he was an impressive teacher, and successful organizer of schools; and as a practical man of affairs he proved to be a most useful factor in the pioneer work at Harport. He planned and erected some thirty different buildings during his missionary experience; and he did on a small scale a publishing business, preparing himself a variety of text-books in both English and Armenian for the schools. As Dr. Creegan well says of his work for Harport: "He found chaos and disorder; he left a fairly well-organized Christian school system for both boys and girls, and government and self-governing, self-propagating Christian churches; a strong Home Missionary Society among the native churches for work in Kurdistan, and a college that is deeply entrenched in the confidence and affection of all classes, crowded with students, and yet unable to meet the demands that come from all sides for teachers in the lower schools."

Creegan (C. C.), Pioneer Missionaries, New York, 1903.

WETI: A village on Pemba Island, East Africa. Mission station of the University Mission.

WHAI-AN-FU. See Hwai-ngan-fu.

WHITMAN, Marcus: Born at Rushville (Gorham), N. Y., September 4, 1802. Died November 29, 1847. Studied with private tutors and at Berkshire Medical College; appointed by the American Board of Commissioners for Foreign Missions (ABCFM) as a missionary. He left home February, 1836, on an exploring tour with Rev. Samuel Parker, arriving at St. Louis in April, Council Bluffs, May 30; crossed the Rocky Mountains, reaching Green River, a branch of the Western Colorado, a rendezvous of the fur-traders, previous to August 17. They prospects for missionary labor among the Nez Percés and Flathead Indians seemed so favorable that it was deemed expedient for Dr. Whitman to return and procure associates before establishing a mission among them. For this purpose he directed his way homeward August 27. Dr. Whitman established himself at Wailatpu, among the Kayuses, 25 miles from Walla Walla. Having frequent occasion to visit the post of the Hudson's Bay Company at that place, he perceived that it was designed to hold that immense and valuable territory as a British possession. In part to forestall that design, and in compliance with a resolve of the mission, he, in October, 1842, crossed the Rocky Mountains in mid-winter on horseback, arriving at St. Louis February, 1843, with fingers, nose, ears, and feet frost-bitten, in spite of furs and robes. While there he was called on by Mr. Webster, Secretary of State, and President Tyler, and by his earnest representations prevailed upon them not to cede Oregon to the British Government. A personal friend of Mr. Webster remarked: "It is safe to say that our country owes it to Dr. Whitman and his associate missionaries that all the territory west of the Rocky Mountains, and as far south as the Columbia River, is not now owned by England, and held by the Hudson's Bay Company." A sharp controversy has arisen over the verity of the incidents which give this importance to Dr. Whitman's foresight. The balance of evidence, nevertheless, favors the substantial correctness of the statements made above. Dr. Whitman wrote from Fort Walla Walla November 1, 1843: "I do not regret having visited the States, for I feel that this country must be either American, or foreign and mostly papal. If I never do more than to establish the first wagon-road to the Columbia River, and prevent the disaster and reaction which would have followed the breaking up of the present emigration, I am satisfied. While at the East he published a pamphlet describing the climate and soil of the Western
region, and its desirableness for American colonies. After a hurried visit to Boston, he was back again in Charleston, and conducted more than a thousand emigrants in wagons over the Rocky Mountains. Dr. Whitman, Mrs. Whitman, two adopted children, and ten other persons, American emigrants, who had stopped at the station to winter there, were cruelly murdered by the Kayuse Indians, November 29, 1847, and the mission was thus broken up.

WILDER, Royal Gould: Born at Bridport, Vt., October 27, 1816; graduated at Middlebury College, 1839; graduated at Andover Theological Seminary, 1845; sailed for India as a missionary of the ABCFM in 1854; he re­turned to India in 1861, and served there eight years at Ahmadnagar. The seminary, containing from 50 to 80 boys, was put under his care by the mission. In 1852 he went to Kolhapur. On his arrival the Brahmanas petitioned for his banishment, but he continued at his post, and after five years had conquered. When he returned to his home in America, he found in a population of 44,000 only one school, in a back street, with twelve boys. When he left in 1857 there was a government college, costing $200,000, and he was requested to make the college the station. In the years 1854-56 occurred a controversy between Dr. R. Anderson and the missionaries concerning the place of education in the missionary enterprise. Mr. Wilder, in common with all his associates, was a strong advocate of schools for the Hindus; was in favor of employing even heathen teachers, if Christians could not be obtained, and refused to abandon his schools, or curtail educational work, as required by Dr. Anderson. Mr. Wilder's health having failed from the severe labor and exposure involved in founding the new station at Kolhapur, he embarked in 1856 for America, and returned the Sepoy mutiny broke out. He was in the Indian home he found his beautiful church had been sold and turned into a Mohammedan mosque. He received generous aid for a church, and continued labor for twelve years, receiving no aid from any society, but sustained by voluntary gifts, Sir Bartle Frere, Governor of Bombay, and other English people, as well as natives, contributing to the work. From 1861 to 1869 he contributed many articles to the Bombay Times and Gazette on the subject of the system of national education. He also took a prominent part in memorializing Parliament, and inducing the Indian Government to establish the present system. In 1871 he transferred the Kolhapur mission to Mr. Pitman, and engaged in Foreign Missions, and was a missionary of that Board till 1875, when, partly for his health and partly to educate his children, he left India and returned home, having been engaged in mission work for thirty-two years. During that time he had preached to 100,000 Indians, convert since, and visited all the islands of the Samoan group, he returned to his family. With health impaired, after seventeen years of toil and hardship, he

many books. The vessel which brought his liquorage by sea was wrecked off the Cape of Good Hope, and among his goods that were lost was his manuscript history of the Kolhapur kingdom, with full diary of his missionary work. His later years were spent at Princeton, N. J. In 1877 he started the Missionary Review, which he edited with ability and success. He longed to return to the work he had been engaged in so long, and when provident, he determined to live a greater sufferer from an internal malady, to sail for Kolhapur. But his work was done, and on the day when the Review was transferred to other hands, and he had sent to the printer proofs of the closing number of the last volume he was hospitalized away. He died in New York October 8, 1887.

WILLIAMS, John: Born at Tottenham, near London, England, June 29, 1796. Died at Erromanga November 20, 1859. At the age of four­teen, while an apprentice to an ironmonger, he showed great taste for mechanics, and acquired considerable experience in mechanical work. At the age of twenty he offered himself to the London Missionary Society as a missionary, and after a special examination, he was adopted, and sent with his wife, November, 1818, to the South Sea Islands. He was first stationed at Elmeo, one of the Society Islands, where he soon acquired a knowledge of the native language. Thence he went to Hushine, where he found the natives had generally renounced idolatry. At the invitation of the King of Raiatea, the largest of the Society group, he went to that island, which became his permanent headquarters. His success here was remarkable, not only in Christianizing the people, but with Christianity introducing the arts and handicrafts. In 1823 he visited, with six native teachers, the Hervey Islands, and after several days' search discovered Rarotonga, the largest of this group. Remaining here for some time, he founded a mission, which was greatly successful, not only Rarotonga, but the whole group of the Hervey Islands being Christianized. He helped the people at their own request to draw up a code of laws for civil administration. He made great use of native teachers whom he had trained. The work accomplished by him on both of these islands for the period, at the close of his life in 1859, of his natives was useful and permanent. He reduced the language of Raiatea to writing, translated with Pitman and Buzaeot the New Testament into it, and prepared books for the schools he had established. Rarotonga being out of the way of vessels, he built one in which he might visit other islands. The boat was named the "Messenger of Peace." In this vessel, during the next four years, he explored many groups of the South Sea Islands. In 1830 he set out in his vessel to carry the Gospel to the Samoan Islands, which he had planned to do in 1824, but was deterred by the great distance—2,000 miles—and the ferocious character of the people. In 1832 he made a second visit to the Samoans, and found the people waiting for the Gospel. In less than twenty months an entire change had taken place in the habits and character of the Samoans. Chapels had been built, and everywhere the people seemed waiting to receive instruction. Having completed the object of his voyage, and visited all the islands of the Samoan group, he returned to his family. With health impaired, after seventeen years of toil and hardship, he
sailed in 1833 for England, where he remained four years. During this time he had the Re- 
tongan New Testament published by the Bible 
Society, raised £4,000 for the purchase and out-
fit of a missionary ship for Polynesia, wrote and 
published a Narrative of Missionary Enter-
pri ses in the South Sea Islands, and prepared 
plans for the establishment of a college for the 
education of native teachers for a mission 
school at Tahiti. In 1838 he and his wife again 
embar ked, accompanied by ten other mission-
aries. After visiting the stations already estab-
lished by him, and several new groups, he pro-
ceded with one companion to the New Hebrides 
with the object of establishing a mission, but was 
met by hostile natives at Erromanga, by whom he 
was killed. A portion of his bones was re-
covered from the cannibals. It is supposed they 
were provoked to the deed by the ill treatment 
they had received from the crew of a vessel which a 
short time before had landed there.

WILLIAMS, Samuel Wells: Born at Utica, 
N.-Y., September 22, 1812. Died, February 16, 
1884, at the Renais saucer Institute in 
Troy, 1832. While there, he was invited by the aged 
of twenty, invited by the ABCFM to join a party 
about to start for China, as superintendent of the 
mission press, having learned to some extent the 
art of type-setting in his father's publishing 
house. He accepted the invitation, and June 15, 
1833, sailed in the ship "Morrison" for Canton, 
China. Drs. Abe1 and Bridgman were the only 
Americans to welcome him. He rapidly gained 
a knowledge of the Chinese language, and became 
editor of The Chinese Repository, begun the year 
before by Dr. Bridgman, to which many able 
writers contributed, bimonthly publishing a mission, 
but was distinct articles. The Celestial Empire, 
published in Shanghai, says: "The Repository, 
extending through 20 volumes, is looked upon as 
of priceless worth, and the name of the editor will 
be long and honorably remembered by sinologists 
in connection with it." In 1853 he completed at 
Macao Medhurst's Hokkien Dictionary. In 1837 
he was one of a party sent to Japan to restore 
seven shipwrecked seamen to their home. They 
were fired upon from batteries of two ports, and 
returned with the men to Canton. Taking some 
of these sailors into his own house, he learned 
their language, translated for them the Book of 
Genesis and the Gospel of Matthew, and had the 
joy of seeing them embrace Christianity. This 
knowledge of the language thus providentially 
acquired led to his being appointed interpreter 
for Commodore Perry, who was sent by the 
United States Government to Japan fifteen years 
later. Soon after the press was established at 
Canton, Chinese interference with his native 
helpers compelled him to remove it to Macao; 
there, later, it was transferred to Hongkong, 
and established again afterward in Canton, 
where, in December, 1856, his own dwelling 
and the entire establishment, comprising three 
presses and many fonts of type, with 7,000 
printed books, were destroyed by fire. In 1844 
he returned to the United States. During the 
three years spent at home he delivered a course of 
lectures for the Establishment, which were after-
ward enlarged and published under the title of 
The Middle Kingdom. With the proceeds of 
the lectures he secured from Berlin a font of 
moveable Chinese type. Soon after the publica-
tion of The Middle Kingdom the trustees of 
Union College conferred upon him the degree of 
L.L.D.

Restrictions forbidding foreigners to bring 
their wives to Canton having been removed, he 
was married, and with his wife sailed in 1848 for 
Canton, taking with him the new font of type. 
On arriving at Canton he found to his great joy 
regular public services in Chinese. His remark-
able success as an interpreter led to his appoint-
ment to the diplomatic service of the United 
States, with which he was connected from 1858 
to his resignation in 1876. In 1857 he was Sec-
retary of the United States Legation in Japan. 
In 1858 he aided William B. Reed in negotiating 
the treaty of Tientsin. In 1860-61 he revisited the 
United States, and delivered lectures before the 
Smithsonian Institution and elsewhere, 
returning to China in 1862 as Secretary of the 
United States Legation at Peking. Besides the 
Chinese Repository, which for twenty years occu-
pied much of his time, he published Easy Lessons 
in Chinese (1841); An English and Chinese Vocab-
ulary in the Court Dialect (1843); The Chinese 
Commercial Guide (1844); A Phonetic Dictionary 
of the Canton Dialect (1856); A Syllabic Dictionary 
of the Chinese Language (1874), containing 12,527 
characters. On this dictionary, a work of great 
philological accuracy, he expounded the Middle 
Kingdom, the best work extant on Chinese 
government, geography, religion, and social life, 
reappeared in 1883 in a revised and enlarged 
edition. Retiring from the service of the gov-
ernment in 1876, he returned to the United 
States, and on his return was appointed professor 
of Chinese at Yale College, and in 1881 was elected president of the Ameri-
can Bible Society. To the end of his life he was, 
by himself and in his words, a witness of the 
dignity and inspiration of the missionary calling.

WILLIAMS, William Frederic: Born at Utica, 
N.-Y., January 11, 1818. Died at Mardin, 
Turkey, February 14, 1871. Studied at Yale 
College, and was subsequently engaged in various 
employments, mostly in engineering, till 1844, 
when he entered Auburn Theological Seminary 
to prepare for the ministry. In November, 
1846, he offered himself to the ABCFM for the 
misionary field in China, and was appointed 
professor of Chinese at Yale College. 
United Samuel Wells Williams, was engaged in China. 
Was ordained in 1848; sailed January 3, 1849, for 
the Syria Mission. In the summer of 1850 he was 
designated to Mosul. There he remained till 1859, 
when he commenced the station at Mardin. 
He had a fine knowledge of Arabic. His clear 
mind had been carefully cultivated and his 
acquisitions were very exact. However much 
he distrusted his own judgment, his associates 
confided in it largely. Few missionaries have 
secured the affection of the people for whom they 
worked so well as he did. He was, in a sense, the main-
stay of the mission work among the Arabic-
peaking peoples of Northern Mesopotamia dur-
ing years of trial and perplexity when it seemed 
often as if the mission would be compelled to 
withdraw, and to his patient, wise perseverance 
is very largely due the success that is now 
attending the labors of the missionaries in that 
field.

WILLIAMS, Rev. S. T. : A missionary of the 
Southern Baptist Convention; born in Floyd 
Co., Va., February 12, 1862; died in Canton, 
China, April, 1903. His work lay among the 
Hakka people, where his labors were greatly

50
blessed. His was pioneer work, done amid great difficulties. It extended the missions of his society in the South China field some 250 miles into the interior.

WILLIAMSON, Alexander: Born at Falkirk, Scotland, December 5, 1829. Died at Shanghai, China, August 1, 1890. Studied in Glascow and ordained April, 1855; sailed as a medical missionary of the LMS May 21 for China, arriving at Shanghai September 24; was stationed for two years at Shanghai and Ping-hu. His health failing, he returned to England in 1858, and continued his work for two years at South Shields as a pastor to the Society of Friends. After some years spent in Scotland, he returned to China as the agent of the Scottish Bible Society, and in connection with the United Presbyterian Mission. He was at first stationed at Chefu, and traveled extensively, making adventurous journeys into unknown and distant regions. Much valuable information was obtained, which in 1879 was published in two volumes. He was afterward settled in Shanghai, where he established the Society for the Diffusion of Christian and General Knowledge among the Chinese. He was a frequent contributor to the North China Daily News.

WILLIAMSON, Thomas S.: Born in Union District, S. C., March, 1800. Died at St. Peter, Minn., June 24, 1879. He graduated at Jefferson College, Penn., and at Yale Medical School, and practised medicine for ten years in Brown County, Ohio. After spending one year in Lane Theological Seminary, he was licensed and ordained by the Presbytery of Chillicothe, and in 1835 left Ripley, Ohio, as a missionary of the ABCFM, with his family, reaching Fort Snelling, in the country of the Dakotas, in May. He remained in connection with the ABCFM for thirty-six years, until 1871, when he and his son, Rev. John P. Williamson, transferred themselves to the care of the Presbyterian Board. He fully believed in the capability of Indians to become civilized and Christianized, and also that God had by special providences called him to do great things in India. Translating the Bible into the language of the Sioux Nation—was continued through more than twoscore years, and was only completed in 1889. In this, as in most things, he worked slowly and carefully. He lived to read the plate-proofs of all, and to know that the Scriptures of the Old and New Testaments were in the language of the Dakotas.

WILSON, John: Born at Lauder in Berwicksire, Scotland, December 11, 1804. Died December 1, 1875. At the age of fourteen he went to the Edinburgh University, where he graduated in 1828, taking a high place in the classes of physical science, and in the last two years studying anatomy, surgery, and the practice of physic. The reading of the reports of the Bible Society, he said, first awakened him to the importance of missions, and led him to resolve to devote himself to a foreign field. He was ordained in 1828, and sailed August 30 of the same year for India, under the Scottish Missionary Society, reaching Bombay February 1829. He gave himself to the acquisition of the vernaculars of a varied population—the Marathi, Gujarati, Hindustani, Hebrew, Portuguese, with Persian, Arabic, and Sanskrit in reserve for the learned classes. All these he acquired and fluently used. Almost his earliest work in Bombay was the preparation of a Hebrew and Marathi grammar for the Jews, known there as Ben Israel. He also spoke the Portuguese with fluency. He was thus able early to influence the Hindu, Mohammedan, Parsee, and Hindoo, and to extend the work. His advance in Sanskrit was parallel with his acquisition of Marathi, so that he was able to confute the Brahmins out of their own sacred books. He soon commenced a series of discourses on Christianity with Hindoos, Mohammedans, and Parsees. His discovery of the unknown and marvellous ability of the Parsees excited his attention, and he mingled with the people who spoke them, and made many tours to Nasik, Poona, the caves of Ellora, and other prominent places. The aware that for some time his toll must be that of preparation, he worked for and expected converts for the Gospel the first twenty years. He resided in Bombay a native church of eight members. In 1833 was established in Bombay an English college for the Christian education of native youth among Parsees and Hindoos, and Dr. Wilson threw the whole weight of his culture and energy into the new institution. One fact in his career was the great work of his life, and its effectiveness caused him to be reckoned one of the great benefactors of India. In 1836 he received the degree of Doctor of Divinity from Edinburgh University, and in 1839 was elected a Fellow of the Royal Asiatic Society. W. was a pupil of the late Dr. Leighton:—Gerson,—Wolff, and Williamson; and in the year 1847, he returned to India. In 1847, after fourteen years of hard work in India, Dr. Wilson left for his native land.

In the disruption of the Scottish Church Dr. Wilson joined the Free Church and on his arrival he was received with great honor. In September, 1847, he returned to India. In 1851 he was appointed by the government Vice-Chancellor of the University of Bombay, and was examiner in Sanskrit, Persian, Hebrew, Marathi, Gujarati, and Hindustani. He was twelve years secretary to the different translation committees of the Free Church, and was the secretary of the Bombay Mission Society for the year of his arrival in India. The mission of his arrival in India was made the occasion of a remarkable demonstration of the respect and gratitude felt for him by all classes of the people. The Governor presided at a great meeting in the Town Hall to present him with a token of regard. The citizens of Bombay in general also presented him with an address, and the Asiatic Society reviewed, with high commendation, his great services for India. The same year he returned to Scotland. While there he was elected Moderator of the General Assembly of the Free Church. In his closing address before the Assembly on the foreign mission work, he said that notwithstanding his forty-one years' connection with India, if he lived to the age of Methuselah he would consider it a privilege to devote his life to his regeneration. He returned to Bombay in 1871. Increasing ill-health compelled him finally to give up work in 1875, and to go for recuperation to a health resort. But it was too late; he died on the way.

WILSON, John Leighton: Born in Sumter Co., S. C., March 28, 1809. Died July 13, 1886. Graduated at Union College 1829, and Theological Seminary of Columbia, S. C., 1833; ordained the same year by his harmony. He returned to India in 1871, and was the first apart as a missionary to Africa. In the summer of 1833 he studied Arabic at Andover Seminary,
and in the autumn went to Western Africa 

to explore the coast, returning in the spring, and on 

the 24th of November, 1834, sailed as a missionary of 

the ABCFM for Cape Palmas, Liberia, arriving in 

December. He was received with demonstra-

tions of joy by the natives, and found the 

frame house which he had taken out on his first 

visit the year before; he had resided here. In 

1836 he made three tours of exploration in the 

interior, journeying mostly on foot. He had, 

while at Cape Palmas, where he remained seven 

years, a boarding-school numbering fifty, a fourth 

of whom were females; a church of forty members, 

180 youths had been educated; the Grebo lan-

guage was reduced to writing, a grammar and 

dictionary of the language published, the Gospels 

of Matthew and John translated and printed, 

besides several other small volumes. In 1842 

he removed to the Gabun River, 1,200 miles 

south of Cape Palmas, and commenced a new 

station among the Mpongwe people. This 

language also he reduced to writing, and pub-
lished its grammar and vocabulary; he also trans-
lated and published portions of the Bible. In 1853 

he returned home on account of failing health, and 

became editor of the Board of Foreign Missions 

in New York, editing also the foreign department of the 

Home and Foreign Record. He served as Secretary till the 

commencement of the civil war, when, returning to 

his Southern home, he organized for the Southern 

Church a Board of Foreign Missions, of which he 

was appointed Secretary, holding the office till 

1855. He established and edited The Missionary, 
a monthly magazine. He organized also the 

Board of Sustentation. In 1854 he published a 

volume of 500 pages on Western Africa, its 

history, condition, and prospects, which 

pronounced by Dr. Livingstone the best work on 

that part of Africa ever written. He published 

also many articles in the Southern Presbyterian 

Review. He received the degree of D.D. from 

Lafayette College in 1854.

WINSLOW, Miron: Born at Williston, Vt., 

December 11, 1789. Died at Cape Town, S.

Africa, September 1, 1864. Studied at Middle-

bury College, Vermont, and at Yale College; 

studied theology at Andover Seminary. He 

was appointed missionary to Ceylon by the 

ABCFM. At his ordination on November 4, 

1819, in the First Presbyterian Church with 

Messrs Spaulding, Woodward, and Fisk, Pro-

fessor Moses Stuart preached the sermon, which 

was widely circulated among the churches. In 

the same edifice, February 6, 1812, had been 

ordained the initial band of American foreign 

missionaries—Messrs. Judson, Hall, Newell, 

Nott, and Rice. With Messrs. Spaulding, 

Woodward, and Scudder he sailed for India 

June 8, 1819, arriving at Oodooville, Ceylon, 

on July 4. He remained there till 1833, 

conducting the boarding and day school, laboring 

and preaching in the neighborhood, and perform-

ing a large amount of literary work. He was the 

pioneer American missionary of his day in 

championing the idea that education must go hand 

in hand with preaching in missionary operations. 

He carried out this idea in the Batticotta Semi-

nary (1829). After the death of Mrs. Winslow 

in 1833 he returned to the United States, where 

he remained two years. In August, 1836, 

he established the ABCFM Mission in Madras, the 

scene of his labors for the remaining twenty-

eight years of his life.

At an early period of his labors in Madras Mr. 

Winslow was engaged in translating the Bible 

into Tamil. Late as 1850 he was much 

occupied with improvements and revisions of 

portions of the translations. When not thus 

engaged, he was occupied three hours daily on 

the Tamil and English dictionary. In November, 

1850, he announced that the printing of the new 

version of the Tamil Bible was completed. He 

published "occasional reports" of the Madras 

Mission. He received from Harvard College the 

degree of D.D., which his Alma Mater supple-
mented with L.L.D. upon the reception in this 

country of copies of his Tamil lexicon, which was 

the greatest new work of his life. Its little-page 

reads thus: "A Comprehensive Tamil and English 

Dictionary of High and Low Tamil, by the Rev. 

Miron Winslow, D.D., etc., assisted by com-

petent Native Scholars: in part from manuscript 

materials of the late Rev. Joseph Knight and 

others. Madras: Printed and Published by P. 

R. Hunt, American Mission Press." The splendid 

quarto of 976 pages, three columns to a page, with 

11 additional pages, attested the ability of the 

mission press to execute the highest grade of 

printing. With the exception of Wilson's Sanskrit 

lexicon, this work is the most elaborate 

and complete dictionary of the languages of India, 

containing 67,452 words with definitions, of 

which 30,551 for the first time take their place in 

Tamil lexicography. The publication of the 

dictionary called forth hearty expressions of 

commendation and of gratitude from scholars 

and missionaries, as well as from the government 

officials of India.

Dr. Winslow sailed for the United States, very 

much broken in health, in August, 1864, but his 

strength was not equal to the long voyage, and 

he was obliged to stop at Cape Town, where he 

found a grave.

WITTE BERGEN: A district in Orange River 

Colony, South Africa, situated about 120 miles 

N. E. of Bloemfontein. Station circuit of the 

South African Wesleyan Methodist Missionary 

Society, with 1 missionary, 44 native workers, 14 

outstations, 8 places of worship, 5 Sunday schools, 

7 day schools and 825 professing Christians.

WODEHOUSE (Forests): A district in Cape 

Colony, South Africa, situated in the Transkei 

region between the Great Kei and Tsomo Rivers. 

Station of the South African Wesleyan Methodist 

Missionary Society, with 1 missionary, 28 

native workers, 28 outstations, 10 places of worship, 

10 Sunday schools, 8 day schools and 483 professing 

Christians.

WOGENTHIN: A village in the Transvaal, S. 

Africa, situated about 15 miles S. of Heidelberg. 

Station of the Berlin Missionary Society (Borate, 

with (1902) 1 missionary, 11 native workers, 3 

outstations and 919 professing Christians, of whom 

305 are communicants. Some write the name 

Woyentin.

WOULG LANGUAGE: One of the Finnish 

group of the Ural-Altaic family of languages, 

rather closely allied to the Hungarian and 

to the group of the inhabitants of 

Western Siberia. It is written with the Russian 

character. The name is also pronounced Vogul.

WOLFF, Joseph: Born in Bavaria, Germany, 

1795, of Jewish parentage, the son of a rabbi; 

early became a Christian; was baptised in 1812 

at Prague by a Benedictine monk, taught 

Hebrew for a time at Frankfort and Halle,
studied at Munich, Weimar, and Vienna; went to Rome in 1815, to be educated as a missionary. He entered first the Collegio Romano and in 1817 the College of the Propaganda. While in Rome he spent his time in studying the Oriental languages. Suspected of the acquisition of heretical opinions in 1818, he was sent to Vienna, then to a monastery in Switzerland, and finally dismissed as incorrigible. He went to London, joined the Church of England, and through the influence of Charles Simeon and others, who perceived his fitness for mission work among the Jews, he entered Campden House, where for two years he continued his Oriental studies under Professor Lee. He then commenced his career as a traveler, visiting Malta, Egypt, Palestine, Mesopotamia, Armenia, Bassorah, and Persia, and returning home by the way of Circassia, Constantinople, and the Crimea, reached Dublin, May, 1826. In these travels he became acquainted with learned men of all ecclesiastical relations, everywhere professing Jesus as the Christ, and, altho he had been imprisoned and his life often endangered, in all undaunted courage and great presence of mind. In 1827 he married Lady Georgiana Walpole, daughter of the Earl of Oxford, who accompanied him on his second missionary tour as far as Malta. In April he proceeded to Smyrna, the Ionian islands, and Jerusalem, where he was imprisoned by some Jews, and just escaped death. On recovering he set out for Bokhara by way of Persia, encountering on the journey the plague; was repeatedly robbed, taken prisoner, and sold as a slave, but finally reached Bokhara. After living there three months, and visiting among the Jews, he went to India, visited the Punjab, Lahore, Lucknow, Simla, Delhi, Bokhara, Lucknow, and reached Calcutta March, 1833. He preached everywhere in different languages, distributed the Scriptures, and interested the most prominent men and women in his behalf. From Calcutta he went to Haidarabad, visited the Jews at Cochin and Goa, proceeded to Bombay, whence he sailed for Arabia, and returned to England in 1834. In 1836 he made a second tour to Abyssinia, whence he sailed for Bombay, and there embarked for America, reaching New York August, 1837. He was ordained as deacon in the Protestant Episcopal Church by Bishop Doane of New Jersey, visited the principal cities, preached before Congress, and returned to England January 2, 1838. Having received priest's orders, he was settled as curate in Lengthwaihe, and then for his wife's health he went to York, where he remained five years. In 1843, the news of the imprisonment of Colonel Stoddard and Captain Conolly at Bokhara having reached England, Dr. Wolff set out to attempt their release or ascertain their fate. Before reaching Bokhara he learned that they had been beheaded. He himself was made a prisoner and condemned to death, but through the intervention of the Persian Ambassador he made his escape. Reaching England in 1845, he was settled in the parish of Isle Brewers, Somersetshire, where he labored till he died, May 2, 1862. The most interesting of his publications are "Travels and Adventures of Rev. Joseph Wolff" (2 vols. 1861).

WOLKENBERG, Rev. Marcus: Born of Israelite parentage in Russia in 1834, he was converted to Christianity in 1856, and educated in the Malta Protestant College. In 1862 he was appointed by the London Society for the Jews to labor at Jassy (in Roumania), and subsequently at Bacan and London. In 1876 he was placed in charge of a new work in North Russia. His Mission, which he continuously held for a quarter of a century and up to the time of his death. Mr. Wolkenberg will be remembered as one of the ablest missionaries of the London Society for Promoting Christianity among the Jews in the present age. Bishop Ryan, at one of the anniversaries of the Royal Society, said: "We have a mission here capable public testimonial; and Pastor de le Roi, in his history of Jewish missions, speaks of him as possessing a more sober and better judgment concerning the needs and the operations of the Jewish mission than many of his contemporaries. He was certainly distinguished for good intellectual powers, sound classical and Hebrew learning, and a masterly ability in preaching special sermons to the Jews and for the Jews. In private conversations or controversies with individual Jews, he had the talent of winning the attention and respect, and often the admiration and love of his hearers. Had he enjoyed better health, he would have been considered a great preacher. Mr. Wolkenberg rendered good service to the Missionary Publications' Sub-Committee in their preparation of new tracts and pamphlets, and keen, critical intellect being of the greatest value. His English literary works testify to his learning and ability as an author, especially The Pentateuch according to the Talmud (a translation of Hebrew with a very learned introduction), Mr. Wolkenberg wrote also the following tracts: Alienation of Jews from Judaism; General Aspect of Judaism; Israel's Mission to the World, When and How Fulfilled; Judaism and Christianity on the Threshold of Eternity; Theory and Practice of Judaism and Christianity; and also contributed excellent papers to the Conference on Jewish Missions held in Southport, 1875, and in London, 1899."

WOMANHOOD; its debt to Missions: To Rev. David Abel, D.D., an American missionary to China, must be conceded the honor of suggesting to Christian women the importance of direct action for mission work. During his missionary career he realized that the greatest hindrance to the spread of the Gospel lay in the fact that heathen homes were the strongholds of Satan. Womanhood itself, synonymous with ignorance and superstition, was trampled under brutal feet. Women throughout the Orient were unwelcome at birth, unloved and oppressed in life, and unwept at death. Hoary customs precluded the possibility of reaching them through ordained ministers, and only by the unavailing efforts of Christian women aglow with gratitude for their elevation through Christ, could they be approached.

Dr. Abel's burning zeal awakened a responsive chord in the hearts of consecrated women in England and America, resulting in 1834 in the organization of the Society for Female Education in England, and seconded by the appeals of Mrs. Francis B. Mason of Burmese, in the establishment in 1860 of the Woman's Union Missionary Society of America for Heathen Lands. Thus these two Societies in England and America were the pioneers of woman's organized distinctive work for women.
Pitiful as is the position of all Oriental women, in no land is it so peculiarly painful as in India. Since the Mohammedan dominion in 1601 A.D., the custom of the *senia* has prevailed (i.e. means woman), whereby millions of women having no contact with the outside world become literally prisoners. Missionaries give these results of wide experience:—"The more I see of woman's lot in India, the more I know that no account is there made of her degradation, dangers, and sufferings can be exaggerated." "No one realizes the depths of suffering borne by the women of India, and the longer I am here the more terrible I see it is. As they often tell us, we do not begin to suspect what goes on behind the scenes, even in the shelter of their own homes. We know their only hope is in the Savior's redeeming love, of which they know nothing."

Pundita Ramabai, the foremost Hind woman reformer of Indian women, states: "Distrust and a low estimation of woman's character is at the root of the custom that secludes women. I have never read any sacred book in Sanskrit literature without meeting this deplorable sentiment."

Among many questions on this subject transcribed by Manu, the law-giver of the Hindus, these occur:--"What is the chief gate to hell? A woman. Who is the wife of the vulture? He who has not been deceived by women, only to be compared to malignant fiends?"

This low estimate of woman induced the deplorable custom of *child marriage*, whereby girls of tender years are doomed to responsibilities for which immaturity unfit them. Following in the ascending scale of misery is the condition of *child widows*. A recent census gives 35,000,000 girls under fifteen, of whom 24,000,000 are widows; nearly 14,000 are four years of age. Rigid custom forces these tiny children to undergo all the penalties of widowhood. The luxuriant hair, the pride of the Oriental woman, is forever shaved, and one white, coarse garment is the badge of the household drudgery, for whom nothing is too severe. Allowed but one meal a day of the simplest character, often the child to observe rigorous fasts, is it any wonder that death is eagerly sought, to end untold misery and often manifold temptations?

In such conditions began what may be called a social and religious revolution in India. Attractive fancy work was the bait which opened the doors sealed for generations. Visiting where the patriarchal system of living pertains, large numbers of women were reached. Children from this same secluded class were gathered into schools, where the vital truths of the Gospel were taught. Native Bible women were trained as evangelists to reach the masses in 718,000 Indian villages, orphanages were established to rescue the victims of famines, and hospitals were endowed, where gifted women physicians could, while mitigating suffering, lead to Christ—the only remedy for the ills accumulated under ages of heathenism. Books also have been written or translated especially suited to women and girls, thus creating a Christian literature for a class hitherto excluded from every avenue for mental culture. But however these have lowered the barriers in the way of service, and thousands of hitherto women have emerged from utter darkness and degradation, to become in Christ homes centers of light and influence.

Often is the flippant comment made:— "The religions of the East are well suited for people—what can be said of the Condemned?" What can be said of religions which doom half of the human race to degradation inconceivable, dwarf aspirations and sterile sympathies, robbing life of every joy, and the future of every hope? We hear from a gifted missionary in China, "One-fifth of all the women of the world are waiting in China for the Savior, Who so long has waited for them. What a burden of responsibility does this lay on the women of Christendom!"

Through girls' schools established by Christian women in Japan the Empire realized the possibilities. One skilled trained and elevated through education. The establishment of Government schools from which religion is excluded does not diminish the obligation in this direction resting on Christian women. Elevated solely by the Cross of Christ to the enviable position which they as Christian women occupy in the Occident, and believing that the Redeemer died for the whole world, and not for a favored few, can they dismiss responsibility without an effort to mitigate a doom inflicted on heathen birth which but for the grace of God has been theirs.

It is not only individual women in Asia and Africa who have been blessed by Christian Missions: it is Womanhood as a whole which is being lifted up and given a position of dignity and influence. The very first effect of a mission in any Mohammedan or pagan community has ever been to force into the minds of men the fact that Christians consider girls and women capable of absorbing book knowledge and whose education has been their privilege.

What has applied a persistant energy which has amazed, astonished, perplexed and at last won the support of men who are neither Christians nor philanthropists. What it means for womanhood in India, Africa, and Arabia, to the emancipation of the population of the world as a whole, and the effect of the power of the holy spirit and the power in the name of the Redeemer, is a fact not to be detailed. Such a change can only be expected in the thoughts of men as the direct outcome of Christian teaching and practised generally and insensibly permeating the community.

The same is true of the abolition of debasing customs and crimes against womanhood in both Asia and Africa. Long after the African slave-trade had been abolished by Europe and America, Mohammedan activity in slave-raids continued. The object of these raids was not to secure laborers, but to capture women. This determined and brutal purpose to degrade and destroy womanhood was revealed to the world, and the passion to end it was aroused by Christians, and in great measure by Christians who were missionaries. The abolition of the *Suttee* in India was but languidly pressed until Carey and his companions and many later missionaries made the halls of Parliament ring with their indignant protests.

The struggle against *Suttee* (1827-30 and 1858-59) against degradation of womanhood through caste denials of the right of low-caste women to cover their persons,
is another instance of the debt of womanhood to missions. So, too, is the strong sentiment now seen among progressive Hindus against child-marriages and the oppression of widows. The same is true of the growing sentiment of Chinese against foot-binding. Wherever we look, the effect of Gospel-teaching is to locate spiritual activities among them and to lift up those who stand in the mire that they may sit among the princes of the people.

WOMAN'S UNION MISSIONARY SOCIETY of America, for Heathen Lands: Headquarters, 67 Bible House, New York, N. Y., U. S. A. This Society was organized in New York City January 15, 1801, as the result of an address by a missionary from Burmah at a parlor meeting the week previous. Its first missionaries included representatives of six denominations, and it has remained strictly undenominational. Its immediate conduct is in the hands of an executive committee of women representing the different denominations residing in or near New York City. In 1812, a Madras branch was organized, and branches and auxiliaries have been established in different parts of the country.

The first missionary, Miss Marston, went in November, 1801, to Burma, and in 1803 Miss Britton (Episcopal) went to Calcutta. Later work was commenced in Shanghai, China, and Yokohama, Japan. The work in Burma has been dropped.

In India the great work of the Society has been from the first been Zenana work. It is carried on in Calcutta, where it is known as "The American Doremus Mission," in honor of Mrs. Doremus, the first President and really the founder of the Society. Other stations are Allahabad, Cawnpore and Jhansi. In Calcutta there are 15 missionaries and 57 native workers; in Allahabad, 12 missionaries and 24 native workers; in Cawnpore 9 missionaries and 21 native workers; in Jhansi 4 missionaries and 2 native workers, a total in India of 40 missionaries and 104 native workers. The Broadwell Memorial School at Cawnpore, the Woman's Missionary Society at Allahabad, and the Mary A. Merriman Orphanage at Cawnpore, besides other homes and rescue work, supplement the Zenana work.

In Shanghai the work of the Union includes the Margaret Williamson Hospital, with 4 physicians, and the Brigman Memorial School, besides the evangelistic work, in which there are engaged 2 missionaries and 5 native workers. The work for 1902 shows 472 patients admitted to wards and 34,743 cases at the dispensary, of which 22,570 were new. There were in addition 208 visits to homes, while over 47,000 prescriptions were filled.

At Yokohama the boarding school has 58 pupils, and the 3 missionaries find excellent openings for educational and evangelistic work.

WOMAN'S WORK FOR WOMEN: The activity of Christian women in support of early foreign missions is a fact often overlooked. The records of the missionary movement at the beginning of the 19th century show that an astonishing proportion of the necessary money was collected by societies of women. These early societies were separate local bodies differing from the modern woman's missionary society in lacking provision for permanence, in taking no responsibility for definite work, in assuming an auxiliary position to the general missionary societies as collectors of money only, and especially in undertaking no enterprises of their own in the mission field.

The following list of the operations of Women's Foreign Missionary Societies in America in the first half of the 19th century shows the character of these early missionary efforts by women. The list was taken from a table in most of the material used in this article, from a paper by Miss Ellen C. Parsons, editor of Woman's Work (PN).

1800 "Boston Female Society for Missionary Purposes." (Baptist and Congregational.)

1801 "Boston Female Society for Promoting the Diffusion of Christian Knowledge." (Congregational.)

1808 "Female Mite Society," Beverly, Mass. (Baptist.)

1811 "Salem Female Cent Society," Massachusetts. (Baptist.)

About this time, 1808-1812, "Cent a Week" societies were common among women of different denominations in Eastern Massachusetts.

1812 The "Female Foreign Missionary Society" of New Haven, Conn., contributed to the American Board $177.09.

1813 First annual subscription to the American Board $345.83 out of an estate of $500, left by Sally Thomas, of Cornish, N. H., a domestic, whose wages had never exceeded fifty cents a week.

1814 April 11, a woman's missionary society was organized in the Fayette Street Baptist Church in New York City.

1815 Legacy from Mrs. Norris of Salem, Mass., was realized to the American Board—$30,000, the largest received up to that time or for many years thereafter.

1816 "Female Charitable Society" of Tallmadge, Ohio, contributed $20 to the American Board—the first received by the Board from west of the Alleghenies, save one dollar from a pastor's pocket.

1818 Woman's Missionary Society formed in Derry, Pa. (Presbyterian.)

1819 July 5, a society was formed in the Wesleyan Seminary, Forsyth Street, New York City. It issued its last annual report in 1841. During forty years it had contributed to the missionary treasury of the Methodist Episcopal Church the sum of $20,000.

1821 There were 250 societies in existence (formed from 1812-1820), all contributing to the American Board; many of them were composed exclusively of women.

1823 A society "For the Support of Heathen Youth" was organized in Philadelphia, Pa., and existed until 1874. (Presbyterian.)

1835 A society "For the Evangelization of the World" was organized in the First Presbyterian Church, Newark, N. J. During the first ten years it contributed $2,344.76 to the American Board. The society still lives (having joined the new movement), and celebrated its jubilee in 1885, one of its original members and 20 descendants of members participating on that occasion.

1838 A society was formed in the First Church, Allegheny, Pa. (United Presbyterian),
and has celebrated its jubilee. The original secretary was still holding the position.

1839 More than 680 "Ladies' Associations," having nearly 3,000 local agents of their own membership, were collecting funds for the American Board. One of these associations met in Baltimore, Mass., at the house of Mr. Ropes, and made regular contributions for Japan, at last, in 1861, Mrs. Doremus, of New York City, was able to carry out her cherished longing, and the United Missionary Society was launched. Women of six denominations composed its membership, and it stood alone in America for eight years. This was the period of the Civil War in the republic, and in the absorbing demands of that struggle Christian women had no leisure to study the possibilities inherent in the position of their organization. The American Board, on the other hand, continued to extend its mission work among the heathen world, where the most of its members, male and female, were engaged.

1847 "The Free Baptist Female Mission Society" was formed in Sutton, Vermont. It continued in operation for over twenty years, and was never formally dissolved.

1848 The "Ladies' China Missionary Society" (Moffin cot. of Baltimore, Md.) was formed. It was a thriving Society in 1871, when it merged itself as a branch of the wider organization of the Methodist Episcopal Church.

The modern uprising of women in behalf of foreign missions must be emphasized as an epoch in the history of missions. It had its motive in the social systems of the East. It was primarily the purdah and the latticed window, the zenana and the harem, that roused the women of Christendom to attempt an errand of mercy to their sister-women of the heathen world. Experience proved that no nation can be elevated until its women are regenerated; also that no man, whether clerical missionary or even physician, can carry the Gospel to the jealously-guarded women of Oriental households. When the degradation and sufferings of Asiatic women and the darkness of their future were revealed to the Western world the conscience of Christian women was aroused. The Gospel had developed them and given them honor, security, moral power, and intellectual freedom. They recognized the claim of their less happy sisters to the same blessings. David Abel, missionary of the American Board, was the first to suggest action for this end. On his way home from China in 1834 Mr. Abel told the people of England the facts, which had hitherto been imperfectly known, concerning the condition of women in India and China. He showed that the missionaries' wives, who had always done what they could for women and children about them, were neither sufficient in numbers nor sufficiently free to assume the burden of lifting up their sex. Effort so strenuous and continuous would be necessary as to demand the entire consecration of many lives, and he urged unmarried women to volunteer to work in Christ's name for this new form of service. He also declared that women of the Church at home should organize to render their labors permanent. Little did Mr. Abel know what a force he was evoking. The Spirit of God winged his words. The same year the first society was formed in England, The Society for Promoting Female Education in the East; and upon whatever others, in the progress of years and under divine control, the burden of leadership may seem to fall, this Society is ever to be had in reverence, as the one that ventured first and led the way. Others followed speedily in Great Britain; those connected with the Free Church and the Established Church of Scotland in 1837, the Indian Female Normal School and Instruction Society in 1852, and the Wesleyan Auxiliary in 1859; the German Society for Christian Education of Women in 1852, and the American Board, and some of these was much known across the Atlantic.

Meanwhile Mr. Abel had brought his plea to America, but hearts were not ready for it. At last, in 1861, Mrs. Doremus, of New York City, was able to carry out her cherished longing, and the United Missionary Society was launched. Women of six denominations composed its membership, and it stood alone in America for eight years. This was the period of the Civil War in the republic, and in the absorbing demands of that struggle Christian women had no leisure to study the possibilities inherent in the position of their organization. The American Board, on the other hand, continued to extend its mission work among the heathen world, where the most of its members, male and female, were engaged.

Organization: All the main features of organization necessary in each separate Woman's Board of Missions may be included in three, and in England two are often made to answer.

First: The local or parish society, made up of individuals from a single local church, or, as often occurs in America, women of two or more churches of the same denomination in one large town unite to form one Missionary Society. This local society is usually called an Auxiliary. It has its own constitution and officers, and is independent in its management; but when it undertakes to carry out its purpose of sending forth missionaries and funds to sustain various forms of missionary work at a distance, it does not try to fulfill its purpose alone, but under the Board, of which it thus becomes an "auxiliary," or helper. An annual fee is the usual requisite for membership.

Second: These auxiliaries are grouped, and thus constitute what are usually called Branches. This relation is sectional. Adjacent auxiliaries, sometimes to the number of not more than 20, sometimes covering a county, sometimes a whole State containing several hundred auxiliaries, combine, with a set of officers elected from the whole territory represented by the Branch. This stands between the Board and its auxiliaries. It voices the wishes of the Board to the auxiliaries, and expresses the sentiment of the latter to the Board. A Branch assumes the responsibility for some missionary enterprise, and its auxiliaries share it among themselves proportionally.

Third: The Board includes all the Branches, and requires its own officers. A legal charter is requisite for a Board, but not for auxiliaries and Branches. Auxiliaries usually hold their meetings monthly or oftener; Branches quarterly; but the Board meets annually, or, at least, two or three times a year. Business of the Board is transacted throughout the year by its officers,
who are elected by the delegates of annual meeting. The delegates are chosen, not from auxiliaries, but from Branches. The Board or Society (whichever name is given to the inclusive organization) has supervision over an area which varies according to circumstances. If the Society is undenominational, like the English Society of Propagation of the Gospel in Foreign Parts, or the Woman's Union Missionary Society in America, it may have its constituency in any part of the country. If the Society cooperates with a Board of some denomination, its territory will depend upon the form of organization of that Church. Thus, the Society within the Protestant Episcopal Church in America, for reasons which are apparent, is indissolubly one all over the country. But the geographical spaces are so great in America that in many cases it is found more practicable to have several coordinate boards in one church. Therefore, one at a time, an auxiliary is formed in a local church by gathering a few picked individuals into a little monthly meeting—this is the unobtrusive way in which Boards grow. Societies of young ladies and children's bands are regarded as only phases of the auxiliary, but the officers of the Branch are responsible for the work undertaken both by young ladies and children within its domain.

The existence of more than 30,000 auxiliaries and bands in America, with a membership of several hundreds of thousands, speaks volumes for the patient, persevering, enthusiastic efforts of the women of the Church for foreign missions; but it all represents the efforts of only a fraction of them. Many of the Societies cover not more than one-fifth of the church membership of the denomination.

**Terms Employed:** In Great Britain the name "Ladies Association," or "Ladies Society" is employed, while in America "Woman's Board" or "Society" is preferred. Also many societies in Great Britain dispense with the "auxiliary" and appoint "collectors of funds from the churches; others do not use the term "Branch," but "District Auxiliary" instead. "Presbyterian societies" and "Associations" and a variety of other terms take the place of those explained above.

In the Presbyterian Church in America "Presbyterian Society" corresponds to the term "Branch," the "Synodical Society" is introduced in some places. The Protestant Episcopal Society is itself called, not a Board, but "Auxiliary;" and its constituent societies, not auxiliaries, but, respectively, diocesan and parish branches.

In Great Britain, societies often have long lists of honorary officers. Such are scarcely known in America. There are a few notable exceptions. Among those of the actually responsible leaders, who conduct public meetings and control the affairs of their societies. The committees of gentlemen which some societies in the old country appoint are also unknown in America, the office of Auditor of Records being the only one ordinarily filled by a man.

**Meetings:** Under the auspices of a single one of these women's societies hundreds of meetings are held every year. Meetings for both business and prayer are convened at the headquarters of most Boards, at stated times, besides farewell meetings upon the departure of missionaries, and other meetings specially called; and an annual meeting is universal; but in both character and conduct of them great diversity exists.

Breakfast and tea meetings, and working parties for the preparation of boxes to be sent to native children in orphanages and schools, for filling Christmas boxes and preparing embroidery patterns for classes—all these are much mentioned in English reports, but are comparatively infrequent in America. In Europe a limited number of Christmas boxes are sent to the missions, but the general purpose of meetings in America is either the transaction of business or the imparting of information in order to arouse interest in missions. Whatever its object, the missionary meeting is always partly a devotional service and sometimes strictly such. Many societies have a by-law requiring the opening of all meetings with devotional exercises; and although many printed reports make no allusion to prayer meetings, it is not supposable that societies often exist without them. Where the organization extends to parishes the number of meetings is vastly multiplied. An "auxiliary" is generally understood in America to mean a company of ladies, who, among other things, hold a meeting every month, in the morning, in cities, for prayer and deliberate study of missions; in the afternoon in the country; and perhaps, on Sunday, in rural districts where people live widely scattered.

A Branch, or Presbyterial meeting, means a quarterly meeting, often lasting all day, which is held in one or another town by invitation. It is thus brought at some time within the reach of every member of the Branch. Those of adjacent towns who can conveniently attend go by carriages or train to the quarterly meeting, and a hearty sight it is on pleasant days, in a country town, to see the ladies driving up from every direction, all their horses' heads pointed toward the church. There they spend the day. A little Branch business, Scripture-reading, and frequent prayer and song, wideawake, practical papers, inspiring talks, often from missionary ladies on a furlough, with a hospitable lunch between morning and afternoon sessions—these are quarterly meetings. Perhaps their place is most nearly filled in Great Britain by "deputation meetings," where some speaker is sent out to a certain locality by the secretary and holds an appointed meeting, generally in connection with one managed by the parent society.

In the old country, also, annual meetings are
often, but not always, presided over by gentlemen, and sometimes no ladies speak on their own platforms. Such a thing is unknown in America. It is there very exceptional for a gentleman to preside, altho occasionally one is invited to speak from a large audience. The leaders of the societies they were rigorously excluded from; of the ladies, gentlemen are now absent chiefly because there is not room for them. Annual meetings of the larger Boards now occupy two or three days, and attendants upon them are quite familiar with the subject of missionary work as packed with women.

Children's Societies: Beyond occasional mention of contributions from "pupils" of some lady, or "from a Bible-class" or "Sunday-school," the reports of women's societies in the old country seldom have anything to say of the children's part in the modern missionary crusade. But in America they are a great factor—both in the United States and Canada. The children are organized into Bands, of which they are themselves officers, altho superintended by some skilful leader; and they read their little reports with quite as much gravity, accumulate their offerings with enthusiasm, and move as a body in a measured march to the music, if with a somewhat broken step, as happily as their seniors. One of the first momentous duties of a band is to name itself, and the English language has been explored for the purpose. There are the Carrier Doves and Look-out Guards, Snowflakes and Mayflowers, Busy Bees, Steady Streams, Mustard Seeds, King's Cadets, Up and Readies, Little Lights, Pearl Seekers, Acorns, The Drum Corps, Do What You Can Band, and so on, in endless variety. As one has said, "Each dainty or suggestive name looks out from the record like the growing face of a child." And no mean sum in hard cash do these children send to the foreign mission treasury.

And what have the children not done to fill their mite-boxes? They have filled what was given for Christmas and Fourth of July; they have hemmed towels by the mile, and pratised scales by the half day; they have foregone sweets and even butter; they have picked blackberries in the sun; they have "minded" baby, and submitted to have their teeth drawn, and "buttoned" papa's boots, who can't stoop over because he's "so fat that when he walks, the snow; raised vegetables and poultry; and after earning their money some of them have divided with little brother, so that he might share the glory of giving. One little girl had her music-box, "which plays with a handle, right by my bank, and plays a tune whenever I put some money in, so I like to put the pennies in oftener than before."

Meetings of these Bands are held statedly, and the inventiveness of the most skilful leader is taxed to arrange programs which are at once instructive and entertaining. The children are taught numerous hymns and Scripture passages and many learn to pray in the meetings. They draw maps, recite dialogues, hold African palavers, and Indian pow-wows in costume, and give facts about missionary lands in one-minute reports or five-minute papers. They quiz their parents and teachers, and ransack the library and search the atlas for information, because they are "on the committee." Sometimes exercises take a different turn, and they make scrap-books or dress dolls for a missionary school, or pick lint and roll bandages for a hospital. In a great variety of ways their childish energies and sympathies are directed into missionary channels, and they are becoming both grounded in the principles of giving, and through graphic stories and letters, exhibitions of curios, and talks from missionaries, they are growing up in the churches of America, familiarized with missions as their parents have been, so that when the people now accomplish, it is as nothing compared with what may be expected from them when they come to years of maturity.

Results of the active entrance of women into Missionary work: What has already been said of the influence of the women in cultivating the missionary spirit among children suggests one important branch of these results. Christian women have taken a leading place in arousing interest in missions and in securing systematic study of this branch of the work of the Church. There is the scheme for united study which has been given to the American Tract Society. Christian women should always be devout women in the churches desires of contributing to the support of missions. But the mass of women, without these societies and the methods which they use, would never be sufficiently in touch with missions nor sufficiently armed with the details of their beneficent influence to make sacrifices for their support. Through the energy of the women's societies it has come to pass, however, that a very large proportion of the funds which they collect must be reckoned as a gain, not otherwise as the only possible, to the resources of foreign missions.

The most far-reaching and helpful results of the entrance of women upon the mission enterprise is found on the mission field. The mission woman is not a preacher, but she is an evangelist. She is also a teacher, more than she is a physician of the highest ability. She may be also a skilled writer, and a linguist of talent that finds its field even in translation of the Bible. Missionary women not only thus reinforce other workers in all the great departments of the missionary enterprise; but, when they go, they gain effective access to that half of the population which no man can hope to reach in any but the most superficial and unsatisfactory way. It is their entrance among the women of non-Christian lands and their many-sided activity for the culture of true womanliness that has made the period of the uprising of the women of Christendom in behalf of missions the dawn of a new era in missionary history.

WONG-BUANG: A village in Fo-kien, China, situated 30 miles N. of Fu-chau-fu. Station of the CEZ (1893), with (1903) 3 women missionaries, 6 native workers, and 4 day schools.

WONSAN. See WEN-SAN.

WOOD, George W.: Born in Haverhill, Mass., February 14, 1814. Died in Geneseo, N. Y., July 17, 1901. He was educated at Dartmouth College and Princeton Seminary; ordained by the Presbyterian Board of Orange, 1842; returned home, 1850; corresponding-secretary of the American Board, resident in China 1850-1871; then reentered upon mission work in Con-
stantinople and continued for fifteen years until his state of health required his return to America, after 48 years of service of the Board. Dr. Wood was superintendent in the art of dealing with men, and was the author of the articles and books in Armenian, the latter including commentaries on several of the New Testament epistles and on the Book of Revelation.

WOODSTOCK. See LANDAU.

WOOSUNG. See WU-SUNG.

WORCESTER: A town in Cape Colony, 60 miles N. E. of Cape Town. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, one of them with his wife; 32 native workers, 2 outstations, 2 day schools, and 4,000 professed Christians, of whom 1,682 are communicants.

WORCESTER, Samuel Austin: Born at Worcester, Mass., January 19, 1798; graduated University of Vermont, 1819; Andover Theological Seminary, 1823; ordained August 25, 1825; left as a missionary of the ABCFM, August 31, for the Cherokees, reaching Brainerd, Ga., October 21, 1825. Through his labors and those of other missionaries, the Indians made great progress in Christian knowledge and the arts of civilized life. They had become largely a nation of farmers and artisans, had organized, with the advice of the United States Government, a regular and creditable government, were to a considerable extent supplied with schools and religious institutions, and many were members of Christian churches. In 1831 the missionaries became involved in a controversy with the State of Georgia in consequence of the passage of a law restricting their privileges, and which they deemed unconstitutional. Mr. Worcester and his two companions were arrested. After sixteen and a half months' imprisonment they were released, January 14, 1833, returned to their stations, and resumed their missionary work. Mr. Worcester removed in April, 1835, with the mission press to Dwight, and spent the summer among the Cherokees of Arkansas, mostly in making arrangements for printing work, with a press stationed at Park Hill, in the Indian Territory, to which the Cherokees had been removed. Here he died April 20, 1859.

WORLD'S WOMAN'S CHRISTIAN TEMPERANCE UNION: The United States Woman's Christian Temperance Union was organized at Cleveland, O., in 1874, as a result of the great Woman's Temperance Crusade of the previous winter. Soon after the completion of the organization, the suggestion was made of an International Union. At the Detroit Convention (1883) Miss Frances E. Willard urged the project, and in 1884 the Union was fully established, with Mrs. Margaret Bright Lucas, of England, as first President. From 1860 to 1898 Miss Willard was President and since then Lady Henry Somerset has held the office.

At the first delegated convention of the World's Union at Boston, 1891, the following Declarations of Principles and Pledge were adopted:

"We believe in the coming of His Kingdom, whose service is the highest liberty, because His laws, written in our members, as well as in nature and in grace, 'are perfect, converting the soul.'

"We believe in the Gospel of the Golden Rule, and that each man's habits of life should be an example safe and beneficial for every other man. We therefore formulate, and for ourselves adopt, the following pledge, asking our brothers of a common faith, to unite and continue to make common cause with us, in working its reasonable and helpful precept into the practice of every-day life:

"I hereby solemnly promise, God helping me, to abstain from all Alcoholic Liquors as beverages, whether distilled, fermented, or malted; from opium in all its forms, and to employ all proper means to discourage the use of and traffic in the same."

In pursuance of this pledge, the plan includes education of the young, the development of public sentiment, the reform of drunkards, and the general work for the establishment of the Kingdom of Christ.

The conduct of the Union is in the hands of an executive committee, consisting of the officers, Presidents of National Societies, Superintendents of World's Departments, and others who may be selected. There are two secretaries, one in England and one in the U. S. A., and the head-quarters of the U. S. Union are practically those of the World's Union.

According to the report (1903) there are auxiliaries in 60 countries (including 6 in Australia), scattered all over the world: 11 in Asia, 15 in Europe, 7 in Africa, etc. There are 37 departments, including a Young Woman's Branch, Scientific Education, Systematic Giving, Anti-Narcotics, Opium, Gambling, Penance, Charitable and hospitals; a secretaries, and a cordial cooperation, etc.

Statistics of such a work are scarcely possible. An idea of its extent is given by the fact that official papers are published in the U. S. A., England, Canada, Australia, New South Wales, South Australia, Transvaal, Japan, Tasmania, India, Burma, Cape Colony, and New Zealand. An extensive work is carried on also among soldiers and sailors. Cordial cooperation is given by missionaries of all societies in every land, who look upon the organization as an effective agency in the attack on the vice.

WOTYAK LANGUAGE: One of the Finnish group of the Ural-Altaic family of languages, spoken west of the Ural Mountains and in the provinces of Viatka and Orenburg, in Eastern Russia. It is written with the Russian alphabet. The name is also pronounced Votyak.

WOYENTIN. See WOOGNTHIN.

WRAY, John: Missionary of the LMS to British Guiana, South America, from 1807 to 1837. He returned to Demerara in 1808, at the request of a wealthy planter, and made his home on the plantation. Here his labors were so much blessed that a great reformation took place among the negroes, not only on this estate, but also on the surrounding ones. They changed their way of living, and became more industrious and attentive listeners to his preaching. The local government of Demerara was not in sympathy with the religious work among the negroes, and it placed so many obstructions in the way of the missionaries that Mr. Wray was sent to England to obtain, if he could, a modification of government. He partially succeeded, and returned to Demerara in 1811.

In 1813 he began work among the common negroes at the stations of Georgetown and
The laws which he had secured for the amelioration of the condition of the negroes being misunderstood, or not carried out, he found it necessary to go a second time to England in their behalf. Still negroes were hindered in their religious worship. Their books were taken from them and overawed, and accompanied them to the meetings “to judge of the doctrines held forth to the negroes.”

Such persecutions irritated them beyond endurance, and a serious insurrection broke out, many of them leaving the plantations and going into the back country. On Mr. Wray’s return to Berbice he was requested by the governor to explain to the slaves the new laws, so that there might be no further trouble. He seems to have succeeded, and quiet was restored in his mission, where he remained for 13 years, when, worn out with his work, he with his wife sought rest and health in England. In 1832 he returned to Berbice and continued his work for eight years longer, when he died of yellow-fever at New Amsterdam.

WRIGHT, Austin H.: Born at Hartford, Vt., November 11, 1811. Died January 14, 1865. He studied at Dartmouth College and Union Theological Seminary, N. Y., and in the medical department of the University of Virginia, Charlotteville, preparing during his term of study to the destitute population of the “Ragged Mountains”; sailed March 9, 1840, as a missionary of the ABCFM for the Nestorians, to take the place in Urmia of Dr. Grant, whose impaired health and large plans for the Mountain Nestorians led him to seek a residence in one of the mountain districts of Kurdistan. His perfect acquaintance with the Turkish, Syriac, and Persian languages, coupled with his knowledge of medicine and his kind, gentle courtesy of manner, gave him much influence among all classes of the people, and the business connected with the authorities, and intercourse with the higher classes, was to a great extent in his hands, or carried on through him. The Persian officials and other gentlemen appreciated very highly the courteous, dignified, yet simple ease and grace with which he met them.

In 1860 he returned to the United States, but, the feeble, he engaged in labors for the Nestorians. In the early part of 1863 he began the revision of the New Testament in Syriac, preparatory to its being electrotyped and printed by the ABS in pocket form. To this the Psalms were added, and he took back with him on his return in 1864 the first few copies, which were hailed with delight by the people. A short time before this it was determined to undertake the translation of the Bible into Turkish for the Mohammedan population of Azerbaijan. This work was assigned to Dr. Wright in conjunction with Mr. Rhea, and he entered upon it with great enthusiasm. But in three months he was called to a higher service.

WU-CHANG-FU: A town and capital of Hup ei, China, situated on the Yangtsze, opposite Han-kang and Han-kau. Population about 100,000. With the other two cities together the population is estimated at 1,200,000. It is a great center of Chinese culture, and there are also manufactures. The following societies have mission stations there: LMS (1867); PE (1868); WMS; Swedish National Society (1890); Scandinavian Alliance; CA; with, altogether (1903), 32 missionaries, men and women; 22 native workers, men and women; 12 places of worship, 10 day schools, 2 boarding schools, and 314 professed Christians.

WU-CHAU-FU: A town in Kwang-si, China, situated in the E. part of the province, on the West River, about 125 miles E. of Canton. Population (1901), 52,000. Station of the WMS, with (1903) 1 missionary, 6 native workers, 1 place of worship, 1 day school, 1 hospital, 1 dispensary, and 22 professed Christians. Station also of the CA. The BFBS has an agency and book room here. The place is sometimes called Wu-chow.

WUCHEO and WUCHOW. See Wu-CHAU-FU.

WUCIEH. See Wu-HSI-HSIEN.

WUGA. See VUGA.

WU-HSI-HSIEN: A town in Kiang-su, China, situated on the Grand Canal, about 30 miles N. W. of Su-chau-fu. Station of the MES, with 1 missionary. Also station of the PE, with 1 native worker, 1 day school, 1 boarding school, 2 Sunday schools, and 10 professed Christians. Some write the name Wu-si.

WU-HSUEH: A town in Hu-pie, China, situated on the Yangtsze River, about 35 miles W. N. W. of Kiu-kiang. Station of the WMS, with (1903) 1 missionary, 8 native workers, 4 outstations, 6 places of worship, and 102 professed Christians. Station of the ABMS from 1860. Some write the name Wu-sueh.

WU-HU-HSIEN: A town and treaty port in Nga-n-hwei, China, situated on the Yangtsze River, about 60 miles S. W. of Nan-king. Population (1901), 102,116. Station of the FCMS (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 4 native workers, 1 outstation, 2 places of worship, 1 day school, and 61 professed Christians. Also station of the CIM (1893), with (1903) 2 missionaries and their wives, 3 native workers, 1 outstation, 2 places of worship, 1 day school, and 61 professed Christians. Station also of the ME, with (1903) 3 missionaries, 2 of them with their wives; 1 woman missionary, 6 native workers, 5 Sunday schools, 5 day schools, and 384 professed Christians, of whom 184 are communicants. Also station of the PE (1894), with (1903) 1 missionary, 5 native workers, 3 outstations, 1 day school, 1 boarding school, 4 places of worship, and 53 professed Christians. Also station of the CA. Some write the name Wuhu.

WU-KING-FU: A town in Kwang-tung, China, situated about 45 miles W. N. W. of Swatow, among the Hakka people. Station of the PCE (1865), with (1903) 3 missionaries and their wives, 2 women missionaries, 16 native workers, 2 boarding schools, 1 dispensary, 1 hospitably, 1 medical class, 1 theological seminary, 1 printing house, and 1,304 professed Christians.

WULUPURAM. See VILLUPURAM.

WUN-CHAU. See WEN-CHAU-FU.

WUPPERTHAL: A village in Cape Colony, South Africa, situated in the Doorn River district, about 70 miles N. of Tulbagh. Station of the Rhenish Missionary Society, with (1903) 1 missionary, 8 native workers, 3 outstations, 3 day schools, and 1,721 professed Christians, of whom 355 are communicants.

WU-SIH. See Wu-HSI-HSIEN.

WUSUEH. See Wu-HSI-HSIEN.
YA-CHAU-FU: A town in Sze-chwan, China, situated about 70 miles S. W. of Chen-tu-fu. Station of the ABMU (1894), with (1903) 3 missionaries, two of them with their wives; 3 outstations, 1 place of worship, 1 day school and 52 professed Christians. Some write the name Yachou.

YAFFA. See JAFFA.

YAKUSA: A village on the upper Congo River, Congo Free State, 70 miles N. W. of Stanley Falls. It has trade relations with five different tribes. Population 1,200. A railroad is now being built thence to Lake Tanganyika. Station of the IMS (1896), with (1903) 4 missionaries, one of them with his wife; 1 outpatient, 1 dispensary, 1 industrial school, and 1 day school. The name is sometimes written as Yakusu, or Sargent is used to indicate the same place.

YANG-CHAU-FU: A town in Kiang-su, China, situated on the Grand Canal, about 15 miles N. of the Yangtse River. Population about 150,000. Station of the CIM (1863), with (1903) 2 missionaries and their wives, 3 women missionaries, 8 native workers, 1 outpatient, 2 places of worship, 1 Sunday school, and 36 professed Christians. The main work of the station is the training home for native appointed missionary women. Also station of the SBC (1891), with (1903) 1 missionary and his wife, 2 outstations, 1 place of worship, 1 Sunday school, 1 dispensary, and 23 professed Christians. Some write the name Yang-chow.

YANG-HSIEN: A town in Shen-si, China, situated in the S. part of the province on the Han River about 51 miles E. by N. of Hanchung-fu. Station of the CIM (1896), with (1903) 2 women missionaries, 1 outpatient, and 18 professed Christians. Some write the name Yang-hien.

YANG-KANG: A town in Kwang-tung, China, situated in the northern environs of Swatow, about 10 miles from the city. Station of the ABMU (1893), with (1903) 2 missionaries and their wives, 2 women missionaries, 31 native workers, 20 outstations, 5 places of worship, and 618 professed Christians. Some write the name Ung-kang.

YANG-KAU-HSIEN: A town in Kiang-si, China, situated a little to the S. E. of Kwanhsin-fu, in the N. E. part of the province. Station of the CIM (1896), with (1903) 3 women missionaries, 3 native workers, 1 place of worship, 1 Sunday school, and 68 professed Christians. Some write the name Yang-k‘eo.

YANG-KIANG-HSIEN: A town in Kwang-tung, China, situated on a little bay about 150 miles S. W. of Canton. Station of the PN (1893), with (1903) 3 missionaries, two of them with their wives; 20 native workers, 4 outstations, 11 places of worship, 1 day school, 1 hospital, 1 dispensary, and 279 professed Christians. Some write the name Yueng-kong.

YAO LANGUAGE: One of the Bantu family of African languages, spoken by a number (not yet ascertained) of tribes inhabiting the Eastern shores of Lake Nyassa, in Portuguese East Africa, and found also in the Shiré region south of the lake. It has been reduced to writing by missionaries with use of the Roman letters.

YARKAND: A town in Chinese Turkestan, situated on the Yarkand River, about 200 miles S. E. of Kashgar. Population about 60,000, mostly Turks, who speak Turkish of the Eastern dialect. The Turkestan in present Mohammedans in religion. Station of the Swedish National Missionary Society (1895), with 1 missionary and his wife, 1 place of worship, and 1 day school. Some write the name Jarkend.

YATES, Rev. M. T.: Missionary of the Southern Baptist Convention, born in Wake County, N. C., January 8, 1819; died in Shanghai, China, March 13, 1888. He was born of humble but intelligent and pious parents. Their poverty forbade them to give him the education they desired him to have, and for which his own soul yearned. He therefore made his own way through school and college with the assistance of his brethren, whom various times he became the support of in his struggles. His regard to his father upon setting out to prepare himself for college has been an inspiration to many lads in the Southern States:—"I will go to school if I have to make bricks by moonlight to pay my way." It was also characteristic of the steady determination and self-reliance of the man.

He graduated from Wake Forest College, N. C., in 1846, married Miss Eliza Morine of Chatham Co., N. C., September 27, 1846, sailed for China April, 1847, and arrived in Shanghai Sept. 13, 1847, shortly after it had been made a treaty port by the treaty of 1846. There in Shanghai and its environs he labored for more than forty years, in spite of wars, famines, perils, sickness, and manifold trials. Always he was cheered and supported by his devoted wife and at intervals by other missionaries sent out to reinforce him. A part of the time he supported not only himself, but also other missionaries by his labor as Vice-Consul and his judicious investments of frugal savings and the small patrimony of his wife. Largely in this way the Central China Mission of the Southern Baptist Convention was preserved, during the great Civil War in America and for some years after, when the Board which sent him to China was crippled and all but destroyed. He grew in power and usefulness in spite of overwhelming difficulties, until he became a master missionary.

His work was that of laying good and true foundations. He made himself such a master of the spoken Chinese language as to make him thoroughly learn the Chinese manners, modes of thought and customs that he was regarded by the Chinese—like Verbeek in Japan—as one of their own number. Besides useful religious works he translated the New Testament into the Shanghai dialect, he organized churches and built houses of worship, established schools, and otherwise built up what has come to be the Central China Mission of the SBC.

His personality was great and inspiring. The man had a tremendous influence both in China.
and America and among all Christain people. By some, if not all, of his compeers he was regarded (as a Presbyterian brother expressed it) as 'head and shoulders above any missionary in China.' Certainly his towering form, his learned and forcible manners, and all that goes to make personality—all combined to make him a mighty factor in the world's evangelization. The his body has slept in the grave for more than fifteen years, his influence is powerful in all the Southern States to-day. On in the dark hours of war and reconstruction his imposing influence was an inspiration to the brethren with fresh courage and enthusiasm, and that influence "still in the world endures."

Taylor (C. E.), Life of M. T. Yates, Sunday School Board SBC, Nashville, Tenn.

YATES, William: Born at Loughborough, Leicestershire, England, December 15, 1792. Died July 3, 1845. Educated for the ministry at Bristol College; ordained August 1, 1814, and sailed for Calcutta as a missionary of the Baptist Missionary Society April 16, 1815. He joined the mission at Serampur, devoting himself to preaching and assisting Dr. Carey in the translation of the Scriptures. Because of the controversy of Dr. Carey and his companions at Serampur with the BMS, Mr. Yates, with three associates, separated from the Serampur Mission. They established themselves at Calcutta in 1817. His special work at Calcutta was the preparation of books and the organization of the new printing establishment, which was soon self-supporting. Mr. Yates visited England and the United States in 1827-29, and while he was in England the unhappy breach was healed between the Serampur mission and the BMS. On his return to India he was again stationed at Calcutta. He translated the whole Bible into Bengali, the New Testament into Hindi and Hindustani, and the New Testament and large portions of the Old Testament into Sanskrit. He was engaged in preparing the latter for the press, and a large part had been already printed. He hoped to complete it in one year and another year to complete the translation of the Scriptures into this sacred and learned language of the East. But, his health failing, he sailed for England in 1845, and died on the passage up the Red Sea.

YELAMANCHILI: A town in Madras, India, about 35 miles by railway S. W. of Viragapatam. Station of the CIM (1890), with 1 missionary and his wife, 9 native workers, 1 outstation, 1 place of worship, 7 Sunday schools, 1 day school, 1 dispensary, and 50 professed Christians.

YELANDUR: A town in Central India, situated S. of Raipur and in the vicinity of Jagdalpur. Station of the ME, with (1903) 1 missionary and his wife, 5 native workers, 6 Sunday schools, 1 day school, 1 place of worship, 1 outstation, and 77 professed Christians, of whom 64 are communicants. Some write the name Yelandu.

YELAMANCHILE. See YELAMANCHILI.

YELANDU. See YELANDUR.

YEN-CHAU: A town in Che-kiang, China, situated on the river, about 60 miles S. W. of Hangchau. Station of the CIM (1902), with 1 missionary and 1 place of worship.

YEN-CHENG: A town in Ho-nan, China, situated on the Hoang-ho, and destined to become an important center, as the railroad is to pass through it. Station of the CIM (1902), with 1 missionary and his wife and 1 place of worship.

YEN-SHAN-EISIEN: A town in Chi-li, China, situated about 80 miles S. by E. of Tien-tsin and 35 miles from Tsang-chau. Station of the LMS (1878), with (1903) 2 missionaries and their wives. The station residences have now been transferred to Tsang-chau. Some write the name Yen-shein.

YEOTMAL: A town in Berar, Central India, about 55 miles S. E. of Amrooti. Station of the Free Methodist Church in America (1892), with (1900) 2 missionaries and their wives, 2 women missionaries, 5 native workers, 1 place of worship, 2 Sunday schools, 2 day schools, 1 industrial school, and 20 professed Christians.

YEZIDIS: The Arabs who accepted Mohammed called those who did not el johaleen, i. e., the ignorant ones. Among the latter was Ye兹d ben M'aw, who refused to accommodate M'aw, his father, which, as an attendant in his palace, followed the fortunes of Mohammed. Many of the “ignorant ones” rallied around Ye兹d, and he became the nucleus of the sect which appropriated his name. The Ye兹dis possess a lineage tree by means of which they trace their religious origin back to him.

They seem to have existed as a very loose organization until about 1106, when there arose among them an elder called Sheikh Hadi, from the region of Damascus. He removed to the district of Hakkari in Kurdistan, and dwelt in Mount Lalish, which is eleven hours from Mosul. He died in 1162, and his tomb, called Sheikh Adi, is hard by the village of Ba'adri, where also is the temple of the Ye兹dis. This place, as their religious center, is by them esteemed superior to Mecca.

Sheikh Hadi gave more consistency to their religious system—still very confused and illogical—and greater stability to its organization, by committing to writing its tenets and traditions. His work, which is the authority for their belief, is named El Jidehk (the Revelation). The original is the only copy existing, and it is esteemed as most holy, and is guarded at Sheikh Adi with the most scrupulous care. It is in Arabic, and speaks in this wise of the origin of the Ye兹dis: 'O angels,' said the great God, 'I am going to create Adam and Eve. They will become man-kind, and from the lines of Adam's palm (?) shall proceed She'n ben Jebr, and of him a separate community will appear upon the earth, that of Azazel, i. e., of Melek Taous, which is the sect of the Ye兹dis.' Then he sent Sheikh Hadi ben Musa'far from the land of Damascus, and in him dwelt in Mount Lalish." Sheikh Hadi was an Arab, and was held in high repute for his piety and devotion. He holds among the Ye兹dis the same place that is given to Moses by the Jews, and that is claimed by the Muslims for Mohammed.

This degraded yet interesting people number
probably about 200,000 souls, but they are scattered over a belt of territory 300 miles wide, extending from the neighborhood of Aleppo in Northern Syria to the Caucasus in Southern Russia. The mass of them, however, are to be found in the mountains of Northern and Central Kurdistan, and among the Sinjar hills of Northern Mesopotamia.

The two mysteries of their religion are in the Arabic language, Kurdish is more generally spoken by the Yezidis than Arabic, both languages being used by those living in the Sinjar hills and in the region of Mosul.

The Yezidis are an agricultural people and live in fixed abodes. As a rule they are neat and cleaner in their homes, and in respect to person and dress, than either Arab or Kurd; while their style of dress follows the fashions of the people by whom they are surrounded, except that the shirt has a square-cut opening in front.

Generally speaking they are quiet and industrious, but in the regions of Redwan and Midyat they are given to house-breaking and highway robbery, and also hire themselves to Muslims and Christians for the commission of deeds of blood, so that they are the terror of those districts. In the Sinjar hills, where they constitute almost the entire population, they are restive and refractory. Everywhere they entertain a deep-seated hatred of Muslims, whether Arabs or Kurds, who treat them in return with contempt and oppression. Polygamy is allowed among them to the limit of six wives, but its practise is not so general as with the Muslims, limited to four wives. The drinking of raki (a mild arrack) is enjoined as a religious rite in connection with the worship of Melek Taous, and accordingly intemperance is common.

They are recognized by the Turkish Government as a distinct religious community. Their civil head is an Emir whose title is hereditary, and who is of royal blood, if El Jilweh is to be believed. It says: “Then Melek Taous came down to earth for our sect, i.e., the Yezidis, the disturbed, and appointed kings for us, besides the kings of ancient Assyrians, Nisroch, etc. . . . And after that we had two kings—Shaboor (Sapor) First and Second—who reigned 150 years; and our Emirs, until this day, have descended from them”.

The Emir never marries outside of this royal line. He is lord of the persons and affairs of the Yezidis, and his power over them is absolute. His person is considered holy, and all his acts are regarded as righteous. To him belongs administrative power and dignity, as well as ecclesiastical, and all the dealings of the Turkish Government with the Yezidis are through him. For this reason he resides most of the time in Mosul.

The Yezidis have written laws and statutes which are read and interpreted only by the members of one family—that of Mella Haider, sur-

named El Bussowi. The secretary of the Emir is always chosen from this family.

Doctrine: The Yezidis believe in God as the supreme deity and the first cause of all things; but they have nothing to do with Him either in that capacity or in any other. They believe in one Melek Taous (King Peacock), who is eternal, an emanation from God, became incarnate as Lucifer, deceived Adam and Eve as Satan, is one of the seven gods who, in turn, rule the world for 10,000 years, and he, having now governed it for the 6,000, has yet 4,000 years in which to reign.

They believe in Jesus, called also in El Jilweh 'Abd Taous (servant of Taous). They say that he is the god of that which is good, of day and of life; that he is descended from the divine nature, or, at least, is so honored of God that whatever Sheikh Hadi wills comes to pass; and that he revealed to his disciples revealed secrets, a knowledge of the unseen and of prophecies. In his book he claimed to be sent both of God and of Melek Taous. The second assertion of El Jilweh is: “He (Melek Taous) sent ‘Abd Taous to this world that he might separate truth from error, and make it known to his people; and the first step to that is by tradition, and afterward by this book El Jilweh, which the uninitiated must neither read nor behold.” His claim to have been sent of God is made farther on in the sentence quoted at length when stating the origin of this sect. They also say of him, “The Yezidis’ god descended in this era and both taught and established us.” Sheikh Hadi associated himself with God in stating farther on in his book that “He afterward came and dwelt in Lalish.” Is there in Sheikh Hadi an effort at the reconciliation of Zoroaster and Jesus? Is there an union of the two eternal principles (according to Zoroaster) of good and evil, in order to secure a reconciliation of man with each, and with both together, through worship at the shrine of one who stood for both?

They accept Christ as the “Light of God,” and say that He cannot die; also that He is a Savior and will come again. But all these are evidently accommodations to the Christian sects with whom they are brought into contact. In the same way the Yezidis about Redwan have attempted to accommodate their tenets to the Christian doctrine of the Trinity.

They hold to the Transmigration of Souls, but subject to the caprice of Melek Taous, for El Jilweh says: “I (Melek Taous) will not allow one in this wretched world longer than the time determined; and if it is a second or a third time into this world, or some other, by the transmigration of souls.” When righteous souls return they enter into men, but wicked spirits are sent back to reside in the beasts. Yet along with this they hold to a Resurrection, when Sheikh Hadi will carry all the Yezidis to paradise on a tray borne upon his head. They hold to a future judgment and punishment for all—except the Yezidis. El Jilweh says: “I (Melek Taous) punish in other worlds those who do contrary to my laws. They have Islamic notions of paradise as a place of eating and drinking, together with the pleasures of physical love. They claim to receive the Old Testament, the New Testament, and the Koran, but reverence the Old Testament more than either of the others. This acceptance is, however, a qualified one, for El Jilweh says: “The belief of those who are without I accept in a sense, i.e., those that agree with and conform to my statutes. Whatever is contrary to these they have altered.”

The Yezidi ecclesiastical polity has the form of a religious oligarchy, is composed of six orders
besides the Emir, which are chiefly hereditary and confined to as many distinct families. These orders are:

1. **The Sheikh**: He is called Sheikh Mengah, which is the name of a district comprising the regions of Mosul, Amadi, and Zakho. He is the chief religious and political head, even as the Sheikh ul Islam in Turkey ranks next to the Sultan, who is the Caliph. The Sheikh is the guardian of the tomb of Sheikh Hadi. The insignia of his office are a black girdle with a white cord about the body and a netting of catgut which is carried on the head. He is supposed to prophesy, and has paradise in his flowing sleeves, sections of which he is willing to dispose of to purchasers according to the sums received. Whenever the Sheikh appears among the people they submit themselves to him in lowly reverence and humility.

2. **Sheikh**: This order was founded by Sheikh Hadi. Every Sheikh traces his lineage back through a regular succession to a Patriarch who is regarded not only as the bestower of the office of Sheikh, but also as the assistant and advocate of the Emir, or who exercise the office as the avenger of all injuries inflicted upon them. For this reason no Yezidi dares to return the smiting of an ecclesiastical. Each Sheikh has the privilege of doctoring a special disease. The Sheikhs frighten their followers into giving presents and alms according to their will by threatening to punish them, upon refusal, with pestilence, fever, distress, sickness, and pains, or the control of their enemies over them—such power being supposed to reside in each Sheikh.

3. **Pirs**: They are the Nazarites, who take vows of celibacy and devote themselves and their property to Sheikh Hadi. To them appertain the conduct of hair-dressing and of the fasts and feasts. They are also intercessors, and perform their function upon certain heaps of stones in the neighborhood of Sheikh Hadi, where they are regarded as having been the avenger of all injuries inflicted upon them.

4. **Kuchiks**: The word is Kurdish and signifies dancer. These attend to the service of the tomb scenes, praises and songs. They order and conduct the sacred dance upon the feast-days. They praise the gods Hadi and Taous with tambourine and flute until they swoon in a trance, when they utter strange sounds and language. They declare what is revealed to them in dream, trance, and vision, and are reckoned as prophets. They are said to have the power of life and death—probably through the influence of magic.

5. **Kowals**: These are the priests proper, to whom pertain the duties of imparting religious instruction to the people, and of seppulture. All instruction is oral, in which they profess to be guided by an 'inner light' to which all, even the Emir, must give heed. Whenever a Yezidi is about to die he is visited by a Kowal, or his agent, who removes the dying man's sins by transferring them to himself. They divide with the Pirs the function of intercessors, and to them belongs the privilege, each year, of bidding for the concession of conducting the "Sanjak Taous" among the Yezidi villages. They never use a razor upon their heads.

6. **Fakirs**: These constitute the lowest order of the priesthood. They are entrusted with the instruction of boys and girls in the tambourine, in dancing, and religious evolutions. They are married, have a salary, live in Sheikh Adi, and are the janitors of that holy place.

The Yezidi worship and regard the cock Taous through his "Sanjak," or symbol, which is a sacred brazen cock, one eye of which is marked over by a cross. They also adore Sheikh Hadi, who is still a god the his body be dead, and who receives divine honors at his tomb in Sheikh Adi. Forasmuch as he was a sun of Melek Taous, the morning cock stands for him also, so that he is worshiped at the same time with Melek Taous, and at his tomb the "Sanjak" of Melek Taous is revered equally with the tomb. The two eternal principles have thus equal honor, and by this arrangement no one can worship the one without equally worshiping the other. Here again there seems to be an attempt to accommodate something to their needs from the Parsee religion. In the Vendidad the cock is a sacred bird—the bird of Angel Yezidis, obedience to the law of Maada and chief of the Yazatas and their leader against the leader of the demon host, Ethna Dava. The Yezidis seem to combine the two principles and so make the cock represent both.

These two gods are the chief objects of their worship, and the tomb of one and the sanjak of the other are the symbols employed to bring them before the worshipers.

The sun is regarded as an exalted spirit without whom there would be no stability to the universe, and, therefore, also worthy of respect and honor. They worship it with flags and pipe. It must remain in the village over night, and the Yezidis must drink "taksi" in its presence. Its worshipers approach it upon their knees, kiss it, putter prayers, deposit their contributions in a box by its side, rise and walk away with their face toward it. Meanwhile a candle burns on either side of the holy bird. They have no liturgy, nor do they pray audibly, believing that all prayer should be with the heart only. They say God does not require them to fast, save during Ramazan, when they fast three days instead of thirty. This fast must be begun and ended in the presence of either Sheikh or Pir. It is ended by a participation in holy wine that is considered to be the blood of Christ. The cup containing it is held in both hands, after the sacrificial manner of the East, and if a drop should fall it is gathered with religious care.

The Yezidi feasts are the following: 1. On the first Wednesday in April, which is the beginning of their year. 2. August 1, continuing three days, in honor of Melek Fuhhr ed Deen. 3. September 22, continuing eight days, to Sheikh Hadi. This is called "et wotan," meaning "the festival."
floods. 4. November, called the Naheevi. (This feast is especially observed by the Yezidis of Jebel Toor, at which the sacred ox is worshiped in connection with Babylonian orgies.) 5. January 5, lasting three days, in honor of Shemshad Din At all these feasts there is much singing in connection with the religious dances. They have a hymn-book called "Zemboor," the hymns of which are in Arabic. They have also songs which are in Kurdish, and are sung to Kurdish tunes. Such as the religious dances, all the women go about dancing and singing, and the singing is very energetic. Nevertheless, there have been instances where Yezidis have been allowed to be Christianized. Another formidable obstacle is found in a requistion of their religion that no one shall learn to read or have any dealing with books except the family of Sheikh ul Bussaw, as stated above, the custodians of the sacred book. Moreover, it may yet come forth from their strange superstitions to follow Him who is the Light of the World.

YING-CHAU-FU: A town in Ngan-hwei, China, situated in the N. W. part of the province, on the Sha-ho. Station of the CIM (1897), with (1903) 3 missionaries, one them with his wife; 2 native workers, 1 place of worship, 1 day school, 1 Sunday school and 3 professors. Some write the name Ying-chau-fu.

YING-SHAN-HSIEN: A town in Sze-chwan, China, situated about 40 miles S. E. of Pao-ning-fu. Station of the CIM (1898), with (1903) 3 women missionaries, 1 native worker, 1 place of worship and 15 professed Christians.

YO-CHAU-FU: A town in Hu-nan, China, situated a little S. of the Yangtsze River, used by the LMS as a point of entrance to the province. After a short period of observation the station residences were transferred to Heng-chau.

YO-YANG: See YO-YANG.

YOKOHAMA: One of the most important of the treaty ports of Japan. It is situated on a plain by the side of the bay of Tokio, on the S. coast of the main island, and is shut in by hills. It occupies an area of a square mile, about one-fourth of which is a foreign settlement. The climate is variable, the thermometer ranging from 65° to 42° F., and the rainfall is quite great. The harbor is a wide and commodious one, well protected by a breakwater. Yokohama is a port of call for the lines of steamers between San Francisco and Hongkong. Other lines connect it with Shanghai, as well as numerous steamers which run from it to points in Japan and China. A line of steamers from Vancouver to Hongkong stops there regularly. A railway connects it with Tokio, and was the first railway opened in Japan (1872). It is also the terminus of a railroad which runs to Kioto.

Population (1898) is 193,762; many Europeans and numerous Chinese are included in the total. The following Societies have mission stations here: RCA (1859), PN (1859), WU (1871), ABM (1872), ME, Methodist Protestant (1879), Salvation Army, Hephzibah Faith Mission, Zion, Chinese, Catholic, Christian Missions. All together they have 44 missionaries, men and women; 155 native workers, men and women; 22 native workers, 8 day schools, 10 boarding schools and 1,921 professed Christians. The ABS (1876) and the BFBS each have an agency and a book depot in Yokohama.

YORK: A town in Sierra Leone, West Africa, situated at the mouth of a river, on the coast, on the north side of the mouth of the White River, 16 miles S. by E. of Freetown. Station of the CMS (1822), with (1903) 4 native workers, 3 outstations, 1 place of worship, 1 Sunday school, 2 day schools, and 261 professed Christians, of whom 83 are communicants. Also, the Wesleyan Methodist Mission (1879), with (1903) 1 missionary and his wife, 36 native workers, 1 outstation, 2 places of worship, 2 Sunday schools, and 430 professed Christians, of whom 217 are communicants. Station of the WMS also, with (1903) 25 native workers, 4 outstations, 7 places of worship, 3 Sunday schools and 355 professed Christians, of whom 316 are communicants.

YORUBA: Name of a people inhabiting the country inland from Lagos, West Africa.

YORUBAN: A language belonging to the Negro group of African languages. It is found in several dialects among the tribes occupying the Lagos protectorate and the territory from Ibadan to the west bank of the Niger River. The sea coast belt. The people are intelligent and enterprising and the language is suited to the development of the people. It was reduced to writing by CMS missionaries in the early part of the 19th century, and is written with Roman letters.

YOUNG MEN'S CHRISTIAN ASSOCIATION: Organizations of Christian young men for mutual improvement, and for more or less of religious activity, have probably existed in almost every age of the Church. There is historical record of such societies in Great Britain and Ireland as early as the reign of Charles I. They maintained a continuous existence for nearly one hundred years, through the revolutions under Cromwell and King William, attaining their highest prosperity in the reign of the latter. The chief object of these societies was the promotion of personal piety among their members, but they gave rise in 1691 to the "Societies for the Reformation of Manners," which had for their aim the suppression of vice through legal means. These were called into being by the low state of public morals, which, notwithstanding the better attitude of the court of William and Mary, had little mended since the dissolute reign of Charles II. The early efforts of these reform societies were favored by the civil courts, and they flourished for about forty years. They had become extinct, however, in 1757, and an effort to revive them by members of Wesley's and Whitefield's congregations was defeated through the indifference if not actual hostility of the authorities. In the 19th century, between 1823 and 1838, David Nasmith, of Glasgow, formed about seventy Young Men's Societies in as many cities of the United Kingdom, France and America. In Germany, as early as 1832, similar associations of young men were formed, closely connected with the established churches and their pastors. But while all these were societies for young men, with a distinctively Christian character, they did not seek broadly to promote the physical intellectual and social as well as the spiritual welfare of young men; develop or train a special class of
executive officers or acquire property in the form of buildings which made them locally permanent. They did not band themselves together in district, national, international and world’s conferences, altho some of them, notably those of Germany, are now part of the brotherhood forming the World’s Conference of the Brothers of Charity. Glasgow and Cincinnati Associations claim to have originated quite independently of suggestion from London; but it seems beyond dispute that the movement which has resulted in the present world-wide brotherhood can be traced to the parent English-speaking association which was organized in London by George Williams, June 6, 1844.

But while the origin and early growth of the movement took place in Great Britain, the larger development and expansion of the work has been wrought out by the American Associations. A knowledge of the London Association and its work led to the formation of Associations in Montreal, Canada, December 9, 1861, and in Boston the 29th of the same month, neither city having any knowledge of the other’s action. Other cities followed, till some twenty Associations had organized. It is known today to be in existence at the date of the first convention, which met in Buffalo, July 6, 1854, followed by the first World’s Conference in Paris, August 19, 1855. Here the following declaration, since known as the Paris Basis, or the Basis of 1855, was adopted: “The Young Men’s Christian Association seeks to unite those young men, who, regarding Jesus Christ as their God and Savior, according to the Holy Scriptures, desire to be His disciples in their doctrine and their life, and to associate their efforts as the extension of His kingdom among young men.” Upon this rests the affiliation of the Associations of all lands, represented since 1855 by a biennial World’s Convention, and since 1878 by a Central International Committee, with headquarters at Geneva, Switzerland. This declaration was ratified by the American International Convention at Montreal in 1856, and at Detroit in 1868 was added what is known as the “active membership test,” by which in the American Associations only those in full communion with an evangelical church are admitted to voting and office-bearing membership. At the Portland Convention the following year this action was unanimously reaffirmed, the meaning of the term “evangelical” was defined, and representation at the International Convention, from all Associations thereafter organized, made conditional upon this test being embodied in their constitutions.

In April, 1860, the Associations of North America had about 25,000 members. At the breaking out of the civil war large numbers of their young men entered the armies on both sides, and the Associations naturally followed them with efforts for their welfare and that of their comrades. At the instance of the New York Association a special convention was called November 14, 1861, which resulted in the organization of the United States Christian Commission, the work of which largely absorbed the energies of the Associations throughout the remainder of the war. With the return of peace, however, the Associations took up their old work with renewed zeal, advanced ideas, and better methods. From about this time dates the beginning of that unparalleled growth which has marked the past three decades. The force of the appeal by the Christian Commission secured the active sympathy of the churches; a clearer conception of the work, as distinctively for and by young men, focalized thought and effort, and rapidly developed both methods and men; this called for better facilities, which were readily furnished as the practical character of the work was recognized; the work developed systematic supervision, and the paid secretaryship was developed; the Associations increased in number, spread over the country, and grew multiplex in their departments of work, and State organization and a comprehensive general supervision became a necessity; broadened methods and appliances in the local work asked for, larger, better adapted and permanent quarters, and buildings sprang up by the score, till to-day the Associations are a universally acknowledged force in the religious, educational, and social life of the country.

In government the individual Associations are independent, except as to the single item of the active-membership test, each society conducting its business affairs through a board of directors as the corporate management, and with a general executive officer styled a general secretary; but they are united in a thorough system of general organization, embracing delegated conventions, executive committees, and visiting agents, the decisions and advice of which, tho in the main only advisory, are very generally accepted and followed. With the Associations of the United States and Canada this system embraces: (a) A Biennial Convention (annual previous to 1878), composed of delegates from all the Associations, representation being based upon the active membership. The ad interim powers of this convention are vested in an executive board, the members of which are elected by classes at the biennial sessions. Since 1866 the headquarters and a working quorum of this body have been located in New York, and in 1883 it was incorporated as the International Committee, a name by which it had for years been known. The scope of the committee’s work is broad, including (a) supervision and extension—generally of all the work, in full when there is no State organization, and very largely of such special departments as the college, railroad, German, and foreign work; the State organizations owe their existence and early nurture to the act and care of the International Convention and its committee; (b) securing, training, and recommending general secretaries; (c) advising and assisting regarding the plans, location, and methods of building and the management of property; (d) securing funds for its own work and aiding State and local Associations in raising money for State work, for new buildings, to place secretaries in new fields, and in special financial emergencies; (e) arranging for the International meetings, assisting in planning many State and special conventions, and sending official representatives to all; (f) conducting an extensive correspondence; (g) a publication list of tracts and serials in several languages, including the “Year-Book”; (h) through the systematic efforts of the committee, the American Associations have observed annually, since 1866, a day and week of prayer in November, and since 1875,
by act of the World’s Conference, the Associations of other lands have joined in this observance; (i) in times of overwhelming calamity by fire, flood, or pestilence, they have often rendered communities effective help through this committee, as their agent, in gathering and distributing such relief.

2. State Organizations: modeled after the international, and doing a like work, so far as needed, in their respective fields.

The organization and work of the typical American Association may be thus described: (a) A dual membership: (1) Active—men who are members of evangelical churches, and who constitute its voting, office-bearing, and working force; (2) Associate—young men of good moral character, who join usually for the secular privileges. The total membership of the 1,736 Associations reporting in 1903 is 350,455. (b) A business organization, with constitution, legal incorporation, officers, board of management, and well-ordered system of committees. (c) A paid secretary to supervise and direct, under the local board, and to develop workers, rather than to attempt too much detail work himself, leaving that mostly to assistants. The total number of general secretaries, physical directors, and the various secretaries and assistants in the local work is 1,729. A school devoted chiefly to the training of young men as general secretaries and gymnastic instructors, opened in Spring- field, Mass., in 1885, has (1903) an enrollment of about 100, while a school of like character organized in 1891 at Chicago has about 150 students, and there are several well-constituted summer schools, notably those at Lake Geneva, Wis., and at Silver Bay, Lake George, N. Y. (d) A building of its own, usually comprising reading-room, library, parlors, recreation-room, offices for secretaries and directors, lecture and small lecture-rooms, class-rooms, gymnasium, including bowling-alley, baths, and dressing-rooms; a kitchen and janitors’ quarters. There are 460 such buildings, valued at $24,016,415—a good index of the estimate put upon the work by Christian business men, and a strong guarantee of its permanency. (e) An organized work: (1) Religious—consisting of Bible-classes, evangelistic and for Christian young men; workers’ training-classes; evangelistic and devotional; meetings for young men; special work in the interests of personal purity, temperance, etc.; systematic invitation work; the distribution of religious literature; and a directly personal work, which is specially emphasized. (2) Educational—reading-rooms; circulating and reference libraries; evening classes in practical and liberal branches, book-keeping, penmanship, stenography, mathematics, drawing, languages, history, literature, political science, music, etc.; literary societies, and educational lecturers. (3) Social—attractive rooms for resort, with companionable supervision, music, recreational games, and a variety of social gatherings and entertainments. (4) Physical—facilities for artificial exercise of every description, and under instructors competent, from both a scientific and practical training, to make physical examinations and prescribe safe and helpful exercise. (5) Athletic and sporting grounds for field-sports, and clubs for boating, swimming, rambling, etc. (6) Economics—employment bureau, boarding-house register, savings-bank, medical club, visitation of the sick, and similar service. (6) Junior department, in which, under special supervision and with separate rooms, a mere or less full line of work is carried out for boys, and assistant secretaries which they graduate into the senior departments.

The International Committee, with headquarters at 3 W. 29th St., New York City, has 43 members aside from the officers, and 15 advisory members, besides Board of Trustees of 15 members. Most of the members live in New York or vicinity, but there are representatives from different parts of the United States and Canada. There are also 52 corresponding members representing different States and foreign countries.

For active work the staff is divided into 14 departments: The Office, Publication, and Business Departments have charge of the general correspondence, literature, and financial management. The Field Department, occupied with the extension, development, equipment and trained leadership of the Association work in the cities and towns, and also the strengthening of the work of the State and provincial organizations. There are 7 secretaries, in New York, the others in other parts of the country. The Railroad Department organizes Associations, determines prices for publishing and distribution, of libraries, buildings, and all the usual features of an Association. For a time it was rather frowned upon by railroad authorities, but of late years they have come to recognize its value and have aided materially in its development, contributing literally in the erection of buildings and assisting in many ways to make it easy for men to attend the meetings, etc. An illustration is the Missouri Pacific system, where 13 well-equipped Associations were organized within four years. There were in 1903, 198 Associations, with a membership of 63,000, an increase of 50 per cent. in two years. There are 79 buildings, valued at $1,129,050, owned by Associations, 8 under construction valued at $159,500, and 35 others set apart by the companies for their use, valued at $541,000. Work among street employes is being organized and plans are under consideration for extending the system into the countries of Europe. The Industrial Department is the most recently organized (1902) and resulted from a study of Association work among the 4,500,000 men employed in the various industrial enterprises of the continent. It looks forward to the erection of buildings or the equipment of rooms in connection with the great factories.

The Students’ Department has (1903) 635 Associations among students (exclusive of colored and Indian departments) of these, 48 are in the theological seminaries, 72 in the medical and other professional schools, and the remainder in universities, colleges, and normal and preparatory schools. Special emphasis is placed on Bible study, and in 1902 there were 18,042 enrolled in the Student Bible Classes, while the secretary in charge was in correspondence with 1,808 Bible class leaders. Student Conferences for the training of leaders are held at Northfield, Mass.; Lake Geneva, Wis.; Asheville, N. C.; Pacific Grove, Cal.; Gearhart, Oregon. One of the great goals of the work is seen in the conversion of over 3,000 young men in the year. Ten student secretaries are employed by the International Committee, some in office and
superintendence work and others in visiting colleges, etc.

The Army and Navy Department received a special impulse during the war with Spain and has been developed steadily. It has received the most hearty support of officials, and the membership of enlisted men has increased rapidly. A Soldiers' Bible and Prayer League and a Temperance Union have added over 1,000 names in a single year. There are 150 traveling libraries in constant circulation, and 75 tons of stationery, reading matter, games, etc., were shipped from the base book fund to the different posts.

There are 31 buildings in the U. S., 14 in Cuba, 1 in Porto Rico, 4 in the Philippines, 1 in China, and 4 in Alaska. Bible classes, religious meetings, and entertainments are held at 269 different points.

In the Naval Department branches are open in Brooklyn, N. Y.; Norfolk, Va.; Newport, R. I.; San Juan, Porto Rico, and at Manila, Cavite, and Olongapo, in the Philippines. Over 1,000 sailors and marines are members. A striking feature is the savings department, which in six months handled nearly $150,000 for the men. Over 1,600 men joined the Naval Temperance League during the year (1903).

The Colored Department: Of the 103 Associations in this department 69 are in educational institutions and 34 in cities, with a membership of over 7,000. Two Conferences at Danville, Va., and Montgomery, Ala., were well attended. Seventeen secretaries give their entire time, 2 in New York and 15 in the Associations.

Boys' Department: The growth in this department has been greatly great. The 576 Associations report 45,000 members, or if those holding senior tickets were included, 80,000. There are over 100 boys' work specialists, 1,500 rooms used, 120,000 in attendance on Bible classes, while between 3,000 and 4,000 are admitted to the evening classes.

The Indian Department: This reports 47 Associations, with a membership of over 2,000, in Manitoba, Ind. Ter., Kansas, Nebraska, North Dakota, Oklahoma, Oregon, Pennsylvania, and South Dakota.

Religious Work Department: In this the special effort has been to secure quality rather than quantity, yet 8,016 volunteer workers have been registered in the year, while 31,300 have attended the 1,711 Bible classes, and the total attendance at religious meetings of all kinds was 3,230,000. In 1903, 18,015 conversions were reported.

The Educational Department: In the different schools, clubs and lectures, 30,600 students were enrolled, while 1,200 more men reached the Physical Department. This, too, has had great success. 654 Associations reporting attention to it, 93,983 men making use of the gymnastic and athletic features. There are 845 gymnasiums, while 464 Associations report out-door games and sports.

Foreign Department: This organization represents the foreign missionary interests of the American Associations. It arose as a result of investigations begun by Mr. Luther D. Wishard, who, in 1889, began a three years' tour of mission lands with the purpose of studying the conditions of young manhood in non-Christian countries. As a result of that tour and of the subsequent study and experience of Mr. John R. Mott and others, work has been established in India, Japan, China and Hong-kong, Ceylon, Brazil, Argentina, Mexico, and Korea. A total of 31 secretaries, most of them with families, are laboring in the countries named. These men have organized or aided in the organization of some 300 Associations in those fields, about one-fourth of which are what are known as Student Associations in institutions of higher learning. They have a total membership of 14,000, of whom 3,600 are active. Eight periodicals are published in their interest abroad, and they have 14 buildings, valued at $400,000.

The reasons which have led to the inauguration and prosecution of this enterprise are as follows: (1) In non-Christian lands, where moral ideals are largely wanting and where temptations are omnipresent, there is no class which so much needs the oversight and religious incentives of Christianity as the young men. (2) In some of these countries, notably Japan and India, young manhood holds a strategic relation to the progress of their countries. (3) Most of these young men are in some way alienated and the process of education has alienated them from the superstitions of their fathers, thus leaving them a prey to the skepticism of the West and to the materialism of a semi-foreign environment. (4) The achievements of the Associations in Christian countries have led missionaries in all the lands where the foreign Associations are doing their work to strongly appeal to the initiation of the enterprise. They have done so because they believe that an Association fosters Christian unity, deals with a difficult class in a most effective way, and trains them for Christian discipleship, as no other agency is able to do. (5) The achievements of the Association, not reducible to any large statistical exhibit, have more than justified the anticipations of the missionaries who have urged the foundation of these usylums for the tempted, and training schools for an active evangelical propaganda. The branches of the World's Student Christian Federation established in India, China, and Japan are in their existence and effectiveness due to the foreign Associations. Those in China, India, and Japan are associated as national organizations, under committees consisting of prominent missionaries and Christian workers long resident in those lands.

The following is a general summary of Y. M. C. A. organizations in all lands:

**Americ:** United States and Canada, 1,736; Mexico, 1; West Indies, 3; Bermuda, 2; Argentina, 1; Brazil, 7; Chile, 1; Guiana (Dutch), 2; Uruguay, 6; Europe: Austria, 87; Belgium, 34; Bulgaria, 3; Denmark, 270; England, Ireland and Wales, 935 (including some church Associations); Finland, 28; France, 103; Germany, 1,784 (including 540 Associated Unions); Greece, 1; Hungary, 34; Iceland, 5; Denmark, 1; Netherlands, 314; Norway, 30; Portugal, 10; Romania, 1; Russia, 11; Scotland, 243; Spain, 5; Sweden, 125; Switzerland, 470; Turkey (European), 6.

Asia: Asia Minor, Syria and Palestine, 13; Ceylon, 14; China, 43; Dutch Archipelago, 1; India, 151; Japan, 54; Persia, 2; Tonkin, 2.

Africa: Madagascar, 1; North, West and Central Africa, 11; South Africa, 8.
OCEANIA: Australia and Tasmania, 15; New Zealand, 3.

YOUNG PEOPLE'S SOCIETY OF CHRISTIAN ENDEAVOR in Mission Fields: Immediately upon the founding of the Christian Endeavor society by Rev. Francis E. Clark, February 2, 1881, the missionary cause was placed in the forefront of its interests. Missionary committees were appointed, reports at missionary meetings were held and books were written for the use of the committees planning for missionary meetings. Many societies established missionary libraries and organized mission study classes. The missionary giving of the Endeavor member has been found most helpful.

The strongest missionary influence that has come to Christian Endeavor societies, however, is a result of their wide spread among all nations and races. Endeavor conventions are cosmopolitan, and Endeavorers have become familiar with the thought that all men are their brothers through the knowledge, brought to them by the methods, that the society, in its prayer-meeting subjects, its committees, its pledge, its constitution, is beloved by Japs and Germans, Hindus and Hottentots, Brazilians and Norwegians, New Zealanders, Chinese, Armenians and Copts. In many ways this world-wide bond of Christian Endeavor has proved itself a very real tie, and the power it may exercise in coming years is illustrated by the following brief survey of Christian Endeavor work around the globe.

In the United States there are now 44,360 societies, and hundreds of these consist wholly of foreigners, including German, Chinese, Indian, Japanese, Greek, Swedish, Bohemian, French, Italian, Armenian. Societies are found in many parts of Alaska, even at Point Barrow, in the northernmost society in the world, and some of them have served for months, before the arrival of missionaries, as the only religious centers for Indians and white miners in wide regions. In Canada there are 4,017 societies, and here also many of the societies are formed of Endeavorers from other lands, especially in the West, from China and Japan.

Mexico has 111 societies, banded together in a strong national union, and possessing a Spanish Christian Endeavor organ, El Esforzador Mexicano. The Mexicans are very earnest in the work; two of them, for instance, once walked more than 200 miles to attend an Endeavor convention. They are evangelistic in their best efforts. A publication of a Mexican Endeavor convention thirty Catholics were converted.

Many islands of the West Indies have received the Christian Endeavor movement. Porto Rico, where the society was introduced by an American soldier, now has societies at the Bermudas 7, Trinidad 10, the Barbados and Grenada 2 each, Cuba 11. An American soldier founded the first society in Cuba, leading, with two Cubans, the first meeting, which lasted two hours and three-quarters. In Jamaica the society was started under the influence of a copy of The Christian Endeavor World sent by a Boston lady to a sick sailor in a Jamaica hospital, and now there are 236 societies in the island, organized in flourishing unions, and conducting their own paper, The Christian Endeavor Gem.

Guatemala formed in 1896 the first Christian Endeavor society in Central America—the "Lone Star" society. There are now two others in the country, and Costa Rica has 10. One Spanish society in Guatemala City, with only thirty-five members, prints tracts on its own press, has circulated many, and has sent into the home mission field seven of its own number.

Half of the 43 societies in South America are in Brazil, where there is a National Christian Endeavor Union, which is rapidly growing, and in Colombia, with 8,000 members. The Society has made its headquarters in the Bermuda Islands. The meetings are conducted in Portuguese, and the native name for the society, translated, is "the Society of Christian Effort." One Brazilian society meets in an old Catholic Inquisition hall, and one of its first fruits has entered the Protestant ministry. Christian Endeavor meetings often take an evangelistic turn, and these gatherings are often held in the open air where many Catholics can be reached with the Gospel. Elsewhere in South America the society is flourishing; in Chile, where a Christian Endeavor paper is published and where the Spanish Protestants have enjoyed the society for many years, tho at first they had much difficulty in finding any one who would rent them a room for their meetings, there are 6 societies, 11 in British Guiana, and 5 in Colombia.

In Hawaii was organized the first Christian Endeavor society formed outside of the United States, the date being 1884. Now there are 28 societies, organized in a union which holds vigorous conventions and reaches out among the Chinese, Japanese, Hawaiians, English, and Americans on the Island.

In all parts of the Pacific the society has found a home. There are some 12 societies in the Loyalty Islands, where the organization was introduced in order to safeguard the results of a revival. There are in the Marshall Islands 21 societies, with 3,000 Endeavorers, who take the name "Imitators of Christ." There is a notable society in the New Hebrides, established by Dr. Paton's son. New Zealand has a strong Christian Endeavor union, which in three years sent out from their number 16 ministers and 30 foreign missionaries. The Gilbert Islands have...
4 societies, the Tokelau 2, the Caroline 3, the Ellice Islands 6, Samoa 19. The pioneer society in Samoa numbered 450, having estab-
lished sixteen others. It has 250 corresponding members, and has sent out from its own number more than 100 missionaries, more than half of
them to the deadly climate of New Guinea. Since the United States has gained possession of the Philippines, Christian Endeavor has been intro-
duced, and already there are 6 societies on the islands. One society has 130 corresponding members among the soldiers. The first native
society had 12 members at the start, and they all took part at the very first meeting. Chris-
tian Endeavor has also made a beginning in Guam, where the society consists wholly of
converted Catholics.

Australia possesses 3,960 Christian Endeavor societies, and has a very active union which sup-
ports two papers, The Golden Link and The Roll Call. Its conventions are among the most important
religious gatherings held in the southern hemi-
sphere. The Australian Endeavorers are greatly interested in missions. Large numbers of the
young people have become missionaries, and
their money and time are spent with special liber-
ty for the help of the hungry.

The first Christian Endeavor society was formed in Japan in 1891, in the Girls' School
at Okayama. Two years later the National Christian Endeavor Union was formed, which
now numbers 115 societies, and supports a national magazine and a paid secretary, who
gives his whole time to the organizing of societies.
The president of the Japanese Union, Rev.
Tasuké Harada, renounced his hereditary privileges as a samurai and became a commoner,
the better to preach Christ. Japan has a number of especially interesting societies, such as
those in the navy, that among the employes
of the Sendai post-office, those in the Okayama
Orphan Asylum. At Nagasaki is an admirable
institution, the Christian Endeavor Seaman's
Home—a Christian place of entertainment
for sailors whose ships touch at that port. The
Christian Endeavor marines on board the
U. S. S. Charleston established the home, and
now it has become self-sustaining.

In Korea the first Christian Endeavor society
was formed in 1900, and now there are twelve
of them. The Union to Korea, on account of the
earnestness of the native Christians, has less need of the society than many mission lands,
for, as Dr. Underwood declares, "Every church
in Korea is a church of Christian Endeavor." After Hawaii, the first country to take
up Christian Endeavor outside of the United States
was China, where the first society was formed in
1885, in Fu-chau. It was called the "Drum-
around-and-rouse-up Society." Now there are
in China 188 societies, organized in a national
union which holds conventions that have
brought together as many as 1,000 native
Christian Endeavorers. There are also local
unions, such as that of Canton. Just before
the Boxer massacres the North China Union
was formed, and during that terrible time it
lost half of its members. In one society 63 out of
64 members were killed. Such deeds of heroism are recorded of these brave Endeavor-
ers. The World's Christian Endeavor Union
supports a traveling Christian Endeavor sec-

In southern Siam we know of only two societies, but among the Laos there are 29. These
Laos Endeavorers hold rousing conventions, and publish a paper in the native language.
"Pumma" has 16 societies. It belongs to the
India Christian Endeavor Union—a vigorous body with 600 societies. There are sectional
unions, such as those for South India and the
Punjab. Large and enthusiastic conventions
are held, and The India Endeavourer is published. An organizing secretary is supported
by the aid of the World's Christian Endeavor Union,

and he gives all his time to the work, greatly
aiding the missionaries of all the denominations.
In India, as everywhere else, the missionaries
find the Christian Endeavor society an invaluable auxiliary to their work. Assembling the
natives, as it furnishes precisely the training school
needed for undeveloped Christians. Indeed,
some of the missionaries in India have formed
Endeavor societies (we cannot call them Christian
Endeavor societies) among those that are still
unbelievers in Christianity, but are being led
by their Endeavor work into close acquaintance
with our religion. Ceylon has many zealous
Endeavorers. Christian Endeavor literature has
been translated into all the great languages of
India. Missionary work is done by the native Endeavorers—traveling with the magic lantern,
personal work on the railroad trains, going from coach to coach, outdoor services for beggars, and similar
endeavors.

Persia has 35 societies, most of them springing
from a single earnest society in a boarding-
school, whose members carried the Christian
Endeavor seed as they returned home. In
1902 a national union was formed, which held
its first convention three days long. In one
Hamadan society 700, among the Jews, foreign
missionaries and Jewish converts are mingled. One Tehran society uses in its
meetings English, Persian, Armenian, and
Hebrew. During a terrible plague of cholera
in 1893, when the Jewish and Muslim doctors
failed and 20,000 died in the city, the members
of this society bravely aided the homeless
missionaries in their hospital work, serving as
nurses.

Turkey has 75 societies, in spite of Turkish
oppression, which will not allow constitutions
or other documents to be signed, badges to be worn, or even the use of
the word "society" to be used. The Constantinople
Society was obliged at one time to burn its
records. The members are all Armenians,
and they suffered terribly during the Armenian
massacres. The young men and young women
meet in separate societies, as everywhere through-
out the Orient. Some of the most active
societies are in Macedonia. In addition to
these 75 societies, there are 16 in Syria. Jeru-
salem itself has an active Christian Endeavor
society.

Of Africa's 141 societies, Egypt has only 5,
but they are decidedly cosmopolitan. One of
them has among its members Italians, Syrians,
Armenians, Copts, Hindus, Germans, English,
and Americans. There are some societies on
the west coast of Africa, especially a vigorous
one in Yorubaland, which started out with five
members and now numbers 200. Most of the
African societies are in the south, where there
is a strong South African union, publishing a
paper, The South African Endeavourer. Andrew
Murray is active in the work there. There are
many Zulu societies, especially in Cape Colony
and Natal. The Boers have entered heartily into Christian Endeavor for a time. During the Boer war there were 8 societies in the Boer prison camp on St. Helena, with 800 members; 700 Endeavorers in 8 societies in the Ceylon camp, 600 in the Bermudas, and others in the Portugal camp. After their return from prison, 200 Boer Endeavorers took up active service as missionaries.

In 1892, 30 Christian Endeavor societies were reported to Christian Endeavor headquarters from Madagascar, the previous to that time it was not known in America that a single society existed. When last heard from, the Madagascar societies numbered 93. Christian Endeavor has also got a start in the Island of Mauritius.

Passing to Europe, we find Christian Endeavor, at least in its initial stages, in all European countries, while in some of them it is it very flourishing. Switzerland possesses only 3 societies, for the movement is a new one there. The pioneer society is in Lisbon, the capital. One of its endeavors was the opening of a mission in the slums. In Spain the first society was founded in 1888 in the American Mission in Seville, conducted by Rev. and Mrs. W. H. Gulick, and as the girls returned home, new societies were started in many places, until now Spain has 47 societies, and more Mothers' Christian Endeavor Societies than any other country. The Spanish Christian Endeavor paper, Esfuerzo Cristiano, is published in Madrid. It has been assailed by much Catholic persecution. The first Spanish national convention was held in 1900 in Madrid in spite of persecution. There were 200 delegates.

Switzerland has 12 societies, chiefly in the western or French-speaking cantons. These Endeavorers publish an attractive Christian Endeavor paper, L'Activité Chrétienne. Geneva has a Christian Endeavor union.

The beginning of Christian Endeavor interest in Germany was in 1894. The first societies were refused the churches as meeting places, and compelled to meet in barns and inns. Now there are 252 societies, largely in the national, or Lutheran, churches. There is a national union, which supports two secretaries, each German Endeavorer contributing half a mark (12 cents) a year. There are 6 provincial unions, and admirable conventions are held. There is an able Christian Endeavor organ, Die Jugend-Hilfe. The United Society of Christian Endeavorers helped the work by annual grants of money for years, but now the German Endeavorers are independent and contribute to the work in newer countries. They are also supporting German missionary work in the Caroline Islands. The German name for the Christian Endeavorer Society, translated, is "The Society for Decided Christianity." There are seven Italian societies, with a regular Christian Endeavor department in a leading paper, L'Italia Evangélica. There are societies in Rome, Florence, and other famous cities. Bulgaria, with its five societies, has already formed a union. The same step has been taken by Hungary's three societies. In Austria there are six societies, and in Bohemia and Moravia, Sweden has 70 societies, one of them fifty-five miles within the Arctic Circle, with an evening, often a year, fourteen days long in which to hold a meeting. Norway has 5 societies, Denmark 4 and Belgium and Holland each have 3. Russia also has 3 societies, and the Red Cross society formed by a young Scotch drygoods clerk in St. Petersburg who went home on a visit, and on his return brought Christian Endeavor with him. Finland has 7 societies. When Dr. Clark visited that land, expecting to find it virgin soil, to his amazement, he learned that 4 societies already existed there.

In Great Britain the first society was formed in August, 1887, being inspired by the account of a young Englishman who had visited Dr. Clark's society in Portland. Now Great Britain has a national union next in strength to that of the United States, and numbering 9,716 societies. Branch unions with vigorous conventions are found in Ireland, Scotland and Wales. Three able Christian Endeavor papers are published—the national organ, The Christian Endeavourer, and The Irish Endeavourer (printed patriotically on green paper), and The Church of England Endeavourer, which represents the rapidly growing societies of the Anglican Church. The largest city Christian Endeavor union in the world is that of London, with its more than 700 societies. Philadelphia comes next, with 625 societies.

In the majority of the lands thus passed in review, Christian Endeavor is young, the society having been established only four or five years. Everywhere, however, it is full of energy and enthusiasm, and it is certain that this great international brotherhood, laboring together "for Christ and the Church," will prove year after year a constantly growing power for the upbuilding of Christ's Kingdom.

YO-YANG: A town in Shan-si, China, situated 35 miles N. E. of Ping-yang-fu. Station of the CIM (1890), with (1903) 2 missionaries, 4 native workers, 1 outstation, 2 places of worship and 51 professed Christians. Some write the name Yoh-yang.

YUEN-CHAU-FU: A town in Hu-nan, China, situated in the E. part of the province on the Yuen River about 30 miles S. W. of Chen-chaufu. Station of the CMS (1903), with 1 missionary and 1 place of worship. Some write the name Yuen-choo.

YUEN-KONG. See YANG-KIANG-HSIEN.

YUH-SHAN. See YU-SHAN-HSIEN.

YUIN-CH'ENG. See Y'UN-CHENG.

YULU: A settlement in Nicaragua, Central America, situated in the N. part of Mosquito Reserve about 30 miles from the E. coast. Station of the Moravian Missionary Society (1884), with (1903) 1 missionary and his wife, 11 native workers, 1 outstation, 1 place of worship, 1 primary school and 50 professed Christians.

YUIN-CHENG: A town in Shan-si, China, situated in the S. W. part of the province about 15 miles N. E. of Kiao-chauf. Station of the CIM (1888), with (1903) 3 missionaries, two of them with their wives; 3 native workers, 1 place of worship, 1 Sunday school and 40 professed Christians. Some write the name Yuin-ch'eng.
YUN-HO-HSien: A town in Che-kiang, China, situated in the S. part of the province about 70 miles W. of Wen-chau-fu. Station of the CIM (1895), with 4 women missionaries, 3 native workers, 1 place of worship, 1 Sunday school and 6 professed Christians. Some write the name Un-ho.

YUNG-CHING. See Yung-ts'ing-hsien.

YUNG-Chun-Chau: A town in Fo-kien, China, about 80 miles S. W. of Fu-chau-fu. Station of the FCE (1894), with (1903) 2 missionaries, one of them with his wife; 3 women missionaries, 16 native workers, 12 outstations, 2 dispensaries, 1 hospital and 1 boarding school. Some write the name Engchun.

Yung-Hsien-Hsien: A town in Kiang-si, China, situated on a branch of Kan River, 45 miles W. by S. of Ki-ngan-fu. Station of the CIM (1899), with (1903) 3 women missionaries and 1 place of worship. Some write the name Yung-sin.

Yung-Kang-Hsien: A town in Che-kiang, China, situated about 25 miles S. E. of Kinhwa-fu. Station of the CIM (1882), with (1903) 1 missionary and his wife, 3 native workers, 1 place of worship and 40 professed Christians. Some write the name Yung-k'ang.

Yung-Sin. See Yung-hsien-hsien.

Zacatecas: A town in Mexico, capital of the state of the same name. The place is not attractive in its appearance, owing to its wild, arid surroundings, and the streets are uneven and badly paved. Population (1900), 32,856, pure-blood Indians, mixed Indians and Spaniards. Station of the PN (1873), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 4 Sunday schools, 1 day school, 5 outstations and 984 professed Christians. Also station of the SBC, with (1900) 5 native workers, 3 places of worship, 1 day school and 193 professed Christians.

Zafarwal: A town in Punjab, India, situated about 20 miles S. E. of Sialkot. Station of the UP (1866), with (1903) 1 missionary and his wife, 2 women missionaries, 29 Sunday schools, 9 day schools, 8 outstations and 1 boarding school.

Zagazig: A town in lower Egypt, situated 50 miles E. of the Suez Canal at Ismailieh. Population (1897) 35,715. Station of the UP (1894), with (1903) 1 missionary and his wife and 1 woman missionary. Some write the name Zakazik.

Zahle: A town in Syria and mission station of the PN (1872), with (1903) 2 missionaries and their wives, 2 women missionaries. Church statistics included under Mt. Lebanon. Also station of the British Syrian Schools, with (1901) 2 women missionaries, 8 native workers, 8 outstations, 1 place of worship and 5 Sunday schools.

Zakazik. See Zagazig.

Yung-Tsing-Hsien: A town in Chi-li, China, on the Hun River, about 40 miles N. W. of Tien-tsin. Station of the SPG (1880), with 2 missionaries and 2 native workers. Some write the name Yung-ching.

Yung-Nan-Fu: A town in Yün-nan, China, capital of the province, situated about 650 miles W. by N. of Canton. Station of the Bible Christian Missionary Society (1855), with (1903) 2 missionaries and their wives, 2 native workers, 1 dispensary and 2 professed Christians. Also station of the CIM (1882), with 8 missionaries, three of them with their wives; 2 places of worship and 3 professed Christians.

Yung-Shan-Hsien: A town in Kiang-si, China, situated in the E. part of the province near the border of Che-kiang, and about 40 miles S. W. of Ku-chau-fu. Station of the CIM (1877), with (1903) 7 women missionaries, 10 native workers, 2 outstations, 3 places of worship, 1 boarding school and 101 professed Christians. Some write the name Yuh-shan.

Yung-Wu-Hsien: A town in Shan-si, China, situated about 65 miles E. N. E. of Ping-yang-fu. Station of the CIM (1890), with (1903) 2 missionaries, one of them with his wife; 2 native workers, 1 place of worship, 1 Sunday school and 71 professed Christians. Some write the name Ue-wu.

Zanzibar: A town on Zanzibar Island, E. coast of Africa. Station of the Universities Mission (1864), with (1903) 7 missionaries, 14 women missionaries, 1 outstation, 2 places of worship, 1 printing house, 2 day schools, 2 dispensaries and 256 professed Christians. Some use for this place the name Mkuana-zini, which is a suburb where missionaries reside.

Zanzibar Protectorate: A British protectorate comprising the island of Zanzibar off the east coast of Africa in the Indian Ocean and about 30 miles from the mainland, having an area of 640 square miles and a population of 150,000, and the island of Pemba, a little further from the coast and to the north of Zanzibar, having an area of 380 square miles and a population of 50,000. The ruler of the islands under British protection is the Sultan Ali bin Hamoud bin Mohammed. The authority of the Sultans formerly extended to the coast of the mainland and indefinitely into the interior, but leases and arrangements with Germany and Great Britain have resulted in the transfer of sovereignty of all the mainland to those powers, and they are now included in German East Africa and British East Africa. The religion of the country is Mohammedan, the natives being mostly Suans of the Shafi sect, the many are still pagans. The town of Zanzibar is a station of the Universities Mission, which also has some work on Pemba. The BFBS and the Anti-Slavery committee of the Friends also have missionary enterprises on the islands.
ZAGEGA: A town in Eritrea, N. E. Africa, situated about 95 miles W. of Massaua. The people are Aigre-speaking Abyssinians. Station of the Swedish Evangelical National Society (1891), with (1900) 1 missionary, 2 native workers, 1 outstation, 1 place of worship, 2 day schools and 58 professed Christians.

ZEHNDER, J. L.: Died at Lundu, Borneo, February 10, 1898. Missionary of the SPG for nearly thirty-three years. In the report of the SPG he is spoken of as an accomplished linguist, critic and conversing in many European and Oriental languages. In translation work his services were specially valuable. At Lundu, where several races meet after the services on Sunday, the people who had come from a distance would congregate in the veranda of the mission-house for refreshment and conversation; and an eye-witness declares it was a sight to be remembered to see the old missionary going from group to group—Sebyuays, Selakaus, Laras, Chinese and Malay—with words of cheer and inspiration for each in his own tongue. Thus weakened in his own mother tongue," his influence was wide-spread, and the impressions left by the spoken and written word were deep and lasting.

ZEISBERGER, David: Born at Zauchenthal, Moravia, April 11, 1721; died November 17, 1808. His progenitors belonged to the ancient Church of the Bohemian Brethren, founded sixty years before Christianity, by the followers of John Huss. When David was five years old, his parents fled to Herrnhut, in Saxony, a colony of Moravian emigrants. In 1736 his parents joined the colony in Georgia, which James Oglethorpe had established three years before, leaving their son at Herrnhut to be educated by the Moravians. From thence he went to Holland and lived in a Moravian settlement called Herrendyk, joining his parents in America in 1738. In 1740 he went North, and with others founded Bethlehem and Nazareth in Pennsylvania. In 1745 he began his work among the Indians, and was soon arrested as a spy of the French by the colonial government of New York, and was imprisoned for seven weeks. Released by Governor Clinton, he labored till 1750 among the Delaware at Shamokin (Sunbury, Pa.) and the Iroquois at Onondaga, where the Six Nations made him a saviour, and "keeper of their archives." In 1750 he visited Europe in behalf of the mission. In 1752 he returned to Onondaga, but was compelled to retire to Bethlehem at the opening of the French and Indian war. Between 1755 and 1762 he visited North Carolina and the New England Provinces, labored among the Indians of Canada, and acted as interpreter for Pennsylvania in the treaty with the Iroquois and his allies. In the time of the Pontiac conspiracy he ministered to the Christian Indians who had found refuge in Philadelphia, and at the close of the war he led the survivors of the converts to Wyalusing, Bradford County, Pa., on the Susquehanna. In 1767 he established a mission among the Monsey Delawares on the Allegheny River, Venango County, Pa., and the Iroquois at Onondaga, where he called Friedenstadt, on Seneca Reservation, in what is now Lawrence County. In 1772 he went to Central Ohio, and commenced a town called Schoenbrunn, on the Tuscarawas, ten miles from the site of Canal Dover, where he was soon joined by all the Moravians converting from Pennsylvania. He built two more towns, other denominational converts among whom were added. Early in the Revolution the Delawares were accused of favoring the American side, and the converts were forced to leave their towns and come within the British lines. In 1781 the settlements were destroyed by a band of Wyandotte warriors at the instigation of the commandant of the British post at Detroit; the missionaries were tried as spies, and the Christian Indians removed to Sandusky. The next year ninety-six of them returned from Sandusky to the Tuscarawas to gather their corn, and were massacred at Gnadenhütten by a party of colonial militia. Disheartened by this catastrophe, Zeisberger in 1782 led a small remnant to what is now Michigan, and built an Indian town on the Clinton River. In 1786 he went back to Ohio, and founded New Salem, one mile from Lake Erie. Thence the hospitality of other Indians, after four years' rest, compelled them to emigrate to Canada, where they founded Fairfield. In 1798 he returned to the Tuscarawas valley, where Congress had granted to his Indians their former lands, and built a town, called Goshen, where he lived ten years, to the close of his life. He was a missionary among the American Indians for sixty years. He established thirteen Christian towns, and the scarcely one remained, yet he had many converts, and his character, motives, and efforts are "an honor to the Moravian Church, and to our common humanity." Zeisberger was a thorough scholar. He mastered several native tongues, especially the Delaware and Onondaga. He left in manuscript a German and Onondaga lexicon in seven volumes quarto, a grammar of the Onondaga language in German and English, a Delaware grammar and dictionary, and several vocabularies. All of these are deposited in the Library of Harvard College, and in the Library of the American Philosophical Society in Philadelphia. His Diary, translated by Eugene H. Bliss, was published in two octavo volumes in 1885.

ZENANA BIBLE AND MEDICAL MISSION, or Indian Female Normal School and Instruction Society: Headquarters: 2 Adelphi Terrace, London, W. C., England. This society was first organized as a general missionary society, with the special purpose of cooperating with other societies, particularly the CMS, BFBS, and others. Later there was a distinction made between Zenana and educational work, and the scope of the society was enlarged and its present organization was effected. Its special object is to help the women of India by sending female missionaries to relieve sickness, promote education, establish hospitals, schools and such other institutions as may be needed. The Executive Committee of not more than 24 nor less than 18 members, is self-perpetuating. While more closely connected with the Church of England, it cooperates with any orthodox Protestant Missionary Societies; holding that the work which it does need not be denominational. Its work is in India, and it supports the Bombay and Madras Presidencies, the United Provinces, and the Punjab. According to the report (1903) there were 104 European and 53 assistant missionaries, 275 native workers, 64
schools with 3,208 pupils and 226 under training in Normal Schools. The hospital shows 1,892 in-patients and 21,083 out-patients in hospitals and dispensaries, with a total of 72,921 attendances at dispensaries. In the Zenana work 4,375 houses were visited and 2,728 pupils were instructed.

ZENANA MISSIONARY SOCIETY (Church of England). See CHURCH OF ENGLAND.

ZIEGENBALG, Bartholomew: Born June 24, 1683, in Pulsnitz, Saxony. Died at Tranquebar, India, in 1719. King Frederick IV. of Denmark, aroused to his duty to give the Gospel to those under his sway in India by his chaplain, Dr. Lütken, directed him to seek men suitable for the work. Ziegenbalg and Plutschau, then students at Halle, young men of talent, learning, and Christian zeal, were appointed, and embarked at Copenhagen in 1705. After a long and dangerous voyage they arrived, July, 1706, at Tranquebar, a Danish port, in the Danish dominion of Hindustan. After several day's delay the governor received them with great harshness. Ziegenbalg obtained a room near the heathen and Portuguese quarters, and began his work not only among hostile heathen, but with a government openly opposed to the work. The European population absorbed in business, addicted to vice, and determined at all hazards to be rid of these earnest men. Ziegenbalg, having no grammar or dictionary to help him in learning the language, persuaded a native schoolmaster to bring his school to the mission room, and, sitting down with the children, he imitated them in making the letters in the sand till he had become familiar with their form. He then found a Brahman who knew a little English, and with his help was able in eight months to speak fluently intelligibly. The teacher, however, was loaded with iron the rajah and thrown into prison. Some of the Europeans owning slaves, Ziegenbalg obtained their consent that these poor outcasts might meet for two hours daily for instruction. In less than a year five slaves were baptised. A native built a church at his own expense, and at the dedication Ziegenbalg preached in Tamil and Portuguese to a large congregation of Christians, Hindus, and Mohammedans. In the second year he made extensive preaching tours. In 1708 he visited Negapatam, and the Dutch magistrate invited the most learned Brahman to a friendly conference with the missionary on religious subjects. The discussion lasted five days, and much information concerning the origin, history, and doctrines of Christianity was diffused among the native population.

Ziegenbalg had so far mastered the language that in two years after his arrival he began Scripture translation, and a year later could speak Tamil with as much facility as his native German. He soon began the preparation of a grammar and two lexicons—one of prose, the other of poetical words. In 1711 he finished the translation of the New Testament into Tamil—the first into any language of India—and a large part of the Old Testament. Not only to Hindus, but to the half-breed Portuguese and to the slaves of Tranquebar he preached the Gospel. He had also a German service weekly, which was largely attended.

In 1714 his translation of the New Testament, the Danish Liturgy, and German hymns, with thirty-three Tamil works, including a dictionary he had prepared, were printed. His health failing, he returned to his native land in 1714. His account of his missionary work created great interest in Germany and England, vast crowds being moved by his glowing appeals, and kings, princes, and prelates giving liberally to the cause. He returned to India in 1719, but died soon after, at the beginning of this year. During the brief period of thirteen years as the pioneer of modern missions in India accomplished a remarkable work. Three hundred and fifty converts and a large body of catechumens mourned his death.

ZINZENDORF, Count Nicolaus Ludwig: Born in Dreesen, May 29, 1720. Died May 9, 1760. While a schoolboy at Halle he heard of the mission established in the East Indies by the King of Denmark, and occasionally he met missionaries returning from the field. His young heart was fired by the missionary spirit, and, moved by the desire of aiding the work of the world's evangelization, he founded the famous "Order of the Grain of Mustard Seed," composed originally of five lads, who pledged themselves to "give the Gospel to all, Jews and heathen alike." In 1715 he joined with his friend, the Baron Frederick von Watteville, in a covenant to introduce the Gospel of salvation especially among those heathen to whom no one else would go. Hoping that he would fit himself for a diplomatic career, his relatives matriculated him as a student of law at the University of Wittenberg; and there, amid world-minded associates, he made a deep religious impression. His passion for souls became more intense as he grew toward manhood; and despite the efforts made by his family to "take the nonsense out of him," he never swerved from his noble purpose. While on his travels he visited the gallery at Dusseldorf, and as he looked upon the Ecce Homo of Sternberg, under which was the inscription:

"Hoc feci pro te;
Quid facis pro me?"

he renewed his consecration vows and determined, without reserve, to dedicate himself to the service of his Lord. On September 7, 1722, he thus wrote in his diary: "On the first day of July, Zinzendorf and I, with five others, went to Dorothea, and on their wedding day they covenanted to put aside all favors of rank, to win souls, and to hold themselves in readiness to go, without delay, wherever the Lord might call them. Soon after he attained his majority, he waived his rights to large estates rather than go to law, and modestly settled at Bertheledorf, near Gross-Hennersdorf, hoping to make it a model Christian village. In 1723, with Rothe, Schaefer and Frederick von Watteville, he formed the "League of the Four Brethren," which had as its object the promulgation of the Gospel among all peoples, and soon new channels of service were opened before him. The Moravian Church, founded in 1457 by the proscribed followers of John Huss, seemed nearly extinct at the close of the 17th century, but there remained, scattered through Bohemia and Moravia, little communities of secret disciples known as the "hidden seed." When Zinzendorf and Watteville made their memorable covenant (1715), these heroic Christians were entering upon new life, under the quickening
influence of the Holy Spirit; and soon afterward the great Protestant awakening occurred, followed by bitter persecutions. Driven from Moravia and led by Christian David, these refugees found an asylum in Berthelsdorf. Soon after Zinzendorf settled in his estate, he came in sympathetic touch with the fervor of the faith; and under his guidance they adopted certain rules and regulations for their government. Zinzendorf was now impressed that he was called of God to become the leader of this people; and he formed bands and societies, from among them, for the spread of spiritual truth. As the communion grew in spiritual power, unmistakable signs of divine approval were placed upon it; and on August 13, 1727 (regarded as the spiritual birthday of the renewed Moravian Church), while the people were assembled to partake of the Communion, the Holy Spirit manifested Himself in a wonderful way, and the power of the revival that followed this awakening is felt until now. Zinzendorf now gave his life entirely to the one work of the development and organization of this Church, which he formed in a fitting place under God for its world-wide mission. To quote another: "Under his guidance a firm and stable form of government was established in Herrnhut. Men of loose views and worldly tastes were weeded out, and none but true-hearted Christians allowed to remain. The women gave up their brilliant Bohemian dress and adopted a simple costume, consisting of a plain dress and cap tied with ribbons, the color of which indicated their position in life—widows wearing white, wives blue and maidens red. And order of worship, with many beautiful customs, including the far-famed Easter service, was introduced, and the constant use of sacred song became one of their marked characteristics. Under the new regime, life at Herrnhut became grave and serious, yet happy and prosperous, combining joyous religious experience with the faithful performance of daily tasks." Before Zinzendorf and the brethren God was unfolding plans for the evangelization of peoples in distant lands. In 1731, while Zinzendorf was attending the coronation of Christian VI. at Copenhagen, he met two Eskimos who had been converted through the influence of Hans Egede, and he learned that Egede was about to abandon his mission. During the same visit, the attendant of Zinzendorf became acquainted with Anthony, a negro servant of Count Daniel von der alpha, who told them of the slaves in the West Indies, who had no one to tell them of the true God. Count Zinzendorf's appeal to his people at Herrnhut and the visit of the negro Anthony stirred mightily the congregation, and two young men offered themselves as missionaries to the West Indies, and two others decided to carry the Gospel to Greenland. Thus was begun Moravian Missions; and at the time of their first jubilee in 1782, ten years before Carey preached his epoch-making sermon, they occupied 27 stations and supported a force of missionaries of 65. In the meantime, under the direction of Zinzendorf, the Brethren at home were indefatigable in their work. They visited the countries of Europe, founded new settlements, and began the Diaspora work, the object of which was to awaken the world and prepare the foundation of societies of prayer. Relentless opposition and persecution followed Zinzendorf as his influence arose and his work increased in power, and in 1738, owing to the misrepresentations of his enemies, he was banished from Saxony. In 1739 he visited the mission at St. Thomas, and in 1741, accompanied by his daughter, the Countess Benigna, he visited the English colonies. After nearly a year a labor among the North American Indians and others in the colonies and established the church at Bethlehem, Pa. Before returning home, he did missionary work in England and Holland; and in all of his travels he sought to quicken the spirit of Christian missions in the cause of missions. In 1749 Zinzendorf was entirely vindicated of all charges preferred against him, and the Saxon Government repealed the edict of banishment and requested him to form other communities like Herrnhut in Saxony. The last years of his life were spent peacefully at Berthelsdorf; and his body was borne to the grave by thirty-two missionaries and preachers from Holland, England, Ireland, North America, and Greenland.

ZITACUARO: A town in Mexico, situated 70 miles west of Tepic City, in the Province of Nayarit (1893), with (1901) 1 missionary and his wife, 7 native workers, 5 day schools, 6 Sunday schools and 464 professing Christians.

ZOROSTERIANISM: The form of religion supposed to have been inculcated by Zoroaster (Persian, Zarudoht), long the state religion of Persia, but now professed by a mere handful of followers in two districts in Persia (Kirman and Yezd), and by the Parsees of India, whose name bears witness to their Persian origin. If Zoroaster was a historical character, as seems to have been the case, he probably lived in the east of Iran, in the region known as Bactria, now sometimes called Balkh. His date cannot be ascertained; some Greek writers put him 5,000 years before the siege of Troy! Modern scholars place him, some 1,000 years before Christ, and some 1,500; at the best all is conjecture, but he certainly lived before Cyrus. Monier Williams thinks that he was a nearly contemporary with Confucius. That he was the leader of schism in the old Aryan race seems to be a great probable. As the result of this the religion of one branch of the race developed into Vedism and Hinduism in India, and that of the other, which settled in Persia, into the dualistic system which still bears the name of Zoroaster.

According to this system, the world is the battle-field of two contending spirits, eternal in their origin and possessing the power of creation. The one is Ahuros-mazda (the wise god), who is the source and author of all that is good; the other is Angros-mainuyash (the spirit enemy), who, evil in his nature, ever strives to neutralize the beneficent activities of the first. These two names of Ormuzd corrupted by time have been reduced into the shorter forms now common, Ormuz and Ahriman. But the conflict between these two powers, the now conducted on terms which are apparently perfectly equal, is hopeless, and is not destined to be perpetual. Despair and dual life in this world for the last phase of the struggle. The might of Ahriman to be
broken forever, and the supremacy of the good established; Ahriman with his defeated followers is to be cast into hell, and to remain there, destitute of power to disturb the progress and enjoyment of the good, who are to be rewarded and to prosper, unvexed by evil, as citizens of the good kingdom. 

Under Zoroastrianism recognizes the existence of vast hierarchies of good and evil spirits, doing the will and fulfilling the purposes respectively ofOrmuzd and of Ahriman. To what extent these elaborate systems of angelology and demonology influenced Jewish thought, and through what stages they may have passed, remains still undetermined. The sacred books of Zoroastrianism are spoken of collectively as the Zend-Avesta. The term is not wholly accurate: the proper designation is Avesta, the word Zend signifying "interpretation," with reference to the commentaries on the original books. The Avesta itself is written in an ancient form of Aryan speech, allied to the Sanskrit, known popularly as the Zend, and possessing no other extant literature. The "interpretation" is in Pahlavi, a more modern (though and now died out) language, which prevailed formerly in Persia. The Avesta, as at present known, is but a fragment, and not a large fragment, of the original sacred literature of Zoroastrianism. Like the Old Testament, it is not a book, but a collection of books—a literature developing in and with the life of the people. Parts of it may date back to Zoroaster, but much of it consists of the accretions of later years. A collection of hymns or "Gathas" is the oldest part of it, and may be said to form the kernel of the whole; these alone claim to be the epithetismera ofZoroaster. The remainder consists of liturgical matter, and, what is called by some (borrowing a phrase from Old Testament scholarship), the "priestly code" of Zoroastrianism. The fire, the sun, the fire, are considered by the Zoroastrians the symbols of Ormuzd. Therefore in their temples the sacred fire is continually burning, night and day, year after year. For this reason at evening, when they recite the prayers of the Avesta, the faces of Zoroastrian worshipers are turned westward, toward the setting sun. Hence they are often spoken of as "sun-worshipers" and "fire-worshipers," tho they themselves reject the imputation which is thus involved; they do not pray to the sun or to the fire, they say, but to that good and shining one whose presence and character are symbolized by the light, and the sources of it. The Zoroastrian religion developed and flourished in Persia, through the vicissitudes of declension and revival incident to all religious history, from the time of its origin to the Mohammedan invasion. During that time it saw and survived the political changes and dynastic revolutions to which Persia was subject, but which need not be recounted here. Mohammed died in 632. It was but a few years after his death that Persia was invaded by armies of his followers, who, under the fierce lead of the early caliphs, were just beginning that astonishing career of conquest which within a century carried the crescent over Western Asia, Northern Africa into Spain, across the Pyrenees, and almost to the shores of the British Channel. The Persian army was ignominiously defeated, the king dethroned, and his realms taken possession of in the name of the Prophet. The people embraced the new religion. The fire went out on the Zoroastrian altars, and the Avesta was dropped for the Koran. A hundred merely of the Persians refused to be converted and sought refuge among the mountains. There for a time they were suffered to remain, but soon after the year 700 they were subjected to such a violence of Musulman persecution that many of them were constrained to abandon Persia and look for a refuge beyond the sea. The story of the wanderings and sufferings of this company of Zoroastrians forms a pathetic episode in the religious history of the race. Through all their wanderings and shipwrecks they held their sacred fire unstirred and alive. About the year 720 of the Christian era they landed on the western coast of India near the city of Surat, some 150 miles north of where Bombay now stands, and craved permission from the Hindu princes then ruling in that region to settle among their people and to practise the religion of their fathers. The permission was granted,—so tradition says,—with a few easily observed conditions, among which was this, that they should adopt the dress and language of the country where they were to make their home. These conditions were accepted, and ever since the language of this Indian branch of the race has been the Gujarati, the vernacular of the district where they landed, with such dialectic variations as would naturally arise from the mingling of a tongue by foreigners whose customs and religion differed so greatly from those of the land where the language had developed. The Parsees— as these Persian dwellers in India came in course of time to be called—do not appear prominently in Indian history until many years later. They faithfully maintained the practice of their religion, jealously guarded the sacred fire, and preserved inviolate the purity of their race. When, under English rule, the city of Bombay grew from a cluster of fishermen's huts into a great commercial mart, the Parsees appear as keen-eyed men of business, and founded great commercial houses. There are said to be about 8,500 Zoroastrians still remaining in Persia.

Darmesteter (J.), In Sacred Books of the East, Vols. 4 and 23, as the Zend-Avesta, London, 1873-7; Darmesteter, Ormuzd and Ahriman, Paris, 1877; Murray (J. M.), The Zend Avesta and the Religion of the Parsees, London, 1884.

ZULUS: The Zulus, according to tradition and the testimony of generations that have but lately passed away, came, something more than a century since, from the north and took up their abode, first on the Umfolosi and Umbluthu rivers, and then farther south as far as the Umzimkulu, and farther east in the vicinity of Delagoa Bay. Not to go back beyond a somewhat distant period of time, but still in the sixteenth century, a small tribe under the chieftain Usenzagakona, son of Jama, and father of Chaka. Chaka, born in 1877, was a chieftain of great enterprise in his way, of great ambition, military prowess, and success. Starting out at the head of a small army, he subdued and assimilated, after tribe and incorporated all into his own, till he had mastered a considerable territory and made himself feared by the Dutch and English at the Cape, the tribes on the west, and other far-distant tribes on the north and east. Finally, in 1828, he was assassinated by the jealousy of two brothers, one of whom,
Dingan, took his place in power. During Dingan's reign, or rather at the close of it, which came through a war with the Boers, as a result of the war with the English, he became a British subject; he married a Dutch woman, and died of his wounds in the wilderness, his kingdom was divided, in 1840, and the southern half of it, called the Natal District, came into the hands of the Dutch, and then, in 1842, into the hands of the English, and so became a British colony; while the northern half, which has since been gone by the name of Zululand, came under the rule of Umbandé, brother of the two previous kings. Umbandé continued nominally at the head of affairs till the day of his death, in October, 1872, when his son Ketchwayo was installed king. He held office till the English-Zulu war in 1879, when he was taken captive and carried to Cape Town and thence to England. The British Government, now professing to have a kind of moral protection and authority over the Zulu realm, divided it into thirteen sections, and over each appointed a kind of petty chief or kinglet, the result of which was confusion, strife, and anarchy. Then Ketchwayo was carried back to Zululand and reinstated king, January 31, 1883, over at least a part of his former realm, but soon died, some say of a disease, some of grief and despair, while others think he was poisoned by his late antagonist.

The division of the country into sections under native chiefs continued for some years in Zululand proper. But in 1897 Zululand was made a part of Natal, with the Governor of Natal in control, and with Zululand represented in the legislative body of the Province. The negro population of Natal, including Zululand and the recently annexed districts of Vryheid and Utrecht, in 1901 amounted to 836,912 souls.

The Zulu is a man of many marked and ready parts, self-respecting, sometimes haughty, of a martial spirit, quick-witted, a studious and keen observer of men and things, and, within all lines of his own observation and experience, a good judge, a good logician, a good reader of character, and a good narrator of facts and events. One of them, having heard his missionary tell of the great power and goodness of God, how He hates sin, and how the race was beguiled to their ruin through the temptations of the adversary, promptly challenged his teacher with the sharp inquiry, "But why didn't God kill the devil at once and stop all that mischief in the beginning?" Another Zulu, being once asked by his missionary, "What is the best color for man?" replied, "For you Americans no doubt white is the best, but for us Africans there is nothing better than a good, clear, shiny black, with just a little of the red in it." The famous Zulu chief Pakade, who used to come now and then into sharp collision with the English, was once visited by Bishop Colenso, who tried to interest him in his translation of the Lord's Prayer into Zulu; but right in the midst of the Bishop's laborious effort, he was suddenly pulled up by his pupil's breaking in upon him with the remark, "Yes, yes, that is all very good, but how do you make gunpowder?" The habits, and pursuits of the Zulus are all in accord with what should be looked for among a people living for ages in a tropical climate and without refining, quickening influences.

In their untutored condition the woman's dress is a half cow-hide, tanned soft, dyed black, bound about the loins, and coming down about to the knees. It is put on by men, women, and children, and torn, as it will be in time, she goes to one bush and tears off the bark, and to another for a thorn, punches a hole here, another there, puts in the string and sews up the rent. The man's wardrobe is only about a fourth part as much as that of the woman, and the little there is generally from the fur of wild beasts; while the children are left to go for some years as on the day they were born. But all—men, women, and children, young men and maidens—furnish ornaments, such as beads and brass bangles or charms, of wood or bark, bones, horns, hoofs, teeth, and claws of birds and beasts. The distinguishing mark of the married man is a head smooth shaved, all but a ring of blackened hair around the crown; while the married woman's head is also smooth shaved, all but a tuft of hair on the crown colored with red ochre. Under pure native rule the Zulu could never marry or build himself a house or kraal till he had served his king as a soldier for a term of years, got his discharge, and with his discharge a piece of ground on which to build. Nothing is supposed to belong to both, the appointment, while others think he was poisoned by his late antagonist.

The house is built chiefly by the women, the enclosures by the men. In times of war the men are engaged in war. In times of peace they are expected to prepare the fields, if need be, for the pick, and either fence them or watch them against cattle and wild beasts. The men take the houses for their wives' dresses; they and the boys herd the cattle and milk the cows; they hunt, smoke, bask in the sun, drink beer, make offerings to their divinities, the shades of the dead, and institute interminable suits at law. In their heathen state the women keep the house, so far as it is kept at all, and are responsible for anything that goes on in it. They, or the men, must carry the burdens, and cultivate the fields. With their baskets and heavy, clumsy picks they do the digging, planting, harvesting—the work of the plow, harrow, cart, ox, and horse. When the corn or other grain is gathered and dry, they do the thrashing, but the grain must be gathered, and ground, or the grain must go to the market ten or twenty miles away, they must carry it there in baskets on their heads. The matrimonial affairs of the Zulus are based upon a belief in polygamy and correspond
to their faith. Native law prescribes no limit to the number of wives a man may have, provided he can find them, and has the means—five or ten head of cattle each—with which to obtain them.

The Zulu who would woo has great confidence in the efficacy of winning over a series of certain medicinal preparations. The more common way would be to prepare a delicate powder and send it by the hand of some unsuspected person, to be given in a pinch of snuff or sprinkled upon the person whose will is to be changed or affects him. On the wedding day, the bridegroom, when Leading at hand, the parents and friends of the bride, all in their best attire, make up a party and escort her to the home of the bridegroom. Arriving there, they begin to sing and dance; nor is it long before the young men of the kraal join them. At length the master of the kraals slants an ox, and all give up dancing and singing for feasting and carousing. And so, after an exchange of presents and other exercises of a joyous character, the man and woman become husband and wife by the manner of a Zulu marriage.

Missionary Work for Zulus: The first missionary enterprise among the Zulus was that of Capt. Allen Gardiner, who afterward lost his life in an attempt to establish a mission in Patagonia. He went to Zululand in 1835 and obtained permission from the Zulu chief Dingan to establish a mission near Port Natal (now Durban). He then induced the CMS to send the Rev. Mr. Owen to Natal. Mr. Owen established himself at Dingan’s kraal in 1847, but the outbreak of a war of reprisals between the Bats and Boers forced him to retire. Work has been carried on by the Church of England diocesan initiative among the Zulus ever since, aided by the SPG to some extent. The SPG now has in Natal 16 mission stations, with 8,585 professed Christians, of whom 2,714 are communicants. It also has in Zululand proper 5 stations, with 4,982 professed Christians, of whom 1,522 are communicants.

The ABCFM was urged by Dr. Phillips of the LMS as early as 1833 to open a mission to the Zulus. It sent out six missionaries, Rev. Messrs. Allen, Grout, Champneys, and Dr. Hermannsburg, and Rev. Messrs. Lindley, Venable and Wilson, M.D., for the Matabili. The two parties reached Cape Town in 1835, and the party for Matabililand established themselves in 1836 at Mosiga Valley, about 100 miles west of the port where Pretoria was afterward built. Within six months, however, an irruption of Boers destroyed the people of Mosiga Valley and compelled the missionaries to withdraw. The missionaries made their way to the coast and joined their colleagues, who meanwhile had become established near Port Natal with the consent of the chief, Dingan. In 1838, however, the war between Dingan and the Boers broke up the mission and drove the missionaries to less troubled regions. Altho work was resumed when the country became more quiet, the Board decided in 1844 to close the mission, and was only prevented from doing so by the conviction of its missionaries on the ground, led by Dr. Adams and supported by official and clerical opinion at Cape Town, that this would be a mistake.

In 1857 the mission was re-established. Five stations of Amanzimtot, Ifume and Inanda in Natal were permanently occupied. It was only about this time, ten

3 years after the work began, that the first Zulu convert, an old woman, was baptised. Connected with the ABCFM mission are now (1903) 23 self-supporting churches of Zulus, with 14,000 professed Christians, of whom 3,256 are communicants. These churches support their own pastors and carry on home missionary work at their own expense.

The WMS was the next to establish a mission among the Zulus. Rev. Mr. Archbell of that Society came from Kaffraria into Natal in 1841. The mission grew and prospered until, with changed conditions, the whole work was passed over in 1852 to the South African Wesleyan Conference as an indigenous church. There are at hand no data for separately enumerating the Zulu members among the 95,000 members who form the Wesleyans of South Africa to-day.

The Norwegian Missionary Society of Schreuder established a station near Verulam in Natal in the year 1845. At present this Society has three stations and 988 professed Christians, of whom 523 are communicants.

The Berlin Evangelical Missionary Society commenced its work in Natal in 1853. Posselt and Dohne being its first missionaries. Mr. Posselt founded the station of Emmaus, near the sources of the Tugela River, and Christianenburg, near Pinetown, ten miles west of Durban. The mission afterward opened stations in the northern part of Zululand, but were driven out, and changed the line of their expansion to the Orange Free State and the Transvaal. The society has now four stations in Natal, with 2,752 professed Christians and 1,444 communicants. It has in the Transvaal and the Orange River Colony 38 stations, with 28,704 professed Christians, of whom 13,804 are communicants.

The Hermannsburg Missionary Society opened a station at Hermannsburg in Natal in 1854 and afterward extended its work into Zululand and westward to the Transvaal Marico region, among the Bechuana. This Society now has in Natal and Zululand 15 stations, with 3,709 professed Christians, of whom 2,092 are communicants.

The Church of Scotland began its permanent establishment in Natal in 1857, taking up the work at Pietermaritzburg and Empolweni commenced by the Rev. Mr. Allison, who had been laboring under the WMS. The UFS has now in Natal 4 stations, with a full complement of workers, both native and foreign, and with 2,241 communicant church members.

The Swedish Church Missionary Society has two stations in Natal and Zululand, where it has gathered about 350 communicants.

The Boers have often been charged in mass with hostility to mission work among the negroes. It is a case of judging the mass by the conduct of some. As a body they are working earnestly for the evangelization of the Zulus who live with and around them. They do this not by organized societies, but by individuals, families, committees, ministers, and laymen. Quite a number of Zulus have been formed into churches in connection with the Dutch Church, but statistics on this point are not at hand.

Zambesi Industrial Mission (1892); Headquarters: 6 Colonial Avenue, Minories, London, England; Secretary: Mr. Robert Caldwell.

### APPENDIX II

#### CHRONOLOGICAL TABLE OF THE EXTENSION OF PROTESTANT MISSIONS FROM THE TIME OF CAREY

Note.—There is not a little confusion of dates in the records. It is not always practicable to distinguish between the date when a mission was decided upon, and that when the missionaries started, or actually commenced the work. The object of this table is not so much scientific accuracy as the attainment of a bird's-eye perspective of the stages by which the missionary enterprise of the Church has reached out to cover the earth. Extension from one district to another in the same country is not noted unless some special feature seems to call for mention.

APPENDIX IV

MISSIONARIES WHO HAVE MADE TRANSLATIONS OR REVISIONS OF HOLY SCRIPTURE

Non-Christian nations will one day know their peculiar indebtedness to missionaries whose laborious scholarship brought the Holy Scriptures within their reach. It has seemed worth while to gather from the records of the 19th century and to preserve from oblivion the names of such missionaries of all nations. We have now to admit, however, that difficulties of compilation mark the following list as merely tentative. We give it in hope that it may serve as a foundation on which a permanent and accurate record will be built up.

APPENDIX V

STATISTICAL TABLES

INTRODUCTORY NOTE

All Christendom is home to the Christian. To him the non-Christian lands, alone, are foreign lands. The statistics of "foreign missions" given in the following tables, therefore, relate to Missionary work in non-Christian lands. Exceptions to this rule are made, however, in the case of, (1) Protestant Missions in Roman Catholic countries whose statistics are reported by some Societies in the tables of their foreign Mission work; and (2) of Missions in those parts of North America and in South America where pagans still form an important element in the population. Consistency would require the exclusion from these tables of statistics of Christian work in lands that have become Christianized by colonization or otherwise, and maintain their own Missionary Societies. Such are the Protestant islands of the West Indies and parts of South Africa, Australasia, etc., where local Christianity is thoroughly organized and established. But this consistency has not been possible, because some Societies do not separate statistics of Missionary work among East Indian coolies or other pagans from those of the regular ministrations to the local Churches under settled pastors.

The plan of this work has required us to exclude from the tables of statistics work for European soldiers, colonists or seamen. It has also seemed necessary in order to avoid reduplication of statistics to omit mention of purely auxiliary Societies. The column "Professed Christians" is intended to show the whole number publicly known as Christians, whether communicants, probationers, or children of Christian parents. This intention has been very imperfectly executed because many societies continue to give in reports the number of communicants only, just as was the usage before the rise on the Mission field of families and even communities which have never been pagans.

The statistics given are intended to represent the condition of the Foreign Missions on January 1, 1903, except in the case of Societies whose names are followed by an asterisk (*). The figures in such cases show the status of 1900, and for them we are under obligation to Beach's Atlas of Protestant Missions.

Notwithstanding close application and exhausting labor, we find ourselves forced to crave indulgence for the faults of the tables. Such tables can be no more than relatively exact, and they require so much time in compilation that they are already out of date before publication.

A. THE OPERATIONS OF PROTESTANT MISSIONARY SOCIETIES IN NON-CHRISTIAN LANDS.

*Note.—These statistics do not include superintendents, colporteurs or Bible Women who are supported by local Missions or Auxiliaries.*
**Appendix V**

**THE ENCYCLOPEDIA OF MISSIONS**

**C. PROTESTANT MISSIONS TO THE JEWS** (by Rev. Louis Meyer, Hopkinton, Ia.).

Statistics brought down to March, 1904.

Note.—The CMS, the CA, the FN, the ZBM, the British Syrian Schools, the Swedish Missionary Union, the Swedish Evangelical National Society, and some others of the Foreign Missionary Societies come in contact with Jews and labor for them in the course of their general work, of which the statistics are reported in Tables A and B. Table "C" contains work that is not reported in the other tables. The heading "schools" includes Sabbath Schools and all of distinctly Christian influence.

† Auxiliary to the London Jews Societies.

Note.—The denominational relation of the above-named Jewish Missions is shown as follows: A—Anglican; B—Baptist; E—Episcopal; F—French Protestant; L—Lutheran; M—Methodist; P—Presbyterian; R—Reformed Presbyterian; U—Undenominational.
## APPENDIX VI

### ROMAN CATHOLIC FOREIGN MISSIONS

#### A.—THE MISSIONS

The following statistics, borrowed from the "Annals of the Propagation of the Faith," were compiled from the Directory of Missions issued by the Congregation of the Propagation (Missiones Catholicae: Rome, 1901), supplemented by the publications of the Society for the Propagation of the Faith.

This list includes the greater part of the mission field of the Roman Catholic Church; but it is not claimed that the figures are exact. In some cases they are only approximative.

</table>

**Notes:**
- The table lists various religious orders and societies, along with their founding years, headquarters, and mission fields.
- The missions listed include locations such as Benin, Dahomey, Gold Coast, Ivory Coast, United States, Egypt, Central Africa, and various countries in Asia and Africa.
- The table provides a brief overview of the mission work undertaken by these religious orders, spanning a wide range of regions globally.
Auxiliaries to the Missionary Priests: The chief auxiliaries in mission works are communities of Brothers and Sisters. Not to mention the lay-brothers accompanying Religious Orders of Priests nor the catechists and other missionary helpers, in almost every quarter of the globe where the priest has planted the faith, Brothers and Sisters have followed to help sustain it. These are represented in various countries approximately as follows:

<table>
<thead>
<tr>
<th>Number of Orders</th>
<th>Number of Orders</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brothers.</td>

It is impossible to furnish satisfactory figures as to the whole number of missionaries, because of the different views people may take as to what is understood by missionary countries and by missionaries. In the popular sense, those are missionaries who have gone to distant regions, and especially to heathen countries for the purpose of spreading the faith among unbelievers.

Taking these distinctions into consideration we may safely assert that there are at least 15,000 priests and others dedicated to the religious life, 5,000 teaching brothers, and 45,000 sisters laboring as missionaries, not to speak of the priests, brothers and sisters native to the regions where they work, catechists and others who make up the personnel of a mission, and the laborers among the Oriental Rites. Probably the estimate is much too small, but we may conclude that there are in the field about 65,000 missionaries of the Roman Catholic Church.
